

CONCEPTUAL VISUAL / 概念视觉

京张安心充

THE SAFE CHARGE LINE

停车、充换电与异常响应的责任基础设施

ACCOUNTABLE STOP-CHARGE RELIABILITY INFRASTRUCTURE

个人使用与报障 · 专业企业保安全 · 政府社区协调监督

USE & REPORT · PROFESSIONAL SAFETY · PUBLIC COORDINATION

OPEN CO-CREATION PROPOSAL · ROUGH PROVISIONAL EXTENT · NOT AN APPROVAL OR BUILT PROJECT

AUDIT FIRST, THEN ASSIGN RESPONSIBILITY

THE SAFE CHARGE LINE: AUDIT FIRST, THEN ASSIGN RESPONSIBILITY

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Historic-facility audit · open tariff and status · local fail-safe · battery retirement

FOUR GATES BEFORE ANY REAL OPERATION

- 01 **AUDIT WHAT EXISTS**
Historic reports are not current status
- 02 **SIGN RESPONSIBILITY**
Operator, site and parking roles are distinct
- 03 **TEST FAILURE & ACCESS**
Offline safety, emergency stop, accessibility
- 04 **RUN SMALL & STOPPABLE**
Status, tariff, response and retirement auditable

EXCLUDED: AI re-energisation · rider profiling · community battery repair

90 DAY STOPPABLE PILOT

0 RIDER ID FIELDS

12 SCENARIO CARDS

3 INDUSTRY TESTS

THREE SCALES AND FIVE PROGRAMME OVERLAYS

FIVE PROGRAMME OVERLAYS, NOT A PSEUDO-REGULATORY PLAN

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Complete topology for validation; statutory land use, intensity, roads, and ownership remain unknown

THREE SCALES / THREE EVIDENCE TYPES

RULE: mark gaps UNKNOWN; never let AI invent control lines

NORTH VALIDATION · CENTRAL TRANSPARENCY · SOUTH HANDOVER

NORTH VALIDATION · CENTRAL TRANSPARENCY · SOUTHERN HANDOVER

Three responsibility stations show prototypes and interfaces, not new-equipment siting or approval

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

RECTANGULAR KEY AREAS = ROUGH PROVISIONAL GEOMETRY

01

ZHONGZHIYUAN · FAIL-SAFE BENCH

Controlled tests for network loss, power loss, over-temperature, communication failure and manual stop; AI cannot re-energise.

LOCAL PROTECTION: FIRST

02

AI ORIGIN · OPEN TARIFF HALL

Separate energy, service, parking and deposit charges; fixed signs, telephone and non-app access stay available.

PRICE EXPLANATION: REQUIRED

03

DAZHONGSI · STOP-CHARGE STATION

Audit the 2018 cabinets and 2026 parking interface first; name operator, site, parking and 24h response roles.

CURRENT STATUS: VERIFY

ANY REAL SITE: re-site only after field, ownership, power, product, fire and accessibility review

CLEAR PASSAGE AND STOP-CHARGE RESPONSIBILITY

PROTECT PASSAGE BEFORE ADDING STOP-CHARGE SERVICE

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

The responsibility line is not a rider trace, cable alignment, transport route or road redline

CLEAR-PASSAGE LEARNING CO

Fixed wayfinding, status, tariffs and safety education; real electrical and battery interfaces remain professionally segregated.

PARKING-DAZHONGSI SERVICE

Shows only the responsibility link between parking order and stop-charge operation; not a vehicle, logistics or construction route.

OPERATING RESPONSIBILITY CHAIN

OFFLINE FALLBACK

Local protection stops first; fixed status sign + 24h phone + staff barrier/alternative. If safety is uncertain, keep power off.

PROHIBITED: AI bypasses protection; equipment blocks accessible, egress or fire routes

90-DAY FALSIFICATION AND STOP GATES

90 DAYS IS A FALSIFICATION WINDOW, NOT A PROMISE

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Prove accountability, privacy, cost, and stoppability before replication

90

PILOT DAYS

0

RIDER ID FIELDS

12

SCENARIO CARDS

3

INDUSTRY TESTS

7

IMMEDIATE STOP GATES

METRICS THAT RESIST SELF-DECEPTION	
100%	Status sign shows operator, price, update time and 24h phone
100%	Basic status, fault report and appeal work without an app
0	Rider identity, platform, order, plate, face and continuous trace fields
TBD	Full cost/service-hour: labour + site + maintenance + emergency + retirement

- STOP IMMEDIATELY
- 1

Operator or safety lead is missing
- 2

Cannot stop safely offline
- 3

Tariff is opaque or status misleading
- 4

No isolation and retirement chain for abnormal batteries

12 SCENARIOS AND 7 ACCOUNTABLE PERSONAS

01

Historic audit

02

Time-banded parking count

03

Tariff breakdown

04

Status freshness

05

Offline safety

06

Battery isolation

07

24h response

08

Accessible passage

09

Capacity and queue

10

Battery retirement

11

Appeal and refund

12

Reliability review

7 ACCOUNTABLE PERSONAS

Delivery rider

Cycling commuter

No-smartphone user

Accessibility user

Parking manager

Operations maintainer

Fire / electrical / insurance / regulator

AI may flag, aggregate and assist tickets; deterministic protection and people retain final authority for shutdown, re-energisation and safety acceptance.

METHOD LIBRARY, RISKS, AND STATUS

OCPI	Location, operator, status, tariff and event layers
OPEN CHARGE MAP	Separate locations from operators and retain corrections
FIXMYSTREET	Route location-based faults to accountable actors
ODK COLLECT	Offline field audits, constrained fields and timestamps
OPENEPCIS	Object lifecycle, event, place and responsibility semantics
BEIJING / NATIONAL	Operating, fire, 24h response and battery retirement boundaries

This is an open co-creation proposal. Spatial content is conceptual and the extent is rough/provisional. A real pilot requires written confirmation of operator, site, parking, power, product, fire and emergency conditions.
