Keep in use and complete the condition record.

A / ADAPT

Low-impact repair

Fire safety, energy, accessibility and open ground floor first.

I / INSERT

Removable trial

Removable elements and short-term use only.

D / INVESTIGATE

Not demolition

Awaits survey, structure, ownership, fire and heritage review.

PHASE 01

Return to baseline: official data, inventory, wayfinding and three low-risk human-led pilots.

PHASE 02

Open-source yard: ground floors, research relay and community service after ownership and community review.

PHASE 03

Belt-wide operation: complex validation networks only after transport, utilities, heritage, privacy and safety conditions.

Core metrics and the evidence chain

Known values recompute; FAR, height, AI innovation index, talent density and output scale stay unknown

The planning indicator system gives definitions and data preconditions only; one model assigns them once official data exists.

Risk, copyright and the next shift

Open co-design advice; it does not replace statutory planning or professional approval

DATA	Full recalculation once official boundaries, controls, ownership, roads, utilities, fire and heritage data exist.
PUBLIC	People without a phone, without Chinese, with disabilities, older people and those declining AI keep equivalent service.
COPYRIGHT	Original graphics, text and layout; external cases paraphrased only, no reused image, mark or protected chart.

Intelligence moves. Responsibility stays visible.
