

Jing-Zhang Bell Code

Resonating the Centennial AI Innovation Belt

One bell-rope · Three bells · Two-wing circuits

Conceptual proposal on provisional boundary (not an official redline)

Design Basis & Boundary

Basis, sources and compliance boundary

Primary basis

Qualification Pre-announcement, Haidian Branch of Beijing MPNR Commission (2026-05-09)

Task basis

Open-Call Taskbook for Global AI Agents (rights-cleared) + brief/site-package

Boundary

All spatial data on provisional boundary (deviation 0.02%–0.43%); full recompute once official polygon releases

Compliance

Intensity, height, renewal, road redlines are conceptual only; no non-public drawings or internal indicators used

Three-Level Scope Framework

43.6 km² → 11.4 km² → 368.4 ha

统筹研究 43.6 km²

Industry ecosystem, future urban form, branding, global cases

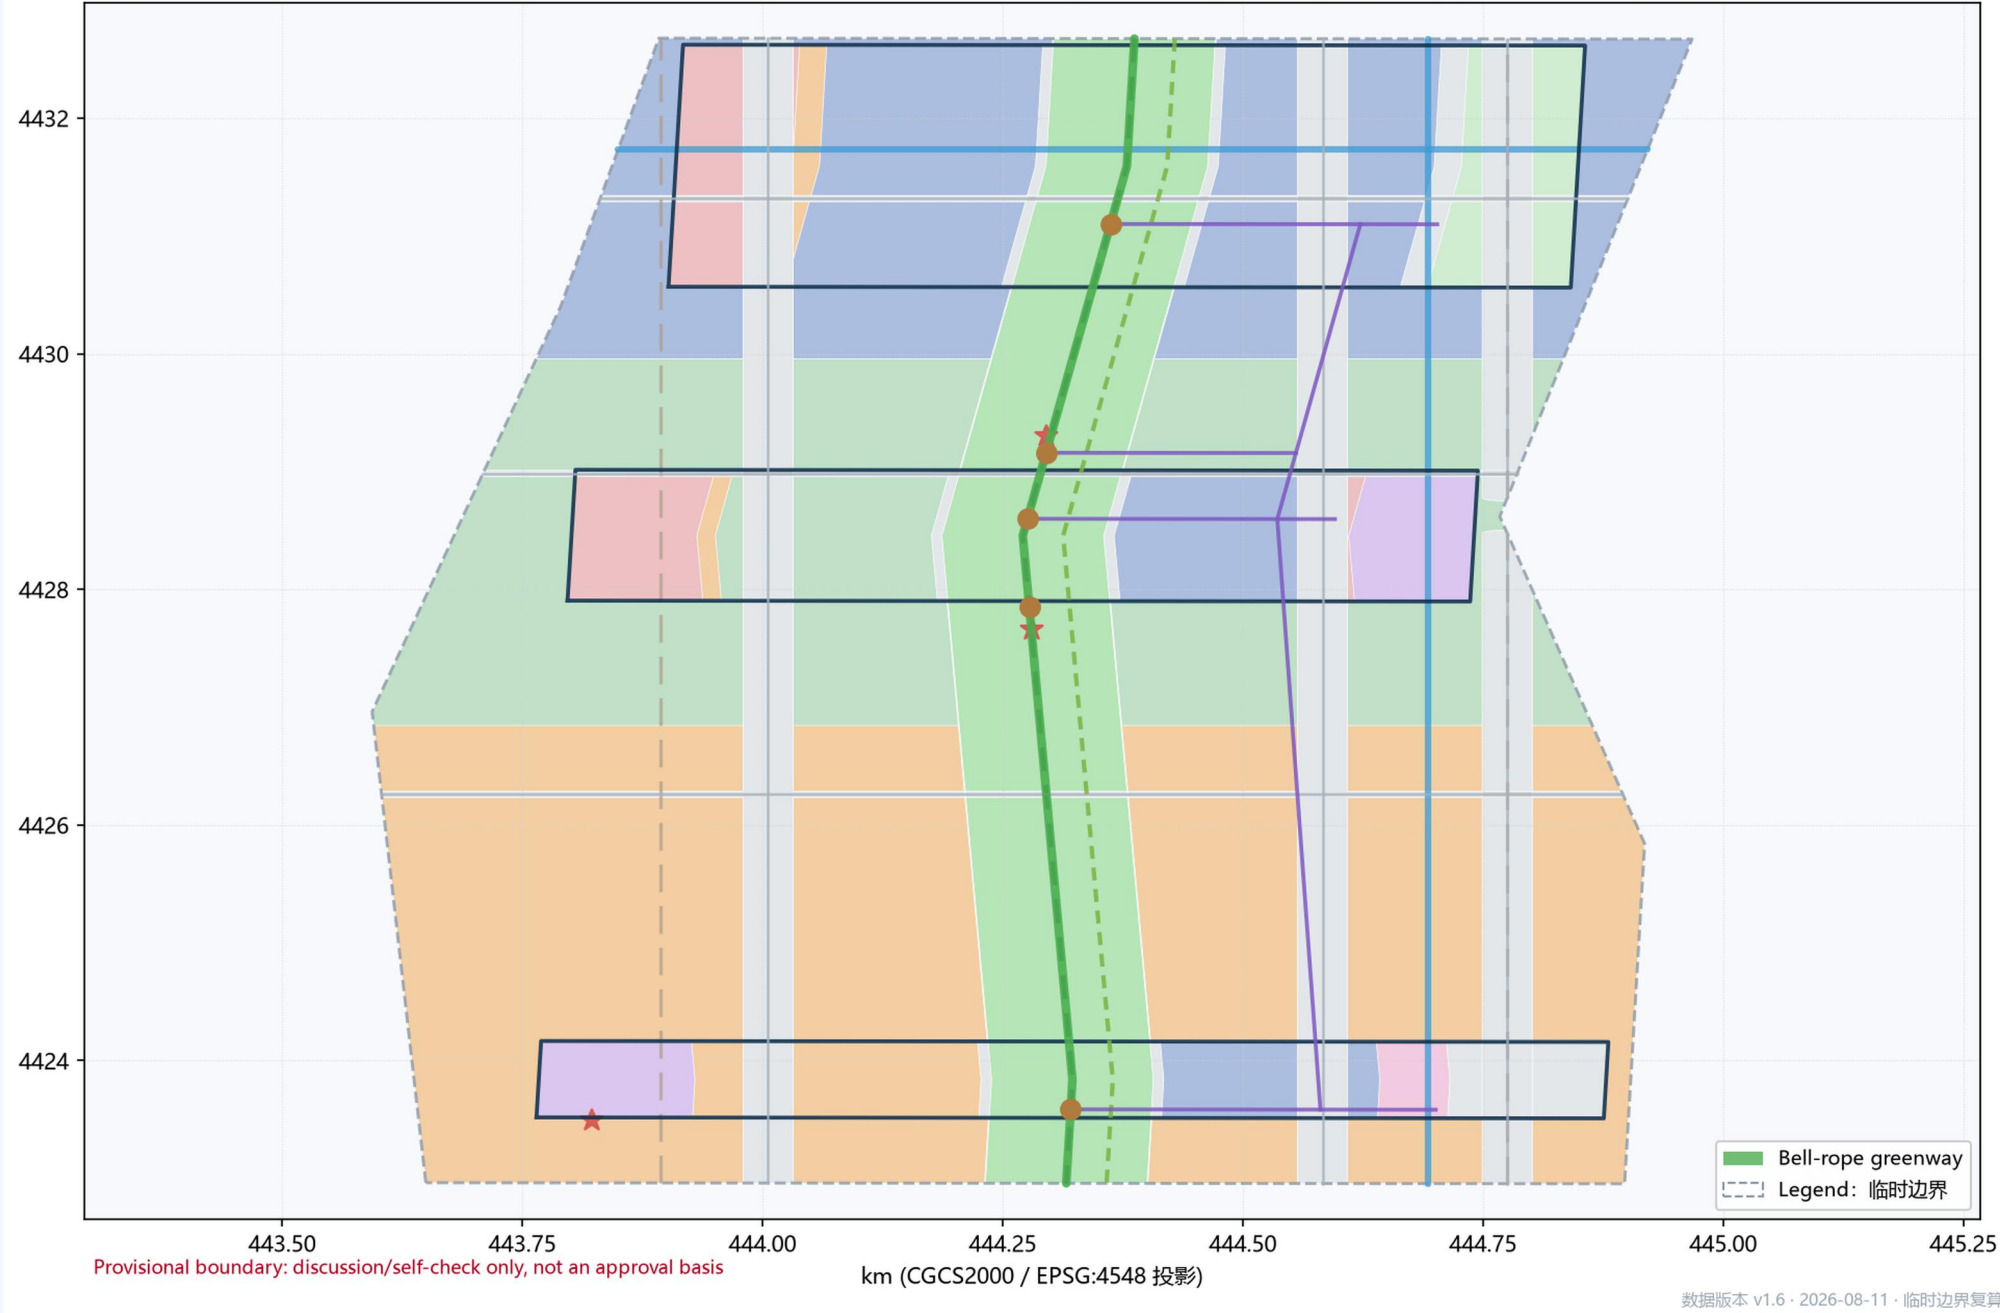

总体设计 11.4 km²

Urban renewal at regulatory-plan depth — the core of this proposal

重点区域 368.4 ha

Detailed design: Zhongzhiyuan / Origin Community / Dazhongsi

Jing-Zhang Bell Code · Overall Concept (provisional)
Three bells · one bell-rope corridor · two-wing circuits | Conceptual suggestions only

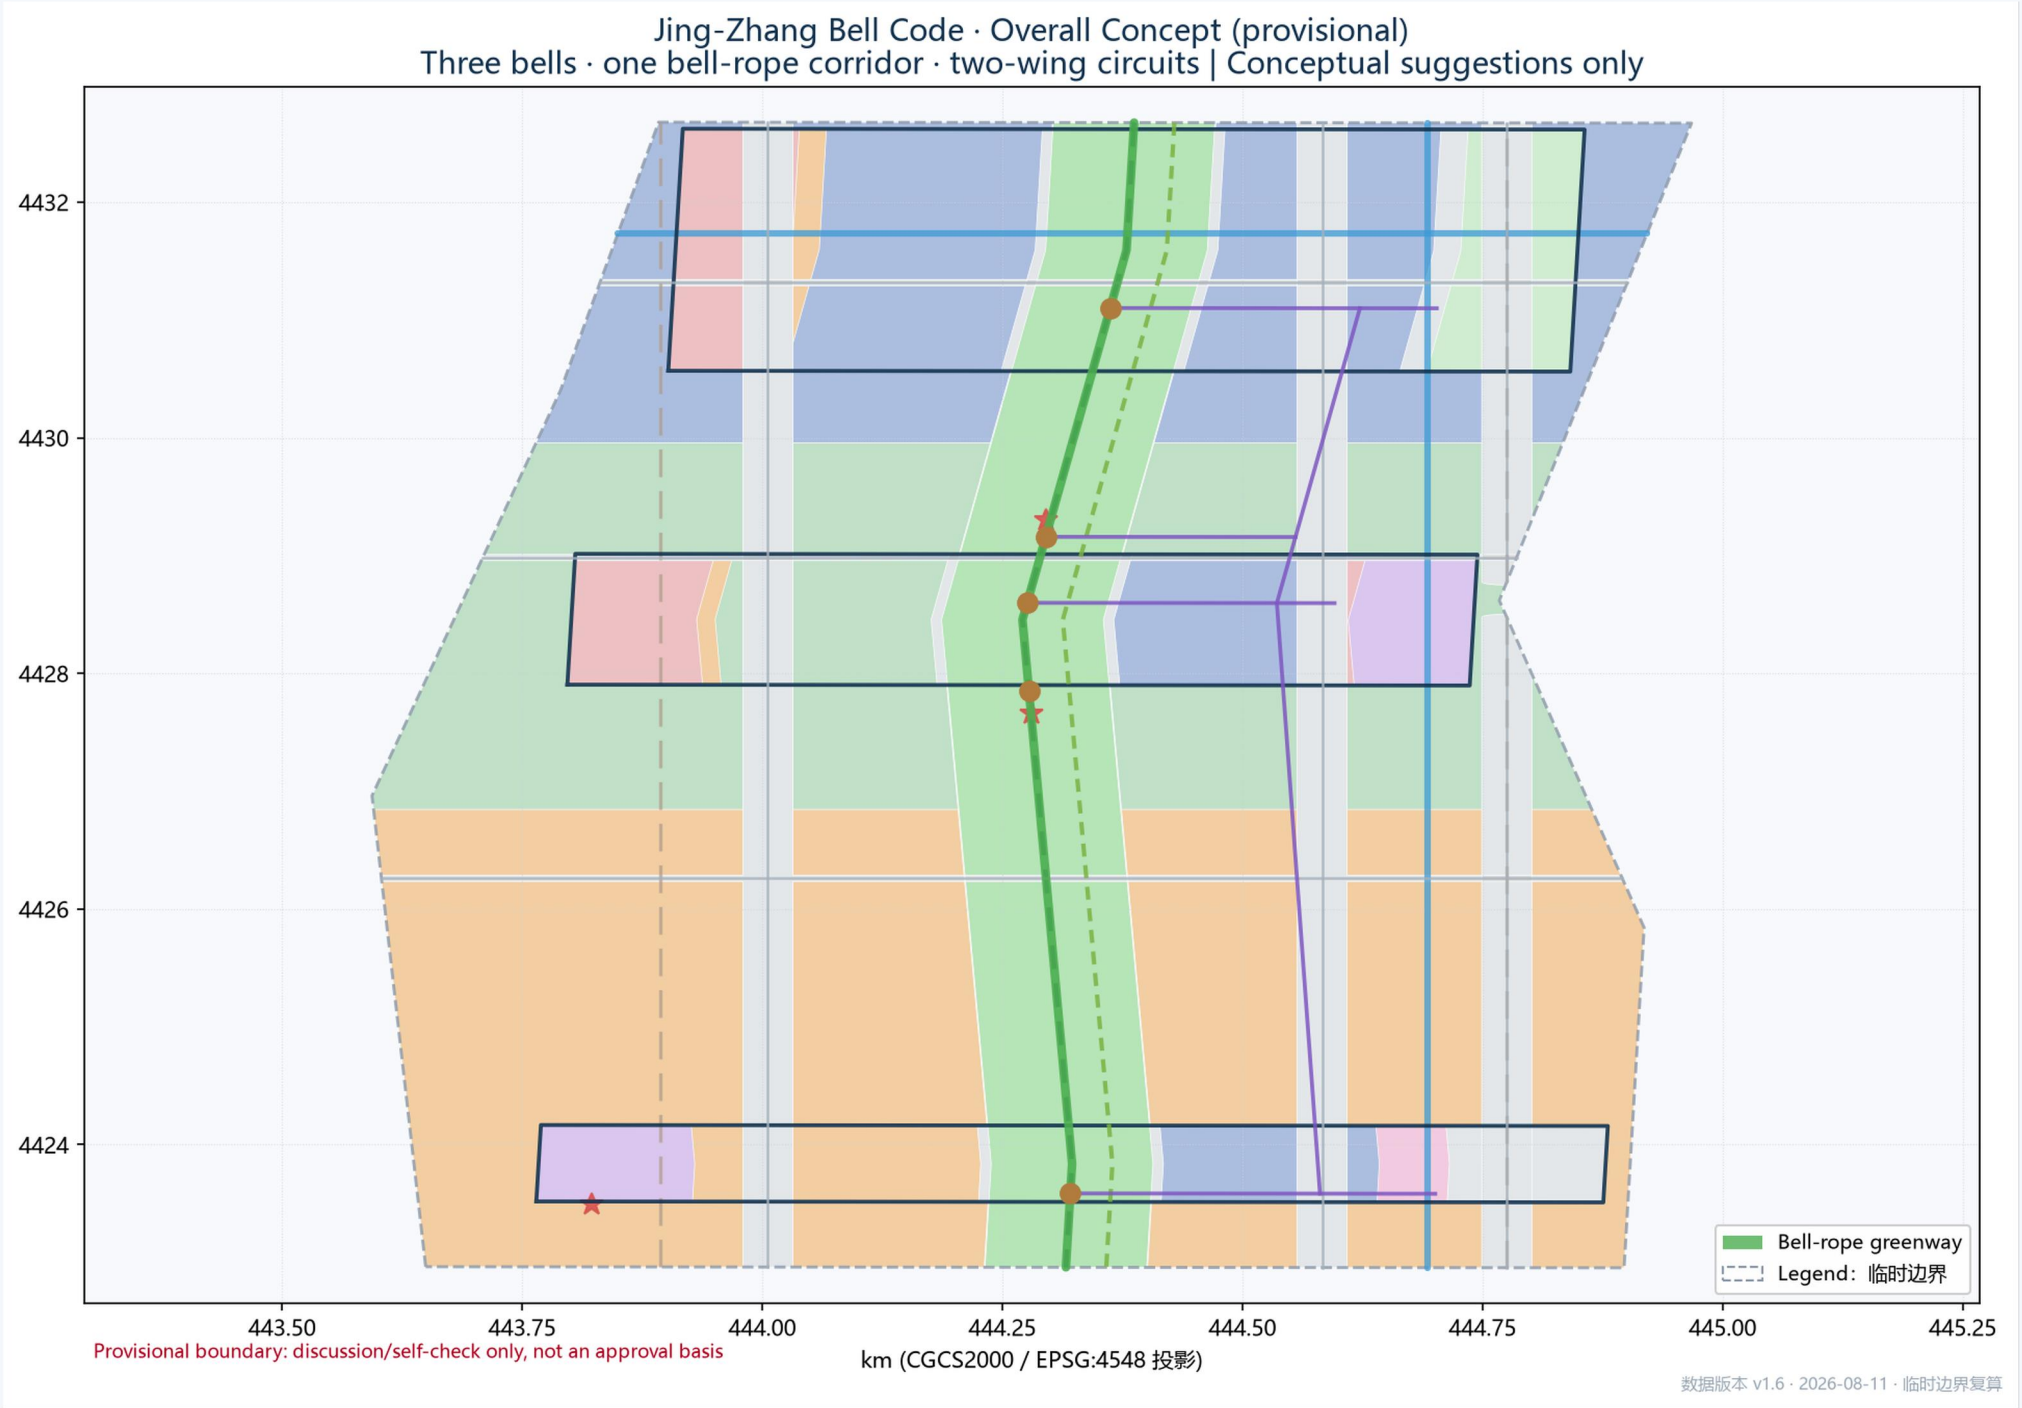

Spatial structure: one bell-rope • three bells • two-wing circuits • scenario nodes

Bell-rope = Jing-Zhang Railway Ruins Park vitality belt (approx. 9.7 km)

Site Overview

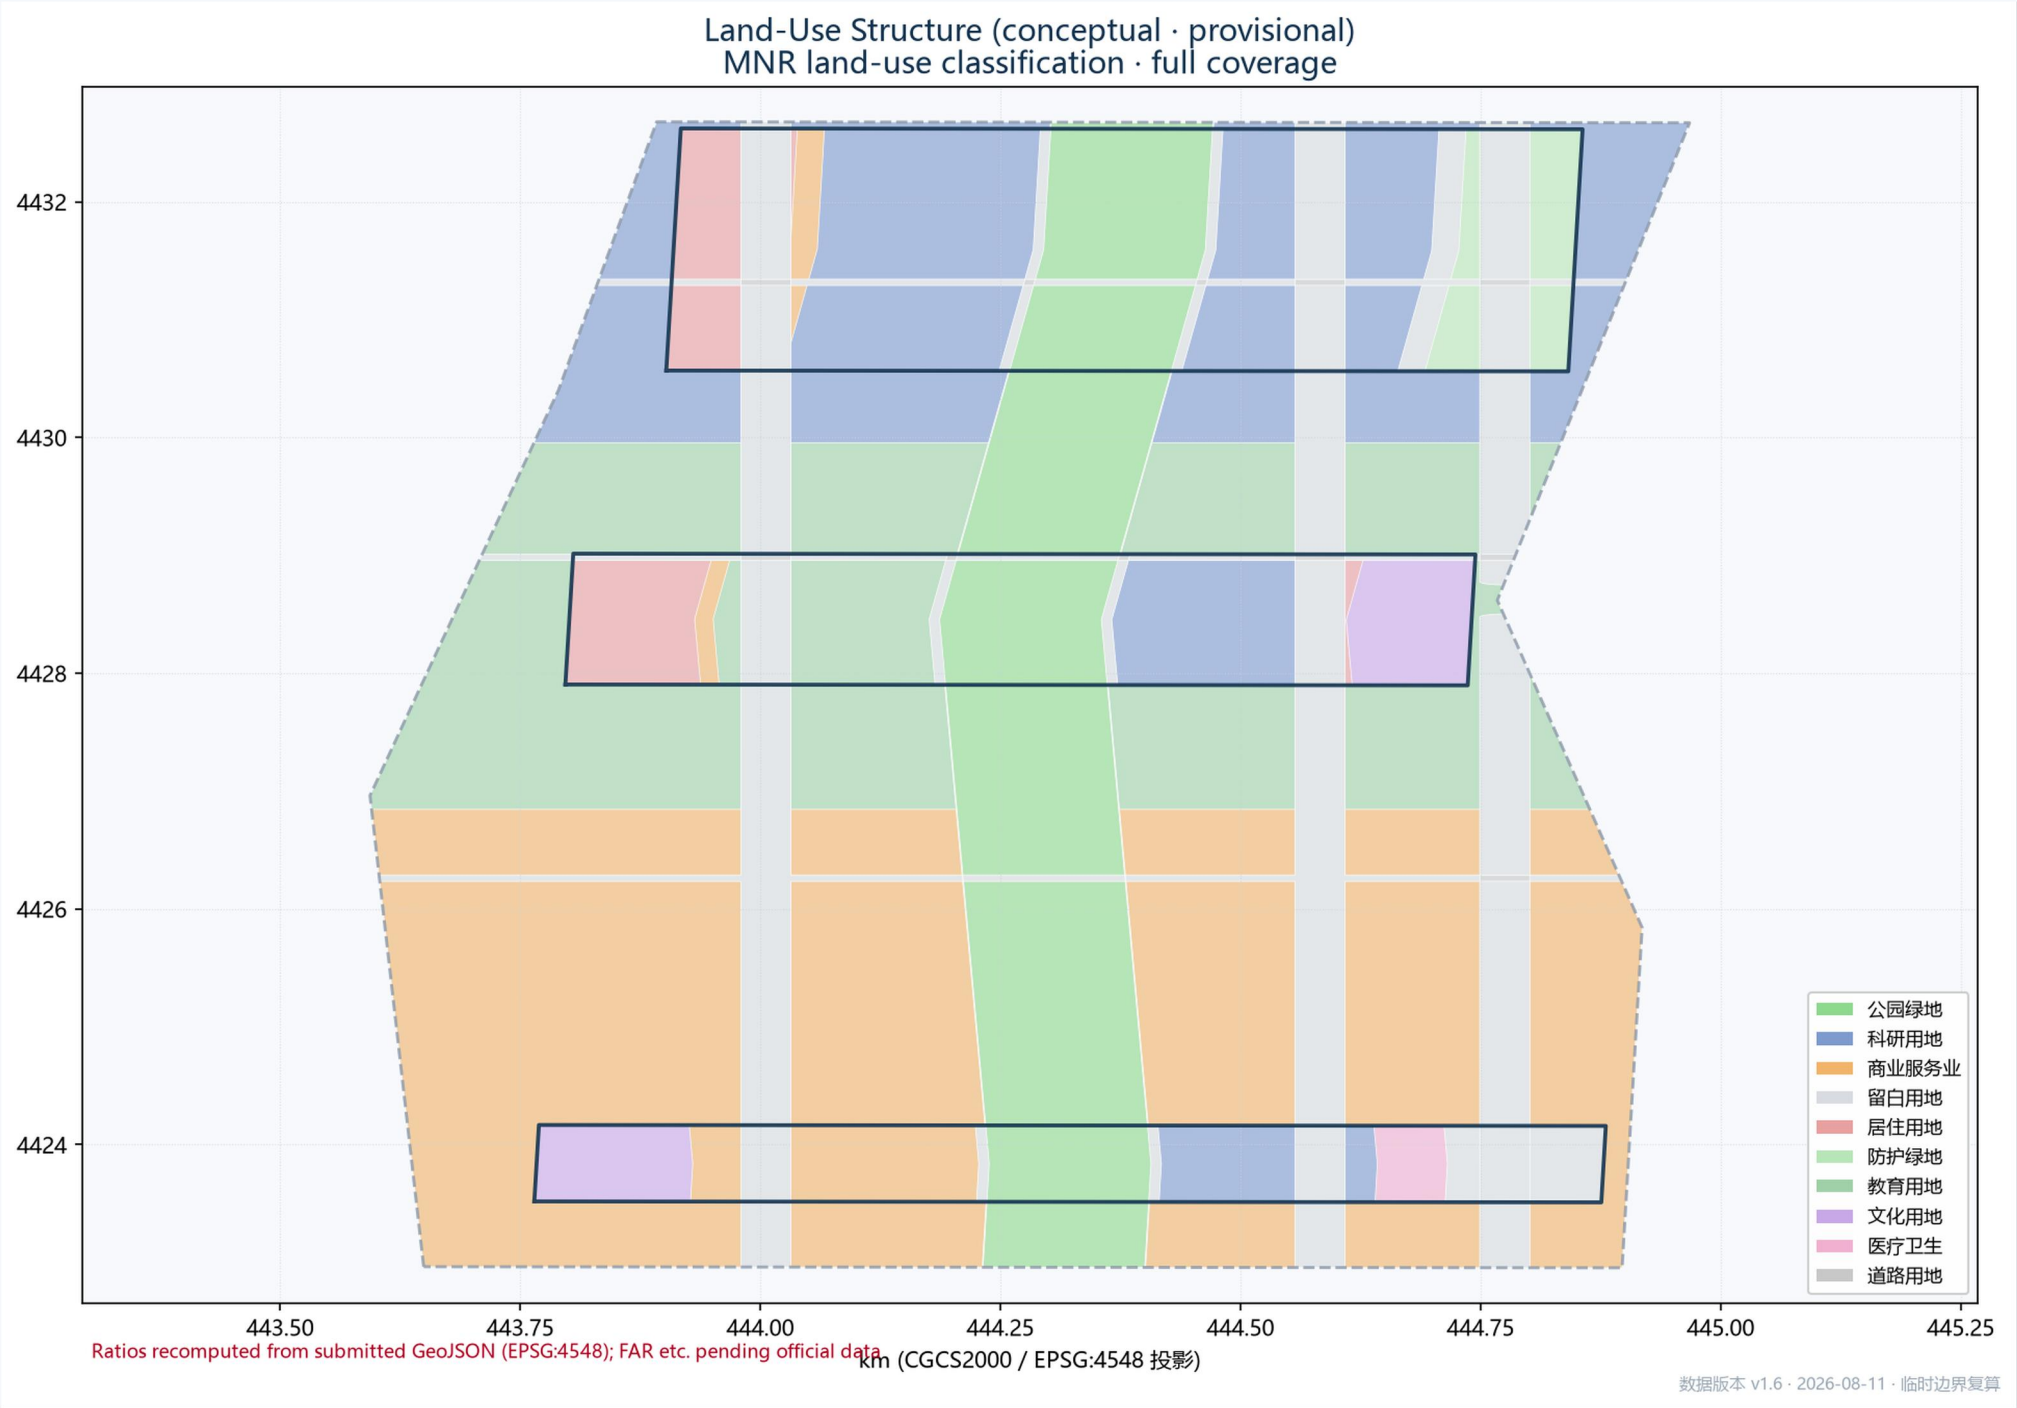

Research scope and three key areas (provisional boundary)

11.41 km ² site area	9.7 km bell-rope	193 ha Zhongzhiyuan	104 ha Origin Comm.	72 ha Dazhongsi
------------------------------------	---------------------	------------------------	------------------------	--------------------

Land-Use Structure

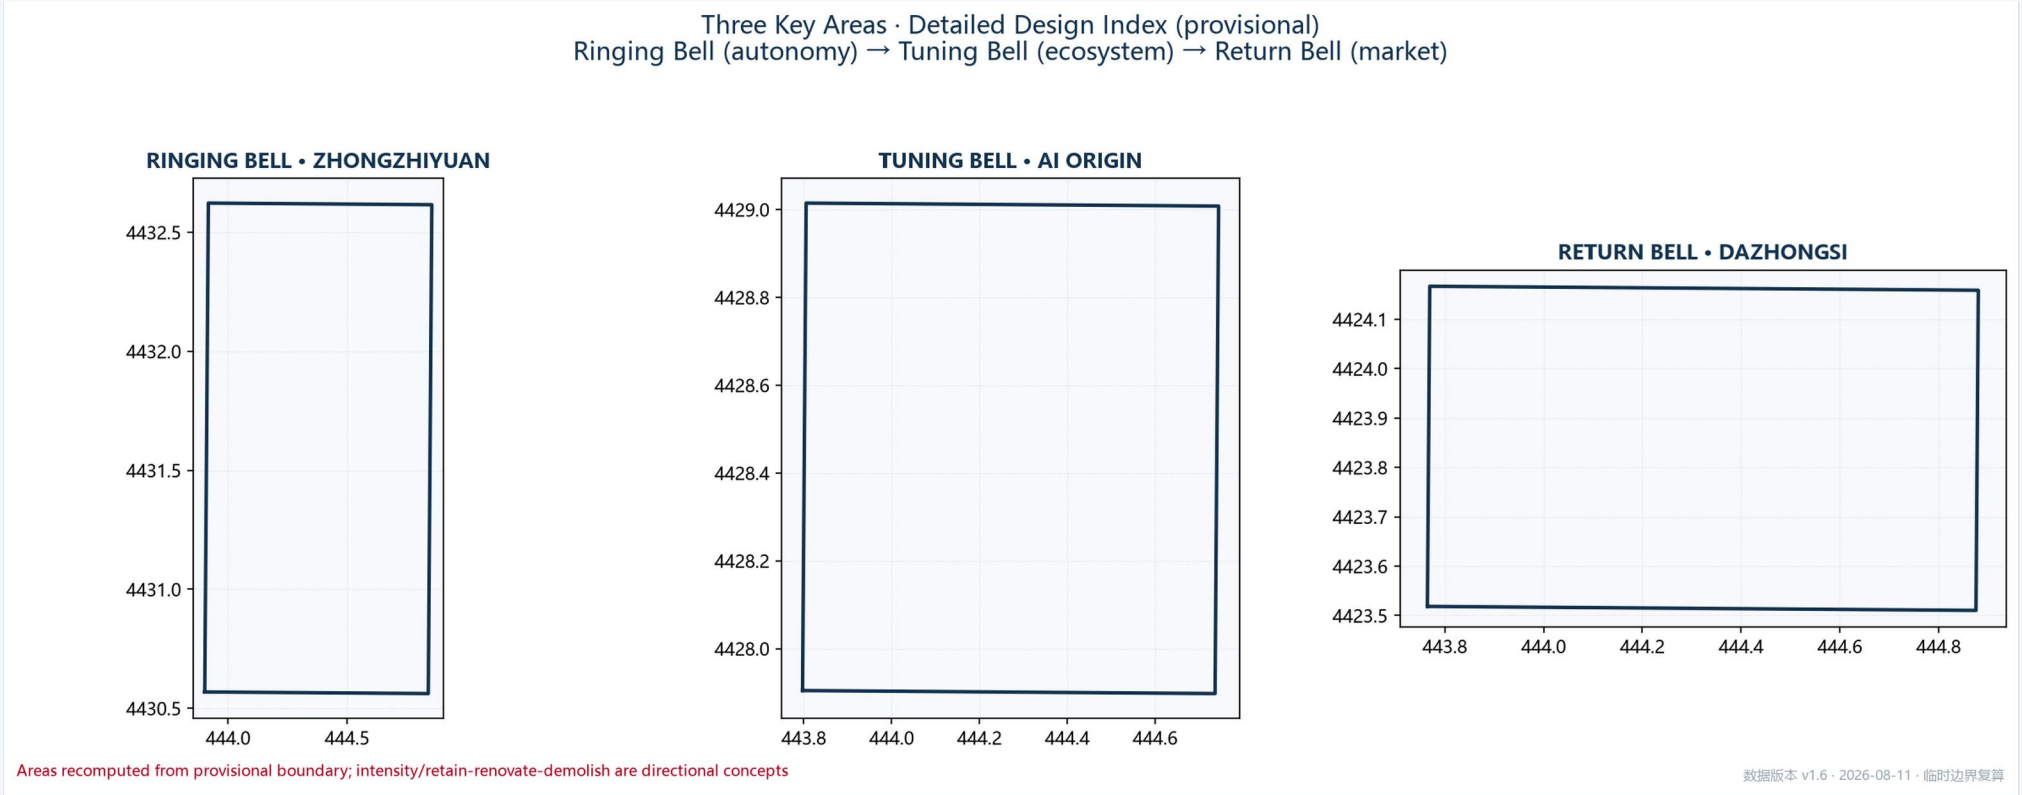

MNR classification · seamless coverage · recomputed

16% 科研 0802	30% 商业 05	17% 教育 0804
16% 绿地 1401+1402	16% 留白 16	3% 居住 0701

Three Key Areas

Ringing Bell → Tuning Bell → Return Bell

启钟 · 众智园 193 ha

Garden-type AI block · AI full-stack core · standard-setting platform

校音钟 · 原点社区 104 ha

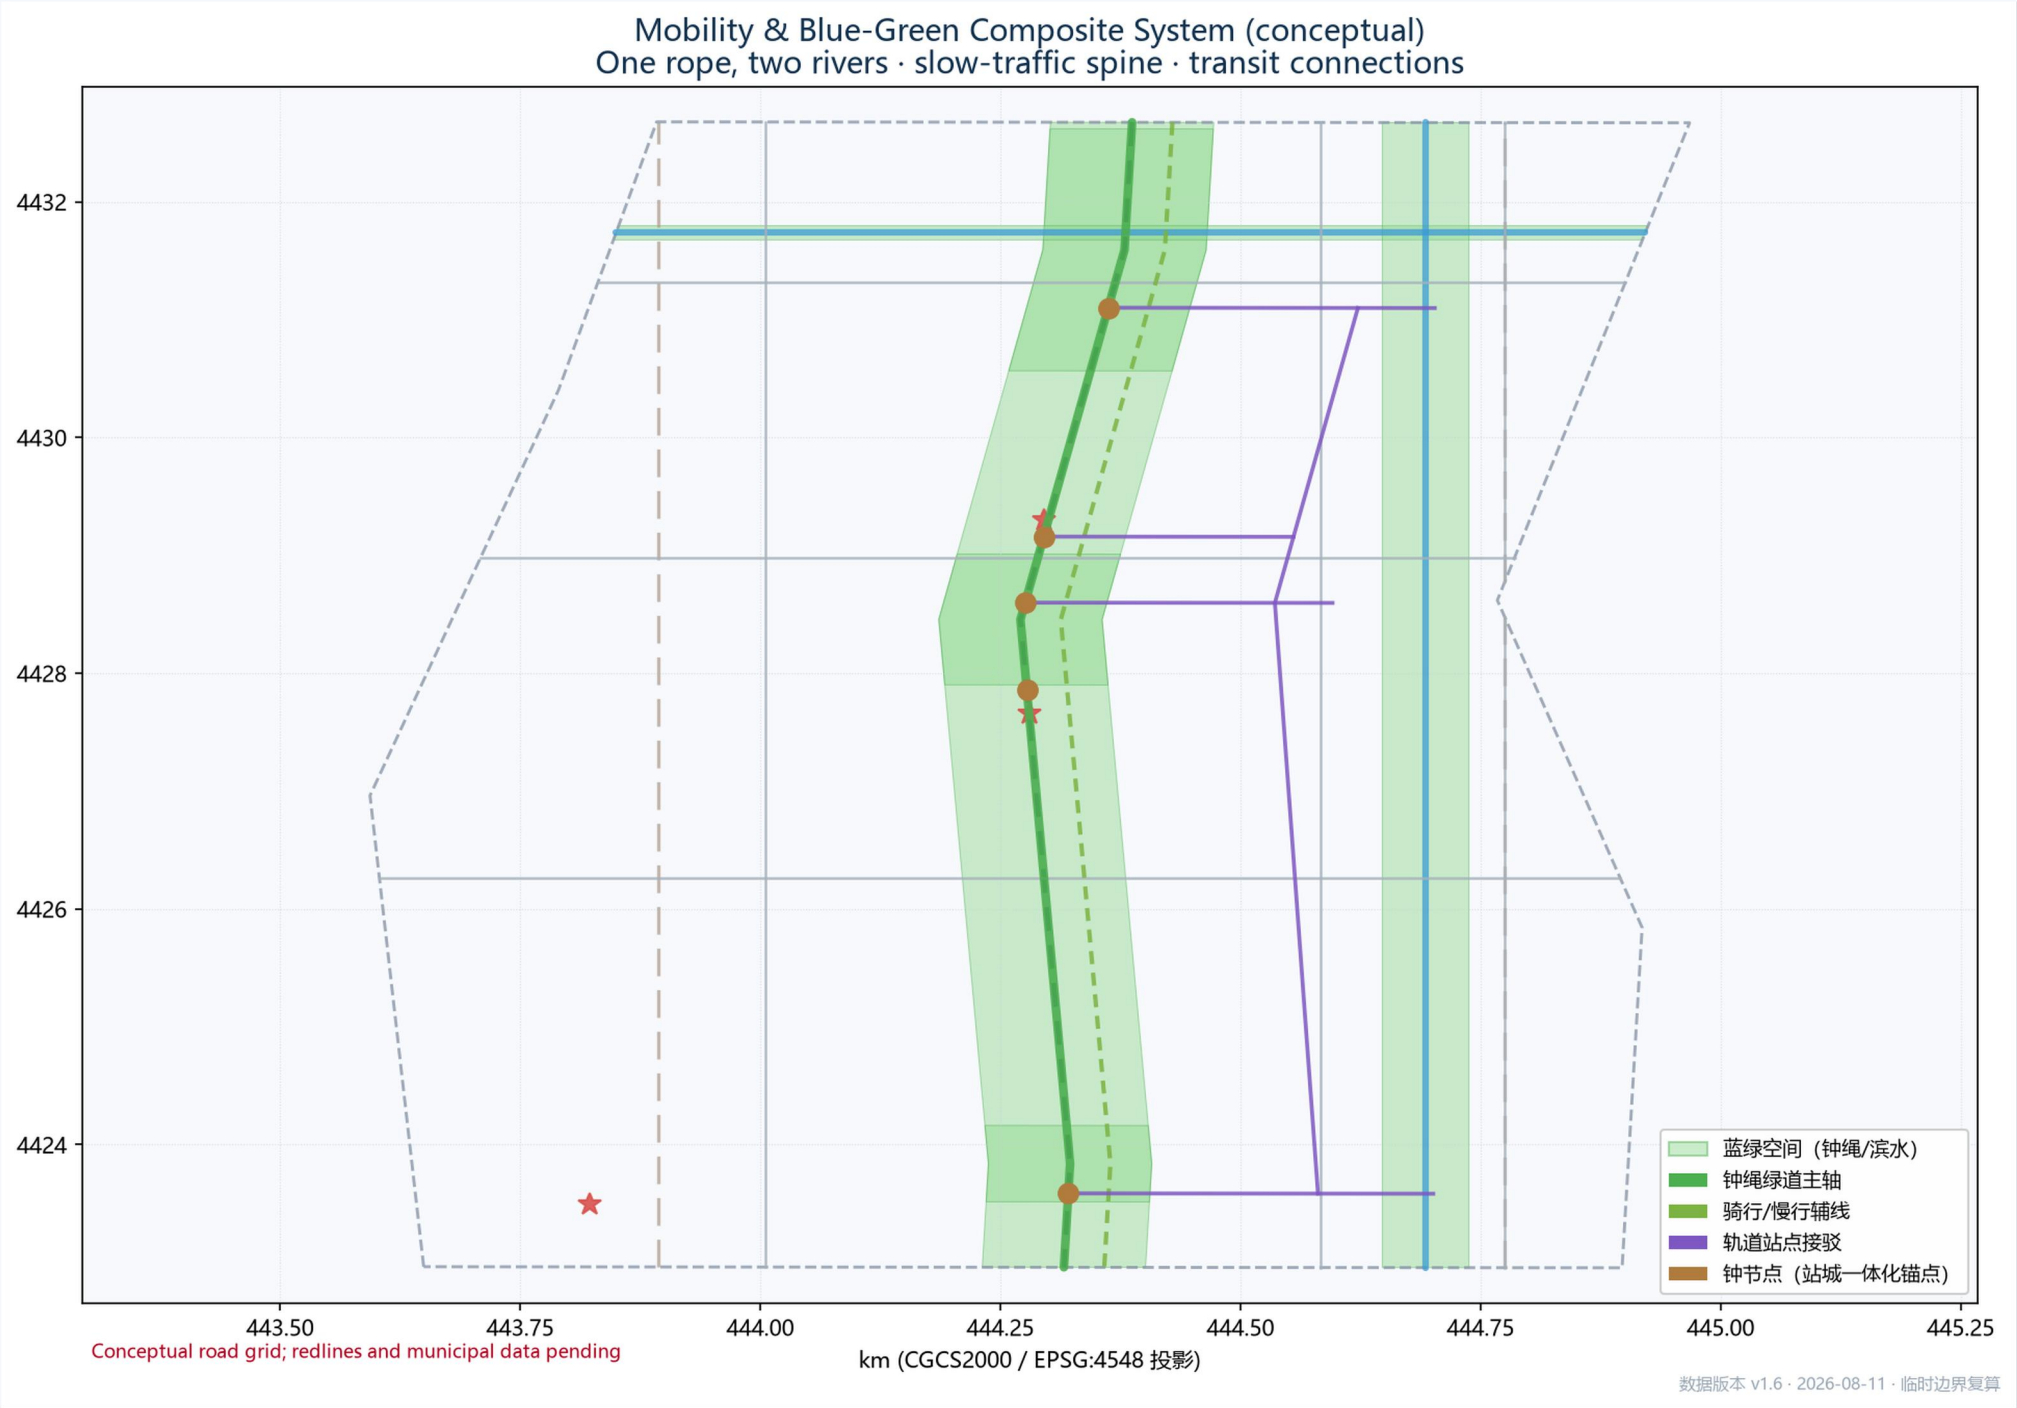

Near-campus AI block · tech-transfer & open-source core · station integration

归钟 · 大钟寺 72 ha

Urban AI block · agents/terminals/content · four-quadrant connection

Mobility & Blue-Green Network

One rope, two rivers · slow-traffic spine · rail connections

道路微循环

Bell-rope greenway as spine; road network 60.5 km (conceptual grid)

蓝绿骨架

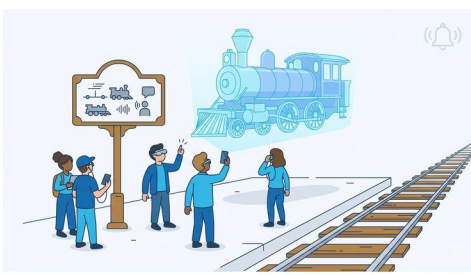

Bell-rope 9.7 km + Qinghe/Xiaoyuehe waterfronts; green ratio ~23%

站点一体化

Dazhongsi (four-quadrant), Wudaokou, Qinghua East Rd West — 500m catchments coupled with bell nodes

AI Scenarios & Operations

12 scenario cards · 3 test-validation · 6 personas · 4 landmarks

Mechanisms: Bell Registry · Quiet Hours · three-tier admission gates · three public ledgers

Phasing

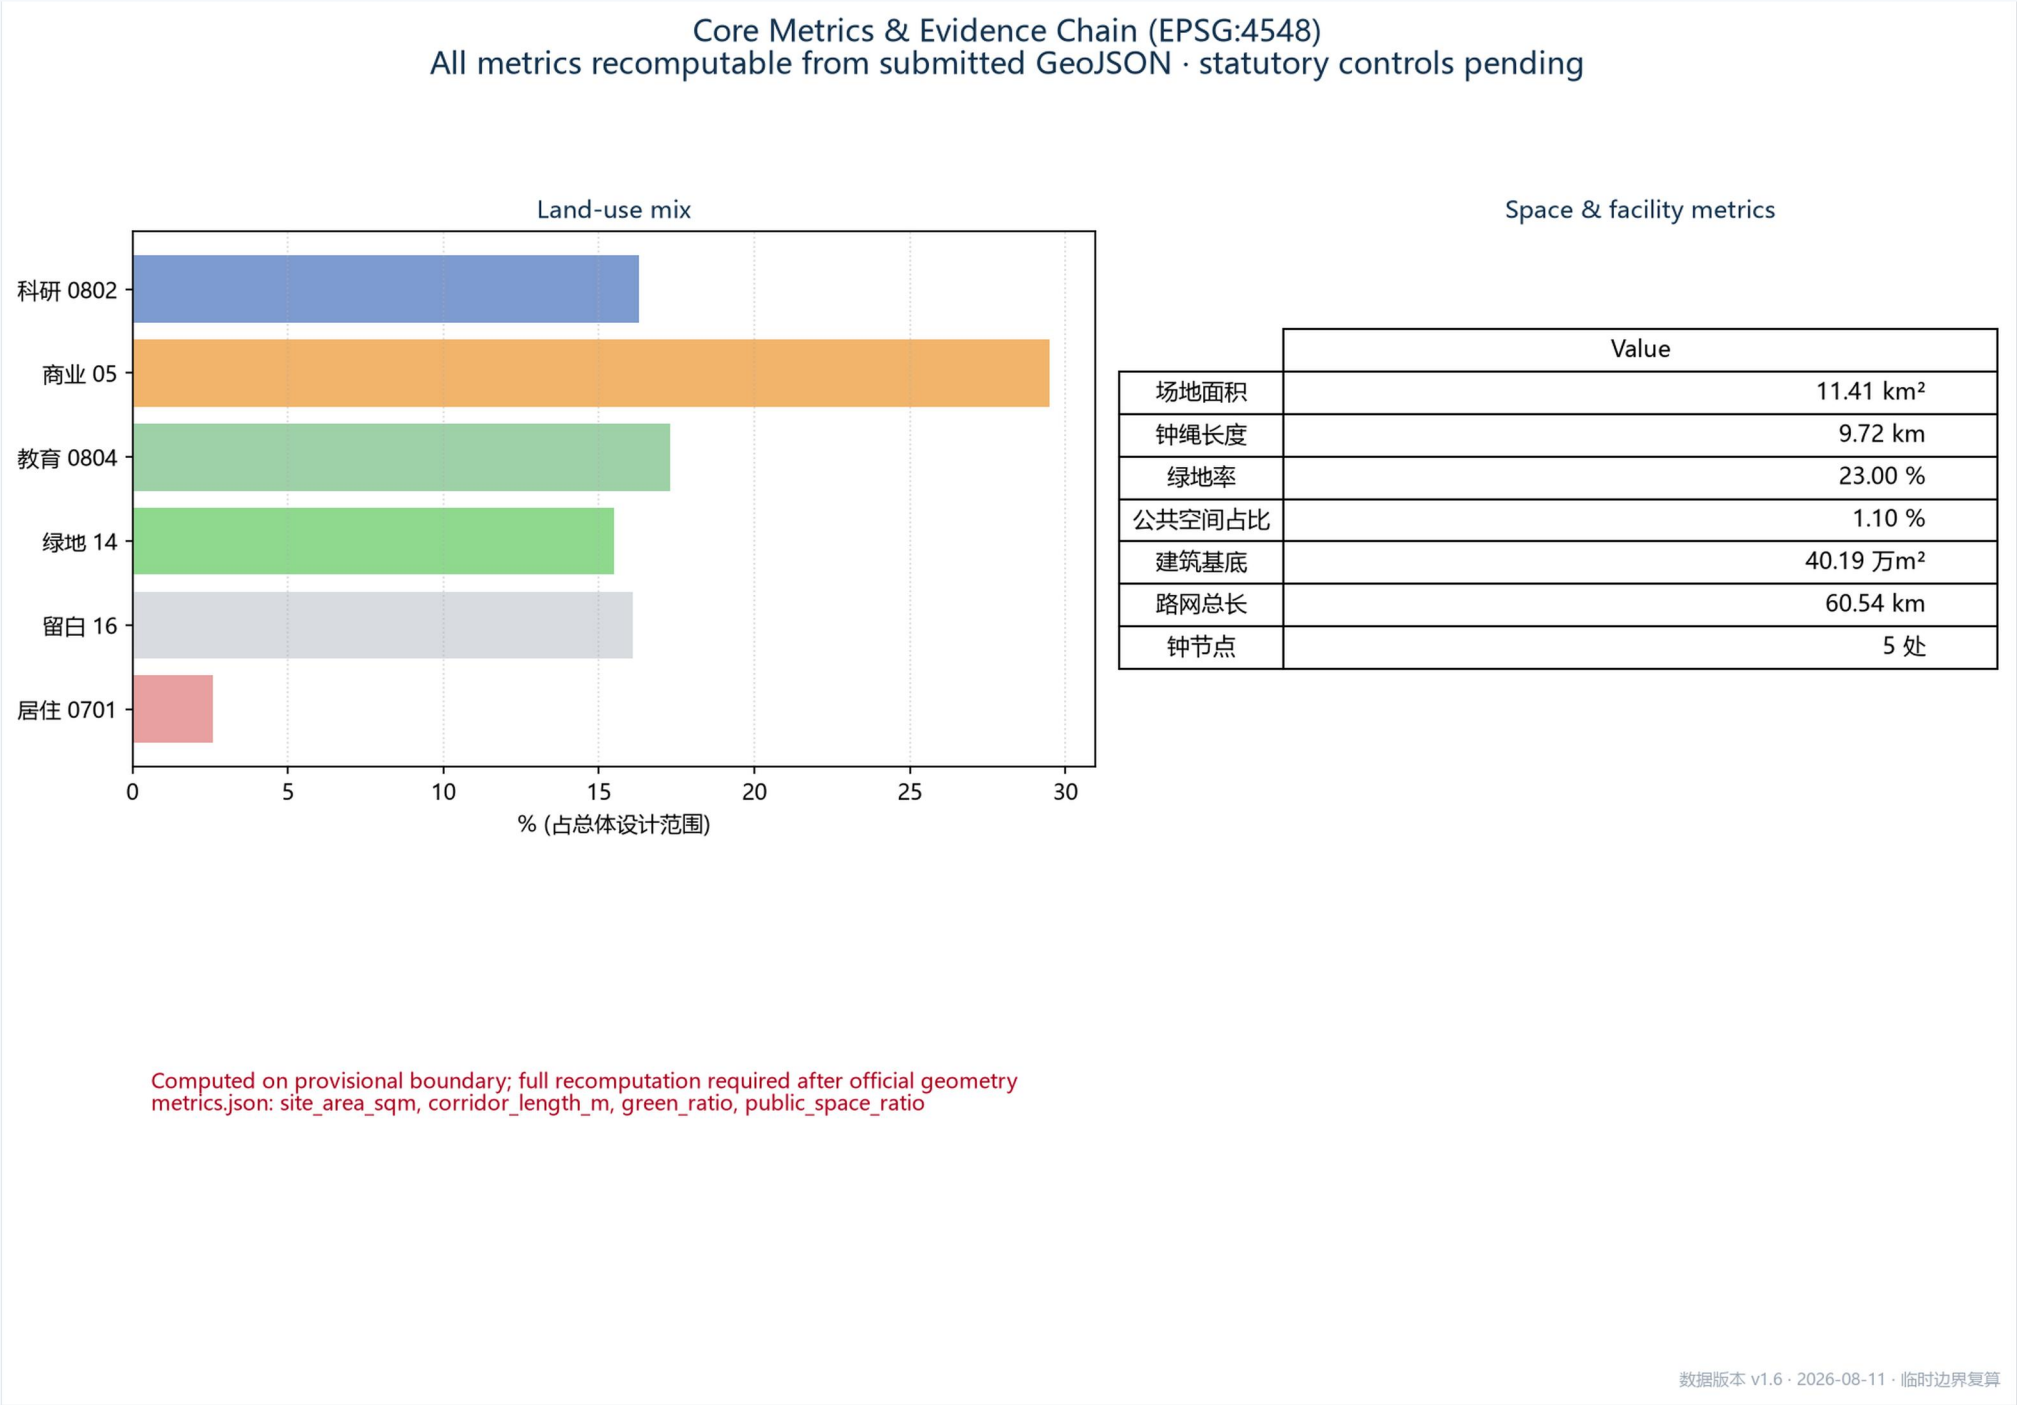

Pilot → expansion → normalization (conceptual)

Phases total ~10.4 km²; remaining ~1.0 km² is linear space (greenway/roads), delivered as linear works.

Metrics Recalculation

Recomputed in EPSG:4548 · formulas registered

23%

green ratio

1.1%

public space

40.2万m²

footprint (concept)

5

bell nodes

Statutory intensity metrics (FAR etc.) status=unknown pending official data; 27 metrics (23 known / 4 unknown) in metrics.json.

Risk & Compliance

Boundary · privacy · negative list · exit discipline

能力禁区（负面清单）

No facial/emotion recognition, no health diagnosis or credit scoring, no account precondition, no surveillance-expanding sensors

边界风险

Provisional boundary for discussion only; full recompute on official release; GAP list in missing_data_checklist.json

隐私与人机边界

No personal-data collection; reviewable/withdrawable content; Quiet Hours; human channel for elderly residents

退出纪律（三本台账）

Equipment / data-minimization / public-value ledgers, published annually with autumn decision record
