

BOUNDED SKY | PUBLIC AIRSPACE PROTOCOL

ONE LINE · THREE CHAMBERS · FIVE LEDGERS · TWO WINGS

BOUNDED SKY | Public Airspace Protocol

Bound public cost before releasing aerial capability

FIVE PUBLIC BUDGETS

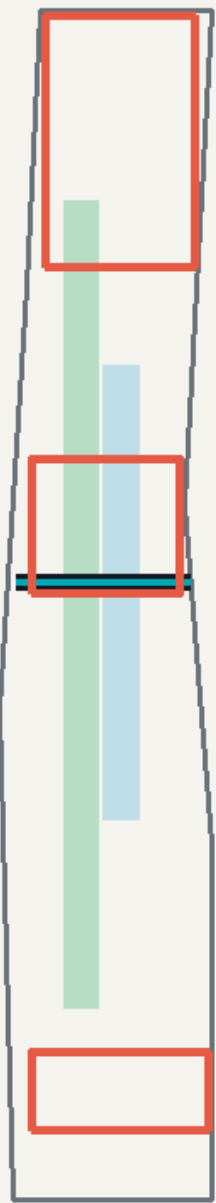

- Safety risk
- Quiet exposure
- Energy and carbon
- Ground occupation
- Public time

NOT A ROUTE | PERMIT | FIELD RESULT

Provisional locator only; every yard can close, fall back, hear appeals, and replay decisions

THREE TEST YARDS, NOT AN OPEN CORRIDOR

Each chamber has its own gate, human owner, and exit condition

01 ZHONGZHIYUAN | VERIFY

closed test · identity · takeover · removal

STOP_IF

02 AI ORIGIN | NEGOTIATE

quiet time · fairness · appeal · replay

STOP_IF

03 DAZHONGSI | SERVE

transit · staffed handover · ground fallback

STOP_IF

Altitude, route, equipment, and operation remain unauthorized

GROUND FIRST: MOBILITY, BLUE-GREEN, AND QUIET EDGES

Aerial service must prove it does not displace ordinary city life

GROUND RIGHTS

- 01 CONTINUOUS WALKING
must remain continuous
- 02 BLUE-GREEN QUIET
pause for events and seasons
- 03 ORDINARY LOGISTICS
equivalent path required
- 04 HUMAN TAKEOVER
freeze new tasks on network loss

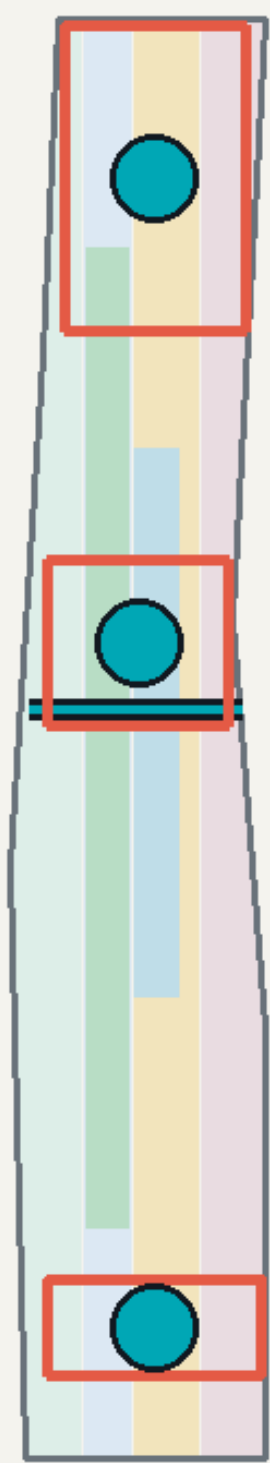

NO GROUND FALLBACK = NO FLIGHT

CITY AGENT | FIVE BUDGETS AND REPLAYABLE GOVERNANCE

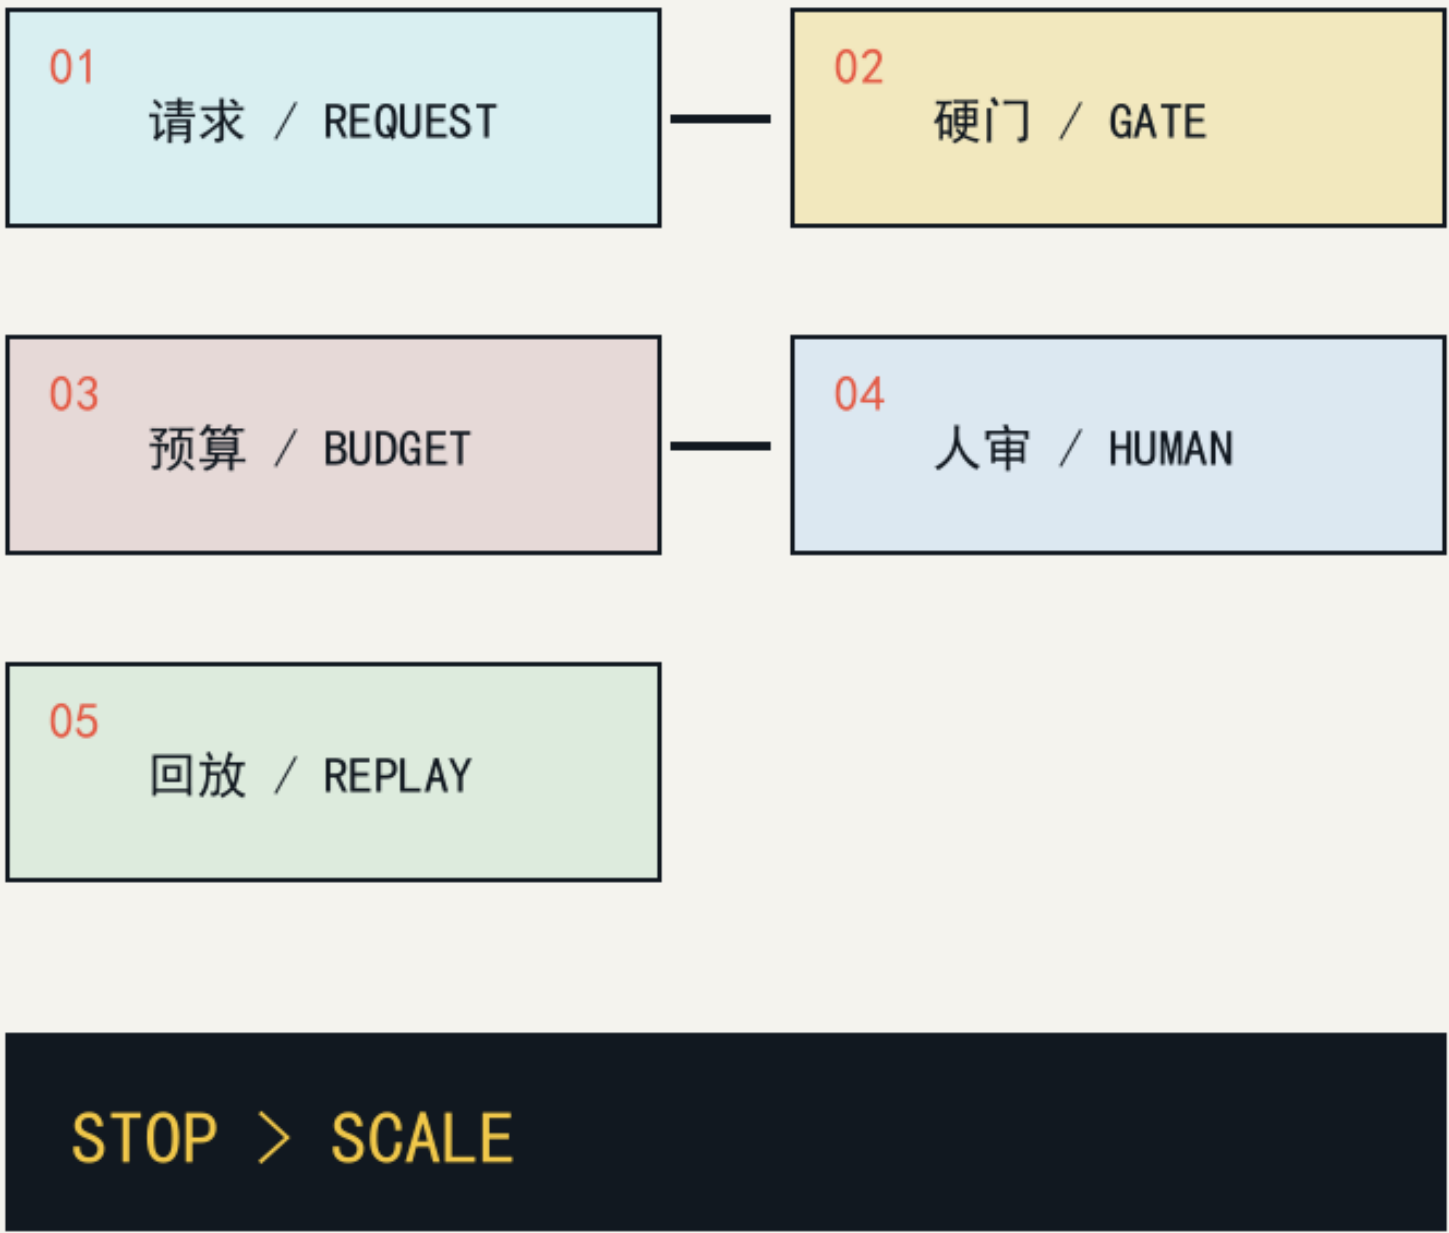

Success is not more flights; it is explainable, stoppable, and recoverable

ONE LINE · THREE CHAMBERS · FIVE LEDGERS · TWO WINGS

Space follows protocol; airspace yields to ground life

PUBLIC ALLOCATION LOOP

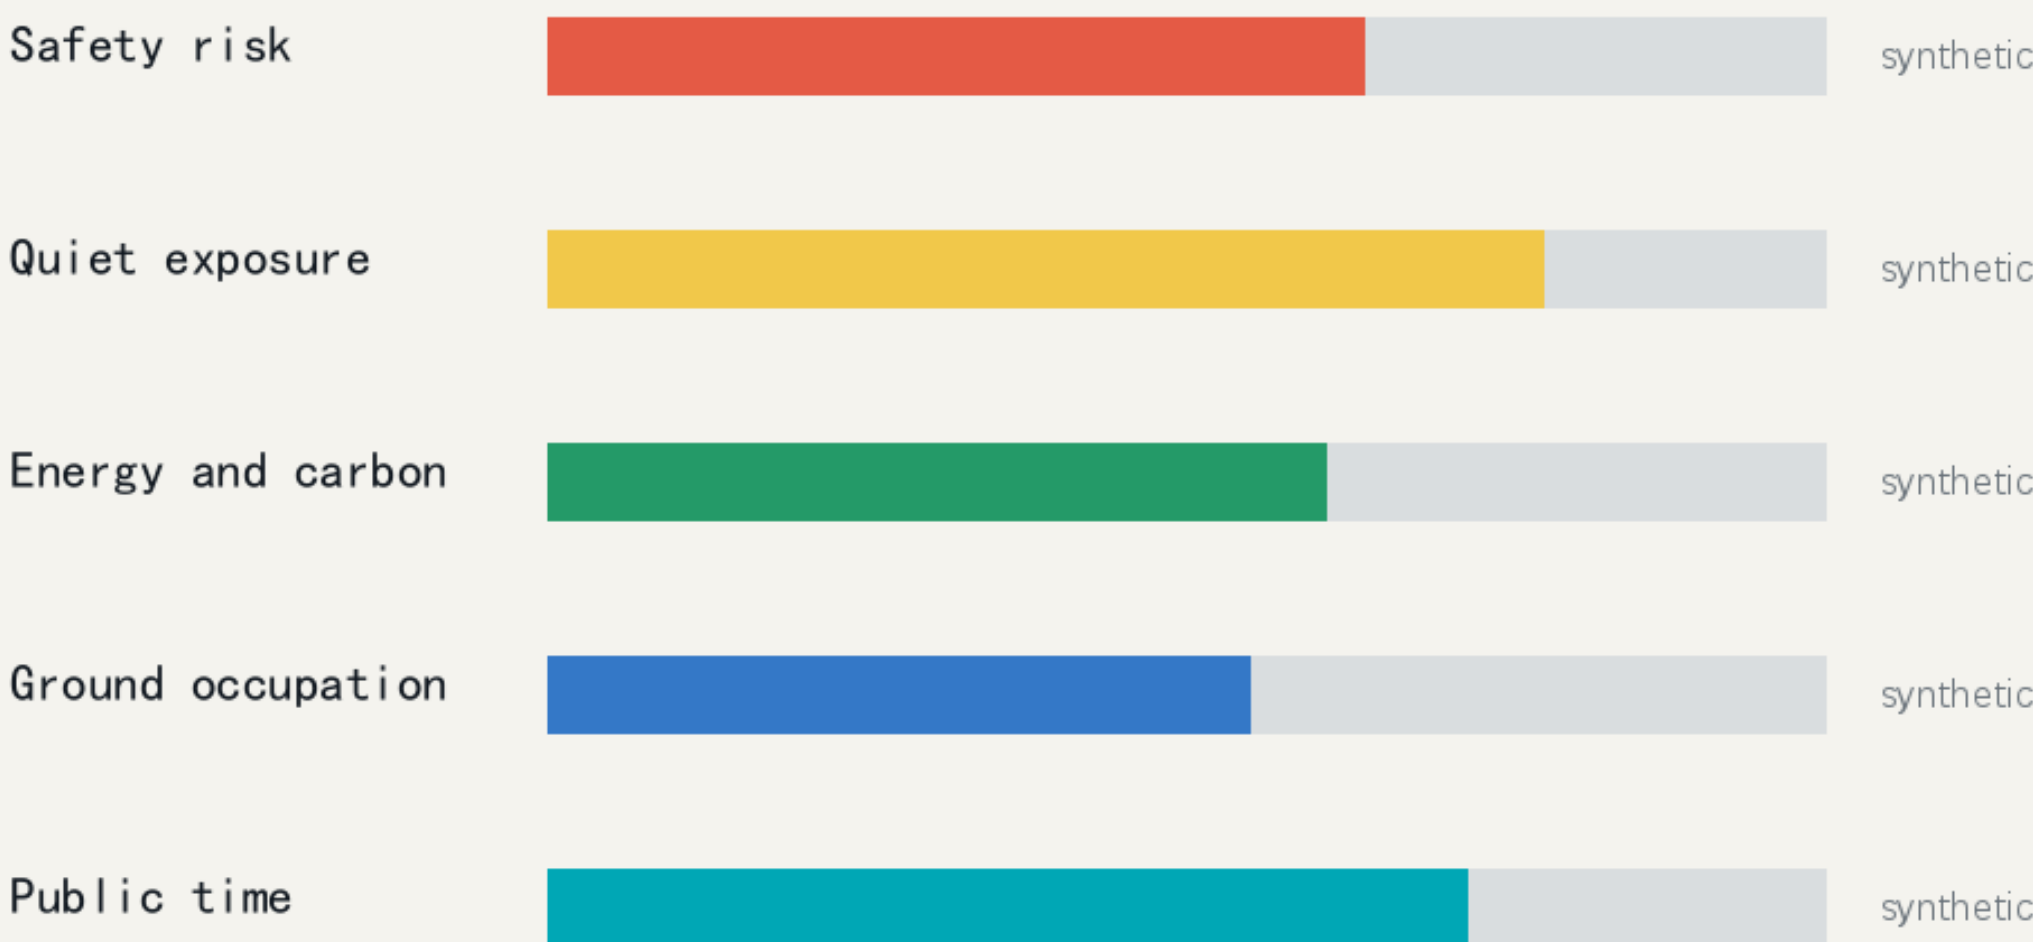

East wing: research review | West wing: community, enterprise, and public service

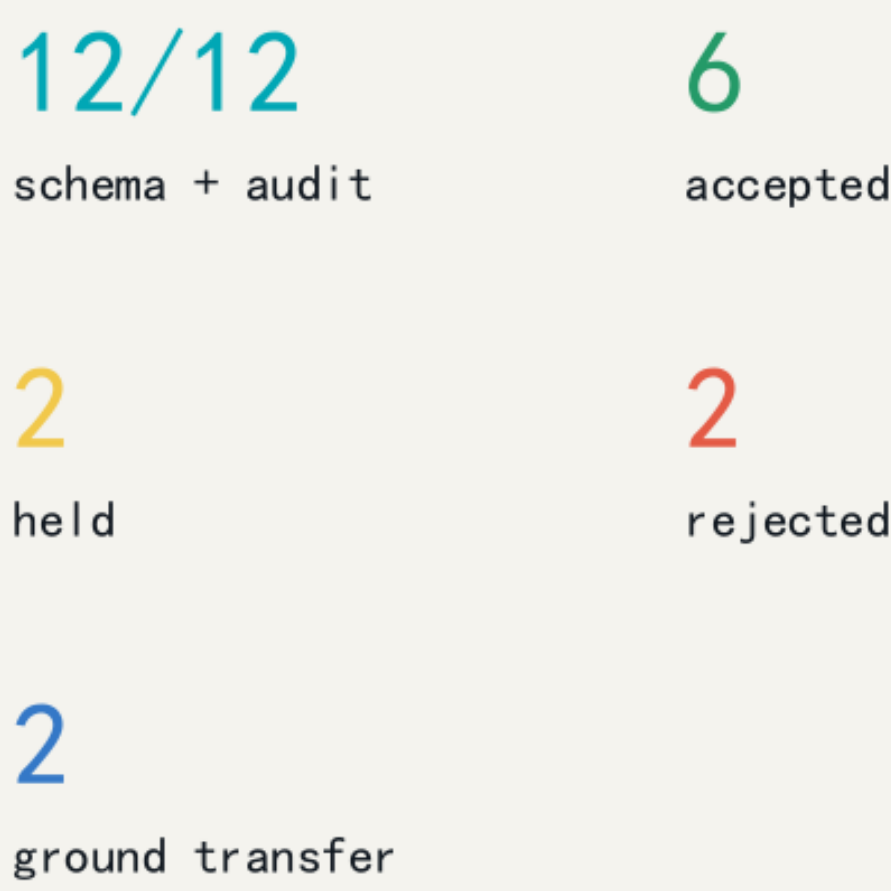

FIVE BUDGETS AND OFFLINE STRESS TEST

Success means the control branch worked, not that a flight succeeded

BUDGET LEDGER

12 TASK REPLAY

0 budget violations
4 in synthetic first-come counterfactual

Normalized design-test units | not dB, incident rate, measured carbon, or authorized capacity
