

END-TO-END OR NOT ACCESSIBLE

THE LEVEL ACCESS LINE: END-TO-END OR NOT ACCESSIBLE

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Authorised register · state expiry · closure · alternative · licensed maintenance · human release

FOUR EVIDENCE GATES BEFORE A ROUTE TURNS GREEN

- 01 **VERIFY ASSET & AUTHORITY**
A map icon is not an available asset
- 02 **VERIFY END-TO-END PATH**
Entrance, crossing, access, vertical link
- 03 **DEGRADE & ACTIVATE ALTERNATIVE**
Offline, outage, maintenance, water drills
- 04 **HUMAN RELEASE AFTER REPAIR**
Repair, review and using-unit signature stay distinct

EXCLUDED: AI control/release · personal traces · map-only green

90 DAY STOPPABLE PILOT

0 SENSITIVE FIELDS

12 SCENARIO CARDS

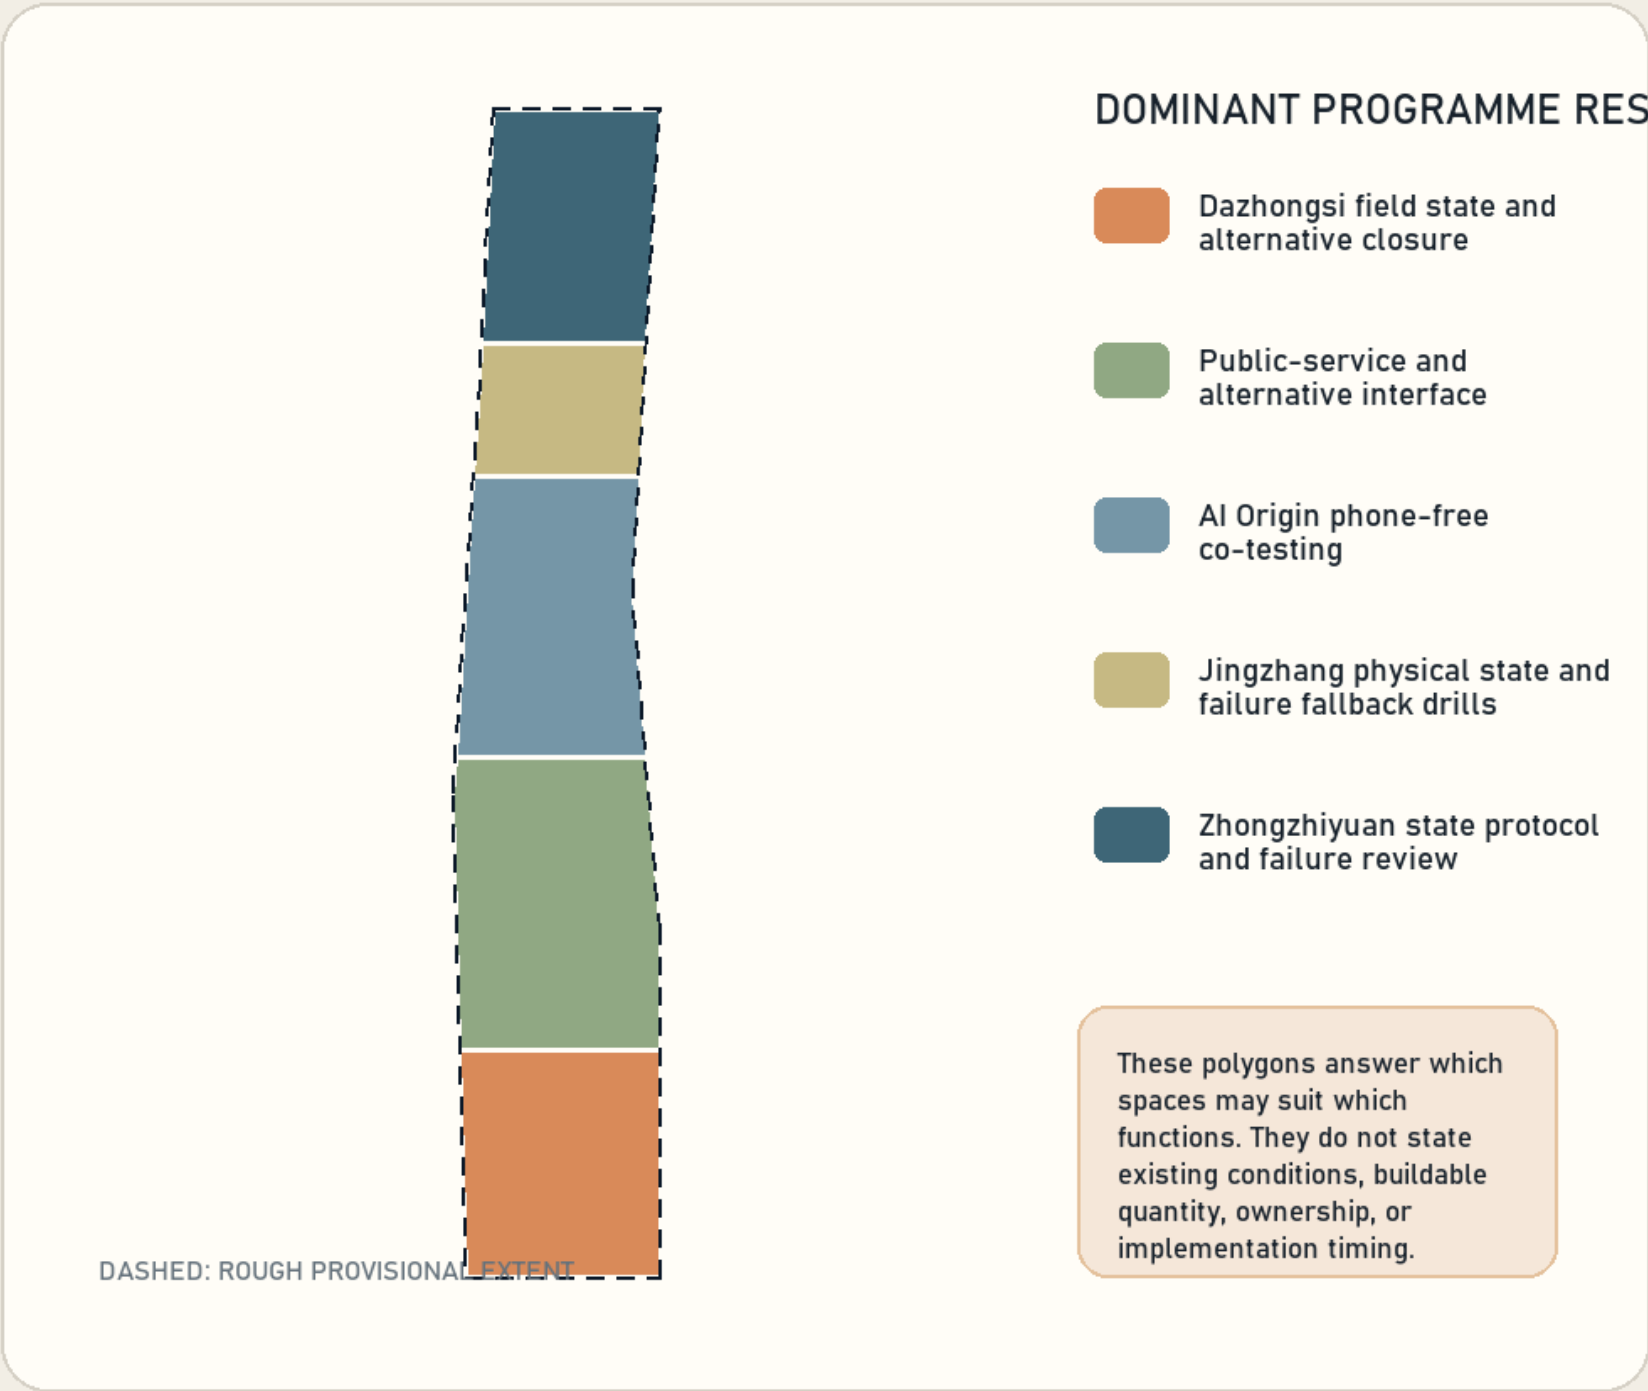

4 PUBLIC STATES

THREE SCALES AND FIVE RESEARCH OVERLAYS

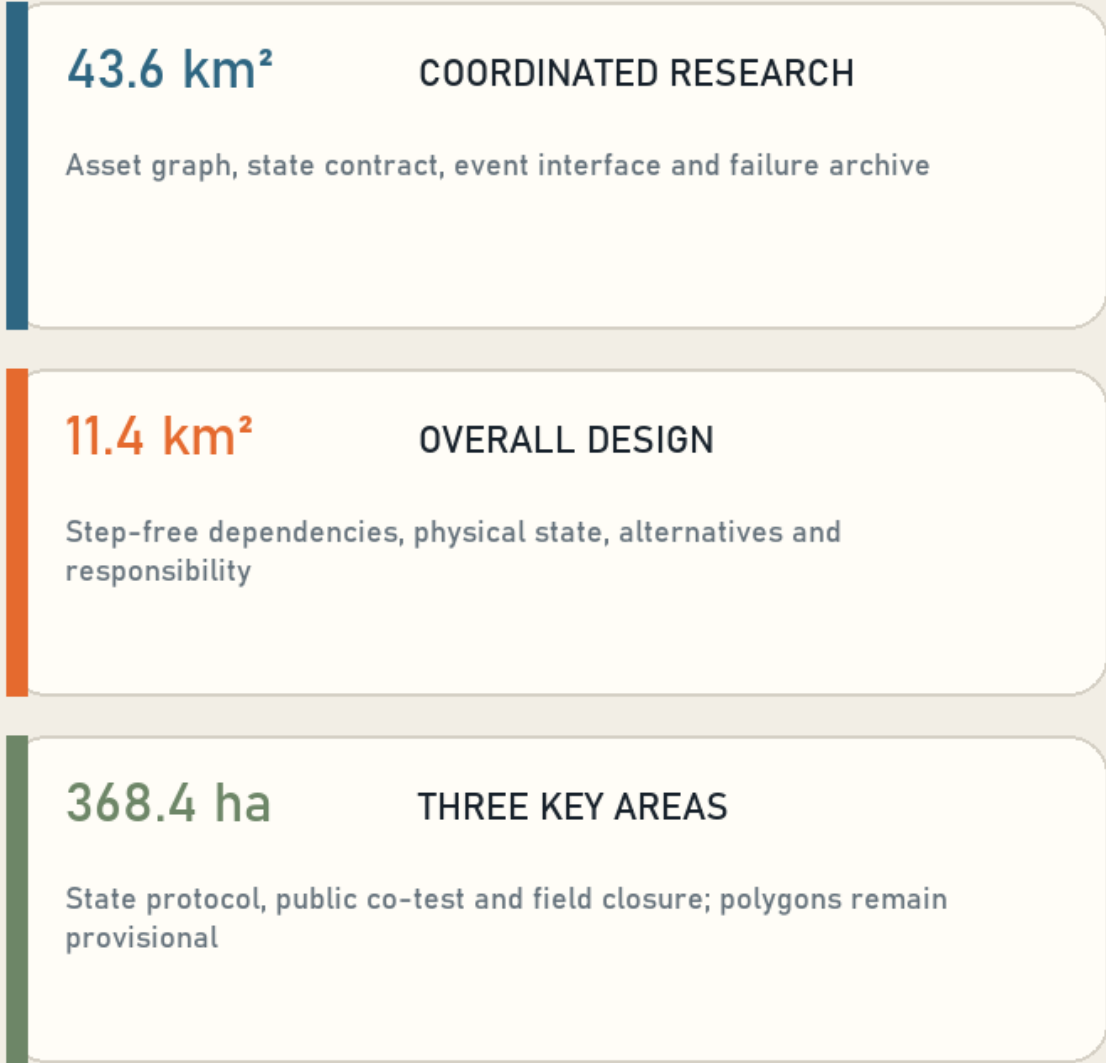

FIVE PROGRAMME OVERLAYS, NOT A PSEUDO-REGULATORY PLAN

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Complete topology for validation; statutory land use, intensity, roads, and ownership remain unknown

THREE SCALES / THREE EVIDENCE TYPES

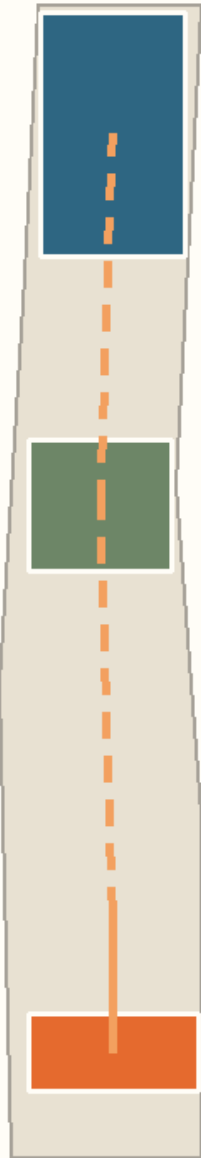

RULE: mark gaps UNKNOWN; never let AI invent control lines

NORTH PROTOCOL · CENTRAL INTERFACE · SOUTH CLOSURE

NORTH PROTOCOL · CENTRAL INTERFACE · SOUTHERN CLOSURE

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Three spaces show state protocols and test interfaces, not lift siting or procurement approval

RECTANGULAR KEY AREAS = ROUGH PROVISIONAL GEOMETRY

01 ZHONGZHIYUAN · STATE SANDBOX

Use synthetic conflicts to test expiry, duplicate reports, repair without review and erroneous auto-closure; AI cannot release an asset.

STATE: EVIDENCE ONLY

02 AI ORIGIN · PHONE-FREE CO-TEST

Co-test state signs, paper alternatives, intercom and human handover; collect no identity, health or continuous trace.

ZERO SENSITIVE FIELDS

03 DAZHONGSI · LEVEL ACCESS STATION

Audit asset, using unit, licensed maintenance and the whole path before drills of failure, alternative and recommissioning; no real-site promise.

CURRENT ASSET: VERIFY

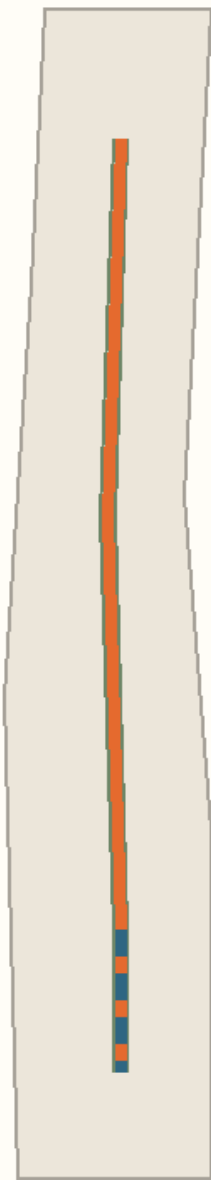

ANY REAL ASSET: re-site only after authorised register, field check, legal responsibility and alternative confirmation

STATE, ALTERNATIVE AND RECOMMISSIONING

END-TO-END ACCESS, NOT AN ICON

The responsibility line is not a measured accessible route, road redline, personal trace or real lift-state claim

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

PHONE-FREE LEVEL-ACCESS CORRIDOR

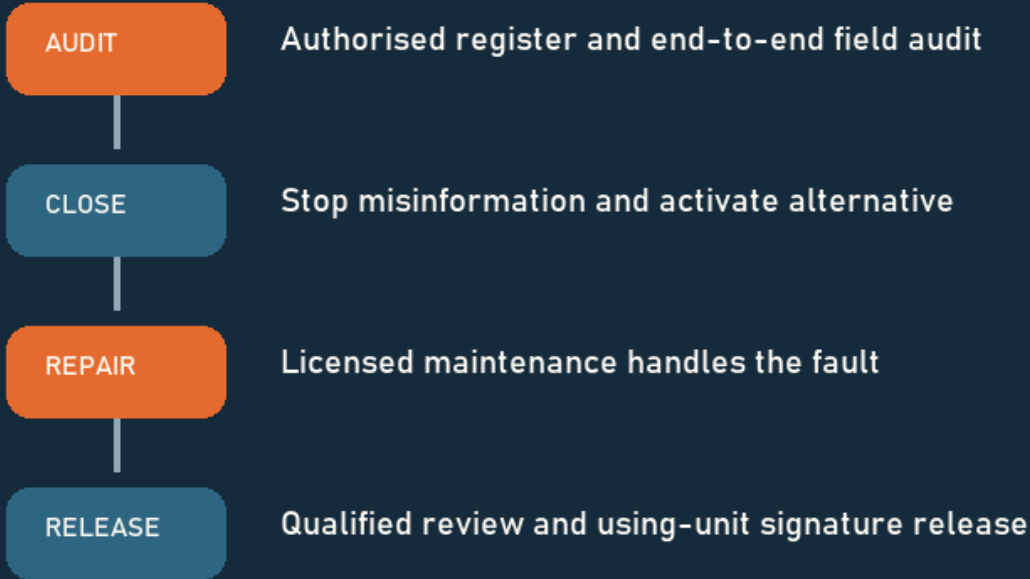

Use fixed state signs, paper alternatives, intercom and staff to verify end-to-end completion offline; phones are supplementary.

SIMULATED FAULT-FOYER HANDOVER

Shows failure fallback, alternative and accountability only; not a real asset, personal trace or engineering site.

LEVEL ACCESS SERVICE CHAIN

OFFLINE FALLBACK

Fixed state sign + paper alternative + intercom/phone + staff. Expired evidence turns grey; if the alternative also fails, close the route explicitly.

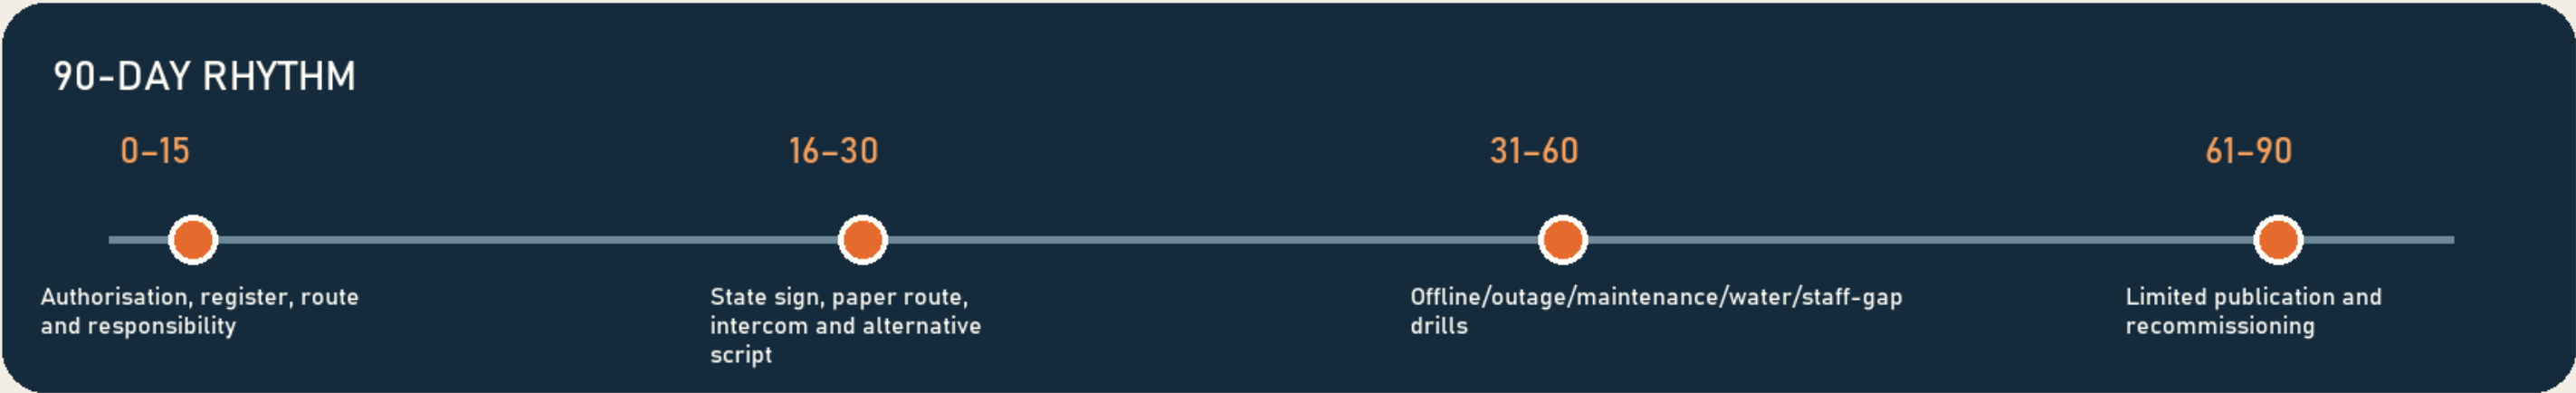

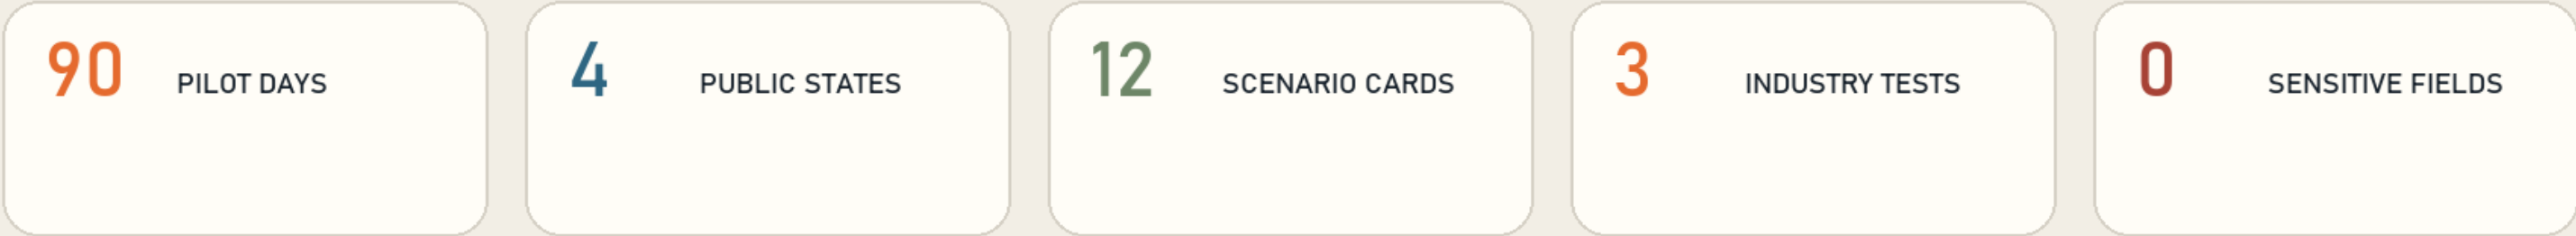

BAN: AI lift control or reuse; identity, health, image or continuous trace

90-DAY FALSIFICATION AND STOP GATES

90 DAYS IS A FALSIFICATION WINDOW, NOT A PROMISE

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Prove end-to-end access, safe fallback and human recommissioning before replication

METRICS THAT RESIST SELF-DECEPTION	
100%	Every critical link in a green route has fresh authorised evidence
100%	Expired states become UNKNOWN; no silent stale green
0	Identity, health, image, voice and continuous-trace fields
TBD	End-to-end step-free availability across service windows

- STOP IMMEDIATELY
- 1

Asset, using unit or legal responsibility cannot be verified
- 2

Only vertical link fails and no alternative works
- 3

Repair record is misread as recommissioning
- 4

Expired, offline or conflicting state stays green

12 SCENARIOS AND 7 CO-DESIGN GROUPS

01

First asset audit

02

Daily state confirmation

03

No-registration public report

04

Planned-maintenance notice

05

Sudden-fault closure

06

Alternative activation

07

Licensed repair

08

Human recommissioning

09

Offline operation

10

Night/weekend windows

11

Fire/emergency boundary

12

Monthly public audit

7 CO-DESIGN GROUPS

Wheelchair/mobility-aid user

Older person

Temporarily injured person

Caregiver with stroller

Visitor with luggage

Site/station duty staff

Maintenance/inspection/accessibility professional

AI may flag state conflicts, cluster recurrence and assist tickets; it cannot control, stop, repair, inspect or release an asset.

METHOD LIBRARY, RISKS, AND STATUS

BRICK SCHEMA	Graph spaces, equipment, service paths and responsibility
ODK COLLECT	Offline audits, drafts and later synchronisation
FIXMYSTREET	Route location-based faults to accountable actors
STATE EVENTS	Append-only audit; never overwrite repair/recommissioning history
OPEN311	Connect reports, assignments and closure with open requests
PRC / BEIJING	Accessibility maintenance and lift use, maintenance and inspection boundaries

This is an open co-creation proposal on rough provisional geometry. Real lift/platform-lift assets, using units, licensed maintenance, states and end-to-end availability await authorised field audit.
