京张五分钟

THE READY AED LINE

不是再画一个点，而是证明它真的就绪

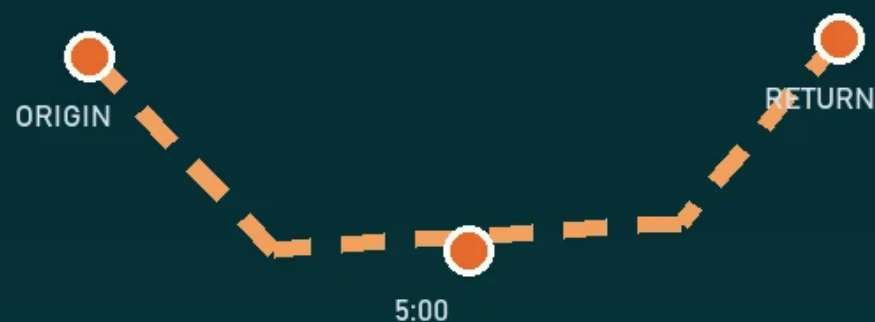

A READINESS PROOF, NOT ANOTHER MAP POINT

拨打 120 · 找到 · 取出 · 往返 · 复位

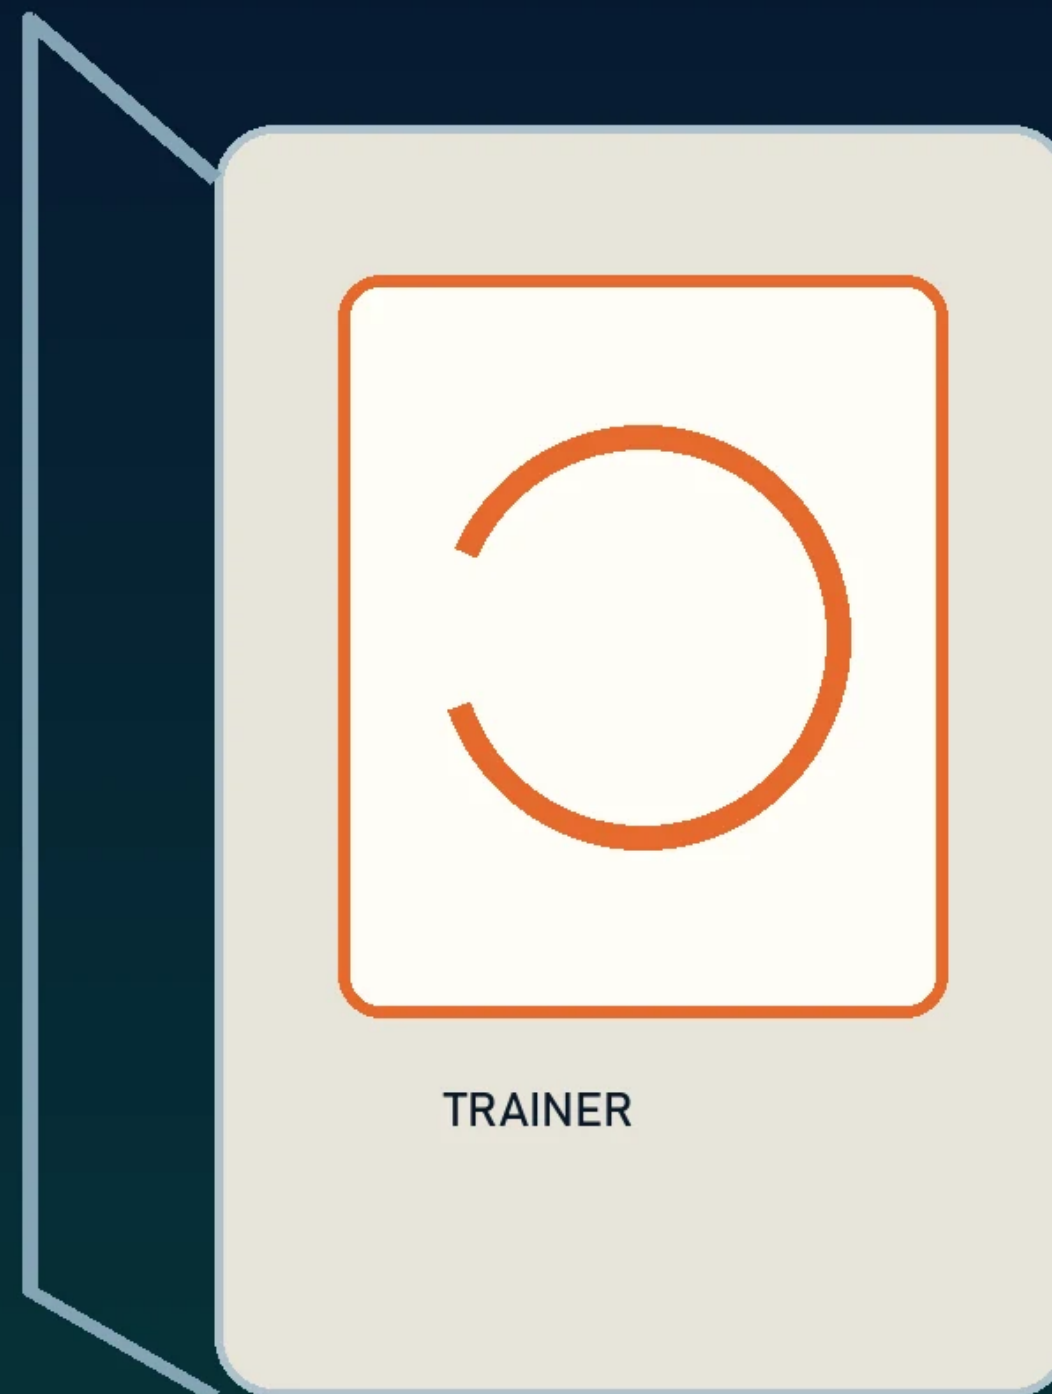

CALL 120 · FIND · RETRIEVE · RETURN · RESET

5:00

MEASURED WITH A TRAINING AED — NEVER A SURVIVAL CLAIM

OPEN CO-CREATION PROPOSAL · ROUGH PROVISIONAL EXTENT · NOT AN APPROVAL OR BUILT PROJECT

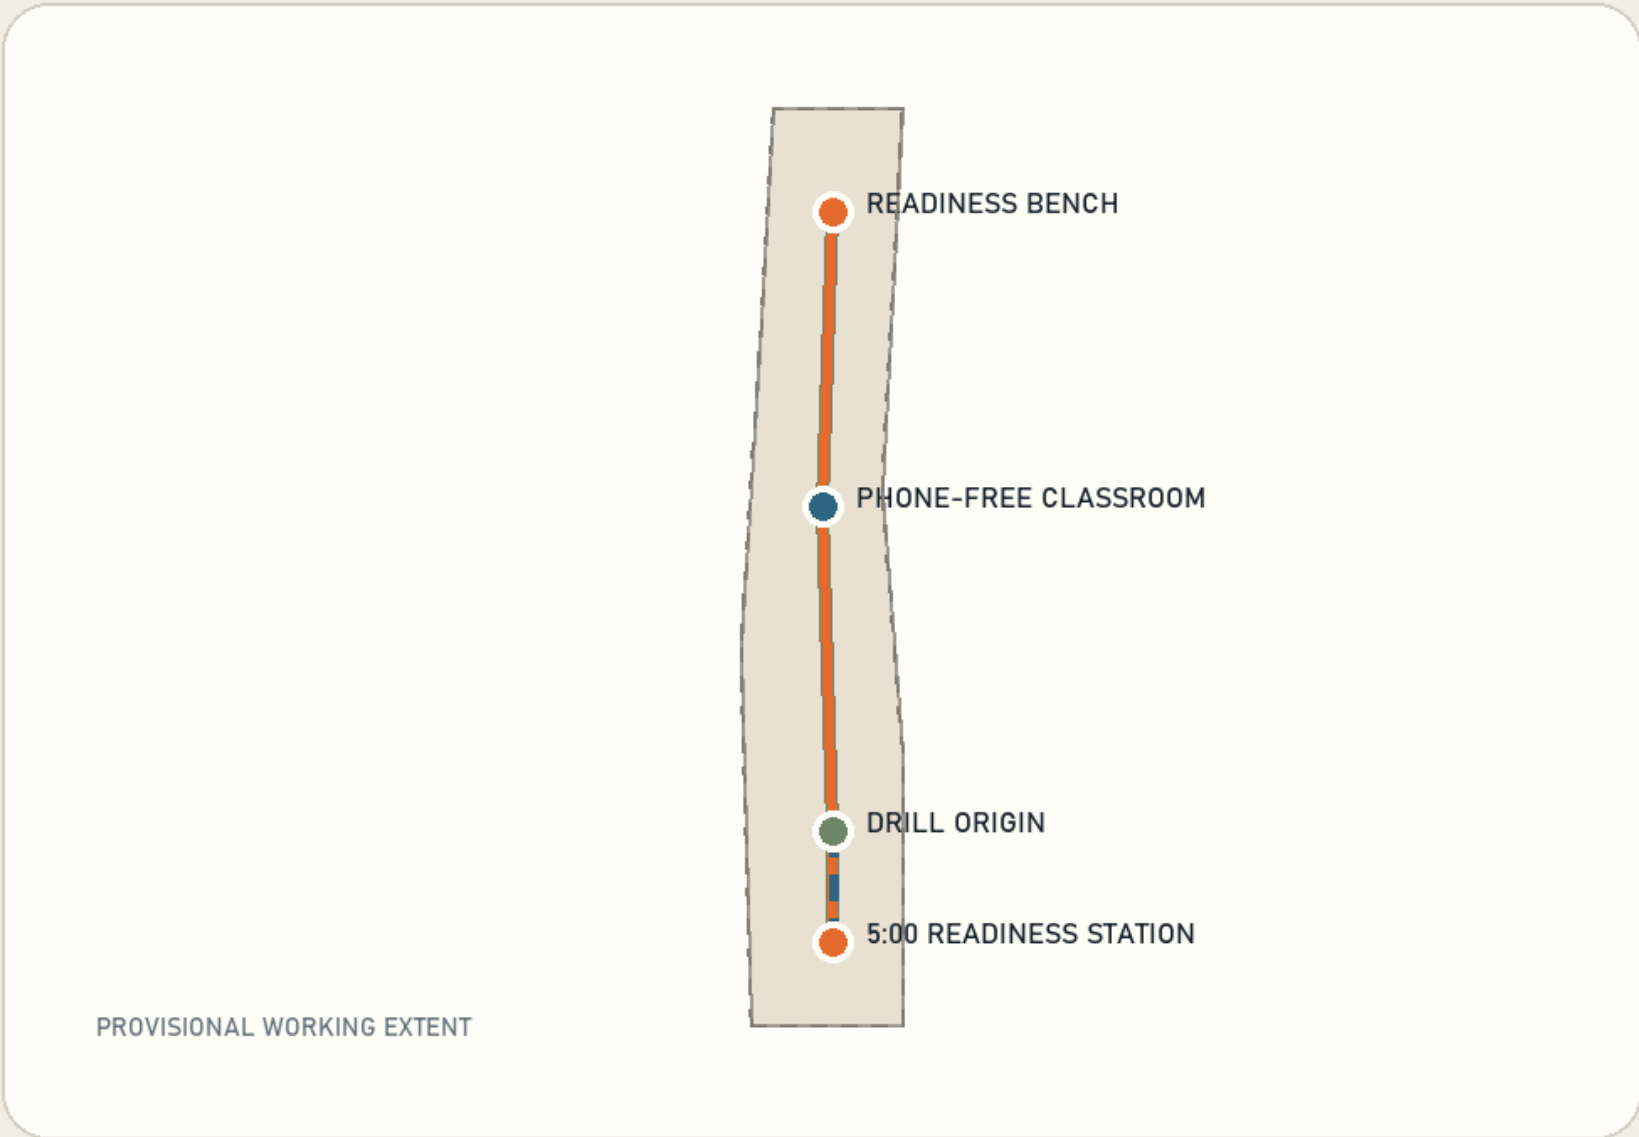

PROVE READINESS BEFORE MARKING AVAILABLE

THE READY AED LINE: PROVE READINESS BEFORE MARKING AVAILABLE

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Open hours · no lock or scan · physical wayfinding · inspection · return drill · reset

FOUR EVIDENCE GATES BEFORE A POINT TURNS GREEN

- 01 **VERIFY ASSET & HOURS**
A map point is not current access
- 02 **FIND & RETRIEVE**
Physical signs, no lock, no scan
- 03 **TRAINER RETURN DRILL**
Weekday, night and weekend separately
- 04 **RESET BEFORE RELEASE**
Restock, record, verify, re-release

EXCLUDED: AI clinical decisions · patient identity · map-only green

90 DAY STOPPABLE PILOT

0 PATIENT ID FIELDS

12 SCENARIO CARDS

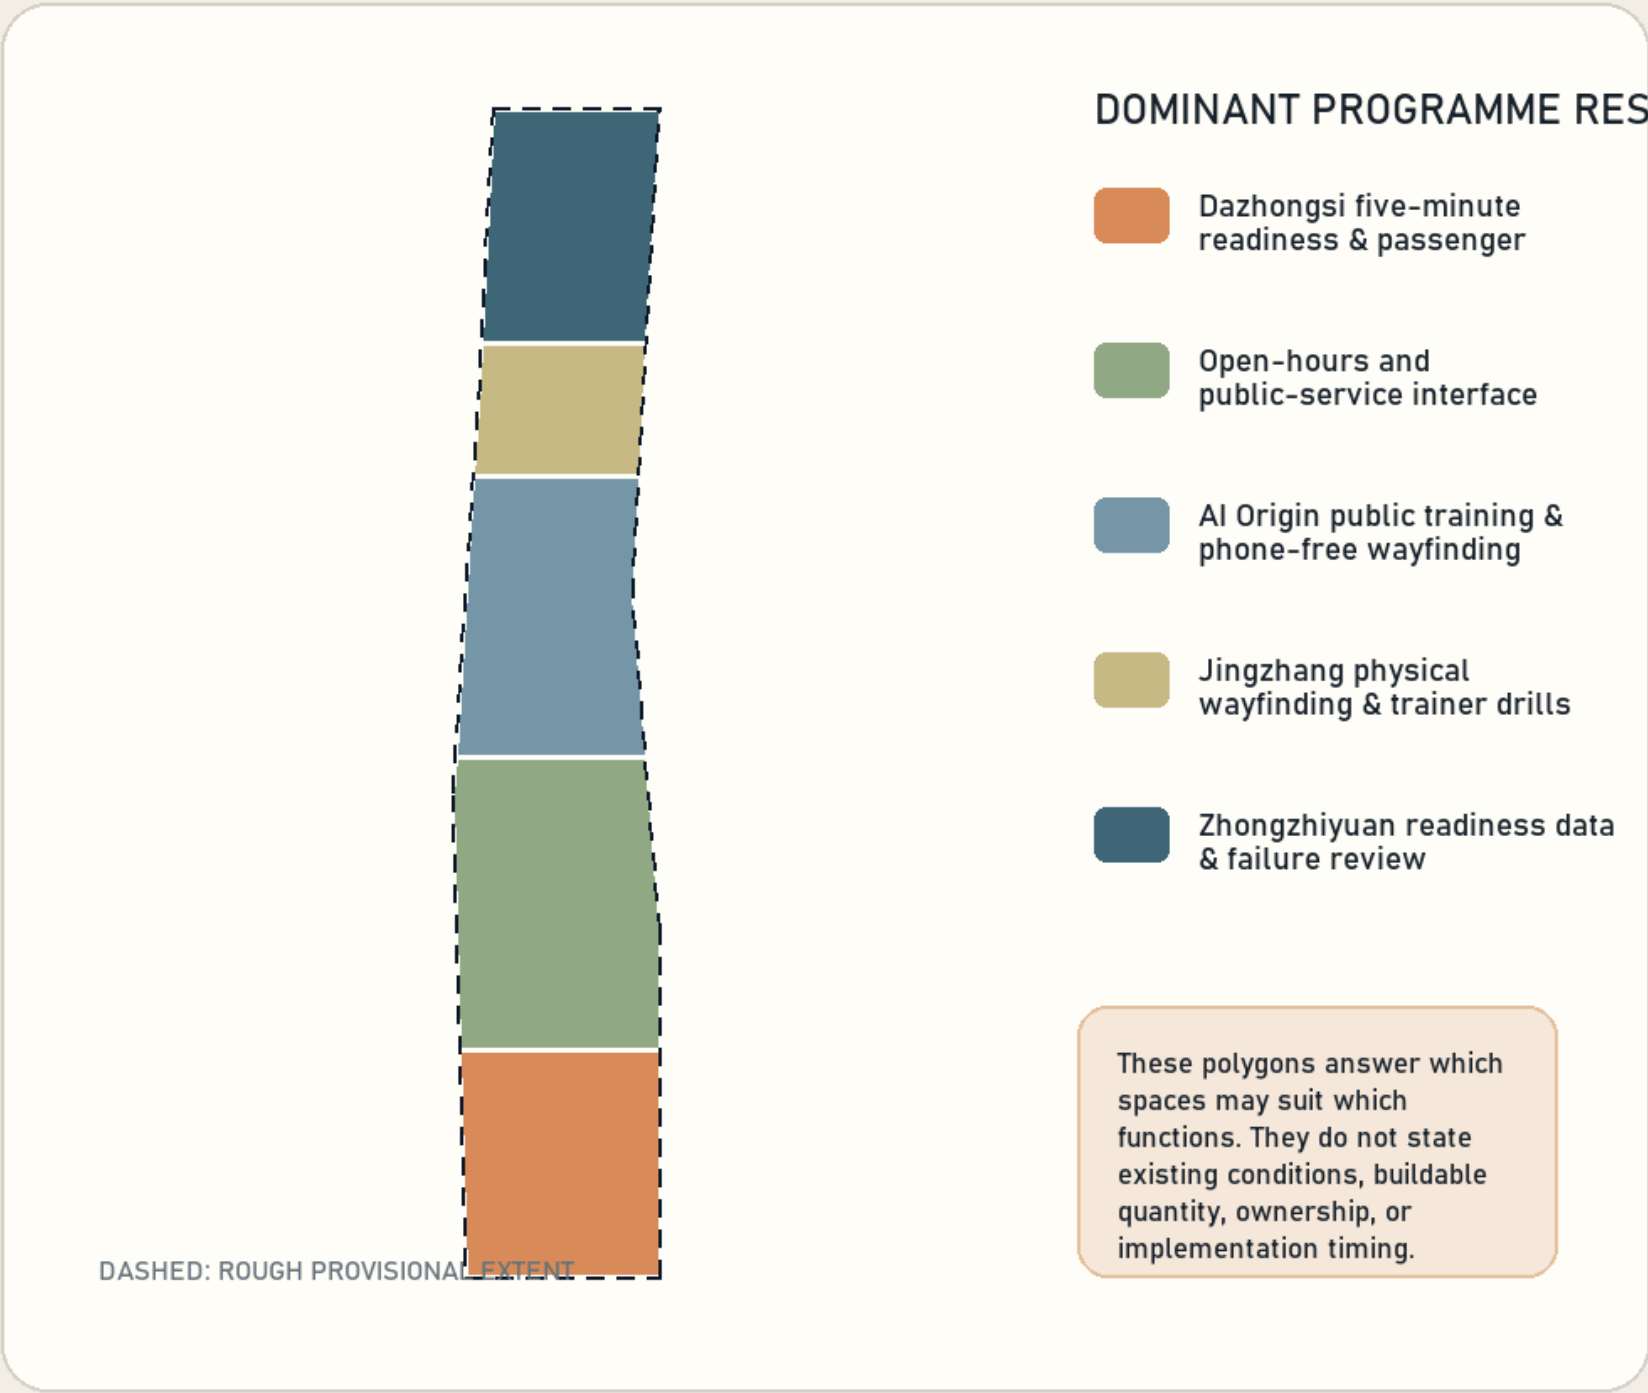

8 READINESS CONDITIONS

THREE SCALES AND FIVE PROGRAMME OVERLAYS

FIVE PROGRAMME OVERLAYS, NOT A PSEUDO-REGULATORY PLAN

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Complete topology for validation; statutory land use, intensity, roads, and ownership remain unknown

THREE SCALES / THREE EVIDENCE TYPES

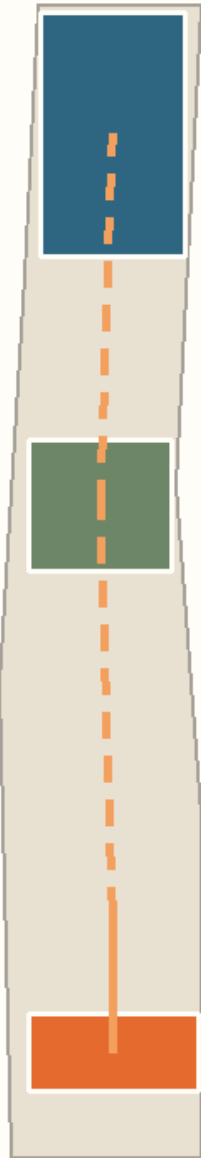

RULE: mark gaps UNKNOWN; never let AI invent control lines

NORTH VALIDATION · CENTRAL TRAINING · SOUTH DRILL

NORTH VALIDATION · CENTRAL TRAINING · SOUTHERN DRILL

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Three spaces show readiness protocols and test interfaces, not AED siting or procurement approval

RECTANGULAR KEY AREAS = ROUGH PROVISIONAL GEOMETRY

01 ZHONGZHIYUAN · READINESS BENCH

Use synthetic conflicts to test asset, hours, inspection and reset fields; AI cannot turn a point green by itself.

READINESS: EVIDENCE ONLY

02 AI ORIGIN · PHONE-FREE CLASSROOM

Train physical wayfinding, calling 120, trainer retrieval and accessible handover; collect no patient identity.

ZERO PATIENT IDENTITY

03 DAZHONGSI · 5:00 READINESS STATION

Audit asset, hours and roles before weekday, night and weekend trainer return drills; no real-site promise.

CURRENT SITE: VERIFY

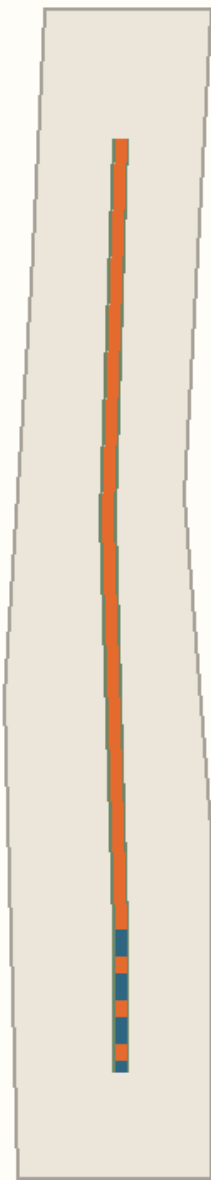

ANY REAL SITE: re-site only after authorised field audit, device check, hours confirmation and signed responsibility

TRAINER RETURN AND READINESS RESPONSIBILITY

MEASURE THE RETURN TRIP, NOT A RADIUS

The drill line is not an ambulance route, patient trace, road redline or real AED coverage claim

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

PHONE-FREE CORRIDOR

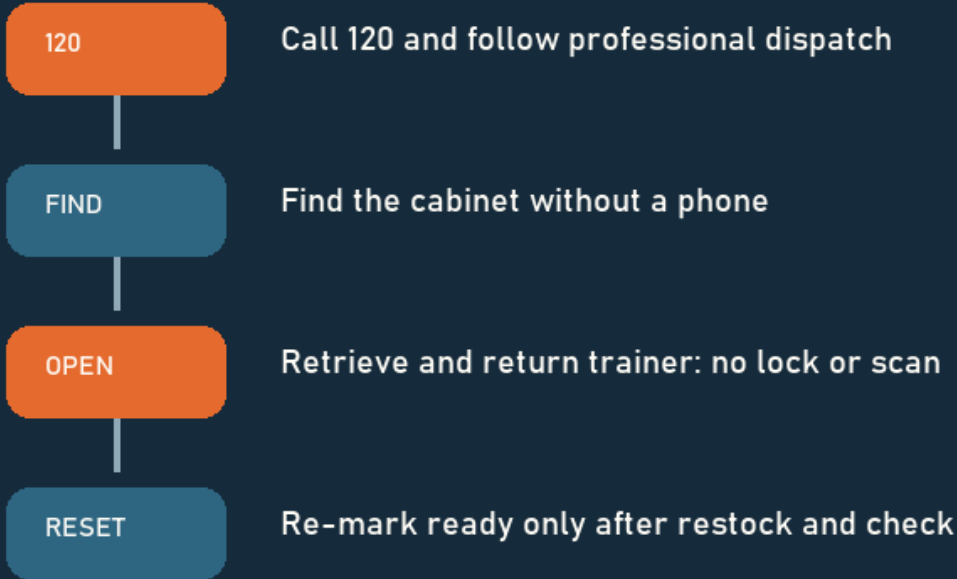

Use fixed signs, entrance plans and a trainer to test find, retrieve and return; phone navigation is supplementary.

DRILL ORIGIN-FOYER RETURN

Shows only trainer return and handover responsibility; not a real patient, emergency vehicle or AED siting.

FIVE-MINUTE READINESS CHAIN

OFFLINE FALLBACK

Fixed signs + entrance plan + paper inspection + site staff/120. If readiness cannot be verified, show a verified alternative and do not mark green.

BAN: AI diagnosis/overriding 120; patient identity or health data

90-DAY FALSIFICATION AND STOP GATES

90 DAYS IS A FALSIFICATION WINDOW, NOT A PROMISE

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Prove retrievability, usability, and reset before replication

90

3

INDUSTRY TESTS

0

PATIENT ID FIELDS

METRICS THAT RESIST SELF-DECEPTION	
100%	Green points have asset, hours, inspection and reset evidence
100%	Retrieval has no lock or scan and continuous physical signs
0	Patient identity, health, image, location and continuous trace fields
TBD	Weekday/night/weekend trainer return P50/P90

- STOP IMMEDIATELY
- 1

Asset, hours or responsibility cannot be verified
- 2

Cabinet is locked/scanned or wayfinding breaks
- 3

Point is green without passing return drills
- 4

Point remains available before restock/reset

12 SCENARIOS AND 7 ACCOUNTABLE PERSONAS

01

Asset and hours audit

02

Continuous physical signs

03

No-lock/no-scan retrieval

04

Device and accessory check

05

Weekday trainer return

06

Night trainer return

07

Weekend trainer return

08

Accessible handover

09

120 voice boundary

10

Post-use restock/reset

11

Failed-point alternative

12

Readiness evidence review

7 ACCOUNTABLE PERSONAS

Incident witness

No-smartphone retriever

Accessible retriever

Site duty staff

AED asset owner

Inspection/reset staff

120 / first-aid training professional

AI may flag conflicts, aggregate readiness evidence and assist tickets; it cannot diagnose, replace 120, decide treatment or turn a point green by itself.

METHOD LIBRARY, RISKS, AND STATUS

OPENAEDMAP	Separate AED points, attributes, status and display
OPENROUTESERVICE	Test walking return networks instead of circular radii
FIXMYSTREET	Route location-based faults to accountable actors
ODK COLLECT	Offline field audits, constrained fields and timestamps
OPEN311	Connect reports, assignments and closure with open requests
NHC / BEIJING	Public access, no lock/scan, inspection, roles and 120 boundaries

This is an open co-creation proposal. Spatial content is conceptual and the extent is rough/provisional. Real AED points, partners, open hours and five-minute performance await authorised field audit. Five minutes is a trainer return threshold only.
