综合交通—蓝绿公共空间系统 | 慢行贯通、横向缝合、生态织补
以步行骑行为优先，组织轨道接驳、公共交通、京张公园、小月河联系与分布式绿色节点

概念建议 | 非交通工程

N ↑

01 | 南北慢行主脉

京张公园内部形成连续步行、骑行与遗产游径，连接三区与沿线公共空间

02 | 横向步行骑行缝合

三区设置较强横向联系，其余位置通过街巷、过街、园区通道和公共节点渗透

03 | 轨道与公交接驳

站点、公交停靠与公园入口之间形成短距离、连续、无障碍的慢行转换

04 | 京张—小月河蓝绿联系

以连续绿化、慢行和雨洪节点连接公园、小月河方向、社区绿地与公共服务空间

05 | 关键道路过街改善

在主路交叉处优先改善连续铺装、遮荫、停留安全岛、导向和步行骑行冲突

06 | 分布式雨洪与热环境改善

在街角、道路边缘和入口节点设置雨水花园、遮荫树阵与可渗透停留空间

总体设计范围临时替代边界；道路、站点、水系及绿色节点均为关系与类型示意

京张公园与南北慢行主脉 慢行步行骑行联系 城市道路关系 轨道接驳节点 公交接驳 重点过街 小月河方向水系联系 口袋绿地与绿色织补 雨洪调蓄节点

交通系统 | 从“经过”转向“可达”

轨道、公交和城市道路负责到达片区；连续步行骑行、重要过街和公园入口完成最后一公里连接。

步行优先

缩短步行，保证连续与无障碍。

骑行贯通

强化南北连续和站点换乘。

公交接驳

以短距离慢行组织站园联系。

海绵织补

在小空间分散消纳雨水并增加遮荫。

本图不提出道路红线、轨道线位、桥隧和水利工程结论。所有线路和节点均为概念性关系，可供交通、市政、园林和规划专业团队在正式数据与现场调查基础上深化。

蓝绿系统 | 从“一条公园”转向“分布式网络”

京张公园是主骨，小月河方向联系、口袋绿地、雨水花园和林荫节点把生态与公共空间织入街区。

CORE FIGURE — DETAILED ENGLISH GUIDE

Integrated Mobility and Blue-Green Public-Space System

- Six coordinated moves: (1) a continuous north-south walking and cycling spine inside Jing-Zhang Park; (2) stronger east-west pedestrian and cycling links through streets, crossings, compound passages and public nodes; (3) short, continuous and barrier-free transfers between rail/bus stops and park entrances.
- (4) A Jing-Zhang-Xiaoyue River blue-green relationship using continuous planting, slow routes and sponge nodes; (5) safer priority crossings at key junctions; and (6) distributed rain gardens, shade and permeable stopping spaces for stormwater and heat mitigation.
- Legend reading: teal is the park slow-mobility spine; blue lines are cross-city links; purple marks rail connections; orange marks bus connections; diamonds identify priority crossings; green blocks are pocket green spaces and ecological infill; light blue marks the Xiaoyue River relationship and sponge nodes.
- Status: alignments and node symbols express relationships and typologies, not engineering design. Final routes depend on official transport, station, utilities, water-system and site-survey data.

SIX COORDINATED MOVES

- 01 North-south slow-mobility spine · continuous walking, cycling and heritage routes
- 02 Cross-city walking and cycling links · streets, crossings, compound passages and shared nodes
- 03 Rail and bus access · short and barrier-free connections to park entrances
- 04 Jing-Zhang-Xiaoyue blue-green relationship · planting, slow routes and sponge nodes
- 05 Safer key crossings · continuous paving, refuge islands and clear wayfinding
- 06 Distributed stormwater and heat mitigation · rain gardens, shade and permeable stopping places

Park publicness extends into surrounding districts through transverse links, green-space infill and enlarged shared nodes.

AI is not a stand-alone facility: knowledge, engineering, market adoption and public feedback form a continuous loop

AI+应用场景空间落位

场景点直接嵌入三个重点片区与京张公园主轴

ENGLISH READING GUIDE

Spatial Placement of AI-Enabled Scenarios

Places knowledge and incubation scenarios in AI Origin Community, integration and governance scenarios in Zhongzhiyuan, market and life-service scenarios in Dazhongsi, and shared cultural experiences along the park spine.

AI产业生态与功能布局图集

从“资源分布”到“产业缺口”，再落到三区、两轴与公共空间场景

01 现状资源场 02 AI产业链 03 能力缺口 04 功能布局 05 融合场景

05 | AI×现有产业×公共空间融合场景

以场景组织城市设计，场景再设计为不少于10张A4场景卡

01 AI × 教育

开放课程、跨校讨论、学生成果发布、公众AI展览。

适配：校园边界、共享教室、沿街首层

02 AI × 科研

成果征集、跨学科评议、开源协作、研究需求匹配。

适配：原点、众智园、共享会议空间

03 AI × 京张文化

数字导览、声音档案、增强现实故事、夜市数字展演。

适配：遗产节点、公园路径、桥下空间

04 AI × 商业消费

产品首发、快闪体验、智能终端试用、内容与零售融合。

适配：大科寺、站点周边、商业首层

05 AI × 社区服务

公共服务咨询、居民共创、老幼友好体验、使用反馈。

适配：小月河滨、社区中心、公园入口

06 AI × 机器人 / 移动

预约式、低速、可关闭的室内或短距离自动驾驶。

适配：众智园、存量厂房、废弃路廊

场景发生

共享既有设施 激活首层界面 改造闲置建筑 轻量可逆加建 条件新建

空间动作

低成本 / 高频 / 可快速实施 低成本 / 高频 / 可快速实施 低成本 / 高频 / 可快速实施 低成本 / 高频 / 可快速实施 低成本 / 高频 / 可快速实施

总体设计优先采用左侧三类动作；场景决定空间，不先造“AI建筑”再找活动。

ENGLISH READING GUIDE

AI-Industry-Public Space Integration

Shows how AI education, research, culture, commerce, community services and robotics can share existing facilities, activate interfaces, reuse buildings and use limited temporary additions.

Core Matrix, Resilience Matrix and Balance Chain

1. Core Matrix: A matrix showing the relationship between AI-enabled scenarios and existing urban functions. It identifies areas for integration and areas for new development.

2. Resilience Matrix: A matrix showing the relationship between AI-enabled scenarios and existing urban functions. It identifies areas for integration and areas for new development.

3. Balance Chain: A chain showing the relationship between AI-enabled scenarios and existing urban functions. It identifies areas for integration and areas for new development.

10 AI SCENARIOS · three-zone roles with public experience separated from controlled validation

SC-01

Cross-campus knowledge co-creation

SC-02

Urban-problem prototype co-design

SC-03

Result release and demand feedback

SC-04

Full-stack collaborative development

SC-05

Interoperability engineering validation

SC-06

Trustworthy-AI safety evaluation

SC-07

Embodied-intelligence safety validation

SC-08

Agent and smart-terminal experience

SC-09

AI content co-creation and consumption

SC-10

Business conversion and city partnership

Knowledge sourcing and near-campus incubation · five nodes translate university resources into a civic collaboration network

ENGLISH READING GUIDE

AI Origin Community — Spatial Structure

Builds the AI Origin Community around a connected public-space framework linking universities, incubation resources, neighborhood services and the Jing-Zhang spine.

Wudaokou-AI Origin Core

PKU-Tsinghua Node

关键空间操作：连—开—启—聚—渗

以连续公共空间序列释放高校创新资源，不对应具体地块或工程边界

空间结果：从单一交通通道转向可停留、可交流、可持续更新的知识公共空间网络

ENGLISH READING GUIDE

AI Origin Community — Key Spatial Operations

Concentrates intervention on connected slow routes, active ground floors, shared thresholds, pocket nodes and adaptive reuse that can release existing innovation resources to the public realm.

Tsinghua-BFU Node

Xueyuan Road Three-University Node

CUGB-Beihang Node

SPATIAL STRATEGY

Use real streets and public passages as cross-city links; activate ground floors, forecourts, bridgeheads, shaded learning spaces and shared halls; organize learning, collaboration, prototype co-creation, result release and urban feedback through five nodes.

IMPLEMENTATION BOUNDARY

Campus access, building use and new structures remain conditional proposals subject to ownership, safety, planning and operator confirmation.

System integration and engineering acceleration · shared engineering, controlled validation and a Xiaoyue River public-feedback interface

06 | 空间原型：五种加速机制转译为五类真实空间场景

CONNECT + SHARE

成果连接与共享研发

园区内部 | 资源导入、能力共享

TEST

园区测试验证

园区内部 | 受控测试、真实验证

GROW + EXPAND

企业成长与成果扩展

园区内部 | 客户验证、市场对接

CONNECT + GROW

创新街道界面

城市外溢 | 开放首层、创新服务

TEST + CONNECT

小月河生态创新界面

蓝绿外溢 | 生态交流、户外验证

CONNECT / SHARE / TEST / GROW / EXPAND

是可叠加的加速机制；众智园由园区内部向街道与蓝绿界面外溢，形成连续创新空间系统。

ENGLISH READING GUIDE

Zhongzhiyuan — Five Spatial Prototypes

Translates innovation activities into five reusable spatial prototypes for connection, validation, growth, street activation and eco-innovation.

ENGLISH READING GUIDE
Result Connection and Shared R&D
Provides shared R&D, exchange and result-connection spaces that reduce institutional separation and support collaboration between research and engineering teams.

Connection and shared R&D

ENGLISH READING GUIDE
Campus Testing and Validation
Places controlled testing and validation close to research and engineering resources while separating specialized test areas from everyday public space.

Controlled testing and validation

ENGLISH READING GUIDE
Enterprise Growth and Result Expansion
Uses flexible buildings and expandable shared services to support enterprise growth without relying on a single large redevelopment project.

Enterprise growth and expansion

ENGLISH READING GUIDE
Innovation Street Interface
Activates ground-floor interfaces and street-facing shared facilities so research and enterprise activity becomes visible and accessible along the public realm.

Innovation-street interface

ENGLISH READING GUIDE
Xiaoyue River Eco-Innovation Interface
Links ecological spaces, community services and selected innovation demonstrations along the Xiaoyue River as a public-facing feedback interface.

Xiaoyue River interface

Public exchange and professional testing are spatially separated: everyday shared spaces remain open, while interoperability, safety governance and embodied-intelligence tests use isolated, reversible and human-supervised environments.

ENGLISH READING GUIDE

Dazhongsi — Four-Quadrant Public Hub Masterplan

The conceptual masterplan organizes a four-quadrant public hub around connected ground, underground and selective upper-level routes.

ENGLISH READING GUIDE

Dazhongsi — Four-Quadrant Diagnosis

Diagnoses fragmented station, commercial, neighborhood and cultural quadrants around Dazhongsi and identifies the missing public connections between them.

ENGLISH READING GUIDE

1733 Content Ecosystem Prototype

Uses the 1733 content ecosystem as a model prototype for creative, release, consumption and feedback, innovating AI content production into urban experience.

ENGLISH READING GUIDE

Dazhongsi — Three-Layer Public Network

Coordinates ground-level streets and plazas, underground station links and selective upper-level connections as one legible public network.

ENGLISH READING GUIDE

Jing-Zhang Result-Delivery and Feedback Spine

Extends the Jing-Zhang result-delivery spine through Dazhongsi, linking product launch, public experience, market conversion and feedback collection.

ENGLISH READING GUIDE

AI Content and Urban Life Stage

Combines AI content display, cultural programming and everyday urban life in a flexible public stage rather than a single-purpose exhibition hall.

AI content and urban-life stage

ENGLISH READING GUIDE

Urban Agent Service Chain

Connects digital urban-agent services to physical consultation, navigation, community support and feedback points distributed through the public realm.

Urban-agent service chain

ENGLISH READING GUIDE

Smart-Terminal Experience and Launch

Provides controlled experience, demonstration and product-launch spaces for smart terminals before wider market adoption.

Smart-terminal experience and launch

ENGLISH READING GUIDE

Future Application Reserve

Keeps adaptable indoor and outdoor capacity for future applications whose spatial requirements cannot yet be fixed.

Future-application reserve

Results that have passed research and validation enter public display, urban experience, business conversion and city partnerships here; market and public feedback returns along the Jing-Zhang spine.
