

Jing-Zhang Civic Loop | Overview

Overall structure | Jing-Zhang Civic Loop

Conceptual recommendation · provisional geometry · for professional deepening

JZ CIVIC LOOP

A loop that returns heritage, innovation, daily life and governance to public value.

Three cores: Zhongzhiyuan | AI Origin | Dazhongsi
Two wings: technology services | scenario enablement
12 nodes: reservable, explainable, reversible

Status: provisional geometry for intake and concept review only.

PUBLIC RETURN

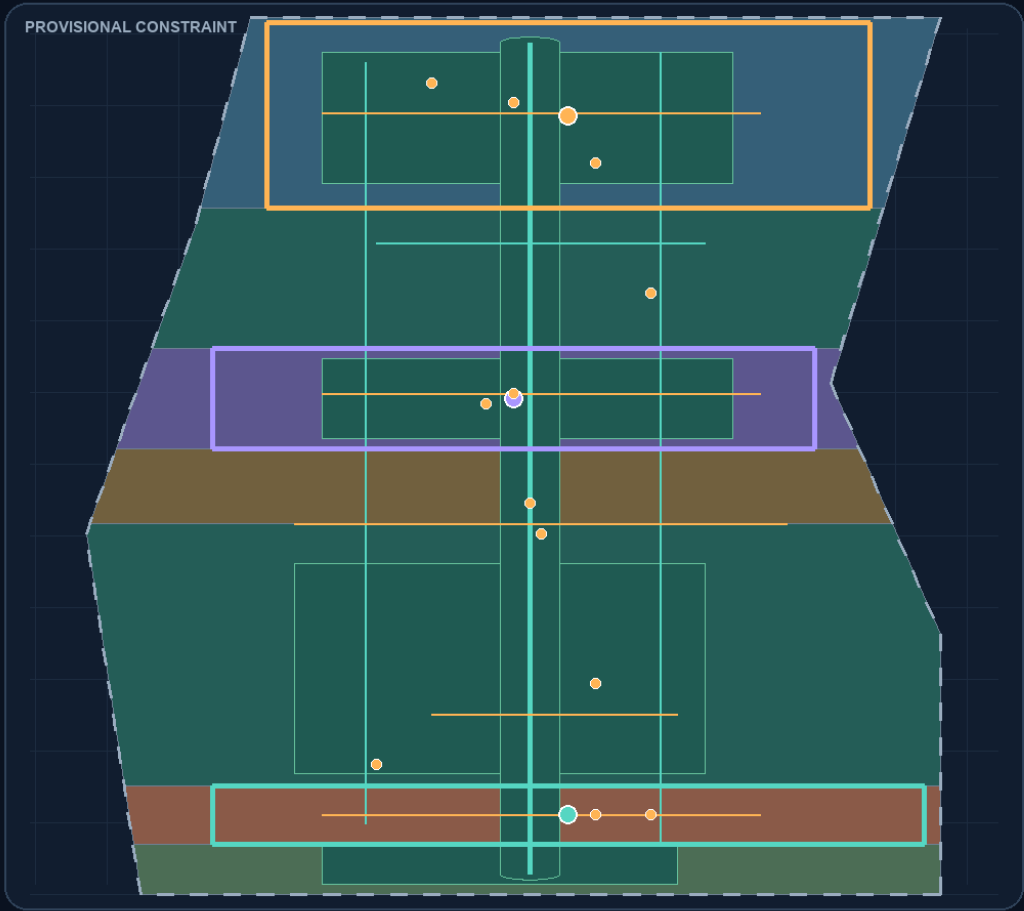

Every test leaves a readable record, human review and an exit condition.

-
- Provisional geometry is explicitly separated from official planning data.

Three levels and evidence

Spatial structure | one spine, three cores, two wings

Conceptual recommendation · provisional geometry · for professional deepening

01 ONE SPINE

Heritage walking spine for memory, blue-green continuity and public return.

03 THREE CORES / □□

02 TWO WINGS / □□

12 SCENARIO NODES / □□□□

100% LAND-USE COVERAGE / □□□□

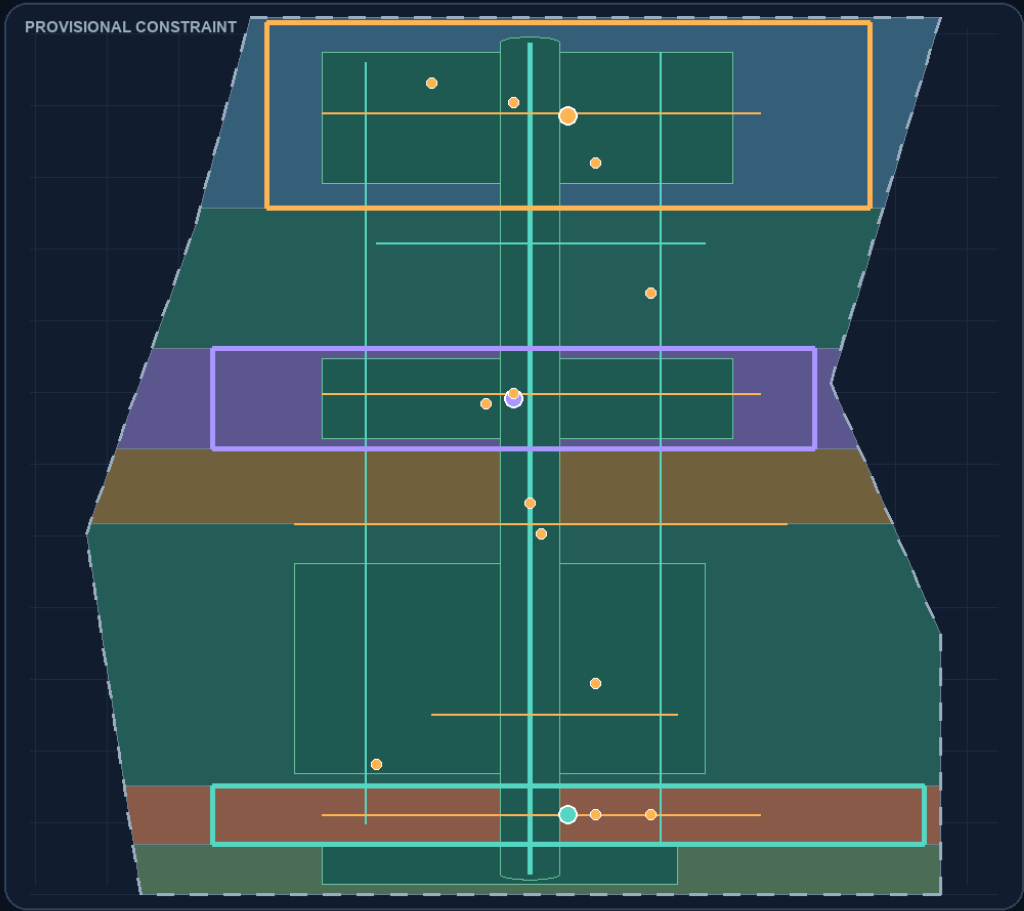

Partition topology is design evidence, not statutory parcel approval.

- CRA 43.6 km² · ODA 11.4 km² · KDA 368.4 ha
- Scope numbers are announced task scales; submitted polygons remain provisional.

Ecosystem mechanisms and identity

Overall structure | Jing-Zhang Civic Loop

Conceptual recommendation · provisional geometry · for professional deepening

JZ CIVIC LOOP

A loop that returns heritage, innovation, daily life and governance to public value.

Three cores: Zhongzhiyuan | AI Origin | Dazhongsi
Two wings: technology services | scenario enablement
12 nodes: reservable, explainable, reversible

Status: provisional geometry for intake and concept review only.

PUBLIC RETURN

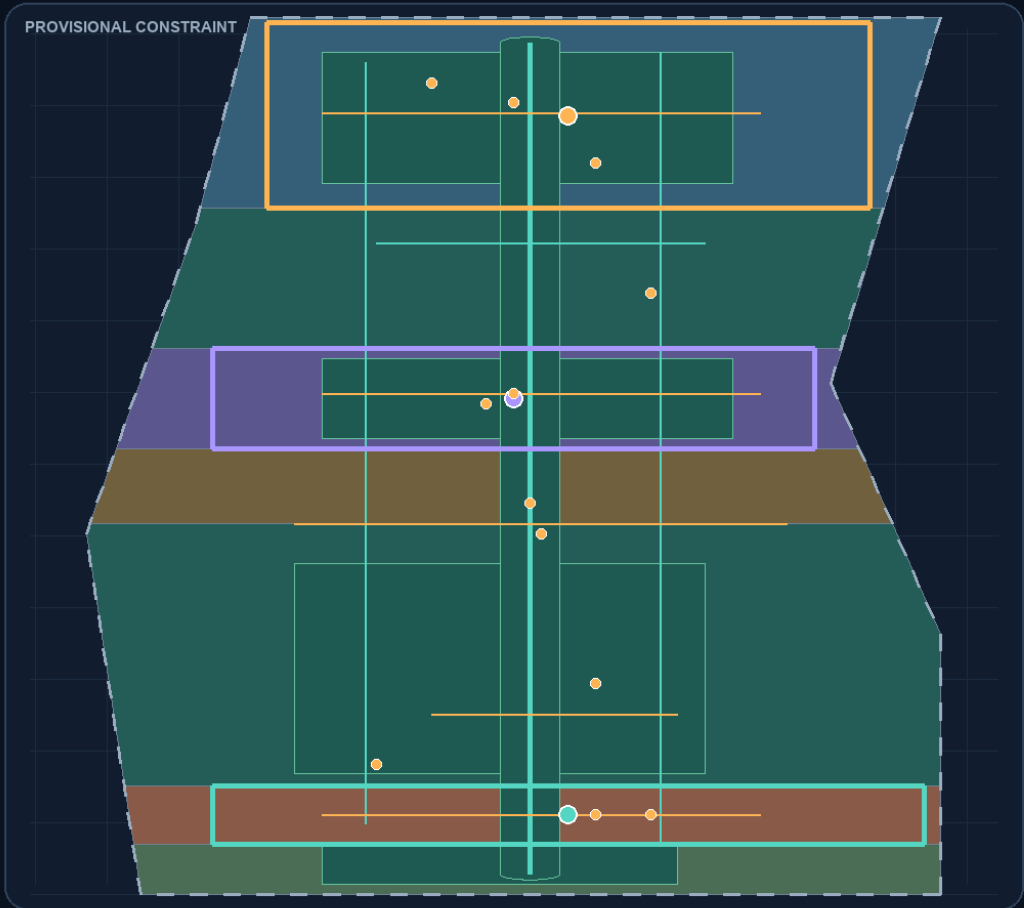

Every test leaves a readable record, human review and an exit condition.

- Six public mechanism cases inform governance, participation and testing
- The logo and color system are self-drawn conceptual directions.

Land use, renewal and control boundary

Spatial structure | one spine, three cores, two wings

Conceptual recommendation · provisional geometry · for professional deepening

01 ONE SPINE

Heritage walking spine for memory, blue-green continuity and public return.

03 THREE CORES / □□

02 TWO WINGS / □□

12 SCENARIO NODES / □□□□

100% LAND-USE COVERAGE / □□□□

Partition topology is design evidence, not statutory parcel approval.

- Seven polygons cover the design geometry
- FAR, height, coverage, setbacks and road redlines remain pending official controls.

Three key areas

Key areas | differentiated spatial levers

Conceptual recommendation · provisional geometry · for professional deepening

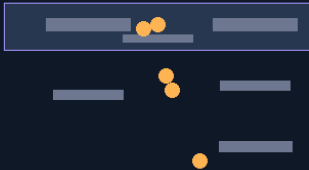

01Zhongzhiyuan | verifiable production

Test court + governance gallery

Spatial move: public interface first;
Buildings: DRR pending verification;
Mobility: walking and connection concept;
Risk: official geometry, rights and specialist data pending.

02AI Origin | open-source transfer

Open-source hall + transfer street

Spatial move: public interface first;
Buildings: DRR pending verification;
Mobility: walking and connection concept;
Risk: official geometry, rights and specialist data pending.

03Dazhongsi | intelligent-native living room

Demo lounge + civic interface

Spatial move: public interface first;
Buildings: DRR pending verification;
Mobility: walking and connection concept;
Risk: official geometry, rights and specialist data pending.

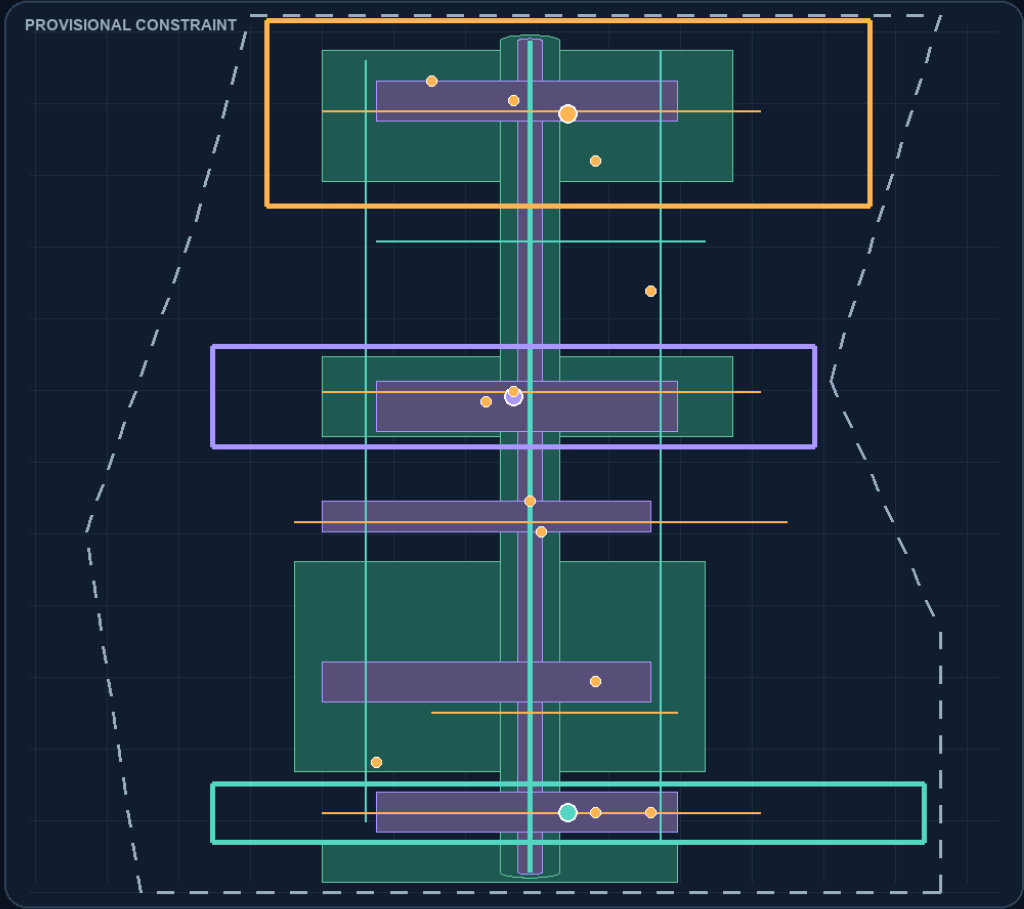

PROV KEY AREAS · NOT OFFICIAL REDLINES

- Zhongzhiyuan verifies; AI Origin transfers; Dazhongsi returns value to daily life
- DRR and project items are conceptual until rights and surveys are available.

Mobility, blue-green and public space

Mobility | blue-green civic loop

Conceptual recommendation · provisional geometry · for professional deepening

WCN + BGS

- Cyan: heritage greenway, cycling, walking and accessibility
- Orange: station connections and cross-stitches
- Green: blue-green interface; violet: civic staying/display
- No road redlines, rail alignments, pipes or engineering sections
- Human, paper and telephone channels run beside smart entry

ACCESSIBLE BY DEFAULT

Explain the scenario before data access; digital ability is never the gate to public service.

- Walking, cycling, station connection and accessible service run together
- No engineering alignment or statutory line is asserted.

Scenarios, governance and operations

Metric evidence | source to review

Conceptual recommendation · provisional geometry · for professional deepening

SITE AREA 11,412,825 sqm	GREEN RATIO 0.319	PUBLIC SPACE 0.117
AI NODES 12	KEY AREAS 3	DEPTH ITEMS 15

Status gate: content review ready; formal professional scoring waits for official geometry

All numeric values recompute from the same JSON/GeoJSON; pending controls are not disguised as numeric facts.

SOURCE → GEOMETRY → METRIC → REVIEW

1 Public/cleared sources
Announcement, standards, taskbook, cases

2 Structured geometry
Boundary, land, buildings, mobility, blue-green, nodes

3 EPSG-4548 recomputation
Areas, ratios, counts and coverage

4 Human review
Provisional status, privacy, copyright and professional gates

- 12 cards, 3 TVS, 6 personas and human fallback
- Quarterly gates, annual public week, repair days and a public-return report.

Metrics, risks and next steps

Metric evidence | source to review

Conceptual recommendation · provisional geometry · for professional deepening

SITE AREA 11,412,825 sqm	GREEN RATIO 0.319	PUBLIC SPACE 0.117
AI NODES 12	KEY AREAS 3	DEPTH ITEMS 15

Status gate: content review ready; formal professional scoring waits for official geometry

All numeric values recompute from the same JSON/GeoJSON; pending controls are not disguised as numeric facts.

SOURCE → GEOMETRY → METRIC → REVIEW

1 Public/cleared sources
Announcement, standards, taskbook, cases

2 Structured geometry
Boundary, land, buildings, mobility, blue-green, nodes

3 EPSG:4548 recomputation
Areas, ratios, counts and coverage

4 Human review
Provisional status, privacy, copyright and professional gates

- Known metrics recompute from EPSG:4548 geometry
- Official polygons and professional data are the explicit next gate.
