

Three autonomous-mobility nodes: public interfaces before

CONCEPT ONLY · FUNCTIONAL BANDS ONLY · HUMAN ROUTE FIRST

SHARED SEQUENCE

A · Zhongzhiyuan Safety Evaluation Yard

Stop if river, flood-control, traffic, ownership, fire, energy, or accessibility evidence is missing; no window without verified handover.

B · AI Origin Accessible-Service Yard

Stop if the service cannot be completed by an ordinary human route, or consent, accessibility, data minimisation, and offline complaint evidence is

C · Dazhongsi Human-Machine Transfer Lounge

Stop if station, road, fire, crowd, retail, or emergency evidence is missing; no window without a human-only route and daily-use recovery.

Make autonomous service stoppable by design

Twelve scenarios are not twelve promises; each must pass human continuity, event safety and data-minimisation gates

147228 / 2026.08.09 / V2.4

12

Scenario cards

Each binds users, minimum data and a stop condition

3

Candidate nodes

Design markers, not approved roads or stations

3

Field gates

Every current baseline is unknown

6

Evidence routes

Policy and method boundaries only

Metric status is not performance

metrics.json

- Readable known 4 / 11
- Field-test unknown 7 / 11

Known means the design register exists. Unknown asks whether the service is safe, continuous and reversible on site. A chart cannot turn unknown into pass.

How twelve scenarios map to three test yards

autonomous-scenarios.json

Zhongzhiyuan / safety yard

AI Origin / equal service

Dazhongsi / transfer curb

Human equivalent

Retained in every scenario

Data boundary

Only fields required to complete the service

Expansion rule

Pass each gate; any failure stops

AV-T01

current: unknown

Curb conflict audit

3 minimum evidence items

stop condition · an accessible route has any unresolved obstruction

AV-T02

current: unknown

Equivalent accessible service

3 minimum evidence items

stop condition · automation performs worse without an equivalent human option

AV-T03

current: unknown

Network and weather rollback

4 minimum evidence items

stop condition · a vehicle or robot cannot safely enter manual service

STOP: restore ordinary public service if a human route is blocked, safe takeover fails, or data accountability is unclear

metrics.json · autonomous-scenarios.json · curbside-test-gates.json · autonomous-evidence-crosswalk.json

08 / Token lifecycle

Request, review, bounded run, evidence review and return to ordinary public use.

一枚令牌的完整生命周期 / TOKEN → TEST → RETURN

RACI	owner + accountable lead	SLA	response + recovery clock	COST	relative band only
DATA	minimum + retention	STOP	rollback + non-AI equivalent		

14 scenario rows in scenario-operation-matrix.json · thresholds are design gates, not statutory service levels

REVIEW NOTES

- English display layer for the same local asset.
- Source board thumbnail is retained for visual cross-check.
- All geometry is provisional until official polygons arrive.
- See proposal.en.md and the local JSON evidence ledger.

06 / Identity system

Two rails, three public nodes and two switch diamonds; concept direction, not a registered mark.

京张开源脉冲 / JING-ZHANG OPEN PULSE

identity system · two rails / three nodes / two switches

CONSTRUCTION RULE

Two parallel rails · three public nodes · two switch diamonds

rail graphite

public jade

open blue

civic amber

human coral

PUBLIC COMPONENTS

status board	what is booked / who is accountable
stitch threshold	step-free, audible, tactile crossing
rain tree pit	shade + storage + work order
withdrawal bay	robot stops without blocking people

Concept direction · no registered mark · all active components require a passive human equivalent and a withdrawal path

REVIEW NOTES

- English display layer for the same local asset.
- Source board thumbnail is retained for visual cross-check.
- All geometry is provisional until official polygons arrive.
- See proposal.en.md and the local JSON evidence ledger.

Three yards, three duties

Autonomy is not a device procurement. It is a public-service question that residents can understand and operators can take over.

01

Zhongzhiyuan

safety yard

families, children, maintainers
verify stop, detour and night rules

SAFE / STOP

02

AI Origin

accessible-service yard

students, wheelchair users,
community verify curb continuity
and data minimization

ACCESS / DATA

03

Dazhongsi

transfer living room

residents, visitors, night workers
verify event days do not block
home routes

MIX / RETURN

RULE 00 Human-chain continuity outranks autonomy coverage

Layer first, autonomy second

Replace the idea of giving an entire street to vehicles with four reversible layers: human chain, curb state, supervised service and fallback.

Turn futurism into a continuation test

Every metric carries a state: known, design target or unknown. Unknown is not a blank; it is the next field-test entrance.

01

continuity

0 irreplaceable breaks

accessible route

TARGET / UNKNOWN

02

safety

100% stop / take-over

remote stop

TARGET / UNKNOWN

03

governance

anonymous aggregate + human review

data minimum

TARGET / UNKNOWN

DECISION RULE

Expansion requires all three: human continuity / event safety / data minimization

The curb is the autonomy interface

Vehicles are not the first layer. Let people, wheelchairs and cycles pass first; make stopping, loading, charging and take-over visible at the curb.

PEOPLE FIRST

A — cross first, stop second

B — stop within sight

C — close to roll back

CURB STATUS
open / guarded / closed

07 / Regional ecology

Eight mechanisms circulate through conceptual regional interfaces; no partnership is asserted.

REVIEW NOTES

- English display layer for the same local asset.
- Source board thumbnail is retained for visual cross-check.
- All geometry is provisional until official polygons arrive.
- See proposal.en.md and the local JSON evidence ledger.

AUTONOMY COMMONS / RESOURCE AND DECISION RIGHTS

Resource and decision board: propose, pause, and expand only with e

Autonomous-mobility commons · conceptual procedure · no budget, permit, or operating result

Resource class	Who holds the public floor	Resource route (to confirm)	Veto / pause
Human service and accessibility	Staffed entry, equivalent route, on-site explanation, and appeal handoff	Authorized public-service procurement, maintenance arrangement, or participation support; not secured here	Pause when e te is cut, or ar
Curb and reversible space	Space window, on-site marking, clearance, and restoration of public passage	Reversible installation, maintenance, and restoration resources after rights and fire review; not secured here	Do not make or restoration
Safety, insurance, and independent evaluation	Test eligibility, risk review, incident record, and the next-gate decision	Authorized professional evaluation, insurance, and emergency-service contracts; not secured here	Veto expansion cy contact, or
Data, logs, and bounded compute	Purpose limitation, minimum fields, access log, deletion, and version difference	Purpose-limited authorized research or public-record service; no continuous personal data is opened here	Freeze when ible, or synthetic ults
Exit, restoration, and public memory	Stop, removal, restoration, public release note, and the next review	Authorized maintenance and exit arrangement; not secured here	Do not open a ation path, an

Four decision gates: a missing item never upgrades automatically

1 Observe and register the problem

Register only; do not activate automated resources

Remain in observation when boundary, rights, or accountability is unclear

2 Verify minimum resources and eligibility

Any missing item limits the work to a paper or synthetic replay

Do not enter a field window without the minimum resource set

3 Reversible window and independent

Accept, pause, revise, or return-to-human must each leave a receipt

Return to RDB-1 when the slowest group is harmed, takeover fails, or objections go unanswered

Jing-Zhang · Three test yards

A continuous public route for people comes first; only then can low-speed, supervised automation enter. The line is an audit route, not a new road.

- human-first chain
- autonomy trial
- stop / rollback

3
test yards

12
scenario cards

Human-first public axis / field-audit route

STOP CONDITION
If accessibility continuity fails, automation stays out
