

JING-ZHANG BREAKS NEW GROUND

From Frontier AI to Trusted Urban First Use

SOURCE - STACK - PROVE - LIVE & MARKET - ENABLE - COMMONS

CONCEPT EXPERIENCE - NOT SITE PHOTOGRAPHY - NOT APPROVED ARCHITECTURE - PROVISIONAL GEOMETRY

V0.8 / URBAN FIRST-USE PROTOTYPE / CONCEPT DESIGN

The Beijing Question

From Frontier AI to Trusted Urban First Use

FRONTIER DENSITY

Haidian already concentrates universities, research, models, open-source communities and firms. The missing link is a path into the real city.

FIRST-USE CAPACITY

Urban design supplies sites, human baselines, accountable roles, data boundaries, stop conditions and public evidence.

THE JING-ZHANG METHOD

The first railway proved capacity for a complex modern system. Today AI must be tested, adopted and corrected while leaving shared capability behind.

SOURCE - STACK - PROVE - LIVE & MARKET - ENABLE - COMMONS

SOURCE

AI Origin / frontier innovation

STACK

Zhongzhiyuan / full stack

PROVE

Xiaoyuehe / real-world co-test

LIVE & MARKET

Dazhongsi / everyday first use

ENABLE

services / capital / talent

COMMONS

heritage park / public evidence

6 / 6

network roles / anchors

5 / 12

flagship pilots / scenarios

1

FP01 contract template

5/5 - 12/12

time gates / clauses

11.41 km²

provisional scope

UNKNOWN

actual first-use procurement

Evidence Base

Provisional geometry has not been verified as correct. Community checks #846 / #1029 remain background warnings; V0.8 moves no coordinates. Official SITE/KEY polygons trigger whole-package recalculation.

Three Spatial Experiences

CONCEPT EXPERIENCE - NOT SITE PHOTOGRAPHY - NOT APPROVED ARCHITECTURE - PROVISIONAL GEOMETRY

ZHONGZHIYUAN

STACK + PROVE

Public observation, a clear safety boundary, staffed control, physical emergency stop and visible energy interface.

AI ORIGIN

SOURCE + ENABLE

A no-smartphone wheelchair user reaches a staffed counter first; evaluation and appeal roles remain separate.

DAZHONGSI

LIVE & MARKET

Small merchants and creators stay frontstage; staffed service, dispute review and a contribution archive connect.

100-Day First-Use Contract

GO only unlocks separate procurement, legal and professional authorization discussion. REVISE / STOP freezes automation, pays no outcome fee, restores the human baseline, disposes data, returns assets and places failure evidence in COMMONS.

FP01 Space and Roles

S03 + S04 + S07 / PUBLIC-TEST-001 / ROOM-TEST-001

FP01-CONTRACT-001

- C01 human/non-digital baseline and real public problem
- C02-C04 role separation, version/provenance, site/funding/data/stop thresholds
- C05-C08 interoperation, no-account/accessibility, human takeover, incident/appeal and restoration drill
- C09-C10 public pass/fail/uncertainty evidence and independent go / revise / stop
- C11-C12 acceptance only after separate authorization; failure restores, disposes, returns and retains evidence

6 / 6

network roles / anchors

5 / 12

flagship pilots / scenarios

1

FP01 contract template

5/5 - 12/12

time gates / clauses

11.41 km²

provisional scope

UNKNOWN

actual first-use procurement

Five Flagship Pilots

12 scenarios assigned exactly once; FP05 observes FP01-FP04

FP01

AI Origin First-Use Station

S03 + S04 + S07

100-day contract prototype

FP02

Zhongzhiyuan Full-Stack Open Test Yard

S01 + S10

safety / interoperation / energy

FP03

Xiaoyuehe Scenario Co-Test Network

S02 + S05 + S06 + S08

bounded real-user validation

FP04

Dazhongsi AI Everyday Market

S11 + S12

provenance / consumer / dispute

FP05

Jing-Zhang Public Evidence Park

S09 + FP01-04

public observation and failure memory

Land Use and Public Realm

V0.3 geometry retained; V0.8 adds first-use and disclosure semantics

ADAPTABLE BASE | SEVEN LAND-USE CODES SUPPORT SIX COUPLED ROLES

02

Keep a closed, gap-free, reproducible topology; retire the 3x4 field story and organize renewal by functional affinity

Mobility and Human Journeys

Public green spine / seven-interface service link / three human journeys

CIVIC COMMONS SPINE | THREE HUMAN JOURNEYS RETURN THE ROLE NETWORK TO DAILY LIFE

04

COMMONS enables public access and feedback; east-west exchange links ENABLE / PROVE; journey dashes are stories, not surveyed routes

Trusted Operations Layer

AI City API + seven interfaces + human takeover + appeal + capability return

RETURN / CAPABILITY HANDOVER

GO only unlocks separate procurement, legal and professional authorization discussion. REVISE / STOP freezes automation, pays no outcome fee, restores the human baseline, disposes data, returns assets and places failure evidence in COMMONS.

Implementation Dependencies

P1 public baseline - P2 source/stack/prove - P3 live/market diffusion

JING-ZHANG BREAKS NEW GROUND | SIX ROLES TURN AI INTO SHARED URBAN CAPABILITY01

From frontier research to industry, real-world proof and everyday public value - then into reusable Beijing methods

Not a one-way conveyor, but a coupled urban-capability network that learns together

Diagram illustrating the six roles and their interactions:

- SOURCE** (AI Origin Community): Frontier research and near-campus transfer
- STACK** (Zhongnanyuan): Full stack, interoperability, standards and safety
- PROVE** (Xiaoyuhe east-wing anchor): Real-world co-testing and professional validation
- ENABLE** (Zhongguancun west-wing anchor): Capital, IP, talent and first-use support
- COMMONS** (Jing-Zhang park): Public access, observation, feedback and shared memory
- LIVE & MARKET** (Dazhongsi): Everyday service, commerce and cultural adoption

FIVE CONVERSION GATES: ACTOR, EVIDENCE AND EXIT AT EVERY STEP

01 Technology

02 Test

03 First use / procurement

04 Diffusion

05 Standards

PROPORTIONAL LOCATOR | PROVISIONAL ROUGH EXTENT

Map showing the proportional locator of the six roles within the Jing-Zhang area. The roles are marked with colored dots: SOURCE (blue), STACK (green), PROVE (orange), ENABLE (purple), COMMONS (red), and LIVE & MARKET (yellow). The map includes a north arrow and a 1 km scale bar.

Roles are functional relationships, not new districts. The two wings are low-contrast functional anchors; no official boundary is encoded.

TRUSTED OPERATIONS LAYER (NOT A SECOND BRAND)

AI City API / Jing-Zhang AI Civic Protocol: Identity, data purpose, capability limits, human takeover, appeal, interoperability, version and exit.

1909 independent engineering into geography | 2019 railway heritage into public space | 2026 frontier AI into shared capability

PROVISIONAL DESIGN BOUNDARY · DESIGN METRICS · NOT STATUTORY / V0.7

Local generation | geometry/*.geojson + metrics.json | no external basemap / web imagery

D0

PROBLEM ENTRY

D30

ACCOUNTABILITY + BOUNDS

D60

BOUNDED CO-TEST

D90

INDEPENDENT DECISION

D100

PUBLIC HANDOVER

Provisional geometry has not been verified as correct. Community checks #846 / #1029 remain background warnings; V0.8 moves no coordinates. Official SITE/KEY polygons trigger whole-package recalculation.

Dependency packages are not schedules, budgets or implementation approvals

Metrics, Risks and Next Step

Total floor area, FAR, density, height, setbacks, road area/ratio, ownership, utilities, energy, fire and heritage conditions remain unknown - never zero or average.

UNKNOWN IS VALID

Total floor area, FAR, density, height, setbacks, road area/ratio, ownership, utilities, energy, fire and heritage conditions remain unknown - never zero or average.

NEXT TRIGGER

Provisional geometry has not been verified as correct. Community checks #846 / #1029 remain background warnings; V0.8 moves no coordinates. Official SITE/KEY polygons trigger whole-package recalculation.
