

GLOBAL AI FRONTLINE

Every AI innovation must pass three tests along the Jing-Zhang corridor: worth doing, works reliably, and gets used.

02 / CORE THESIS

Not a technology boulevard, but a public innovation system

Diamond Model

City mission → innovation center → focused choice

Distributed network

Five flows connect knowledge, talent, capital, scenarios and culture

Five Highs

Industry, community, services, scenarios and governance

Super Innovation Elements

Mission connects space, operation and investment feedback

The two wings are cross-area service and scenario networks, not new enclosed parks

ZHONGGUANCUN SERVICE WING

Cross-area value amplifier

- 1 One directory and lightweight service windows
- 2 Joint clinics for capital, IP, compliance, brand and global markets
- 3 Cross-area project ledger and global partner interface

NEAR / Establish common access and first prototypes

MID / Build cross-area use and evaluation network

LONG / Export service or scenario-opening protocols

XIAOYUE RIVER SCENARIO WING

Responsible open urban test field

- 1 Health, education, sport, mobility, community and public-space registry
- 2 Human accountability, non-AI access, complaint and stop rules
- 3 From low-risk prototypes to an urban scenario protocol

NEAR / Establish common access and first prototypes

MID / Build cross-area use and evaluation network

LONG / Export service or scenario-opening protocols

Operate first, consolidate through space; every phase can learn and exit

PROTOTYPE / 0–6 months

Scenario activation and community formation

One reversible prototype in each area with accountable operators, real users, risk rules and a Five Highs baseline

NETWORK / 6–18 months

Ecosystem and service upgrade

Connect validation, incubation, services, living rooms and governed scenario opening; test project flow

BRAND / 18–36 months

Mature elements and model export

Build platform, enterprise ladder and recurring community; publish progress and reusable protocols

ANNUAL OPERATING PORTFOLIO

AI LINE 1 Global Innovation Week Rotating Demo Day Open Test Season Jing-Zhang AI Culture Festival Young Developer Residency

Problem → teams → governed scenario → evaluation → services → scale / exit

Make Jing-Zhang the frontline where global AI innovation keeps happening

Diagnosis sets objectives; objectives organize the network; five strategic units validate through scenarios; operating feedback then improves design.
