

JING-ZHANG FIRST MILE | EXECUTIVE REVIEW BOARD

REAL PLACE · THREE DUTIES · PUBLIC BASE · EVIDENCE GATES

11.41 km²

3 STATIONS

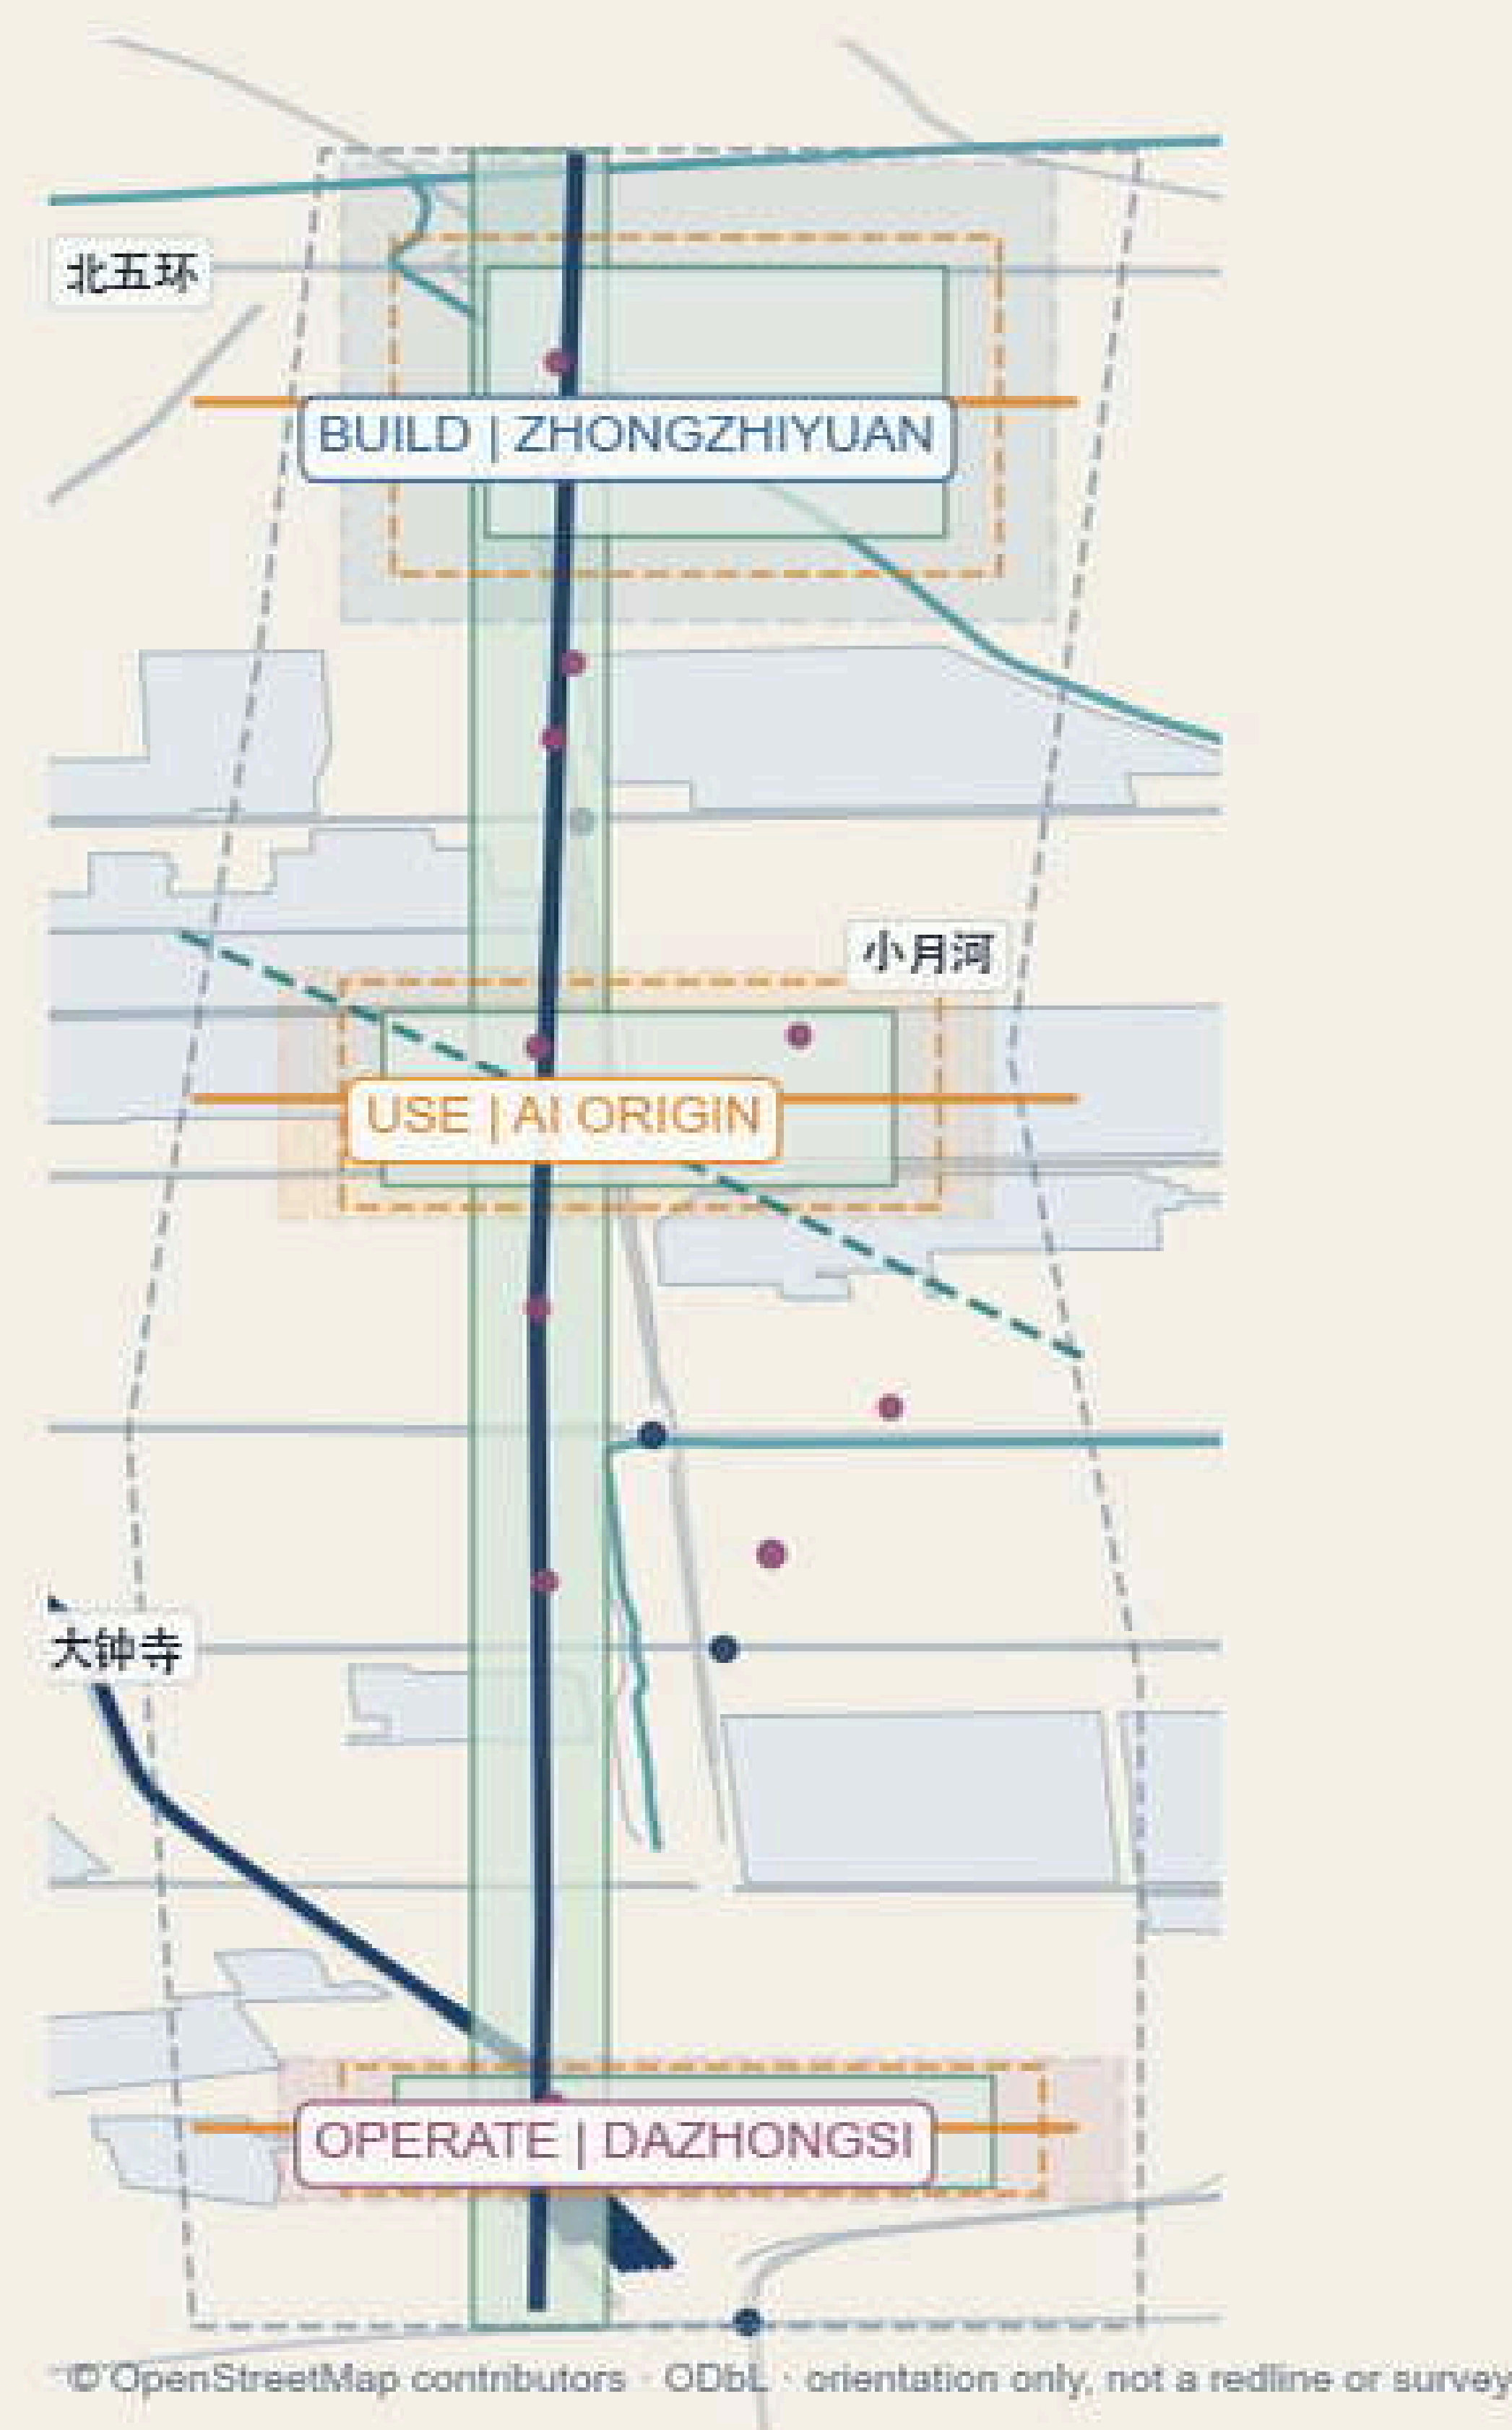

G0-G4

90 DAYS

REAL PILOT: PENDING

REAL-PLACE OVERVIEW | ONE HERITAGE SPINE, THREE NON-SUBSTITUTABLE DUTIES

Presentation-only OSM orientation + provisional design extents; the map explains why rail, water, campuses, heritage and the three stations meet here.

THREE-STATION HANDOFF

01 BUILD · ZHONGZHIYUAN
readiness → deployable product pack

02 USE · AI ORIGIN
real task → first-user evidence

03 OPERATE · DAZHONGSI
acceptance → reusable service pack

FOUR LAUNCH OUTCOMES

first real user · first operable scenario
verifiable order · verified reuse

PROVISIONAL EXTENTS · CONCEPT DESIGN · NOT SURVEY / APPROVAL / COMMITMENT

Xiaokang × Codex Urban Agent · V9 REVIEW ENTRY

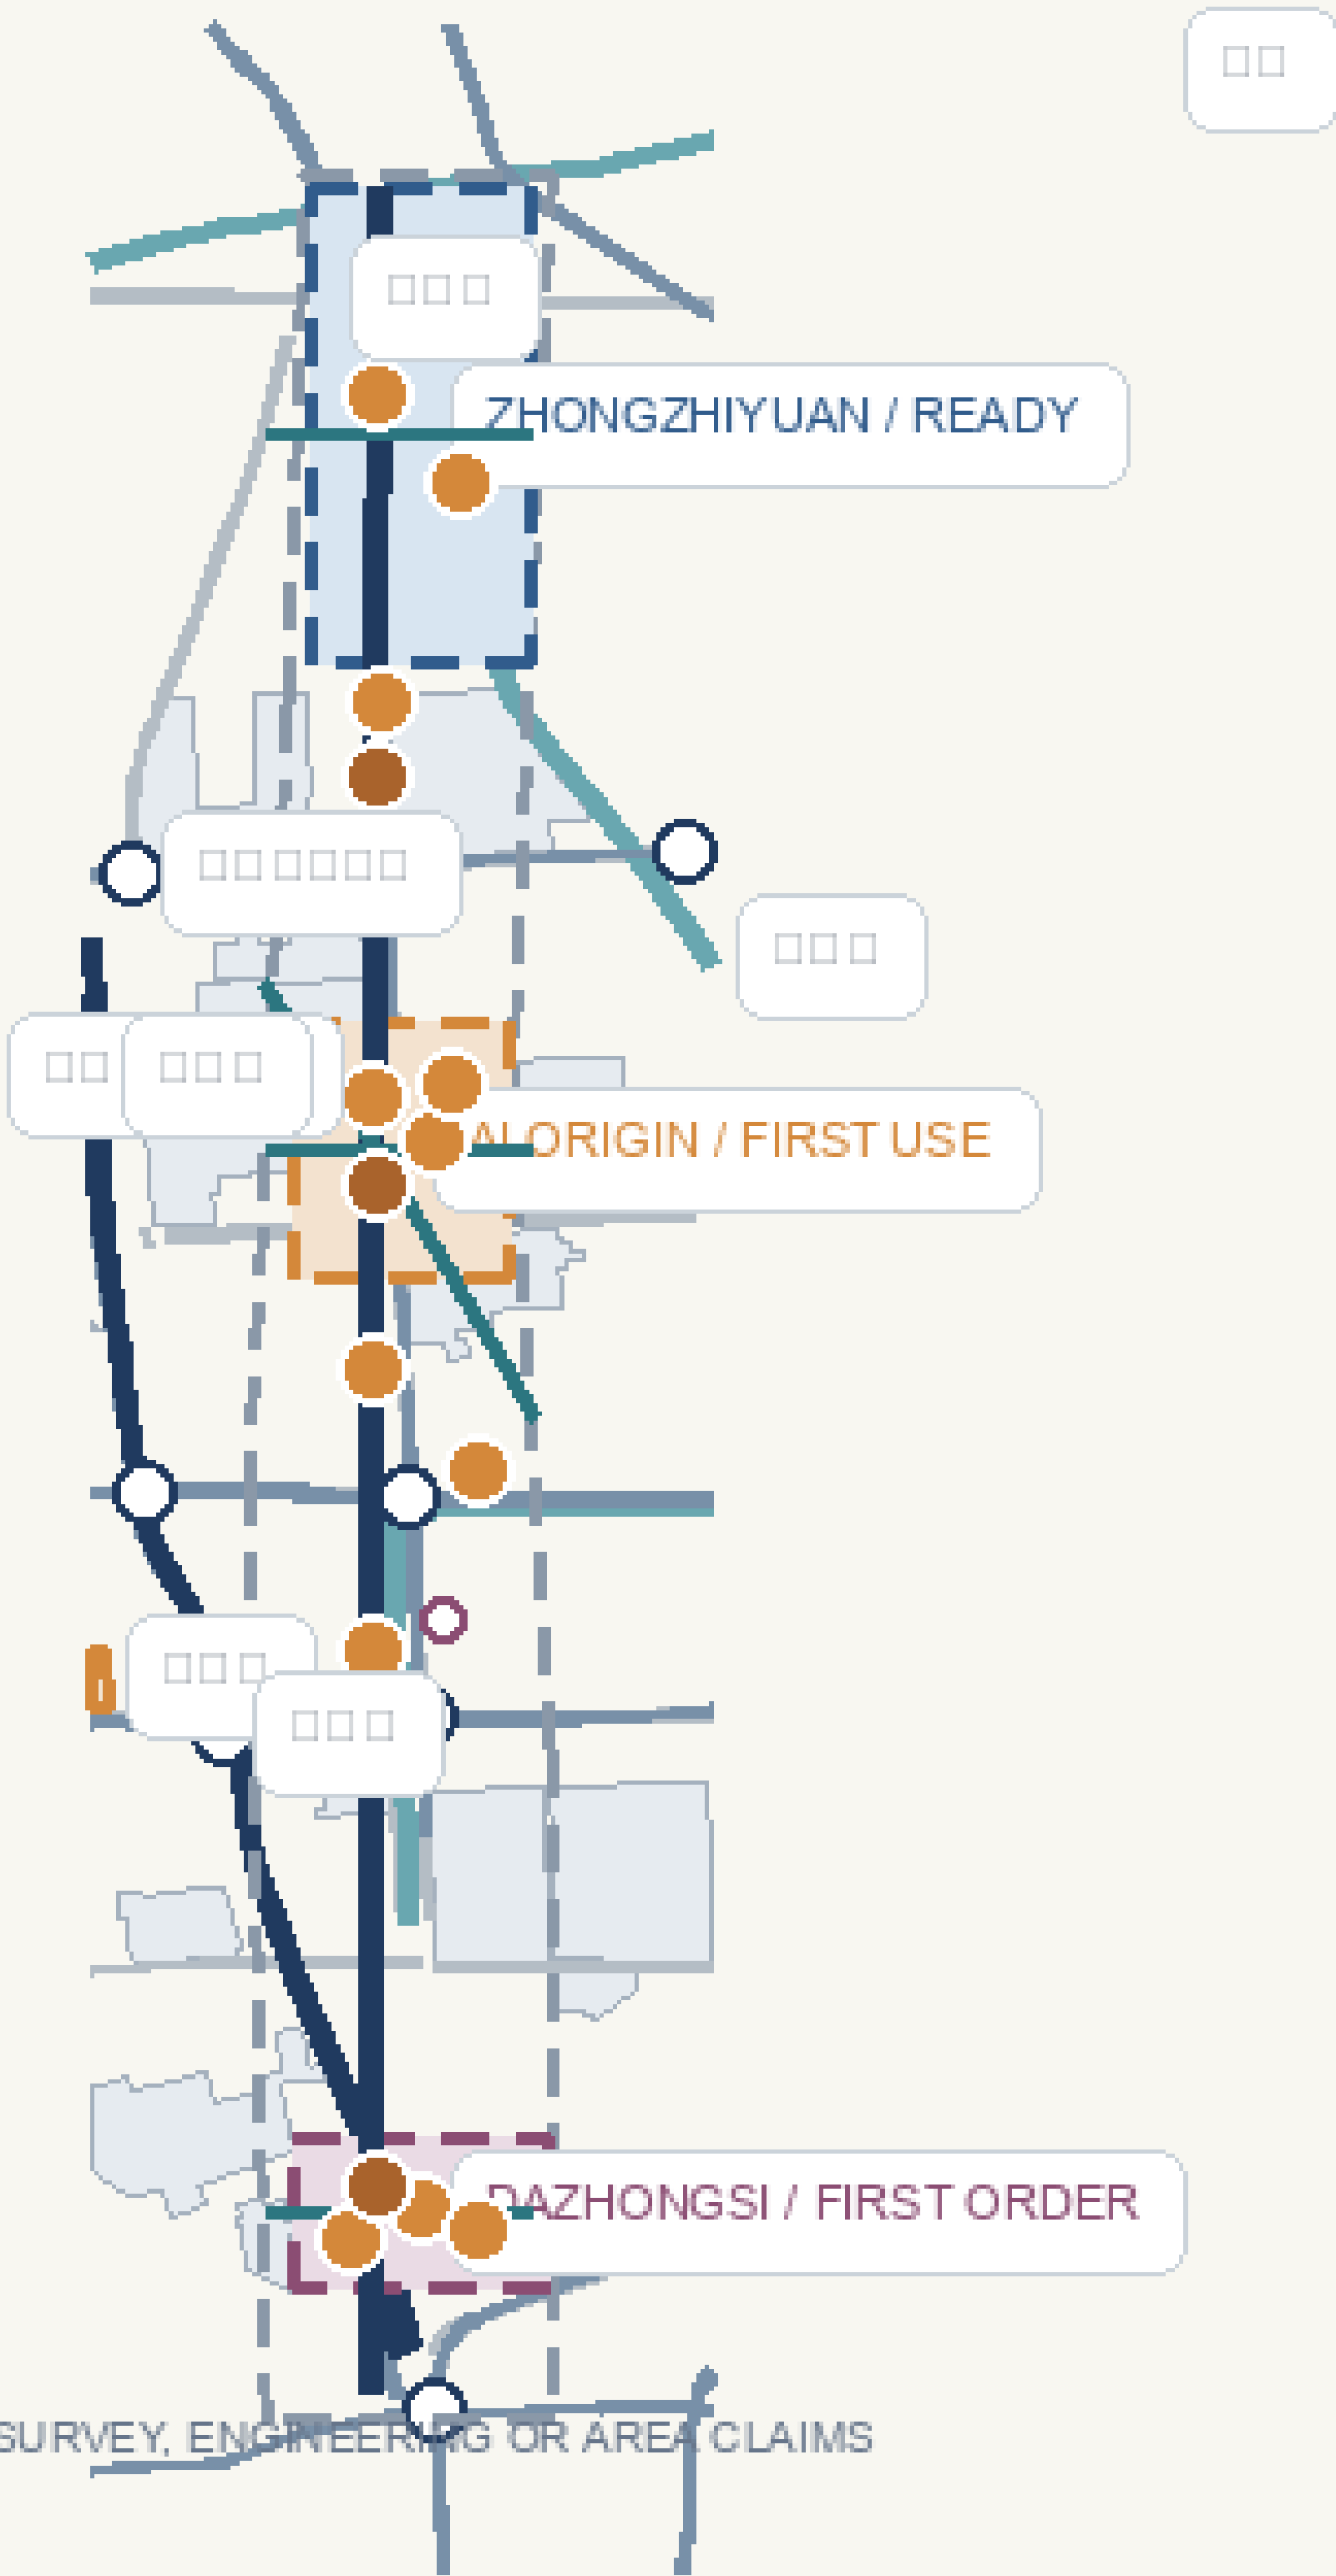

Real-Place Atlas

Ground the adoption chain in roads, rivers, rail, campuses, stations and heritage without promoting provisional extents

REAL-PLACE ATLAS | AN ADOPTION CHAIN ANCHORED IN ROADS, RIVERS, RAIL, CAMPUSES AND HERITAGE

PRESENTATION-ONLY OSM CONTEXT + PROVISIONAL DESIGN BOUNDARY; NOT SURVEY OR STATUTORY CONTROL

SIX REAL-PLACE JUDGMENTS

- 01 The heritage park is an existing everyday spine, not a future green-axis invention
- 02 The north meets Qinghe and tech campuses: fit for readiness and safe handoff
- 03 The middle meets Wudaokou, Qinghuayuan heritage and transit: fit for first users
- 04 The south meets Dazhongsi heritage, transit and commerce: fit for first order and reuse
- 05 Cross streets, campuses and communities define launch ports, not just a north-south promenade
- 06 Every AI service is removable; routes, shade, seats and human entry remain

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

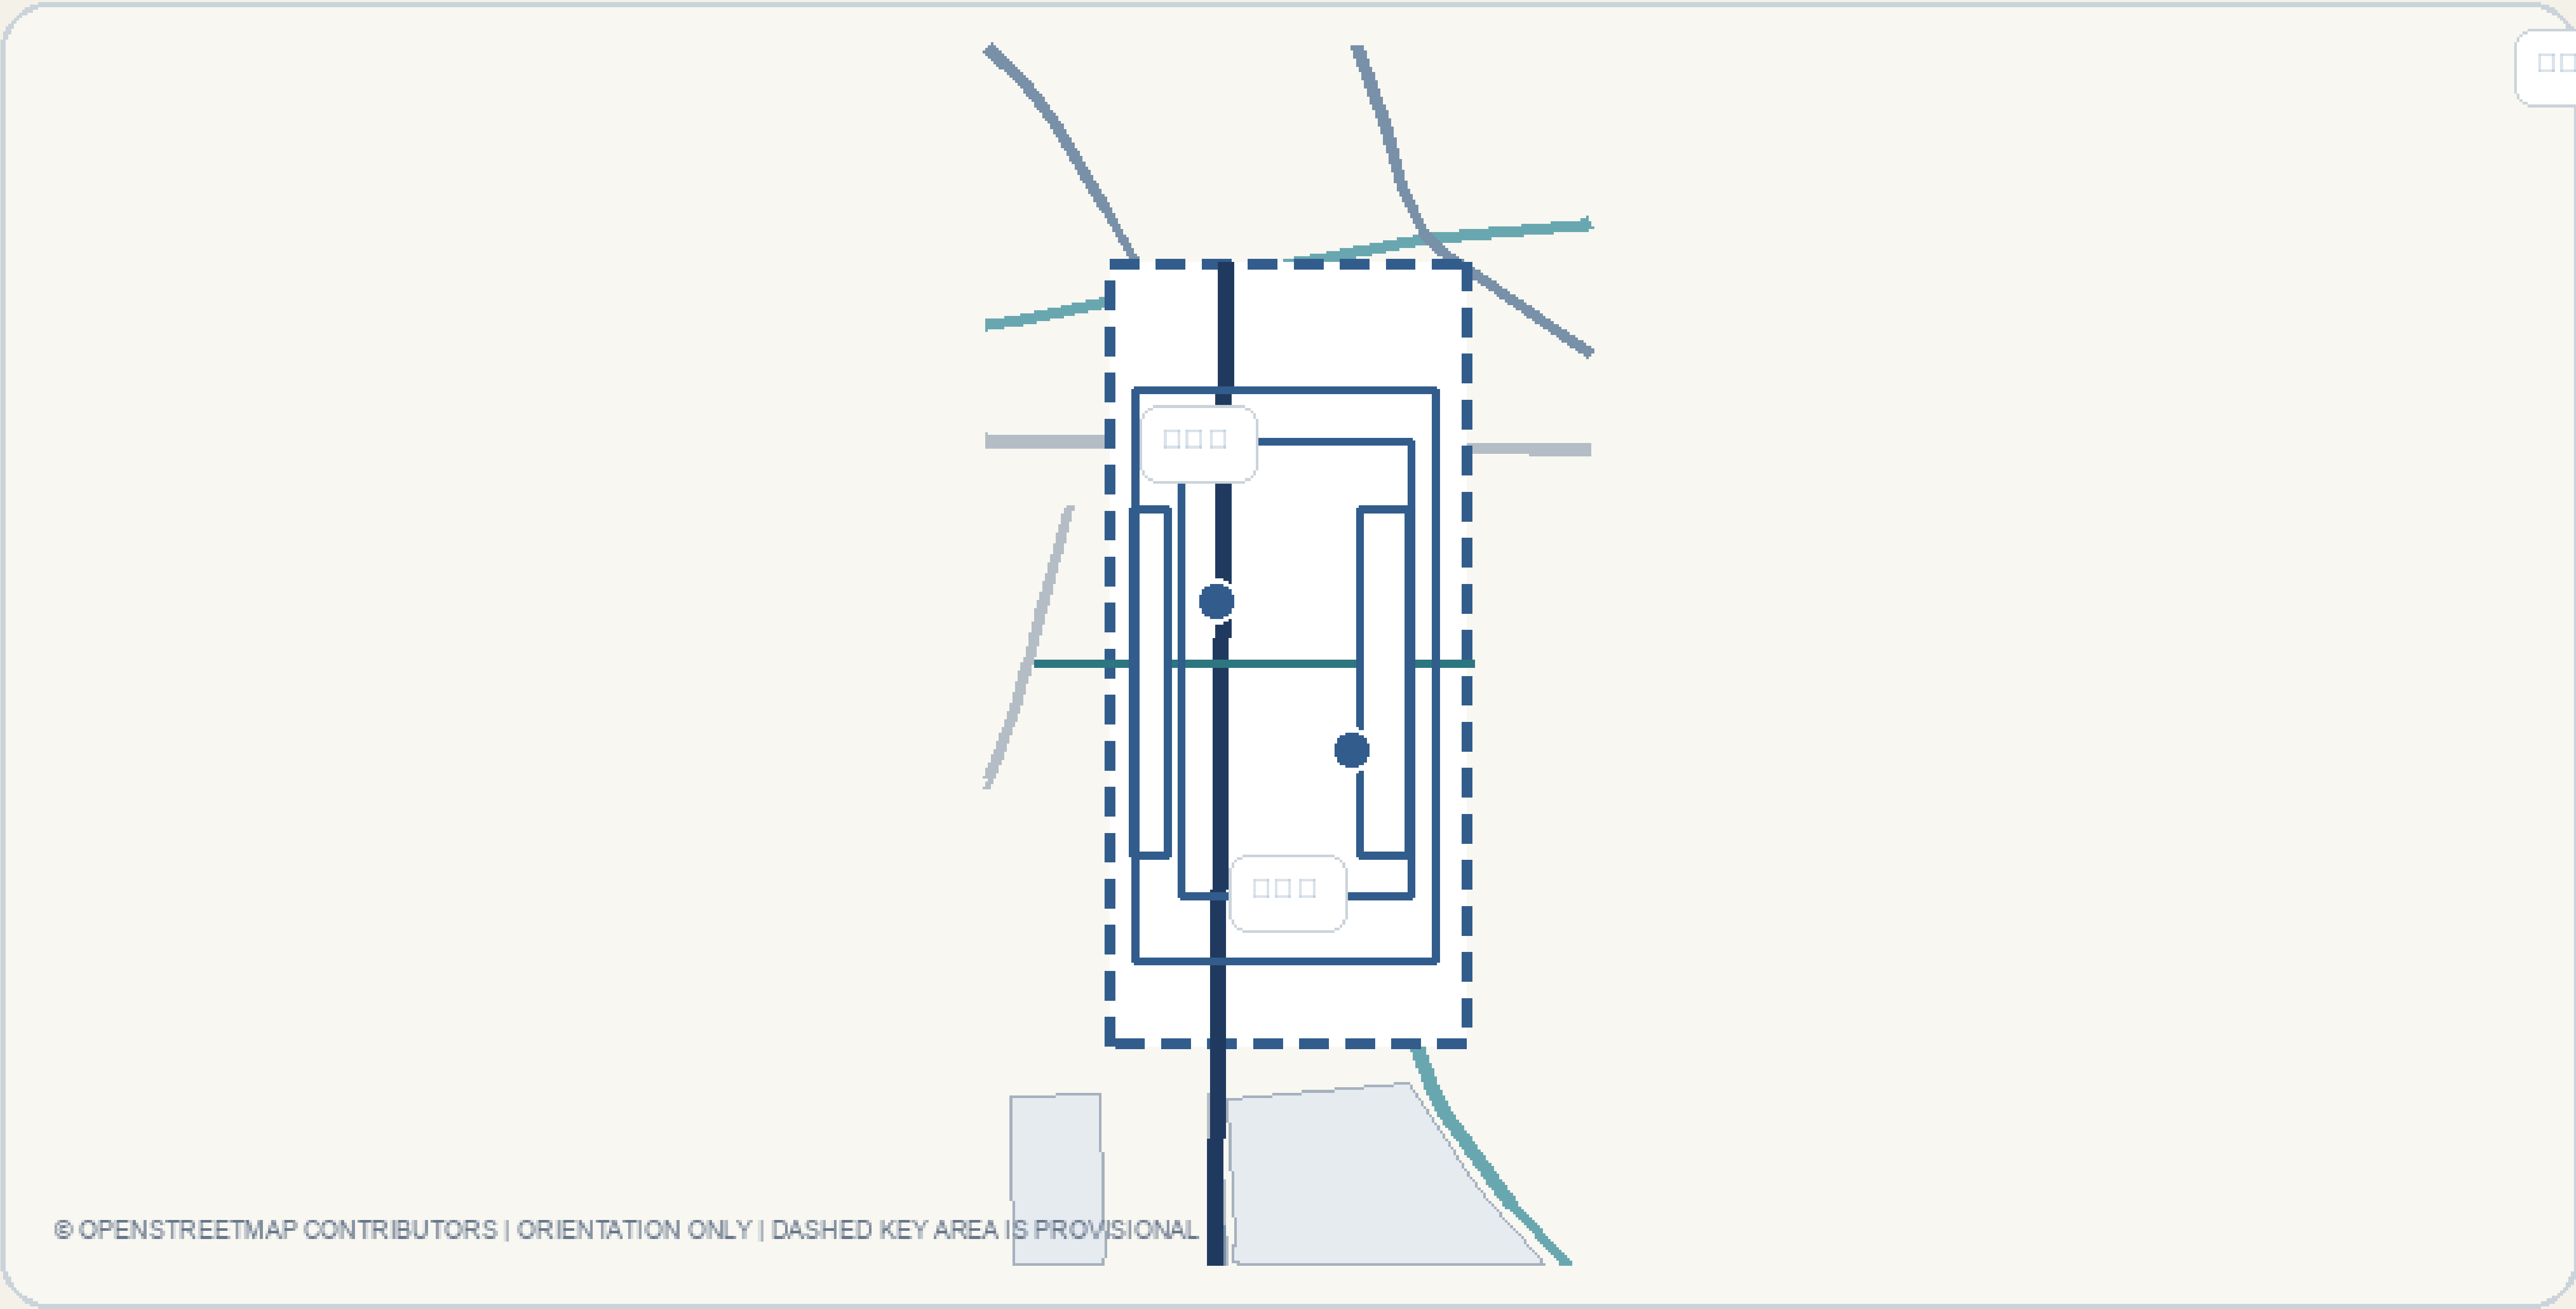

Zhongzhiyuan: Turn a Prototype into a Safely Handoff-Ready Product

A product-ready yard between Qinghe and campus clusters; no data owner, human takeover or maintenance plan means no G1

ZHONGZHIYUAN | PRODUCT READINESS AS A HANDOFF-READY URBAN FORECOURT

QINGHE–FIFTH RING–XUEQING ROAD TECH/CAMPUS EDGE | REAL ORIENTATION + PROVISIONAL KEY AREA

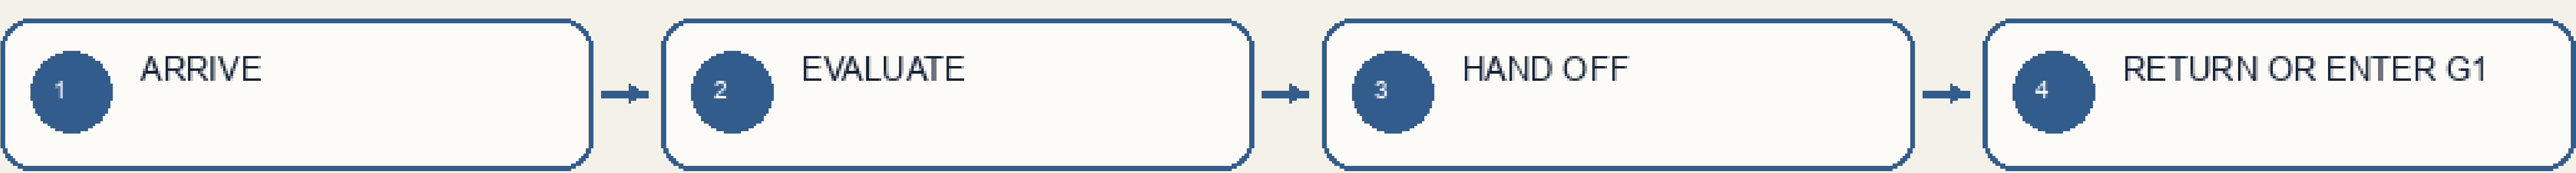

THE QUESTION THIS PLACE MUST ANSWER

How does a demo become a city service an unfamiliar operator can actually take over?

THREE SPATIAL MOVES

- 1 Place safety review between public forecourt and R&D back-of-house
- 2 Keep the ordinary route continuous; tests are bounded in place and time
- 3 Name data duty, human handoff, maintenance and exit before G1

FIRST-MILE ACTION SEQUENCE

HARD STOP

No unfamiliar-operator handoff and maintenance plan: buy no equipment and do not enter first use.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

The key area remains provisional; exact siting requires official redlines, survey, title, traffic, fire, trees, utilities and ecological review.

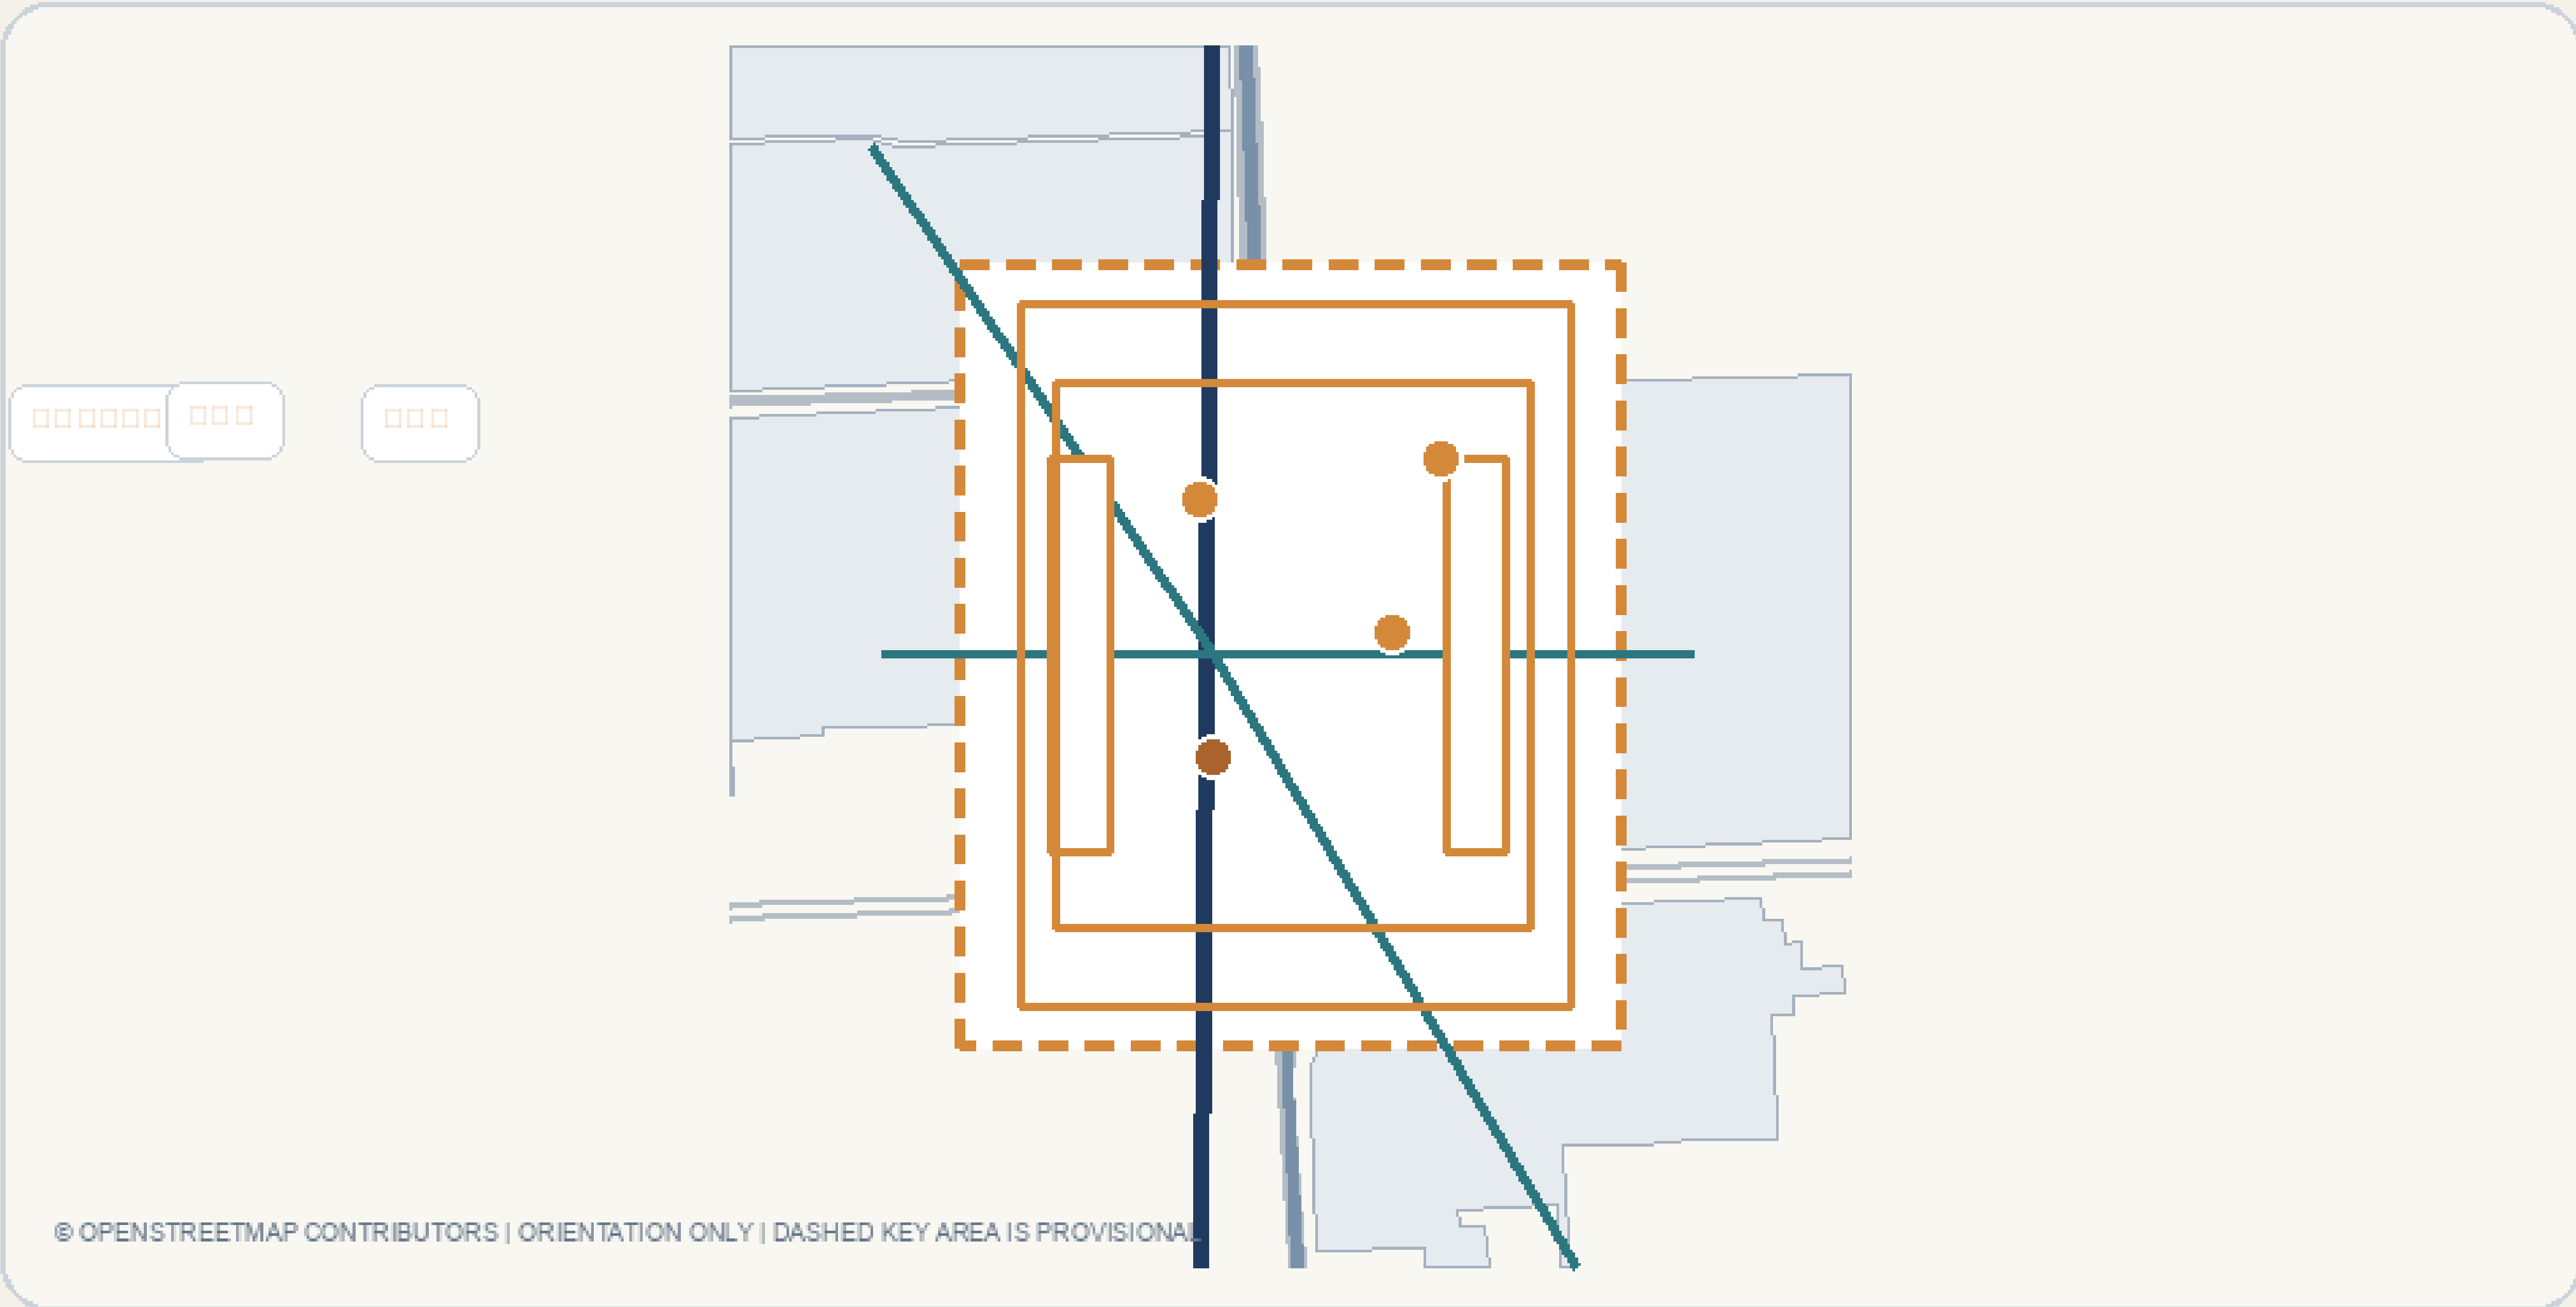

AI Origin: Turn the Everyday Route into a First-User Commons

Between Wudaokou, Qinghuayuan heritage and transit; ordinary route first, human service visible, AI optional

AI ORIGIN | TURN THE EVERYDAY ROUTE BETWEEN WUDAOKOU AND QINGHUAYUAN HERITAGE INTO A FIRST-USE COMMONS

FIRST MILE
JING-ZHANG

WUDAOKOU–CHENGFU ROAD–QINGHUAYUAN HERITAGE–LINE 13 | REAL ORIENTATION + PROVISIONAL KEY AREA

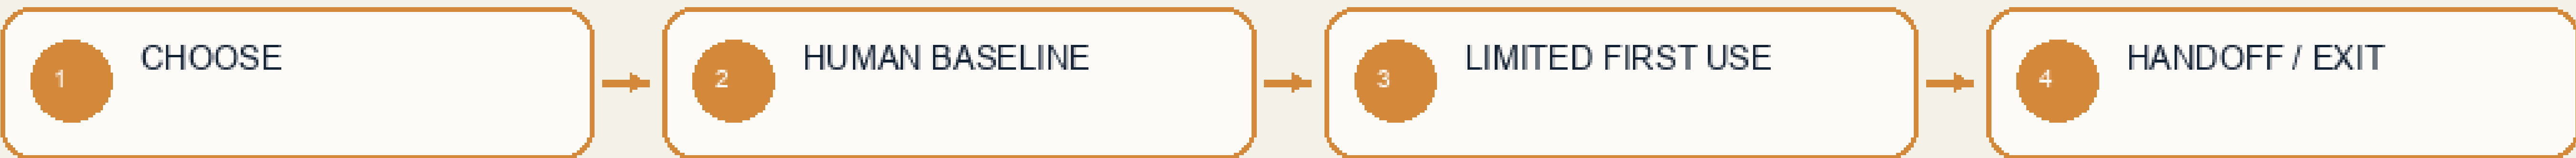

THE QUESTION THIS PLACE MUST ANSWER

Can an ordinary person complete a real task and transfer to a human without loss when AI fails?

THREE SPATIAL MOVES

- 1 Keep the 6 m ordinary route primary; AI is optional
- 2 Make the human/appeal desk visible and directly reachable
- 3 Use the First User Table to connect founders, residents and front-line staff

FIRST-MILE ACTION SEQUENCE

HARD STOP

If any of three real tasks cannot hand off or exit without loss, pause G2 immediately.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

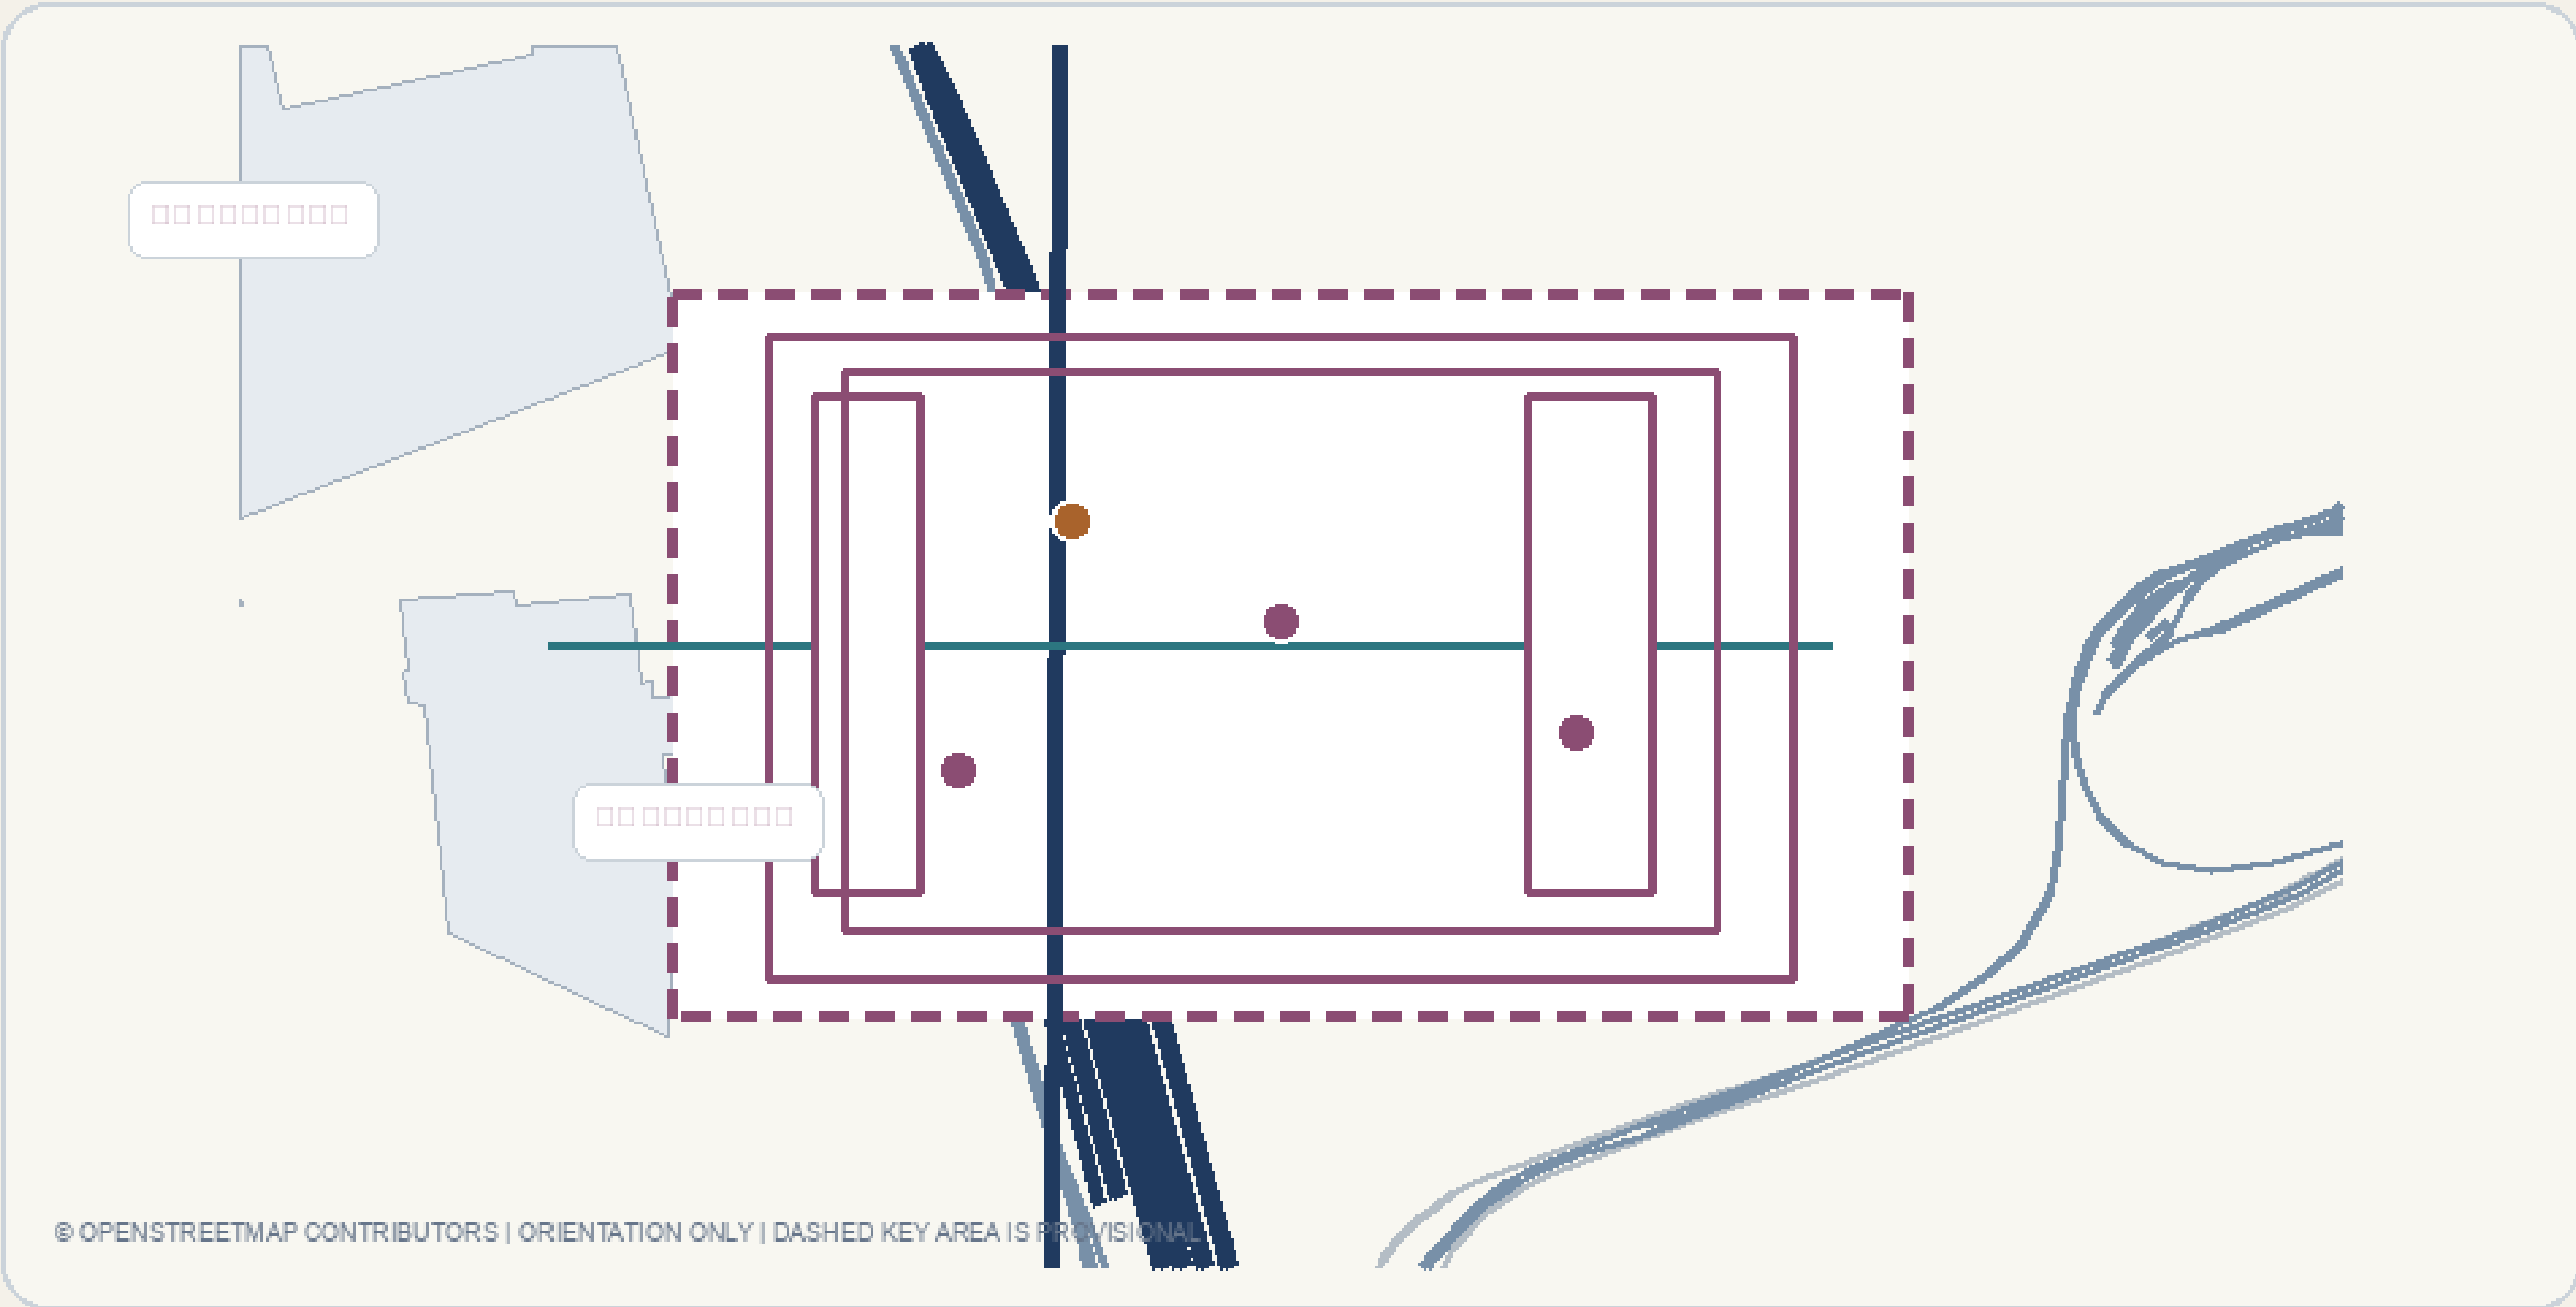

Dazhongsi: Turn Pilot Evidence into Reusable First-Order Terms

Station, heritage, commons and everyday commerce connect; a first order states acceptance, fee, liability, training and exit together

DAZHONGSI | LINK TRANSIT ARRIVAL, HERITAGE AND EVERYDAY COMMERCE INTO A VERIFIABLE FIRST-ORDER ROOM

 FIRST MILE
JING-ZHANG

DAZHONGSI STATION–NORTH THIRD RING–HERITAGE–BEIJING JIAOTONG UNIVERSITY | REAL ORIENTATION + PROVISIONAL KEY AREA

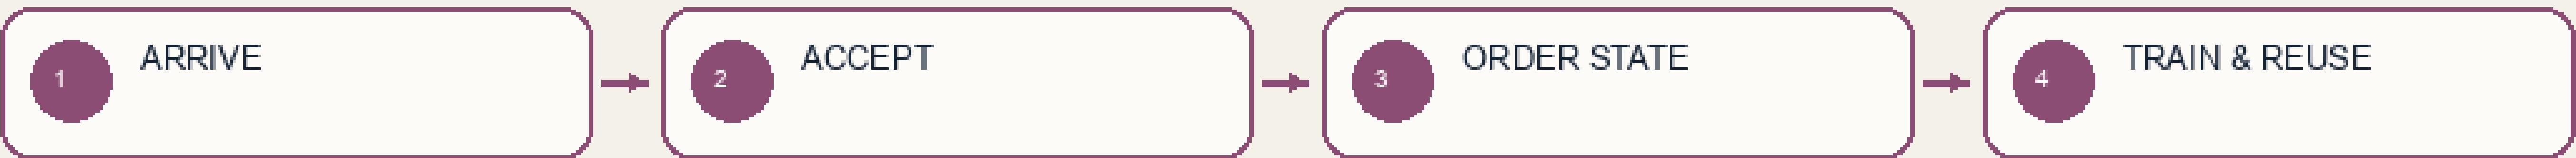

THE QUESTION THIS PLACE MUST ANSWER

How does one pilot become reusable terms with acceptance, fee, liability, training and exit?

THREE SPATIAL MOVES

- 1 Link station, public room and daily commerce in one arrival loop
- 2 Let procurement clinic and ordinary public stay coexist, not become a showroom
- 3 Address reuse/failure records to the next operator, not media traffic

FIRST-MILE ACTION SEQUENCE

HARD STOP

If acceptance, fee, liability, procurement state, training or exit is blank, do not call it a first order.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

A First User Is Not an Event Check-In

Human-scale flagship experiences are followed by a six-step, four-lane journey proving correction, human handoff and no-loss exit

FIRST-USER JOURNEY | TURN USE INTO REVIEWABLE ADOPTION EVIDENCE

SIX STEPS, FOUR SWIMLANES | PAUSE IF HUMAN ESCALATION OR NO-LOSS EXIT FAILS

	01 ARRIVE & CHOOSE	02 DEFINE REAL TASK	03 HUMAN BASELINE	04 LIMITED AI USE	05 CORRECT & HANDOFF	06 EXIT, REUSE OR STOP
FIRST USER	See 6m ordinary route; choose human or AI	State today's decision; 'experience' is not a task	Run current process once; time errors and material	Rights-cleared public info only; stop anytime	Flag error; transfer without losing progress	Receive recoverable record; end or reuse
FRONT-LINE STAFF	Explain boundary and non-digital entry	Confirm owner, done state and harm	Record human steps and waiting	Stay visible; may overturn the answer	Take over, correct and close the loop	Confirm no-loss service; explain appeal/deletion
AI ASSISTANCE	Off by default; no face/trajectory	Help decompose, never decide	Read de-identified baseline only	Show source, confidence, refusal and handoff	Export context; stop automation	No departure tracking; delete on schedule
EVIDENCE & GATE	G0: choice visible	Task card: owner / done / harm	Baseline: time / error / handoff	G2: source / refusal / consent	G3: handoff / correction / complaint	G4: outcome / unit cost / reuse / exit

SUCCESS IS NOT SATISFACTION: RECORD COMPLETION, HUMAN CORRECTION, INDEPENDENT HANDOFF, UNIT COST, NO-LOSS EXIT AND CONDITIONAL REUSE.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

The AI-generated triptych is concept communication, not site, interview, partnership, order or built evidence; status follows the Passport and G0-G4 records.

Twelve Scenario Cards: Every One Must Pass the Gates

The chain starts only with a real task, human baseline, minimal data, operating owner, cost state and stop condition

TWELVE SCENARIO CARDS | EVERY ONE MUST PASS THE FIRST-MILE GATES

REAL TASK, HUMAN BASELINE, MINIMAL DATA, OPERATING OWNER, COST STATE, HANDOFF AND STOP CONDITION ARE ALL REQUIRED

01

Urban Problem Launch Desk

Real-need intake | Human moderation

HUMAN HANDOFF / PAUSE / EXIT

02

Pre-Street Model Evaluation

Fact, bias and safety | Expert final review

HUMAN HANDOFF / PAUSE / EXIT

03

Agent Operations Handoff Pod

Unfamiliar operator takeover | Return on failure

HUMAN HANDOFF / PAUSE / EXIT

04

AI Startup Service Copilot

Public information | Human correction

HUMAN HANDOFF / PAUSE / EXIT

05

Accessible Slow-Mobility Task Chain

Barrier work-order closure | Paper and phone remain

HUMAN HANDOFF / PAUSE / EXIT

06

Multilingual Railway Culture Guide

Human historical review | No route tracking

HUMAN HANDOFF / PAUSE / EXIT

07

Public-Space Microclimate Assistant

Environmental advice | Site staff decide

HUMAN HANDOFF / PAUSE / EXIT

08

Low-Speed Robot First-Use Route

Bounded place, time and speed | Emergency stop

HUMAN HANDOFF / PAUSE / EXIT

09

AI-Native First Store

Product, after-sales and reuse | No profile pricing

HUMAN HANDOFF / PAUSE / EXIT

10

Innovation Procurement Clinic

Acceptance, cost and liability | No award promise

HUMAN HANDOFF / PAUSE / EXIT

11

First Mile Console

Gate, owner and pause state | Public view de-identified

HUMAN HANDOFF / PAUSE / EXIT

12

Reuse Stage and Failure Archive

Reuse conditions and failure lessons | Anonymous allowed

HUMAN HANDOFF / PAUSE / EXIT

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

A scenario without a problem owner, human baseline, handoff owner or stop condition does not enter the field; scenario count never substitutes for real adoption.

90 Days: Prove One Real User Before Construction

Responsibility, output, cost, evidence release, quantity basis and stop condition enter one delivery ledger

90-DAY DELIVERY LEDGER | MONEY, DUTY, EVIDENCE

ORDER-OF-MAGNITUDE CONTROL, NOT A QUOTE | EACH GATE CAN PAUSE, RETURN OR EXIT

GATE	TIME	ACCOUNTABLE	MANDATORY OUTPUT	RELEASE	COST RMB 10K	ACCEPT / STOP
G0	D1–15	Problem owner	3 real tasks + human baseline	10%	15–25	Unobservable task / no exit → stop
G1	D16–35	Product + data owner	Rights, refusal, escalation, maintenance	25%	12–25	No data duty / safety fail → return
G2	D36–55	Site operator	Human roster + reversible kit + use record	25%	43–80	Ordinary route blocked / no handoff → stop
G3	D56–75	Independent operator	Takeover drill + unit cost + correction closure	25%	15–30	Takeover fail / complaint open → return
G4	D76–90	Reuser + buyer	Acceptance, fee, liability, exit + reuse pack	15%	13–24*	No real reuse intent → archive; no build-out

DESIGN-CONTROL ENVELOPE | RMB 0.98–1.84M

- Research/co-design 15–25
- Human desk/training 18–30
- Reversible kit/furniture 25–50
- Access/wayfinding 15–30
- Testing/data security 12–25
- Contingency 15%: 13–24

THREE PROCUREMENT GUARDRAILS

1. No problem owner, no hardware
2. At least 2 quotes + site survey
3. Release follows evidence, not publicity

* G4 cost is the 15% contingency. Total is a concept control range; verify after official scope, quantities, procurement route and 2+ quotes.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

PILOT QUANTITY BASIS | WHERE RMB 0.98–1.84M COMES FROM

CONCEPT CONTROL, NOT A QUOTE | UPDATE QUANTITIES, UNIT RATES AND ROUTE AFTER SURVEY + 2 QUOTES

WP	CATEGORY	QUANTITY BASIS	UNIT / SUBITEM ASSUMPTION	LOW RMB10K	HIGH RMB10K
W1	Research / co-design	1 human baseline + 12 fixed interviews + design coordination	Baseline 6–10; interviews 3–5; coordination 6–10	15	25
W2	Human desk / training	80 two-person service shifts + 6 training / takeover drills	Shifts 12–19.2; training 6–10.8	18	30
W3	Reversible kit / furniture	36 m² demountable service kit + user table / sign kit	Kit 18–32.4; furniture/signs 7–17.6	25	50
W4	Access / wayfinding	1 route audit + reversible repairs + 12 field information signs	Audit 3–5; repairs 8–18; signs 4–7	15	30
W5	Testing / data security	1 rights clearance + 1 evaluation suite + 1 privacy/security review	Rights 3–6; evaluation 4–8; security 5–11	12	25
W6	15% contingency	Approved-scope uncertainty only	Rounded from W1–W5 subtotal	13	24

CONTROL TOTAL RMB 0.98–1.84M

PERMANENT WORKS, LAND, BULK DEVICES: OUTSIDE THIS PILOT

THREE DECISION PREREQUISITES

SITE SURVEY + QUANTITIES + 2+ QUOTES PER ITEM

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

RMB 0.98-1.84M is concept control for one first pilot, not a quote or fiscal promise; update after survey, quantities, procurement route and 2+ quotes.

Long-Term Operation and a Global Public Brand Asset

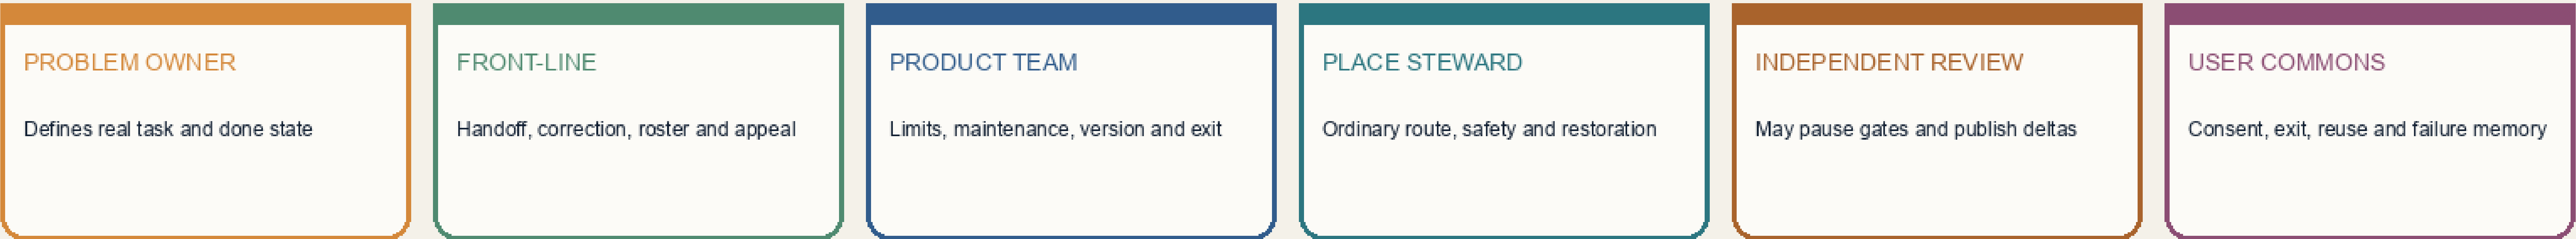

Six parties, dual ledgers, four seasons and three years; verified reuse matters more than city logos

LONG-TERM OPERATIONS | MAINTAIN AN ADOPTION LINE, NOT A ONE-OFF EVENT

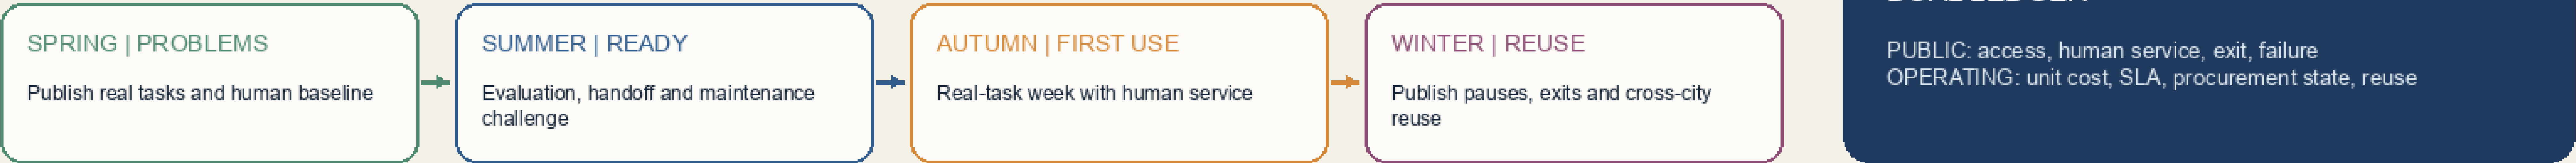

ROLES, ANNUAL RHYTHM, DUAL LEDGER AND THREE-YEAR ROADMAP; ORGANIZATIONS AND FUNDING REQUIRE FORMAL CO-CREATION

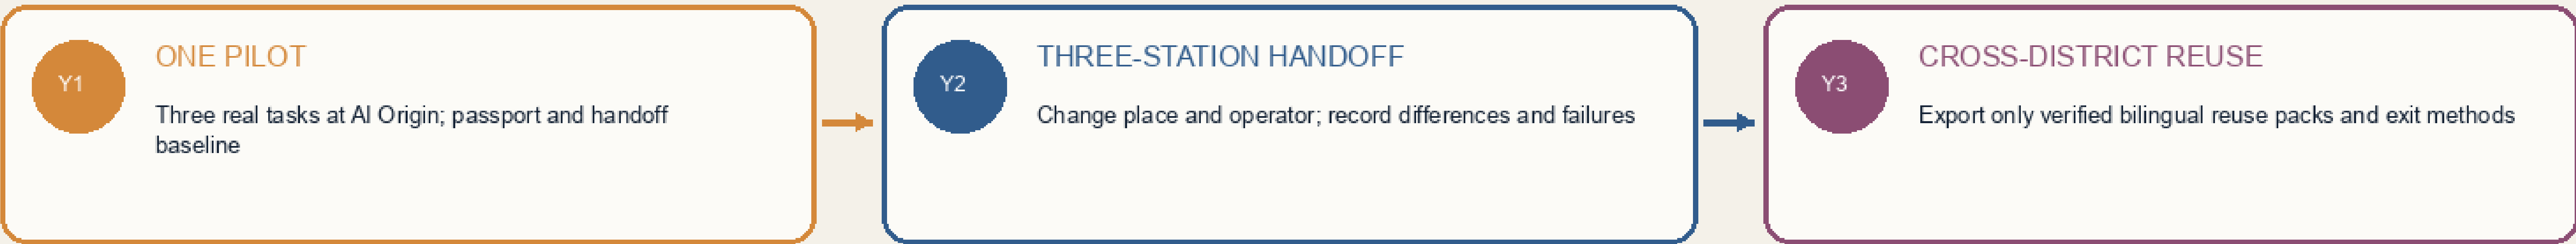

SIX-PARTY STEWARDSHIP: SEPARATE DELIVERY POWER AND STOP RIGHTS

ANNUAL RHYTHM

THREE-YEAR ROADMAP: SCALE ONLY AFTER REUSE EVIDENCE

STATUS BOUNDARY: OPERATORS, ANNUAL FUNDING, PARTNER CITIES AND EVENTS ARE CO-CREATION PROPOSALS, NOT COMMITMENTS.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

No party declares success alone; Year 1 proves operation, Year 2 replicates G4 services, and Year 3 connects cities through bilingual reuse packs and open interfaces.

FIRST-MILE PASSPORT | WHAT EARNS THE NEXT MILE

SYNTHETIC EMPTY EXAMPLE: REPRODUCIBLE STRUCTURE; ORG, PEOPLE, PERFORMANCE AND ORDER ARE NULL

FIRST-MILE PASSPORT

FM-DEMO-000 / SYNTHETIC_NON_OPERATIONAL

NOT STARTED / NO REAL RESULTS

01 PROBLEM OWNER
NULL | NAME BEFORE G0

02 FIRST USER
NULL | NOT RECRUITED

03 REAL TASK
Find authority, human channel and complete one correction

04 HUMAN BASELINE
PENDING | time, error, material, wait

05 DATA BOUNDARY
Rights-cleared public info, no face or continuous trajectory

06 HUMAN HANDOFF
PENDING | visible desk + context export

07 UNIT SERVICE COST
NULL | CALCULATE AFTER PILOT

08 EXIT & DELETION
No-loss exit; retention set by accountable operator

09 HUMAN DECISION DELTA
PENDING | system advice / final decision / reason

10 REUSE CONDITION
NULL | NO SUBSTITUTE WITH LIKES OR TRAFFIC

FIVE GATES ARE REVOCABLE STATES

G0 REAL NEED
PENDING

G1 PRODUCT READY
PENDING

G2 FIRST USE
PENDING

G3 FIRST ADOPTION
PENDING

G4 FIRST REUSE
PENDING

IF A GATE EXPIRES, EVIDENCE FAILS OR APPEAL STAYS OPEN:
PAUSE / RETURN / EXIT

FIRST-MILE GATE: A BRAND FOR THE FIVE-GATE JOURNEY

MONO-COMPATIBLE, DISTANCE-LEGIBLE, READY FOR WAYFINDING, PASSPORTS, GATES AND EVENTS

FIRST-MILE GATE
JING-ZHANG FIRST MILE
MAKE REAL ADOPTION HAPPEN

MARK CONSTRUCTION

OPEN GATE
OPEN COLLABORATION

RAIL / PATH
HERITAGE TO ADOPTION

FIVE SLEEPERS
G0-G4, GO OR PAUSE

FORWARD POINT
EVIDENCE BEFORE PROGRESS

FOUR APPLICATIONS

01 WAYFINDING PYLON

02 EVIDENCE PASSPORT

03 G0-G4 GATE SIGN

04 LAUNCH BADGE

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

EVIDENCE CHAIN

The evidence chain consists of five sequential steps, each in a rounded rectangle, connected by arrows:

- SOURCE**
Official / cleared source
- GEOMETRY**
Spatial layer
- METRIC**
Recomputable metric
- GATE**
Gate + human review
- DECISION**
Scale / revise / exit

THREE METRICS WAIT FOR A REAL PILOT

This section displays three metrics, each in a colored box with a corresponding line indicator:

- 11.41 km²** (Provisional design area) - Indicated by a blue line.
- 15.3%** (Concept green ratio) - Indicated by a green line.
- 22.0%** (Concept public-space ratio) - Indicated by an orange line.
- 12** (AI scenario cards) - Indicated by a blue line.
- 5** (Launch gates) - Indicated by a green line.
- 6** (Primary personas) - Indicated by a purple line.

THREE METRICS WAIT FOR A REAL PILOT

- First-user task completion (UNKNOWN)
- Repeat-use rate (UNKNOWN)
- Operator handoff pass rate (UNKNOWN)

Xiaokang x Codex Urban Agent - 2026-08

93171-sys / PROVISIONAL BOUNDARY / CONCEPT DESIGN

COMPLETE TASKBOOK RESPONSE | FROM OFFICIAL POSITIONING TO ADOPTION AND GLOBAL GOVERNANCE

3 positionings x 5 functions x 6 stack layers x 4 daily domains x JZ-AUP v1.0

Three Positionings x Five Functions x First-Mile Evidence

Official task - mechanism - spatial anchor - review evidence; eight requirements on one page

P1 Centennial Jing-Zhang Cultural Belt Translate engineering autonomy, truth-seeking and public learning into urban-adoption discipline PLACE Heritage-park public realm + First-Mile Gate + three handoff landmarks	P2 Urban AI Life Experience Belt Test AI through everyday work, living, social and learning tasks PLACE Ordinary route first + optional AI route + visible human desk + day/night operation	P3 AI Convergence Innovation Belt Connect R&D, first real use, first operational order and cross-district reuse PLACE Zhongzhiyuan Build—AI Origin Use—Dazhongsi Operate—two wings
--	---	--

FIVE FUNCTIONS	FIRST-MILE MECHANISM	PRIMARY ANCHOR / EVIDENCE
F1 Full-Stack Independent AI Innovation System	Six-layer loop: compute/edge, data/IP, model evaluation, open tooling, scenario operations, adoption/reuse	Zhongzhiyuan Product-Ready Yard
F2 World-Class AI Innovation Ecosystem	Universities, firms, users, operators, professional services and regional nodes collaborate around reusable outcomes	Three Zones and Two Wings + seven global translations
F3 New Paradigm of AI-Enabled Scenarios	Each scenario card includes a problem owner, non-AI baseline, human takeover, cost state and stop condition	12 scenario cards + 3 testing settings
F4 Intelligent and Vibrant AI City	Ordinary routes, free stay, human service and public space still work after AI is removed	Day/night work—living—social—learning task chain
F5 Global Voice in AI Governance	Publish G0—G4, the First-Mile Passport, failure archive, dual ledgers and reuse pack as a versioned protocol	Jing-Zhang AI Urban Adoption Protocol, JZ-AUP v1.0

This is a proposal-authored task response and open-protocol draft, not official adoption, partnership, procurement, funding or implementation.

Xiaokang x Codex Urban Agent · V6_TASKBOOK_CROSSWALK

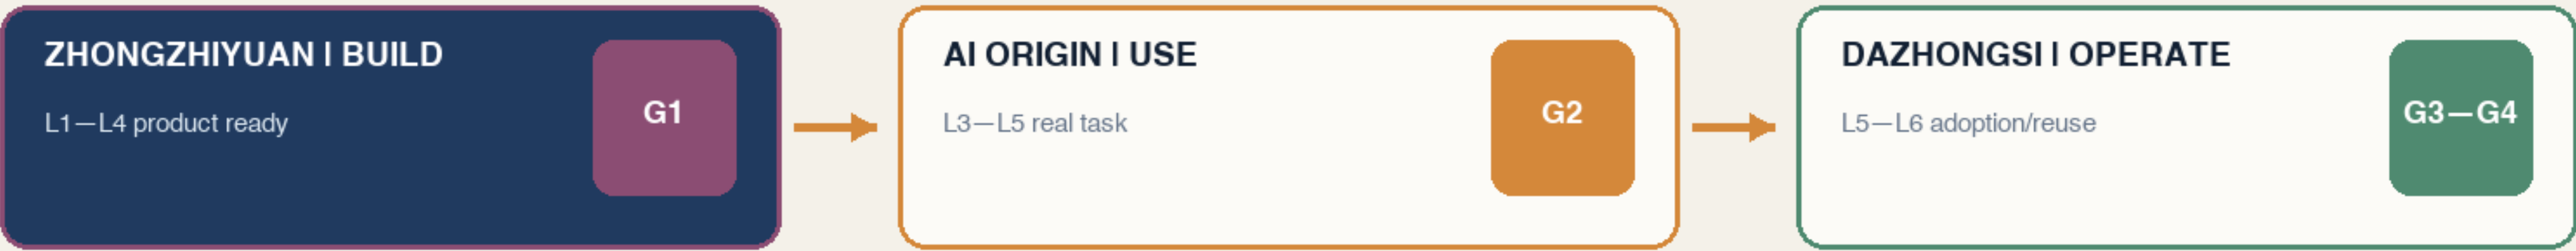

FULL-STACK AI | FROM CAPABILITY TO ADOPTION

Independence is not isolation: every layer is replaceable, auditable, transferable and tested through real urban tasks

L1 Compute and Edge MINIMUM EVIDENCE Compute source, energy, edge boundary and degraded mode	L2 Data and IP MINIMUM EVIDENCE Register, licence, minimisation, deletion and attribution	L3 Model, Evaluation and Safety MINIMUM EVIDENCE Capability limits, bias, refusal, red-team and human takeover
L4 Tooling, Open Source and Deployment MINIMUM EVIDENCE Version, dependencies, interfaces, portable deployment and unfamiliar-team takeover	L5 Scenario, Operations and Service MINIMUM EVIDENCE Problem owner, non-AI baseline, roster, SLA and harmless exit	L6 Adoption, Procurement and Reuse MINIMUM EVIDENCE Acceptance, cost range, procurement state, training, changed conditions and restoration

THREE STATIONS TURN A TECH STACK INTO AN ADOPTION CHAIN

This is a proposal-authored task response and open-protocol draft, not official adoption, partnership, procurement, funding or implementation.

Xiaokang x Codex Urban Agent · V6_FULL_STACK

URBAN AI LIFE EXPERIENCE + JING-ZHANG AI URBAN ADOPTION PROTOCOL

The left tests whether daily life improves; the right defines responsible urban adoption and global reuse

FOUR REAL TASK DOMAINS IN ONE DAY

08:00	Work Commute, find service and complete a real work task PUBLIC BASELINE Ordinary route and staffed window remain available
12:30	Living Eat, access services, shop and stay accessibly PUBLIC BASELINE No mandatory sign-up or payroll for public service
18:00	Learning Learn railway culture, join first-use training and correct AI PUBLIC BASELINE Humans final-review history and high-impact content
20:30	Social Meet in the commons, attend an evening event and return safely PUBLIC BASELINE Free stay, lighting, human help and exit remain available

JZ-AUP v1.0

Jing-Zhang AI Urban Adoption Protocol

FIVE OPEN OBJECTS

First-Mile Task Order

G0—G4 Gate Record

First-Mile Passport

Failure and Reuse Archive

Public-Value + Operating-Economics Ledgers

RELEASE RULE

Annually publish problem orders, version changes, failures and bilingual reuse packs that pass G4, cities exchange authorised, de-identified structures, not personal data.

This is a proposal-authored task response and open-protocol draft, not official adoption, partnership, procurement, funding or implementation.

Xiaokang x Codex Urban Agent · V6_URBAN_PROTOCOL
