

AI LINE 1
GLOBAL AI FRONTLINE

GLOBAL AI FRONTLINE

AI LINE 1

A distributed innovation network of three areas, two wings and multiple nodes

Origin + Dazhongsi: translated from FTA real project practice

PROFESSIONAL DESIGN PACKAGE

2 REAL FTA PROJECT PRACTICES

30-second read: one project, three passes, three traceable records

JZ-AI-001 is a review memory line, not a claimed live-project ID; thresholds are preregistered decision rules.

MINIMUM DELIVERY BRIEFS

AI ORIGIN	ZHONGZHIYUAN	DAZHONGSI
PACKAGE living room + PoC register	PACKAGE bounded garden + stop zone	PACKAGE arrival + public floor + handover
LEAD operator + university + service wing	LEAD operator + evaluation + safety	LEAD district + mobility/accessibility
COST S-M STOP unclosed major incident / failed human service	COST M STOP stop failure / incursion / owner exits	COST M STOP worse conflict / major event / failed review

Winning logic: not the most images, but a unique mechanism, delivery ownership, failure exits, and evidence limits found in 30 seconds.

Origin and Dazhongsi translate real FTA practice; Zhongzhiyuan is a design prototype; all remain concepts, not approvals or engineering commitments.

02 / CORE THESIS

Not a technology boulevard, but a public innovation system

Diamond Model

City mission → innovation center → focused choice

Distributed network

Five flows connect knowledge, talent, capital, scenarios and culture

Five Highs

Industry, community, services, scenarios and governance

Super Innovation Elements

Mission connects space, operation and investment feedback

Diagnose first; then allocate current action resources

整体诊断 | 基础成熟度 × 问题紧迫度 × 当期行动资源建议

比例由诊断结果推导，用于本轮行动排序；五项本体同等重要，不是预设权重或绩效得分

01 | 基础成熟度

相对成熟度，仅表示本轮专业判断

判断

产业资源基础最强；服务入口、跨区调用与场景规则尚未形成网络，成为从“资源密度”走向“协作效率”的瓶颈。

02 | 问题紧迫度矩阵

越靠右上，越需优先配置行动资源

首要矛盾

不是产业资源不足，而是服务、治理和场景尚未把分散资源转化为可进入的协作网络。

03 | 行动资源建议

诊断后生成 | 年度复盘后动态调整

先打通瓶颈，再根据真实成效重新配置

The five dimensions are equal; 26/24/21/17/12% is a post-diagnosis action-resource recommendation, not preset weights.

04 / DIAGNOSIS TO ACTION

Five diagnosed gaps lead to five spatial and operating propositions

CITY MISSION

Translate Haidian's AI advantage into a globally recognizable, publicly usable and continuously learning urban capability.

GLOBAL AI FRONTLINE

Two open paths · network crossing · red core engine · dynamic numeral 1

05 / IDENTITY

A public brand, distinct from FTA authorship

- Bright cyan

Knowledge, technology and urban connection
- New-leaf green

Ecology, community and continuous growth
- Core red 1

The Super Innovation Element as catalyst

#08B9E6 / 青蓝

#16B85C / 新叶绿

#F2383D / 核心红

The identity does not claim to be the organizer's official mark.

06 / DISTRIBUTED NETWORK

Three areas complete the chain;
two wings make resources flow

- ZHONGZHIYUAN

Public validation engine
- AI ORIGIN

Origination and young entrepreneurship
- DAZHONGSI

AI-native launch and urban experience
- SERVICE WING

Capital, compliance, brand and global markets
- SCENARIO WING

Responsible open urban scenarios

07 / AI ORIGIN COMMUNITY

Original-AI source innovation district

Strong universities, original research and young talent; gaps are proof of concept, early capital and campus-to-market continuity.

SPATIAL MOVE | FTA REAL PROJECT PRACTICE

One belt, one axis, two centers and one cluster; Origin City Living Room is the core element

DELIVERY PATH

- 1 0–6 months: governance, brand and scenario activation
- 2 6–18 months: proof of concept, early capital and community
- 3 18–36 months: original launches and Origin model export

08 / DAZHONGSI

AI + applications and scenarios district

Strong platform business and market feedback; gaps are dependency, Third Ring fragmentation, shared services and identity.

SPATIAL MOVE | FTA REAL PROJECT PRACTICE

TOD ecosystem; Lingjing World and the mobility hub form the core element

DELIVERY PATH

- 1 0–6 months: open day, active ground floors and safer crossings
- 2 6–18 months: incubation, acceleration, shared services and scenario loop
- 3 18–36 months: urban Agents and application-district protocol

09 / ZHONGZHIYUAN

AI + standards and ecosystem district

Strong platform and validation base; gaps are open standards access, cross-institution collaboration and engineer community.

SPATIAL MOVE

One core, two loops and test gardens; the shared standards-and-ecosystem center is the core element

DELIVERY PATH

- 1 0–6 months: directory, evaluation field and bounded test garden
- 2 6–18 months: shared center, standards co-creation and engineer community
- 3 18–36 months: result recognition and global ecosystem protocol

The two wings are cross-area service and scenario networks, not new enclosed parks

ZHONGGUANCUN SERVICE WING

Cross-area value amplifier

- 1 One directory and lightweight service windows
- 2 Joint clinics for capital, IP, compliance, brand and global markets
- 3 Cross-area project ledger and global partner interface

NEAR / Establish common access and first prototypes

MID / Build cross-area use and evaluation network

LONG / Export service or scenario-opening protocols

XIAOYUE RIVER SCENARIO WING

Responsible open urban test field

- 1 Health, education, sport, mobility, community and public-space registry
- 2 Human accountability, non-AI access, complaint and stop rules
- 3 From low-risk prototypes to an urban scenario protocol

NEAR / Establish common access and first prototypes

MID / Build cross-area use and evaluation network

LONG / Export service or scenario-opening protocols

From industry categories to real users

01 / RESEARCHERS + ENGINEERS

Computing, data, peers, quiet work and rapid validation

02 / STARTUPS + GROWTH FIRMS

Accessible space, client scenarios, capital and services

03 / STUDENTS + YOUNG TALENT

Translation, learning, affordable life and global exchange

04 / RESIDENTS + FAMILIES

Understandable, optional and human-backed AI services

05 / INVESTORS + OPERATORS

Discovery, evaluation, partnership and long-term operation

Every space, service and AI scenario must identify its user, access, accountable operator and exit condition.

Twelve scenarios are operable Five Highs interfaces, not a technology catalogue

Common baseline: minimal data · accountable human · non-AI access · complaint route · graceful degradation · stop condition

01 / SCENARIO

AI AGENT EVALUATION FIELD

INDUSTRIAL ECOLOGY

ZHONGZHIYUAN

SPACE + SERVICE

Shared benches, isolated data room, expert review and traceable results

HUMAN + EXIT BOUNDARY

Segment data and retain human review; no substitute for certification

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

02 / SCENARIO

EMBODIED AI SAFETY GARDEN

INNOVATION SCENARIOS

ZHONGZHIYUAN

SPACE + SERVICE

Bounded test loop, observation deck, charging and maintenance

HUMAN + EXIT BOUNDARY

Time-space limits and physical stop; suspend on unresolved incidents

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

03 / SCENARIO

AI COMPLIANCE + GLOBAL SANDBOX

POLICY GOVERNANCE

SERVICE WING

SPACE + SERVICE

Joint clinic for law, standards, IP and global markets

HUMAN + EXIT BOUNDARY

Professional review; advice is not regulatory approval

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

04 / SCENARIO

OPEN COMPUTE SERVICE STATION

SERVICE NETWORK

ZHONGZHIYUAN / ORIGIN

SPACE + SERVICE

Bookable workstations, edge devices, quota and energy display

HUMAN + EXIT BOUNDARY

No sensitive tasks; stop anomalies and escalate to humans

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

05 / SCENARIO

AI ORIGIN OPEN LIVING ROOM

CULTURAL COMMUNITY

ORIGIN CITY LIVING ROOM

SPACE + SERVICE

Launch, proof of concept, global exchange, learning and services

HUMAN + EXIT BOUNDARY

Open agenda, accessibility and protected non-commercial time

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

06 / SCENARIO

YOUNG INNOVATOR LIFE STATION

CULTURAL COMMUNITY

ORIGIN TALENT-LIFE AXIS

SPACE + SERVICE

Affordable food, living room, night study, sport and support

HUMAN + EXIT BOUNDARY

Life services never tied to hiring, investment or data consent

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

07 / SCENARIO

AI CONTENT LAUNCH + CO-CREATION STREET

INDUSTRIAL ECOLOGY

DAZHONGSI

SPACE + SERVICE

Ground-floor studios, pop-ups, live launch and feedback

HUMAN + EXIT BOUNDARY

Label generation, review rights and retain non-AI access

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

08 / SCENARIO

ROBOT SERVICE COEXISTENCE SHOP

INNOVATION SCENARIOS

DAZHONGSI

SPACE + SERVICE

Rotating test bay, human counter, charging and clear routes

HUMAN + EXIT BOUNDARY

Human service in parallel; degrade safely; no mandatory face ID

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

09 / SCENARIO

AI HEALTH NAVIGATION STATION

SERVICE NETWORK

XIAOYUE RIVER WING

SPACE + SERVICE

Accessible terminal, waiting, process guidance and handoff

HUMAN + EXIT BOUNDARY

No diagnosis, minimal data and human handoff for all advice

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

10 / SCENARIO

AI LEARNING WORKSHOP

CULTURAL COMMUNITY

SCHOOL / COMMUNITY

SPACE + SERVICE

Group tables, process wall, device storage and teacher review

HUMAN + EXIT BOUNDARY

Protect minors; automated outputs never replace teachers

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

11 / SCENARIO

JING-ZHANG MEMORY GENERATIVE THEATRE

CULTURAL COMMUNITY

JING-ZHANG HERITAGE PARK

SPACE + SERVICE

Archive access, oral history, generation demo and performance

HUMAN + EXIT BOUNDARY

Separate verified history and generation; trace and revoke consent

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

12 / SCENARIO

ACCESSIBLE MOBILITY ASSISTANCE POINT

POLICY GOVERNANCE

TRANSIT / WALKING NODE

SPACE + SERVICE

Low counter, tactile/audio information, wheelchair and human help

HUMAN + EXIT BOUNDARY

Retain non-digital access, minimal data and complaint route

PROTOTYPE PATH

Small pilot → real users → Five Highs review → consolidate, adapt or exit

Baseline: minimal data · accountable human · non-AI route · complaint · degradation · stop

Public life first;
technology serves everyday urban life

Rail first

Connect transit with all three areas

Walk + cycle

Heritage spine and east-west stitching

Fine grain

Improve blocks and ground-floor edges

Timed logistics

Reduce conflict between research and life

Shared parking

Release underused land

AI LINE 1 · PUBLIC-FIRST INNOVATION INFRASTRUCTURE

交通慢行、蓝绿空间与创新服务 / MOBILITY + BLUE-GREEN

FTA GROUP · CONCEPT DESIGN

The diagram illustrates a five-layer traffic system and civic rules. It features a central vertical axis with three main nodes: 01 值得做 (Worth doing), 02 做得稳 (Done steadily), and 03 有人用 (Used by people). The layers are represented by horizontal lines and a central vertical path. The layers are: 01 轨道优先 / RAIL FIRST, 02 慢行成网 / WALK + CYCLE, 03 道路微循环 / FINE GRAIN, 04 物流分时 / TIMED LOGISTICS, and 05 停车共享 / SHARED PARKING. The civic rules are listed below the layers: 生态与日常使用优先 (Ecology and daily use priority), 技术装置可关闭、可维护 (Technology devices can be closed, maintainable), 无障碍与人工服务保留 (Barrier-free and人工 services retained), and 低照度、低噪声、儿童安全 (Low illumination, low noise, child safety). The diagram also includes labels for '横向缝合 / EAST-WEST STITCHING', '轨道站点接驳 / TRANSIT CONNECTION', and '分时研发物流 / TIME-SEPARATED LOGISTICS'.

五层交通体系 / 5 LAYERS

01 轨道优先 / RAIL FIRST

02 慢行成网 / WALK + CYCLE

03 道路微循环 / FINE GRAIN

04 物流分时 / TIMED LOGISTICS

05 停车共享 / SHARED PARKING

过线底座 / CIVIC RULES

生态与日常使用优先

技术装置可关闭、可维护

无障碍与人工服务保留

低照度、低噪声、儿童安全

公共生活优先于技术展示

PUBLIC LIFE BEFORE TECH SPECTACLE

Operate first, consolidate through space; every phase can learn and exit

ANNUAL OPERATING PORTFOLIO

- AI LINE 1 Global Innovation Week
- Rotating Demo Day
- Open Test Season
- Jing-Zhang AI Culture Festival
- Young Developer Residency

Problem → teams → governed scenario → evaluation → services → scale / exit

Write pass, hold and stop rules before seeing results

Future decision lines, not current performance; measure T0 in week 0, then D30/D60/D90.

01 / AI ORIGIN LIVING ROOM	02 / DAZHONGSI PUBLIC INTERFACE	03 / ZHONGZHIYUAN TEST GARDEN
MINIMUM SAMPLE	MINIMUM SAMPLE	MINIMUM SAMPLE
≥ 120 people · ≥ 8 sessions · ≥ 6 teams	≥ 240 observations · ≥ 120 surveys · ≥ 18 periods	≥ 30 tests · ≥ 5 teams · ≥ 10 stop drills
D90 PASS	D90 PASS	D90 PASS
repeat ≥ 30% · ≥ 2 validations/referrals · zero major incident	arrival ≥ 20% better · no conflict worsening · accessibility 100%	stops 100% · incursions 0 · takeover median ≤ 30s

STOP | unresolved major safety/privacy incident · no accountable operator · failed professional review

Full machine-readable protocols: simulation.json

Concept inquiry values, never disguised as construction drawings

01 ORIGIN: CONTINUOUS PUBLIC INTERFACE

02 DAZHONGSI: SAFE ARRIVAL

03 ZHONGZHIYUAN: BOUNDED TESTING

All dimensions require official redline, ownership, traffic, fire, accessibility and equipment-risk verification.

Internal concept screening: the highest score must still pass hard gates

METHOD DEMO | Not a competition score, official finding, or claimed live-model output

A · 86

Iconic Third Ring bridge-station

SCREEN #1 → HARD-GATE REJECT

B · 82

Walking + active ground floor + wayfinding

ACCOUNTABLE DECISION → TEST

C · 74

Expanded underground link

HOLD FOR DATA

Reject A: official road/rail redlines, ownership, structure, fire, accessibility, cost, operations and approvals are absent; it is irreversible.

Tools may expand options; humans own weights, evidence limits, public safety and the final decision.

Verified facts, provisional geometry, design proposals and future commitments remain distinct

Official data → replace all dependent layers → recalculate all metrics; concept values are not statutory controls.

Make Jing-Zhang the frontline where global AI innovation keeps happening

Diagnosis sets objectives; objectives organize the network; five strategic units validate through scenarios; operating feedback then improves design.

- FIVE HIGHS
- THREE AREAS + TWO WINGS
- 12 GOVERNED SCENARIOS
- 2 REAL FTA PRACTICES
