

JINGZHANG OPEN MARKET LINE

REAL PROBLEM • CONTROLLED PROTOTYPE • LIMITED VALIDATION • PUBLIC REVIEW

One-sentence proposition

SHOP POSTING • HUMAN SCREEN • PROTOTYPE ENTRY • ANNUAL LEDGER

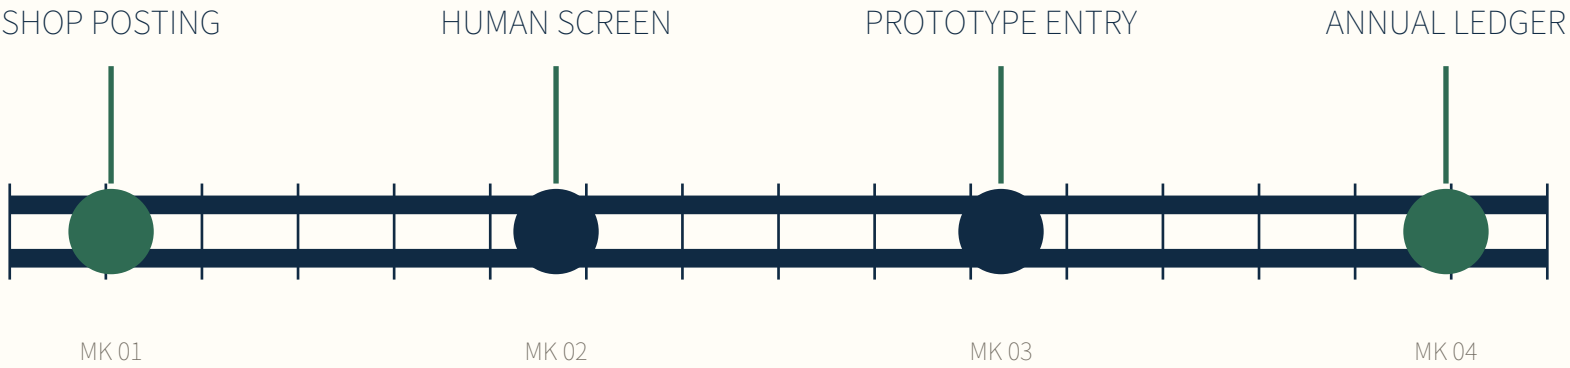

- 01

Statutory planning, engineering and other professional conclusions require officially confirmed boundaries and professional source materials.
- 02

The overall site and all three key areas retain provisional geometry supplied by the project repository.
- 03

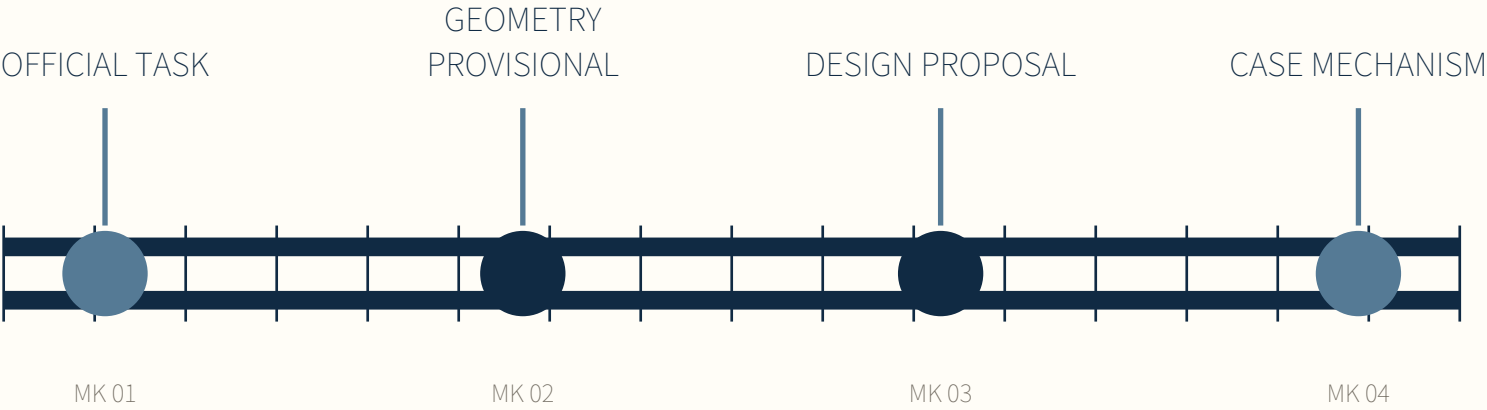

Apparent precision in a drawing is never presented as a legal redline.
- 04

Haidian’ s economic census and 2025 statistical bulletin provide commercial and entrepreneurial context only; they do not establish parcels, merchant counts or development controls.

Evidence and boundary

OFFICIAL TASK • PROVISIONAL GEOMETRY • DESIGN PROPOSAL • CASE MECHANISM

01 Apparent precision in a drawing is never presented as a legal redline.

02 Haidian’ s economic census and 2025 statistical bulletin provide commercial and entrepreneurial context only; they do not establish parcels, merchant counts or development controls.

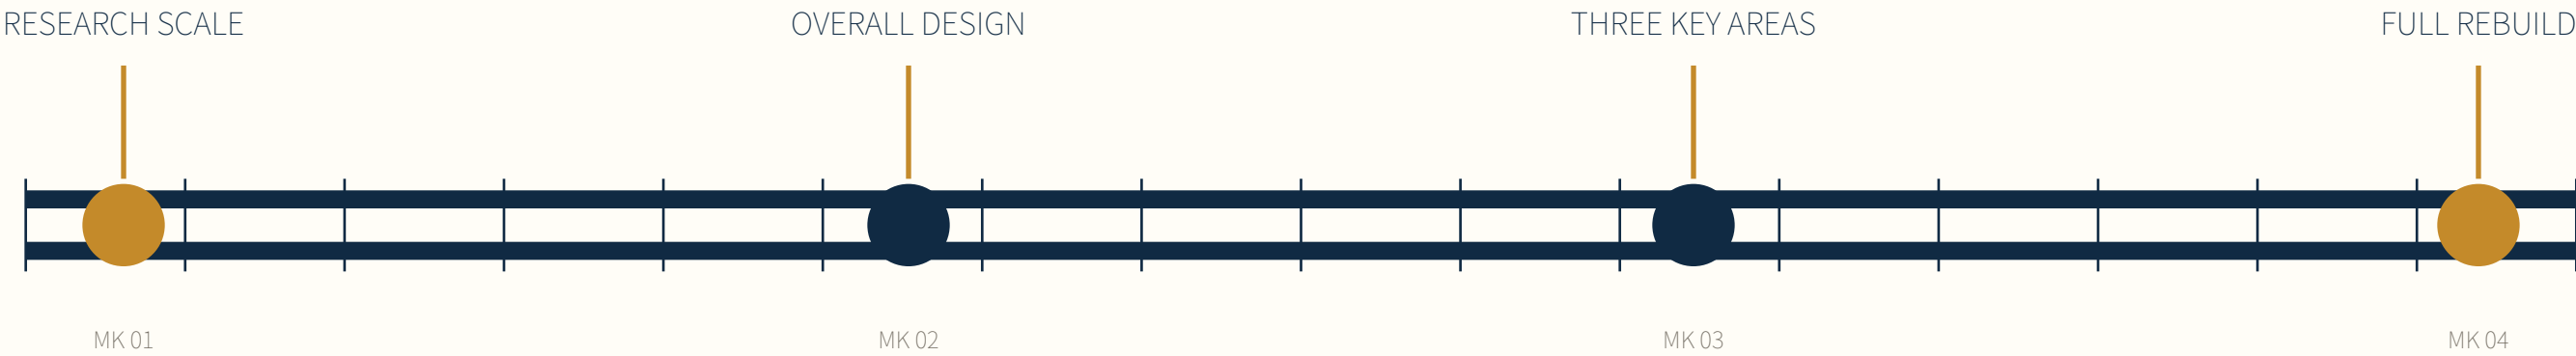

03 Evidence is separated into four layers: official tasks and standards define what must be answered; provisional area polygons in the project repository provide the current reproducible frame; submitted land use,

04 The Dazhongsi polygon is not shifted.

Three scope levels

RESEARCH SCALE • OVERALL DESIGN • THREE KEY AREAS • FULL REBUILD

01 A street-level problem enters through a staffed need desk, receives legal, standards and talent support through the service wing, proceeds to a controlled prototype, is publicly explained in the co-creation market and receives a small,

02 Outcomes return to an annual public ledger, including failed prototypes.

01 Any scale, revenue or policy commitment that cannot be recomputed from submitted evidence remains unknown.

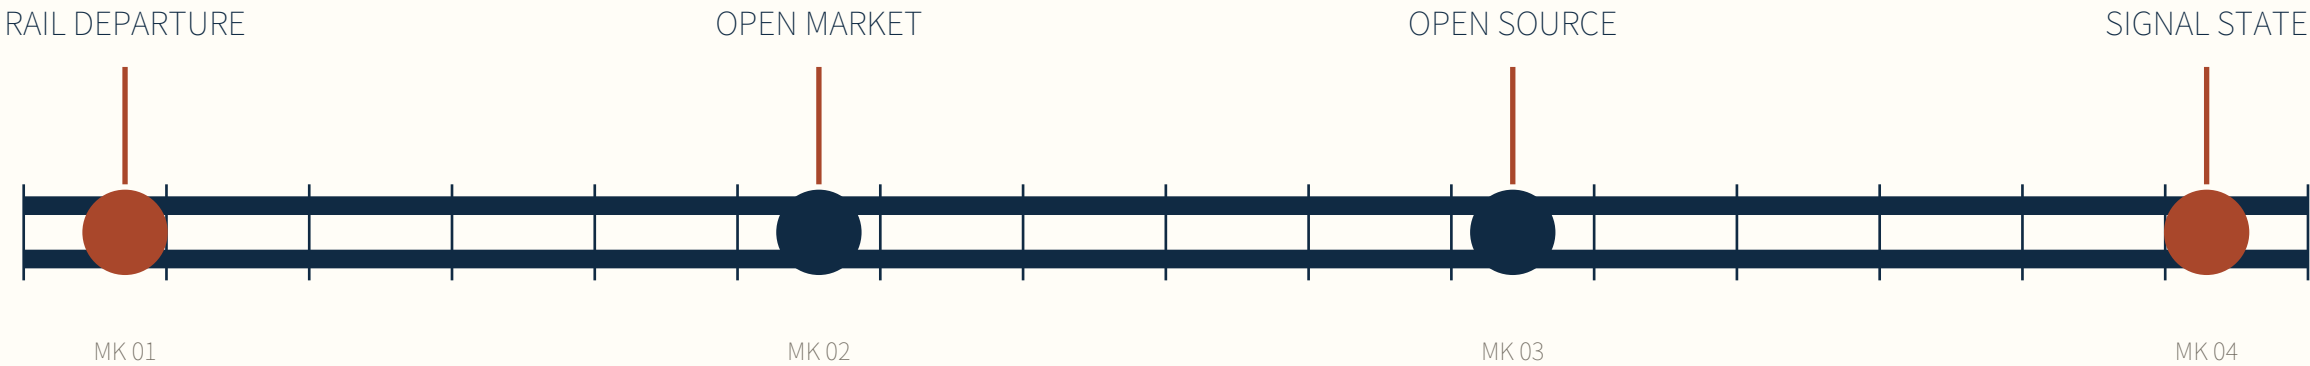

02 At the coordinated-research scale, the proposal asks how an innovation mechanism can connect Haidian’ s industry, talent and everyday urban life.

Identity and open gate

RAIL DEPARTURE • OPEN MARKET • OPEN SOURCE • SIGNAL STATE

05

RAIL DEPARTURE • OPEN MARKET • OPEN SOURCE • SIGNAL STATE

01 No subsidy value, eligibility promise or policy brand is copied.

02 The mechanisms become four local steps: public problem posting, controlled prototyping, limited validation and public review.

Two-way innovation market

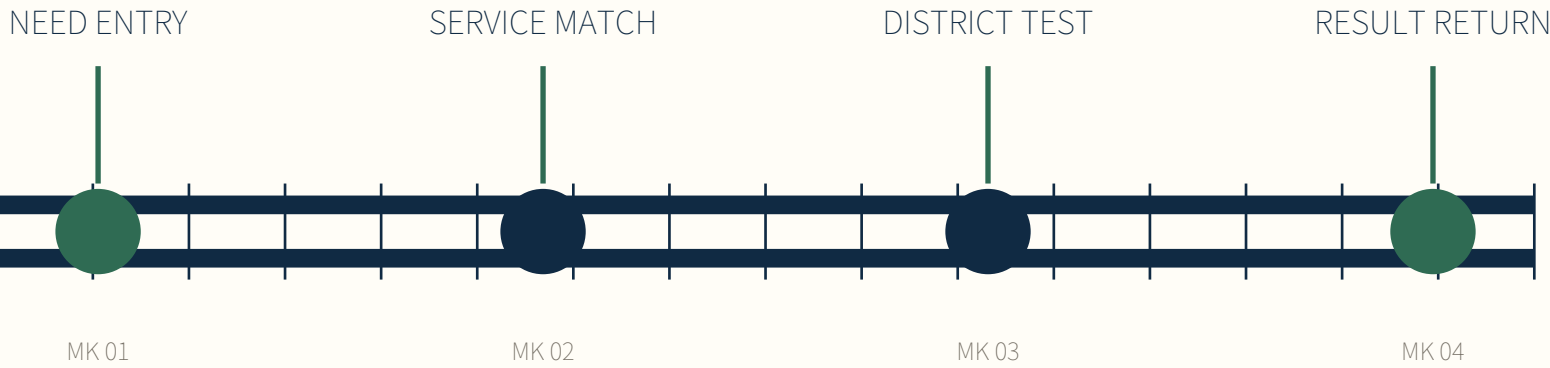

NEED ENTRY • SERVICE MATCH • DISTRICT TEST • RESULT RETURN

01 The identity uses parallel rails to form an open gate shaped by the Chinese character 开.

02 It combines railway departure, an open market and an open-source city.

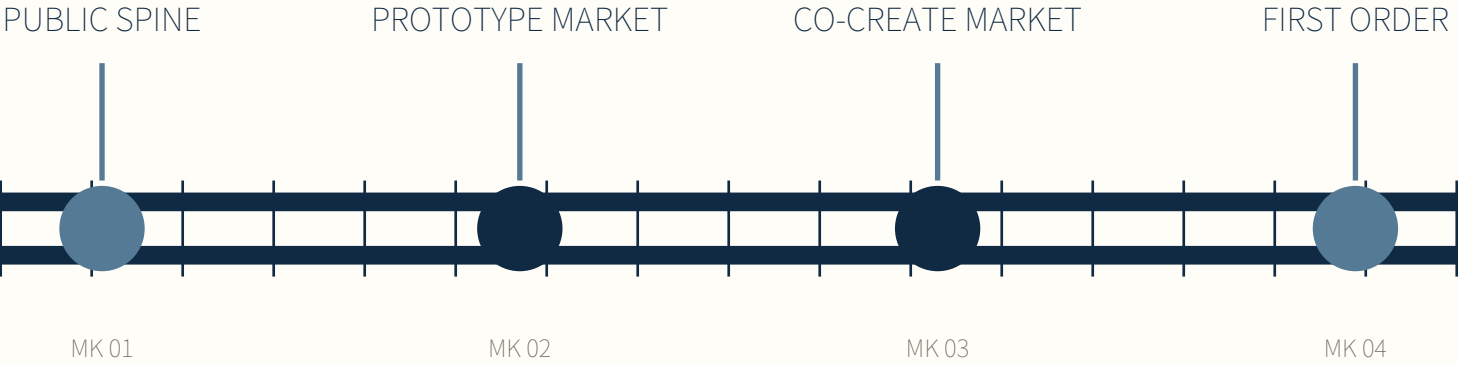

03 Paper cream represents the public ledger, ink navy represents civic order, and rust red marks problems and action.

04 Signal green and amber are limited to “continue” and “review required” states.

Spine, markets and wings

PUBLIC SPINE • PROTOTYPE MARKET • CO-CREATE MARKET • FIRST ORDER

01 The three markets are the Prototyping Market at Zhongzhiyuan, the Co-creation Market at AI Origin Community and the First-order Market at Dazhongsi, meaning a small-scale validation district facing a real market.

02 The two wings connect Zhongguancun technology services and Xiaoyuehe scenario feedback.

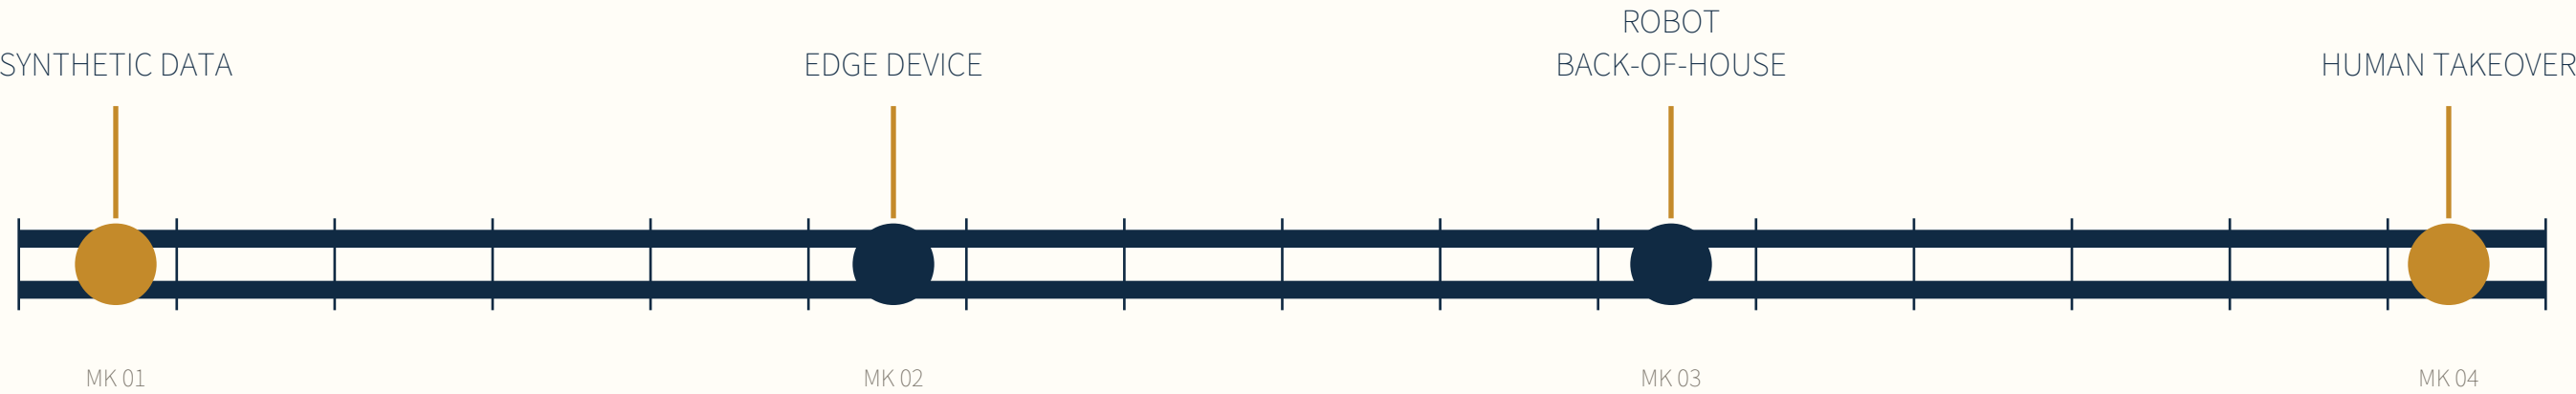

03 The three scales form one operational chain.

04 A street-level problem enters through a staffed need desk, receives legal, standards and talent support through the service wing, proceeds to a controlled prototype, is publicly explained in the co-creation market and receives a small,

Zhongzhiyuan prototyping

SYNTHETIC DATA • EDGE DEVICE • BACK-OF-HOUSE ROBOT • HUMAN TAKEOVER

01 The Zhongzhiyuan Prototyping Market hosts synthetic-data work, edge devices, embodied back-of-house trials and human takeover tests.

02 Industry staff define the task, success conditions and prohibited zone before a trial; a person retains the stop control during testing; applicability limits and failure reasons are published afterward.

01 It is not an automation showcase but a controlled test space that exposes safety, standards and operational-maintenance problems while retaining human intervention.

02 The AI Origin Co-creation Market combines an enterprise clinic, staffed merchant need desk, IP and data clinic, and explanation workshops for young people and researchers.

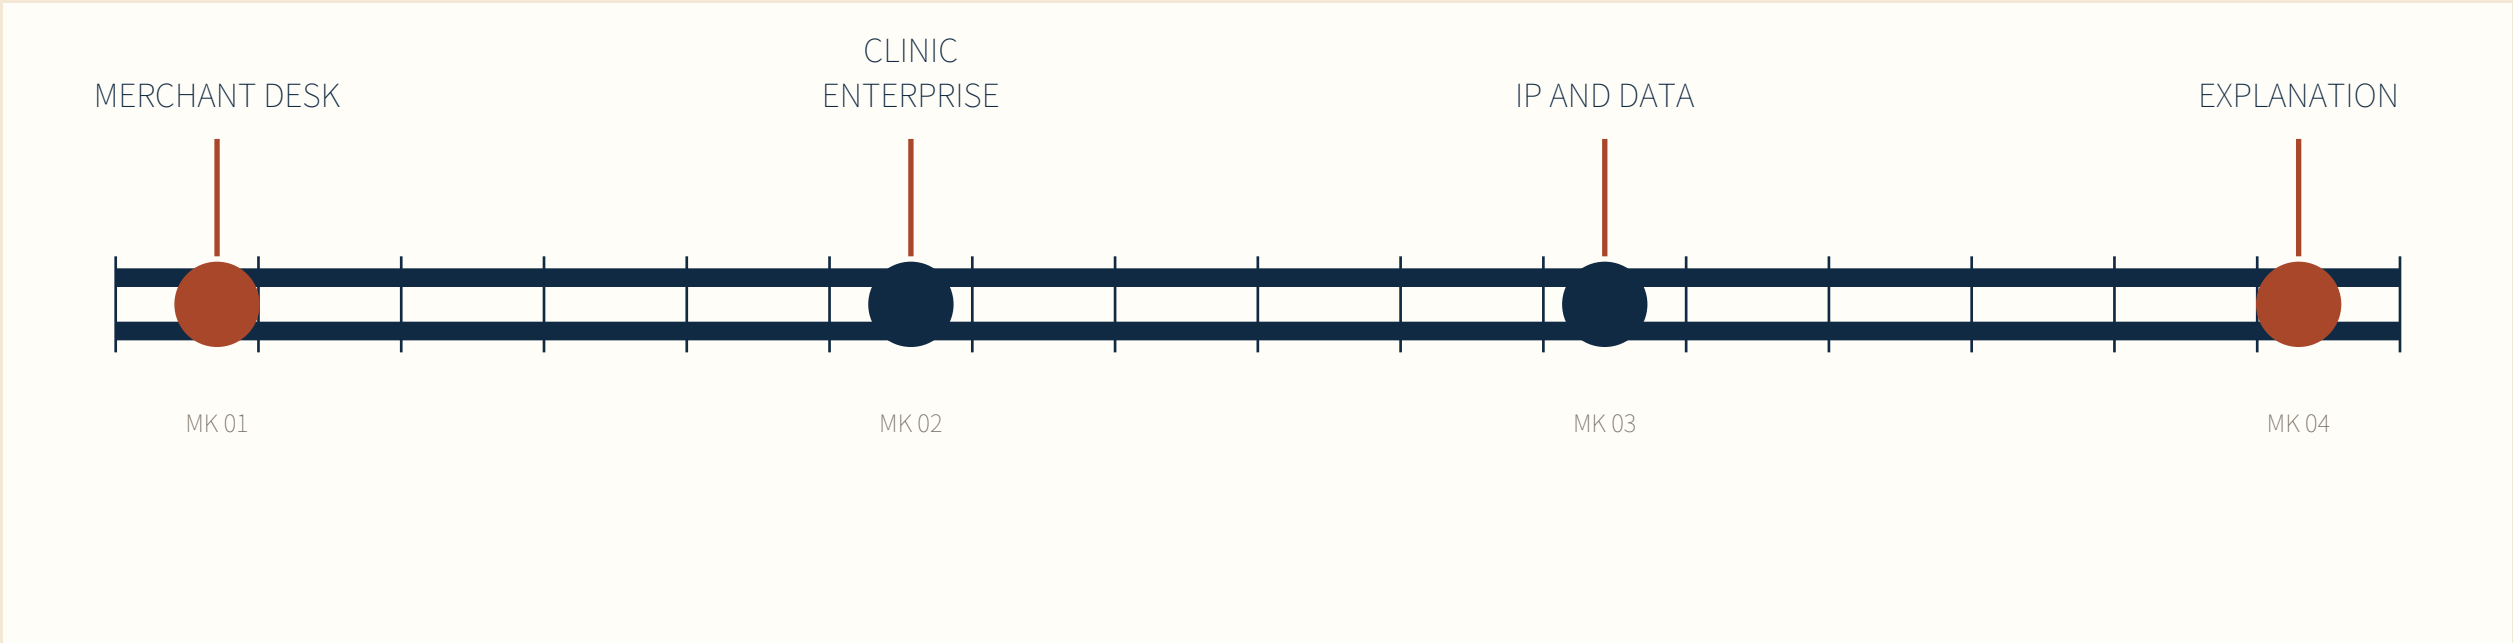

AI Origin co-creation

MERCHANT DESK • ENTERPRISE CLINIC • IP AND DATA • EXPLANATION

09

MERCHANT DESK • ENTERPRISE CLINIC • IP AND DATA • EXPLANATION

- 01 It is not an automation showcase but a controlled test space that exposes safety, standards and operational-maintenance problems while retaining human intervention.
- 02 The AI Origin Co-creation Market combines an enterprise clinic, staffed merchant need desk, IP and data clinic, and explanation workshops for young people and researchers.

Dazhongsi first order

LIMITED TEST • MULTILINGUAL SUPPORT • STAFFED APPEAL • LOCATION DISPUTE

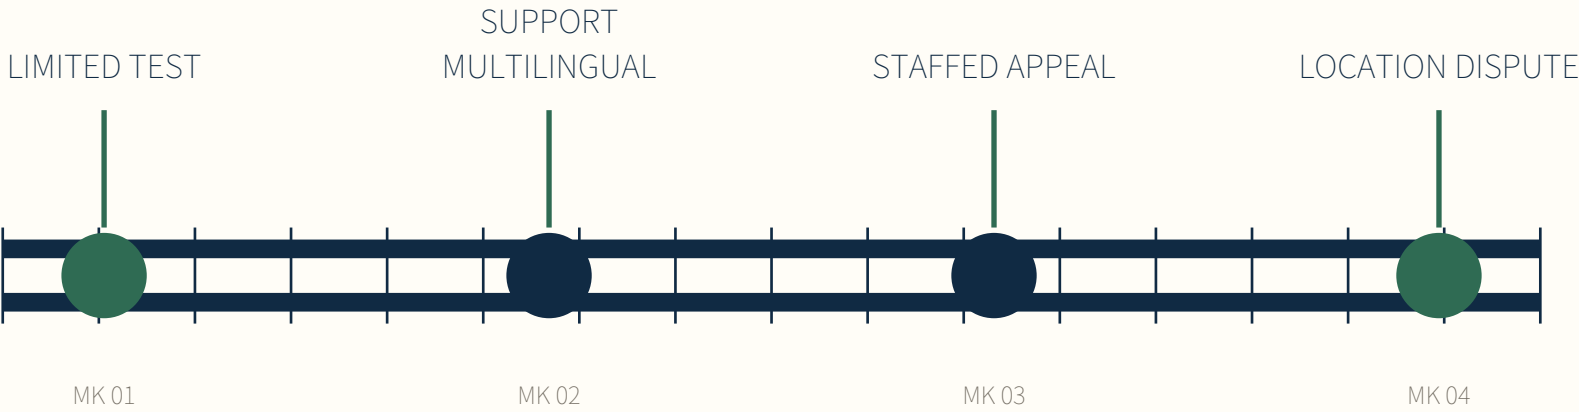

- 01

Teams must explain in plain language what a prototype does, what it does not do, which data it uses and who can stop it.
- 02

The Dazhongsi First-order Market hosts limited market validation, multilingual assistance, public review and a staffed appeal window.
- 03

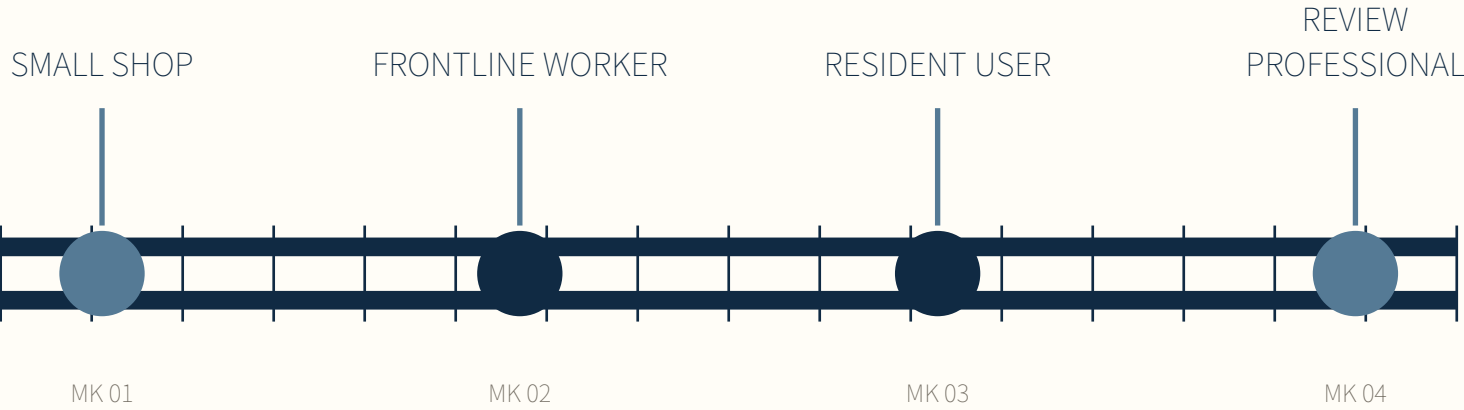

Because the provisional key-area polygon and Dazhongsi Station have an approximately 2.26 km public location discrepancy, this proposal neither relocates the polygon nor infers a station TOD relationship.
- 04

The Zhongzhiyuan Prototyping Market hosts synthetic-data work, edge devices, embodied back-of-house trials and human takeover tests.

Seven personas

SMALL SHOP • FRONTLINE WORKER • RESIDENT USER • PROFESSIONAL REVIEW

01 Every scenario provides human decision authority, refusal, immediate stop, data deletion and exit.

02 Low-speed robot delivery is allowed only with physical separation, low speed, staffed takeover and permits.

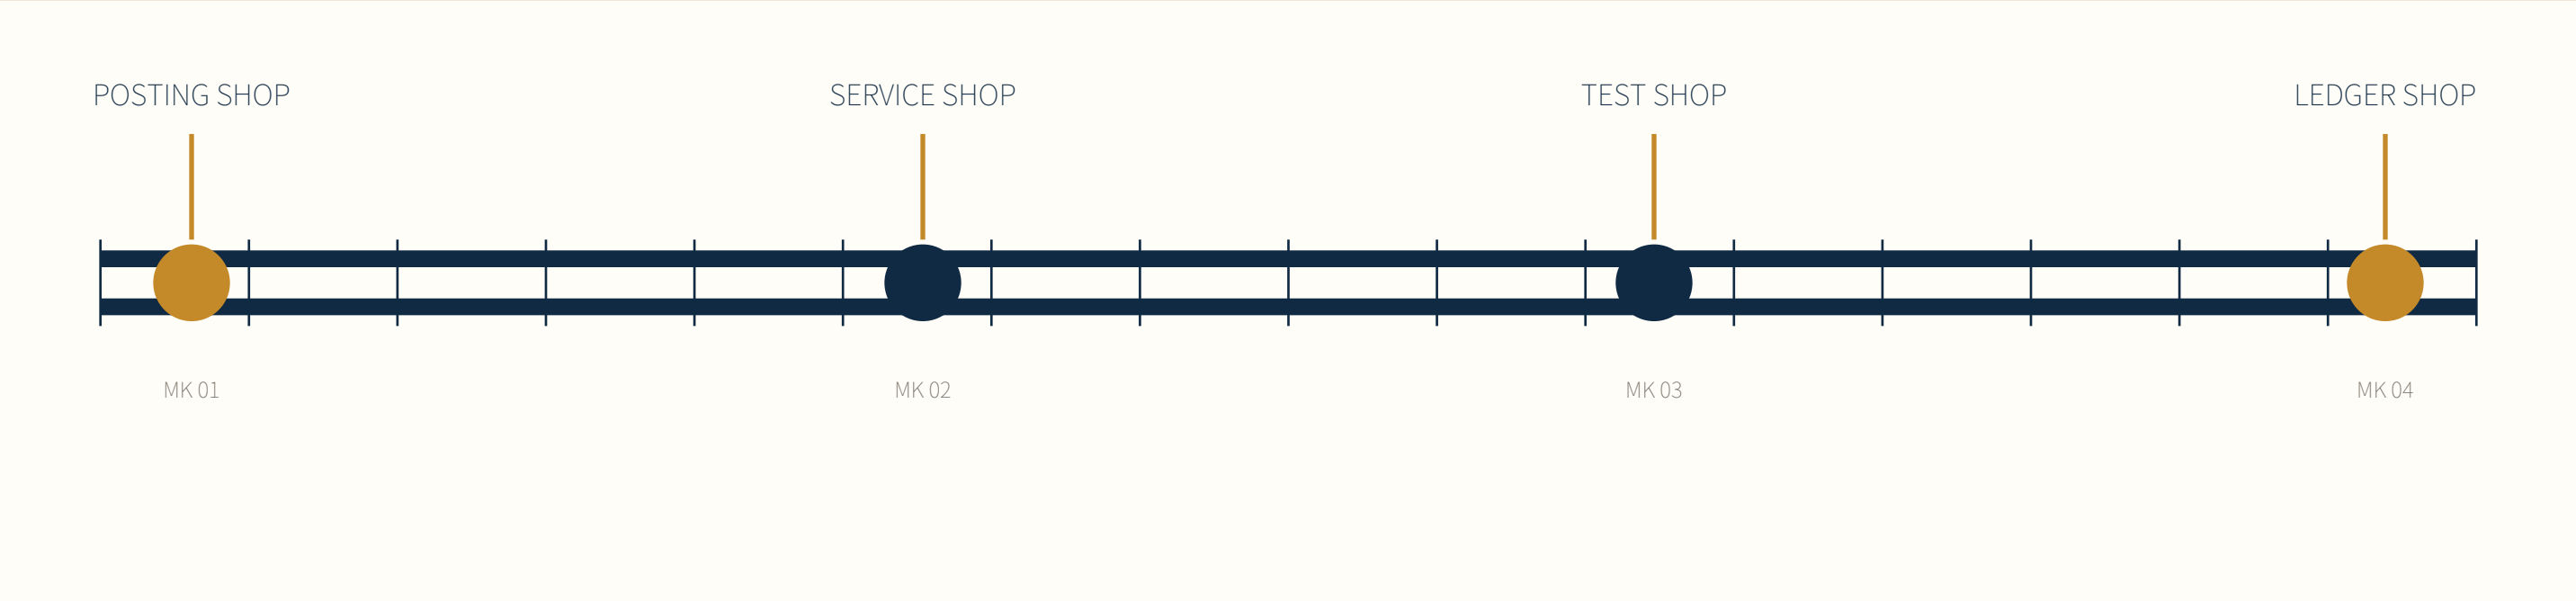

03 Four standard scenarios registered in the project repository connect enterprise services, accessible walking diagnosis, low-speed back-of-house logistics and Jingzhang cultural guidance.

04 They are service-prototype entry points, never authorization for automated decisions.

Twelve shops

POSTING SHOP • SERVICE SHOP • TEST SHOP • LEDGER SHOP

01 Four standard scenarios registered in the project repository connect enterprise services, accessible walking diagnosis, low-speed back-of-house logistics and Jingzhang cultural guidance.

02 They are service-prototype entry points, never authorization for automated decisions.

01 Seven groups jointly form the users and evaluators of the pilot scenarios: small shops and sole traders post testable problems; AI SMEs and developers bring prototypes; frontline service workers judge whether a workflow is

02 A persona is never a personal scoring label.

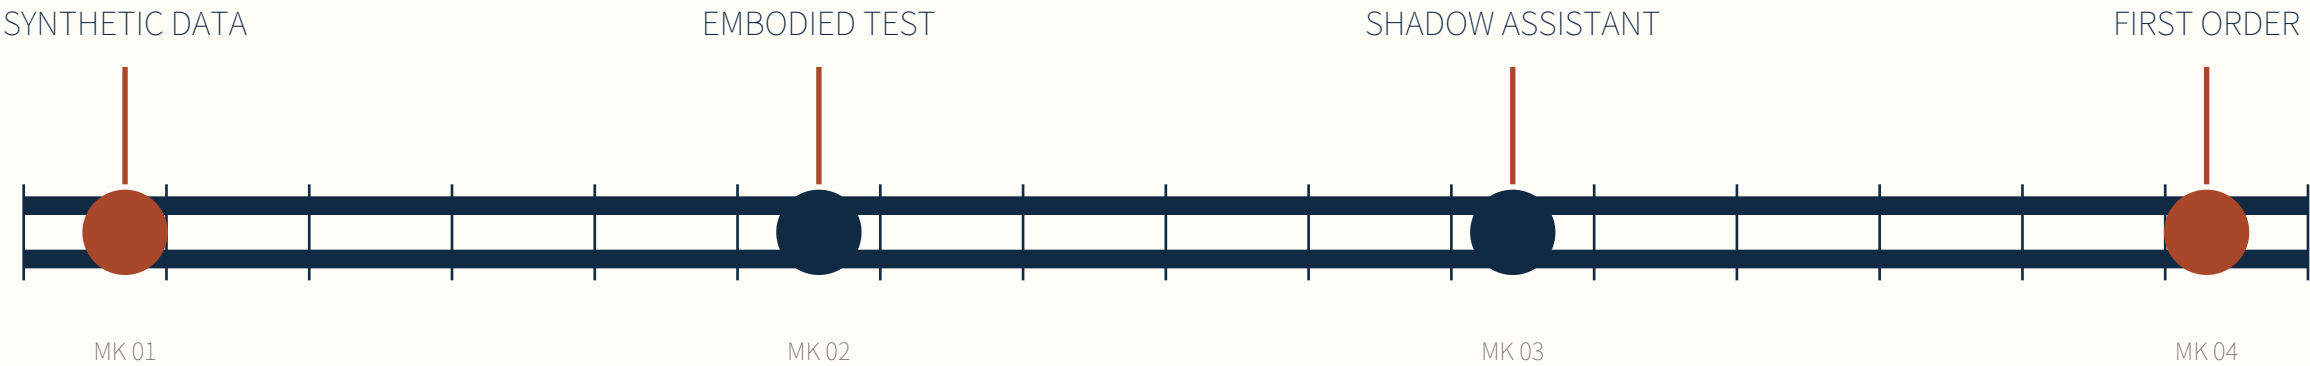

Industry validation

SYNTHETIC DATA • EMBODIED TEST • SHADOW ASSISTANT • FIRST ORDER

13

SYNTHETIC DATA • EMBODIED TEST • SHADOW ASSISTANT • FIRST ORDER

- 01 Seven groups jointly form the users and evaluators of the pilot scenarios: small shops and sole traders post testable problems; AI SMEs and developers bring prototypes; frontline service workers judge whether a workflow is
- 02 A persona is never a personal scoring label.

Human rights and governance

HUMAN DECISION • REFUSAL • IMMEDIATE STOP • DELETE AND EXIT

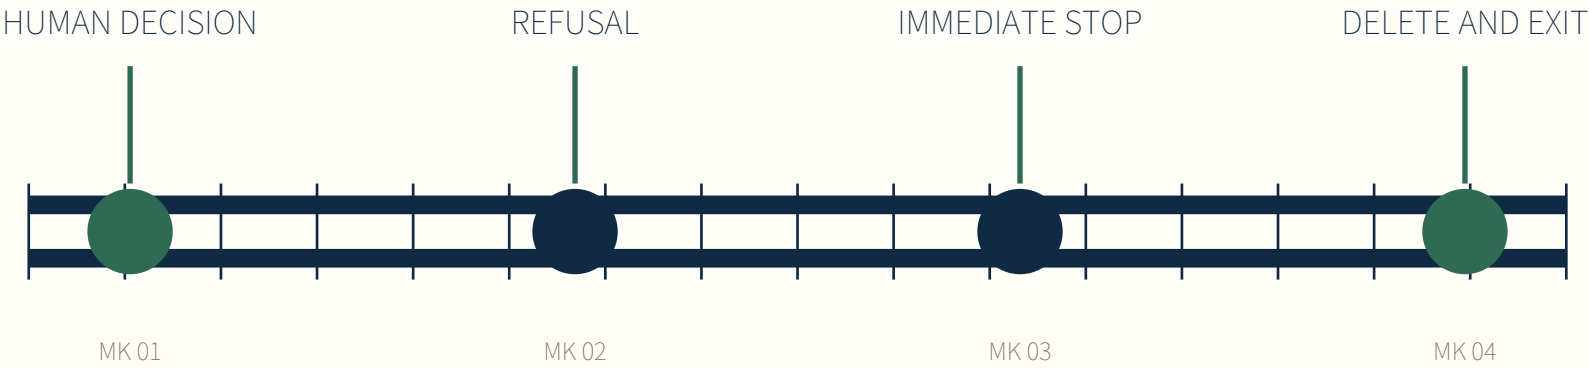

- 01

The twelve shops are need posting, synthetic-data laboratory, accessible signage, multilingual service, embodied back-of-house testing, workflow shadow assistant, inventory assistance, enterprise-service clinic, IP and
- 02

Five are explicitly industry-validation scenarios: synthetic data, embodied back-of-house, workflow shadow, inventory assistance and first-order testing.
- 03

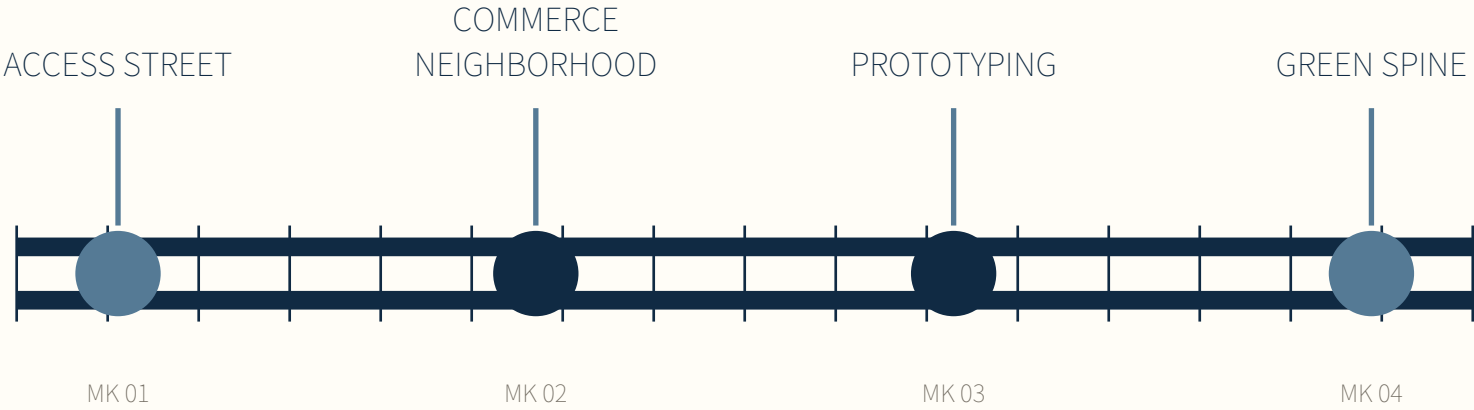

Every scenario provides human decision authority, refusal, immediate stop, data deletion and exit.
- 04

Low-speed robot delivery is allowed only with physical separation, low speed, staffed takeover and permits.

Land-use structure

ACCESS STREET • NEIGHBORHOOD COMMERCE • PROTOTYPING • GREEN SPINE

01 Each prototype excludes real merchant mapping, precise addresses and uncleared imagery.

02 Ownership, accessibility, fire safety, structural load, energy, utilities and heritage constraints must be professionally checked before siting.

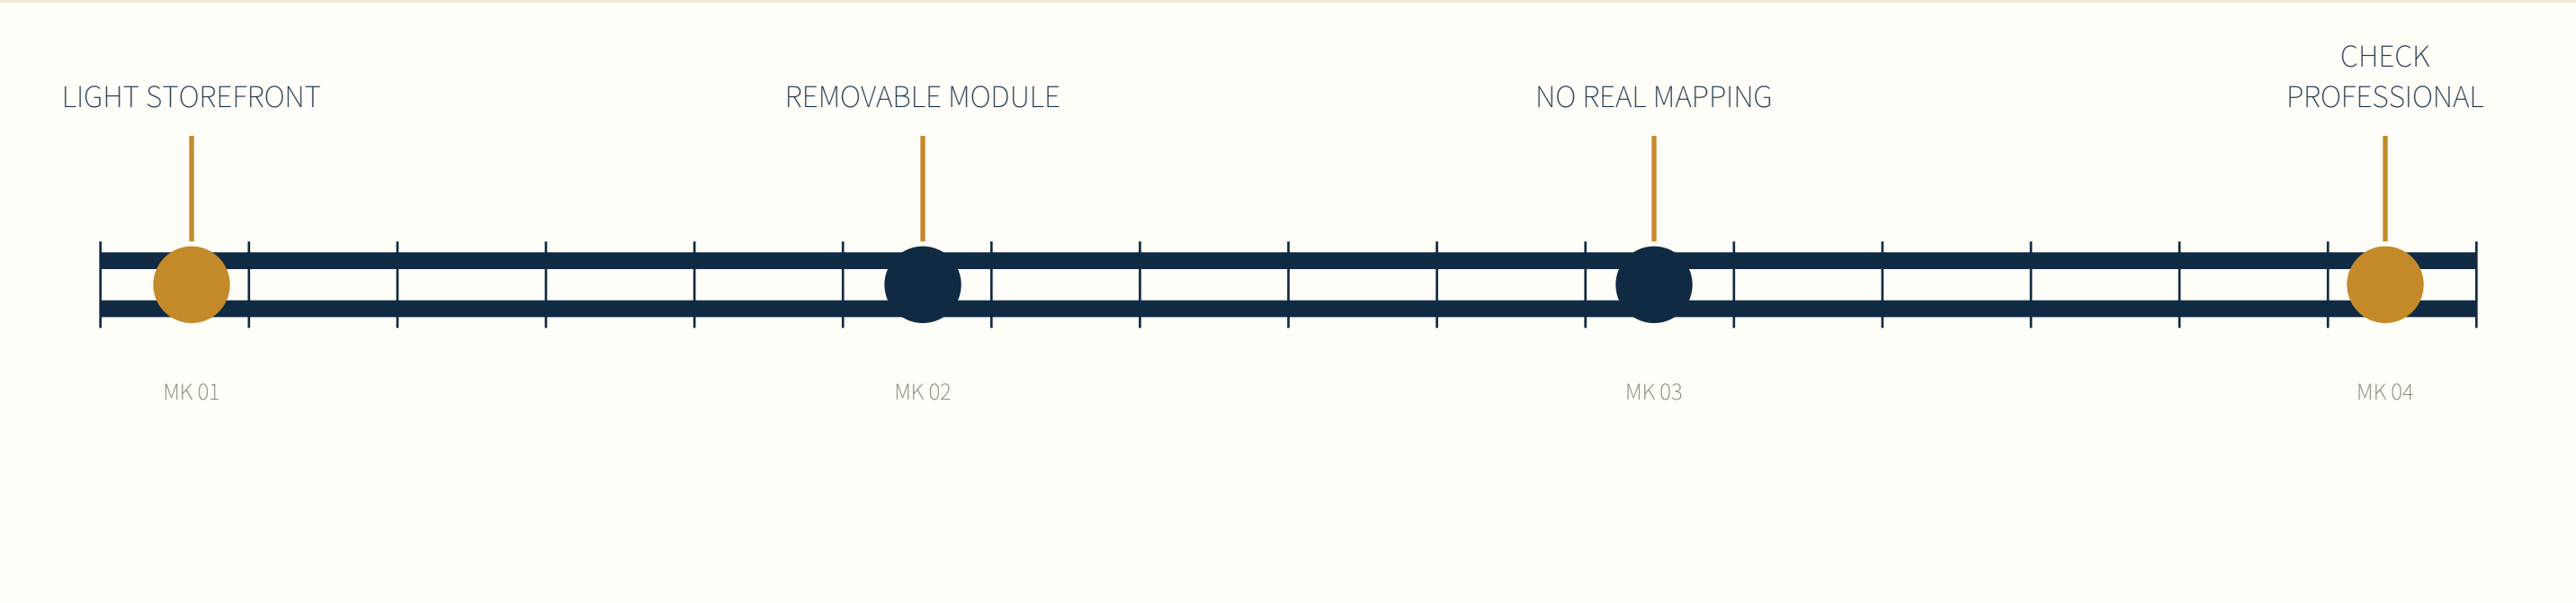

03 Land-use representation follows a simple rule: geometry is computable while regulatory controls remain unknown.

04 Seven LANDUSE polygons fully cover the provisional SITEBOUNDARY.

Reversible prototypes

LIGHT STOREFRONT • REMOVABLE MODULE • NO REAL MAPPING • PROFESSIONAL CHECK

01 Land-use representation follows a simple rule: geometry is computable while regulatory controls remain unknown.

02 Seven LANDUSE polygons fully cover the provisional SITEBOUNDARY.

01 The 1401 park-green and 1403 plaza polygons are reused in the green-space and public-space layers, so the same claim can be cross-checked.

02 Known quantities are limited to submitted areas, ratios, lengths and structural counts; confidence is medium because the boundary is provisional.

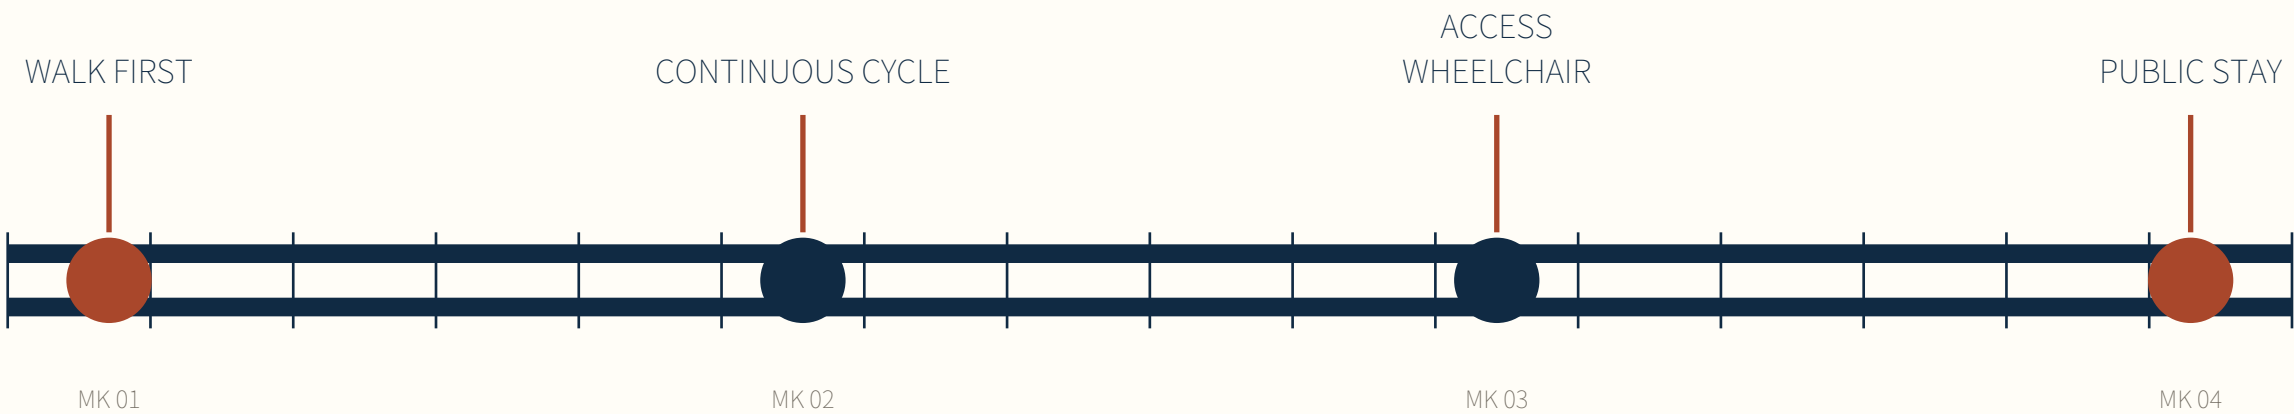

Slow mobility and blue-green

WALK FIRST • CONTINUOUS CYCLE • WHEELCHAIR ACCESS • PUBLIC STAY

17

WALK FIRST • CONTINUOUS CYCLE • WHEELCHAIR ACCESS • PUBLIC STAY

- 01 Municipal and public-service planning follows “interfaces before facilities.” Phase one defines professional checklists for power, connectivity, storage, fire safety, stormwater, waste and accessibility without promising edge-
- 02 Phase two may add removable interfaces after permits and an operator exist.

Service and low-speed logistics

TECH SERVICE WING • FEEDBACK WING • LOW-SPEED LOGISTICS • STAFFED TAKEOVER

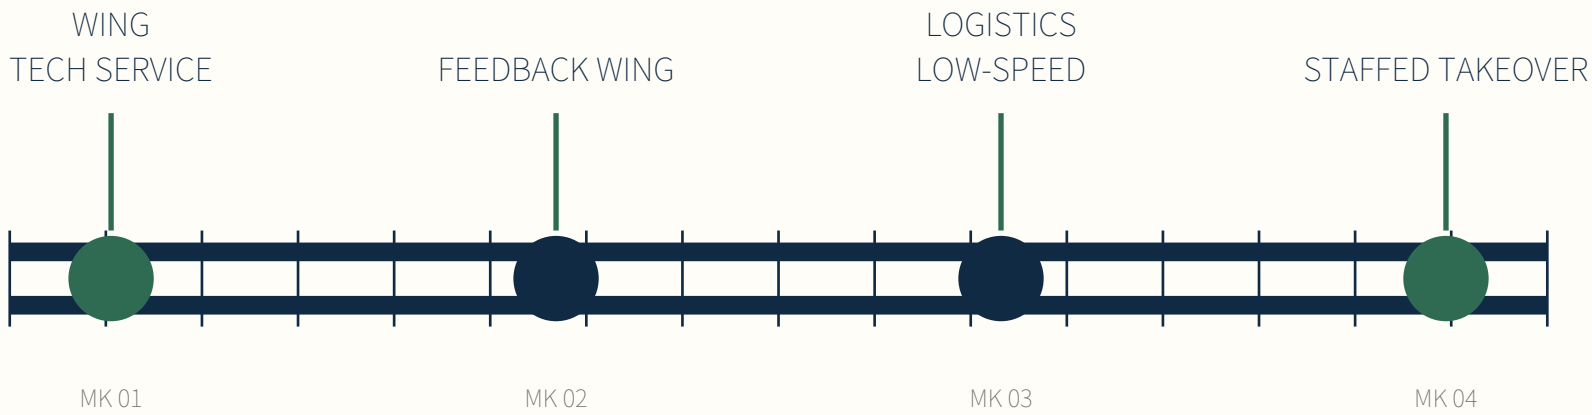

- 01

Phase three uses the annual ledger to decide whether any capacity should expand.
- 02

If OSM is later used for roads, transit or candidate merchant context, ODbL attribution will be shown and missing tags will never be treated as proof of absence.
- 03

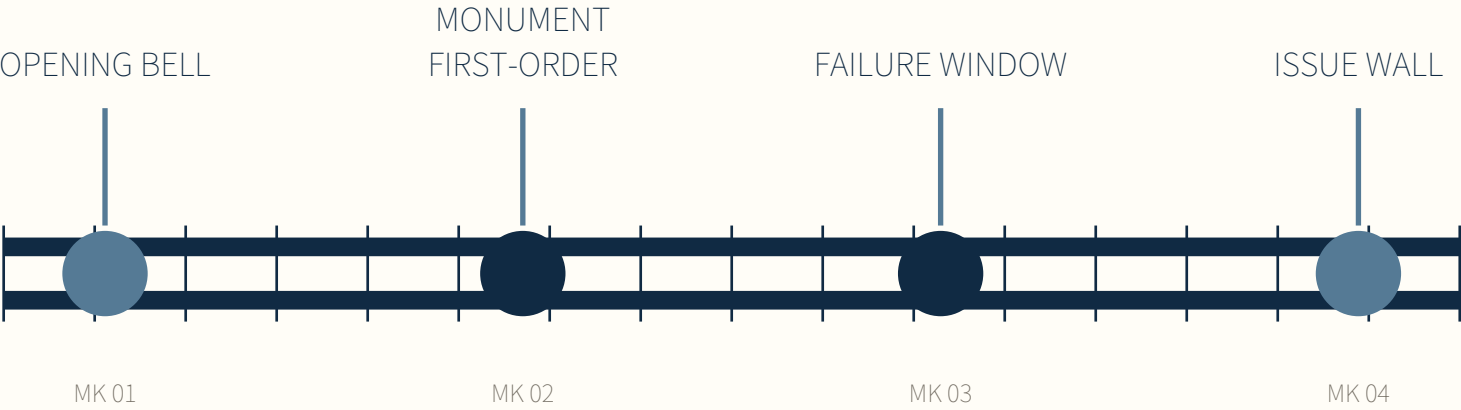

Mobility separates public movement from service logistics.
- 04

The Jingzhang spine prioritizes walking, cycling, wheelchair movement and stopping.

Four memorial nodes

OPENING BELL • FIRST-ORDER MONUMENT • FAILURE WINDOW • ISSUE WALL

01 The Jingzhang Heritage Park is an everyday public display and slow-mobility spine rather than a background for events.

02 It links the issue wall, first-sample shelf and failed-prototype window, making stopping, review and appeal visible.

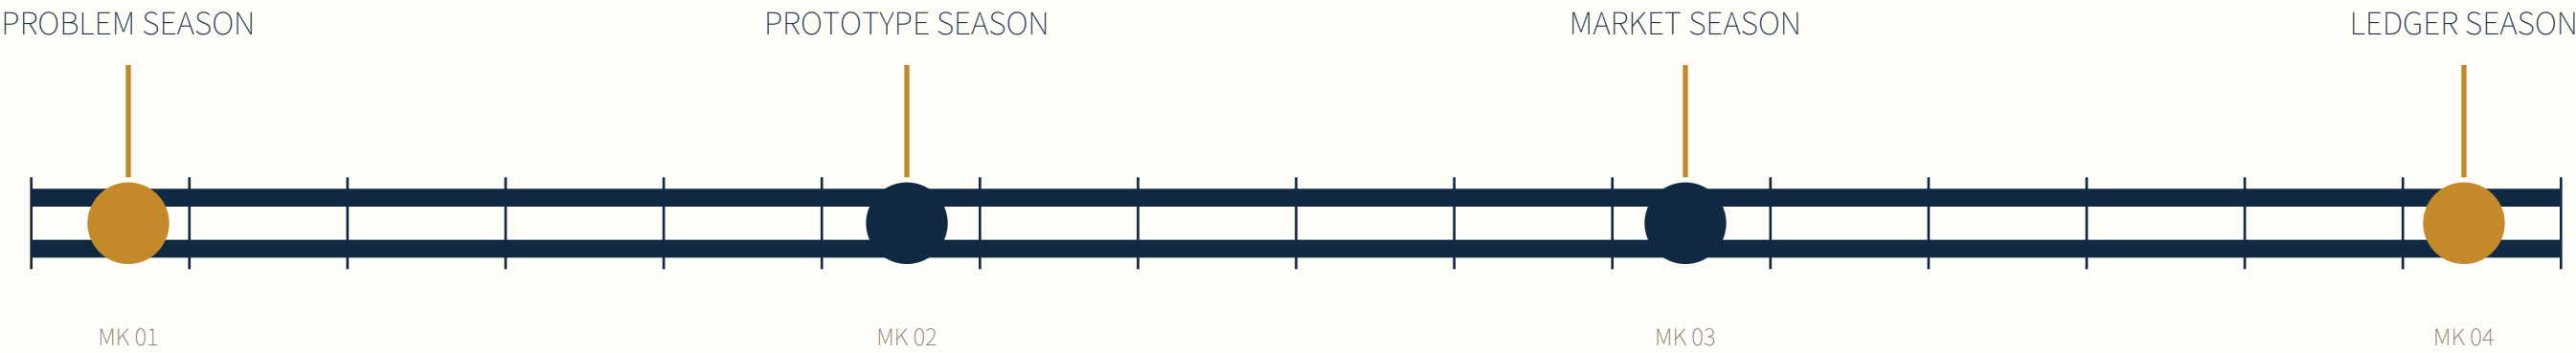

03 The Xiaoyuehe wing receives neighborhood problem feedback, while all ecological, flood-control and bank-line conclusions wait for professional inputs.

04 Submitted green and public-space ratios describe conceptual geometry only.

Four-season operating loop

PROBLEM SEASON • PROTOTYPE SEASON • MARKET SEASON • LEDGER SEASON

01 Season two performs synthetic-data and controlled back-of-house trials.

02 Season three conducts limited tests in the co-creation and first-order markets, constrained by quantity, time and space.

01 Season four publishes an annual ledger of success, stopping, appeals, deletion and unresolved problems.

02 Failure is not repackaged as a showcase.

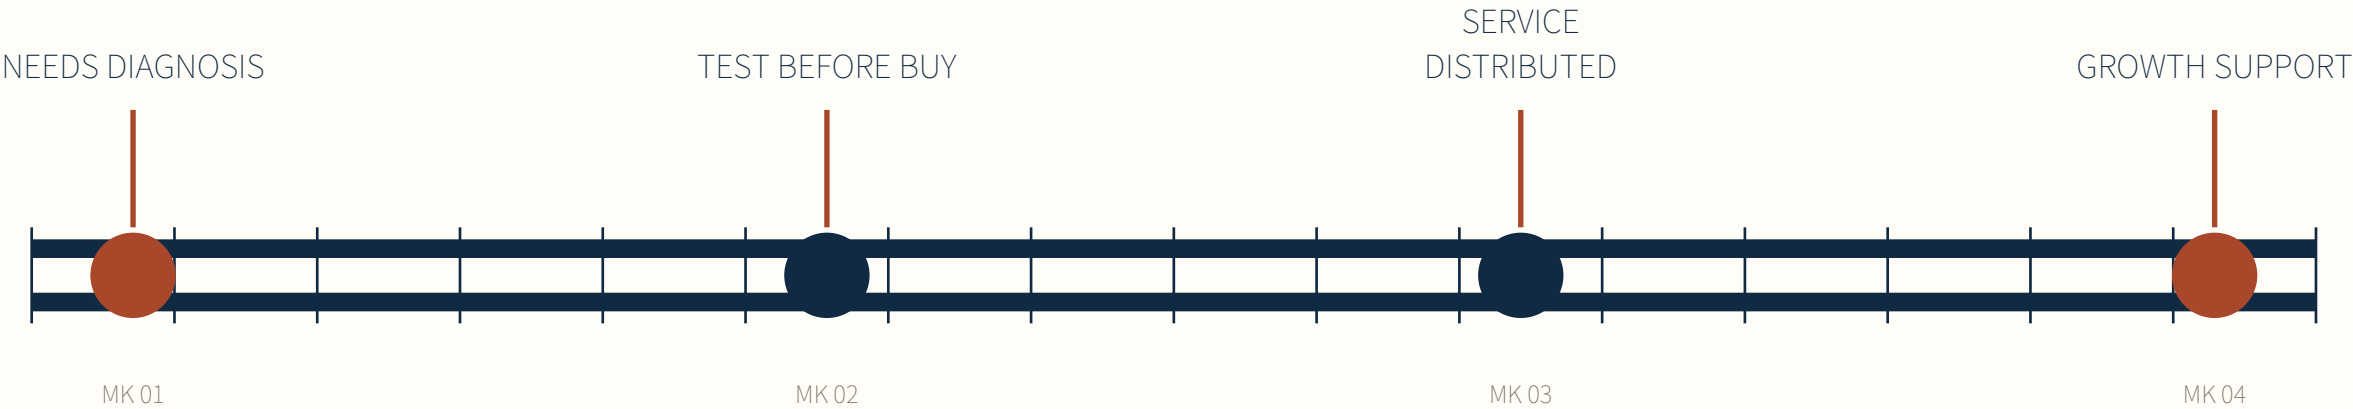

Global mechanism translation

NEEDS DIAGNOSIS • TEST BEFORE BUY • DISTRIBUTED SERVICE • GROWTH SUPPORT

21

NEEDS DIAGNOSIS • TEST BEFORE BUY • DISTRIBUTED SERVICE • GROWTH SUPPORT

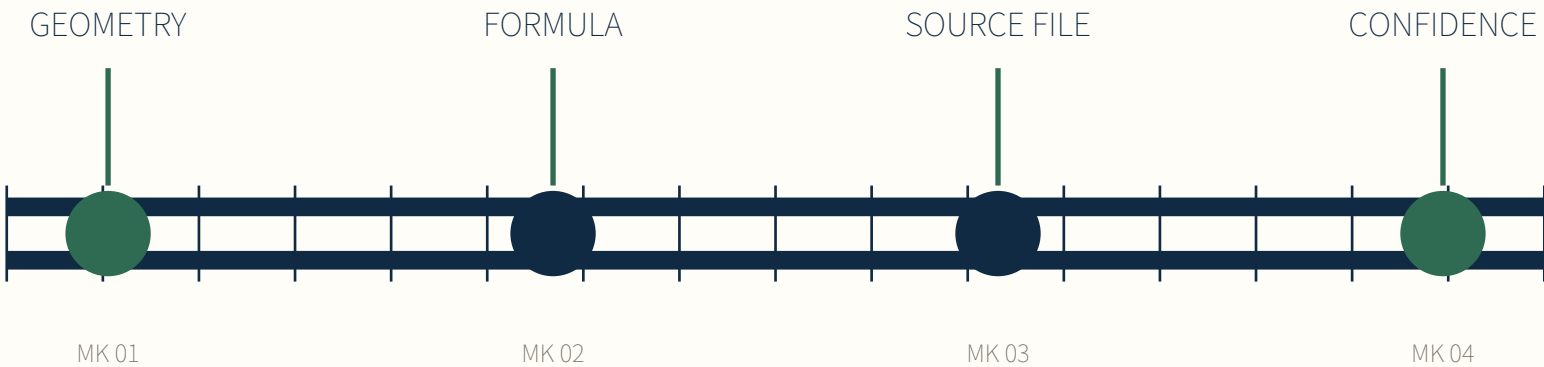

- 01 Paper cream represents the public ledger, ink navy represents civic order, and rust red marks problems and action.
- 02 Signal green and amber are limited to “continue” and “review required” states.

Metrics and evidence chain

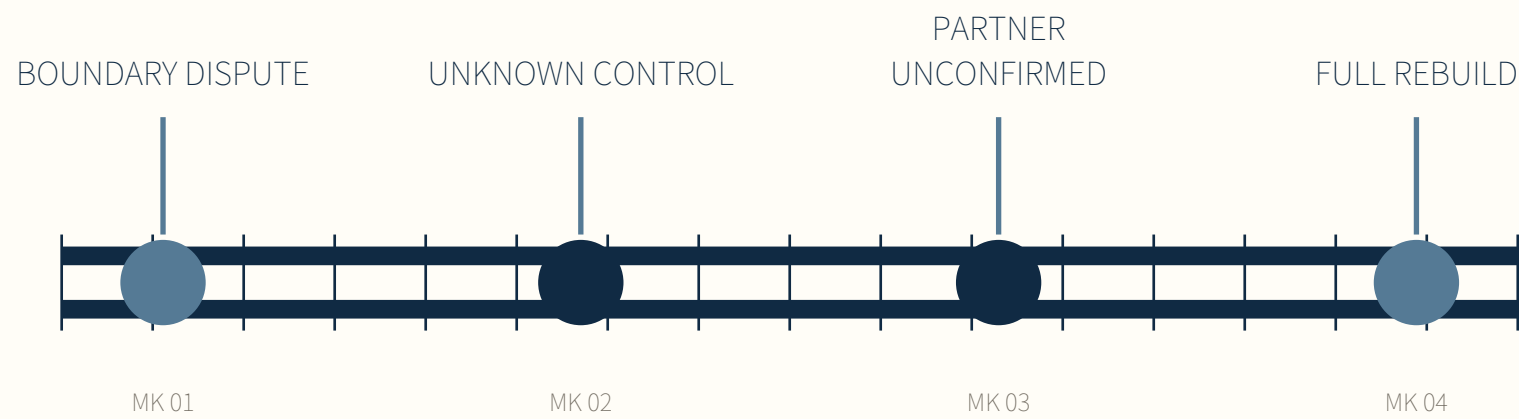

GEOMETRY • FORMULA • SOURCE FILE • CONFIDENCE

- 01 Metrics use two columns: known and recomputable, or unknown and never imputed.
- 02 Every known item stores value, unit, formula, source file, confidence and assumptions.
- 03 Items include overall area, land-use coverage, gap, overlap, prototype footprint, green and public-space ratios, design route length, and structural counts for three markets, twelve shops, seven personas and four memorial nodes.
- 04 Area and length are recalculated in EPSG:4548, with responsibility recorded in the design-depth matrix.

Risk and rebuild trigger

BOUNDARY DISPUTE • UNKNOWN CONTROL • UNCONFIRMED PARTNER • FULL REBUILD

01 All figures are generated specifically for this submission.

02 No third-party photograph, company mark or uncleared asset is used.

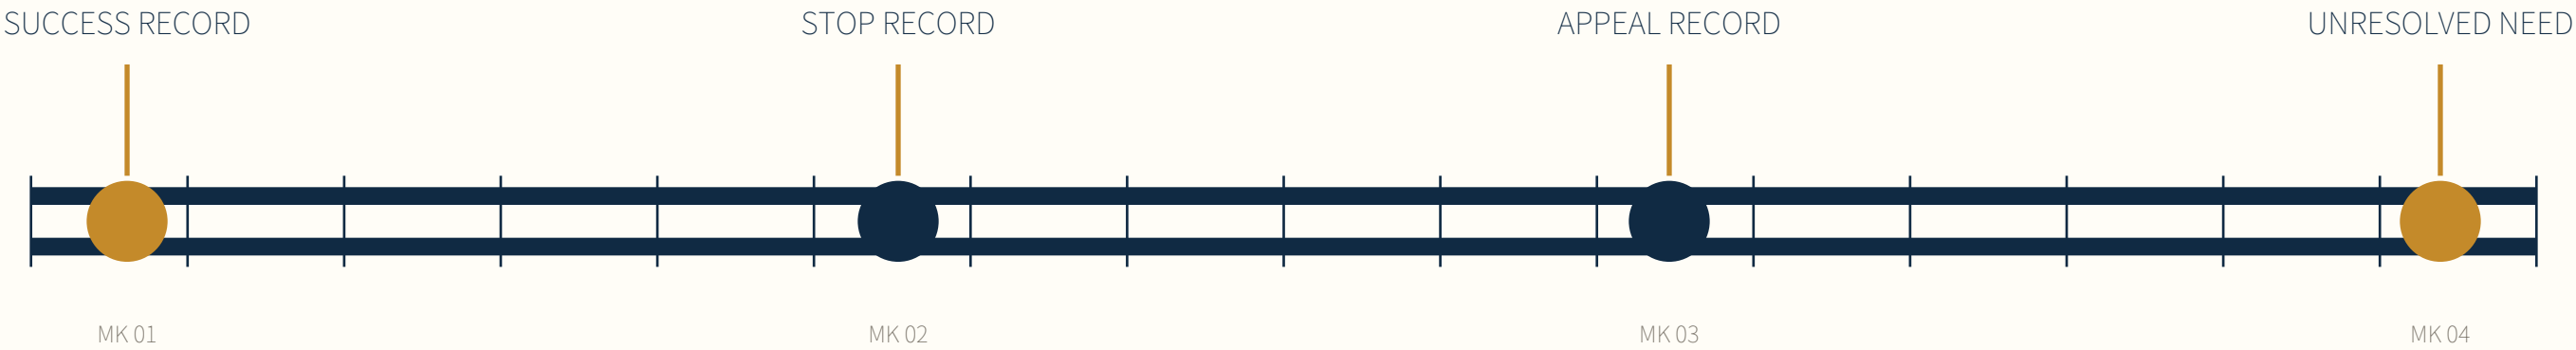

03 PDFs embed a subset of Noto Sans SC under SIL Open Font License 1.1.

04 The web pages load no CDN, remote tile, external font, iframe, form or network request and perform no tracking.

Closing: the public ledger

SUCCESS RECORD • STOP RECORD • APPEAL RECORD • UNRESOLVED NEED

01 Both groups support needs diagnosis, test-before-buy, distributed services, testbeds and growth support only; they do not support spatial controls or policy commitments.

02 Any later open-data background will retain OSM ODbL attribution.

01 Font provenance and generation software are documented in the copyright statement.

02 Complete machine indexes are in sources.json, metrics.json, assumptions.json, compliancematrix.json, standardmatrix.json and designdepthmatrix.json.
