

Industrial infrastructure that returns urban AI equipment to accountable service

RETURN-TO-SERVICE RELEASE PROTOCOL v1.2

Restore public service first; then decide whether the asset returns

Dazhongsi staffed intake and service continuity → AI Origin part, calibration, and rights evidence → Zhongzhiyuan whole-system regression → accountable plus independent limited release at Dazhongsi.

R0 Intake eligibility

R1 Ownership, warranty, and data rights

R2 Risk isolation and diagnostic baseline

R3 Repair authorization and part evidence

R4 Calibration and regression retest

R5 Human release and destination

MISSING EVIDENCE
HOLD

OUT OF SCOPE
QUALIFIED HANDOVER

CHAIN CLOSED
HUMAN RELEASE

REALITY STATE

Concept space
formed

Official polygons
pending

Professional commissions
not started

Field runs
0

90-DAY EXITABLE PILOT

One device family; no heavy new build; register intake, work order, parts, retest, receipt, and exit conditions first.

TABLETOP REPLAY 12/12

Proves only repeatable participant-authored rules, not field safety, device performance, institutional authority, or public acceptance.

PUBLIC SERVICE CONTINUITY

Staffed takeover remains available to non-app and accessibility users; a device HOLD does not suspend the civic service.

Industrial infrastructure that returns urban AI equipment to accountable service

Public service stays on the main line; failed assets enter a side line

ONE CONTINUOUS CIVIC MAIN LINE · THREE DISTINCT WORKS · ONE CLOSEABLE EQUIPMENT SIDE LINE

01 / CIVIC MAIN LINE + EQUIPMENT SIDE LINE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

Provisional rough geometry supports concept recalculation only; routes show responsibility, not road, station, or logistics commitments

ONE PUBLIC-SERVICE ROBOT

Staff take over the service while the asset gathers intake, rights, part, calibration, regression, and human-release evidence.

HOLD / RETEST	missing evidence; retain failure
QUALIFIED HANDOVER	out of scope; controlled transfer
HUMAN RELEASE	accountable + independent sign-off

SYNTHETIC REPLAY 12/12 | AI-AUTHORITY GUARDS 4/4 | FIELD 0

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Three-area relay | evidence, receipts, and handoff

Industrial infrastructure that returns urban AI equipment to accountable service

Three spatial types, three works, one professional relay with no skipped stop

03 / KEY-AREA HANDOFF

STAFFED INTAKE + ACCESS RETEST · PARTS COMMONS + CALIBRATION · ISOLATION + SYSTEM REGRESSION

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

DAZHONGSI | terminal after-sales and circular procurement

0.720 km² · PROVISIONAL

PUBLIC SERVICE WORKS

staffed intake · accessibility retest · receipt

Public intake, accessibility retest, accountable release, and procurement feedback

ENTRY: official station/area anchoring / lawful site/use

OUTPUT: intake/warranty record / service-continuity record

PAUSE: No staffed fallback, inaccessible public route, unresolved complaint, erasure failure, or incomplete gate trail.

AI ORIGIN | instruments, protocols, and skills

1.043 km² · PROVISIONAL

PRECISION SHARED WORKS

parts commons · protocol review · calibration

Interchangeable-part evidence, instrument calibration, protocols, and skills

ENTRY: official area/survey / lawful use

OUTPUT: part evidence / calibration/reference record

PAUSE: Reference invalid, environment uncontrolled, data/IP rights unresolved, or compatibility dimension missing.

ZHONGZHIYUAN | system diagnostics and recertification

1.929 km² · PROVISIONAL

CONTROLLED TEST WORKS

isolation · whole-system regression · recertification

Whole-system fault reproduction, fleet interfaces, and safety regression retest

ENTRY: official area/survey / lawful site rights

OUTPUT: whole-system baseline / regression evidence

PAUSE: Unsafe isolation, failed emergency stop, uncontrolled route, or missing responsible operator.

HANDOFF OBJECTS | work order → rights record → part/calibration evidence → regression + failure record → limited-release summary

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Bounded translation of global cases

Industrial infrastructure that returns urban AI equipment to accountable service

What is formed, what remains missing, and what is tabletop-only

SEPARATE DESIGN QUANTITIES, STATUTORY CONTROLS, READINESS, AND FIELD PERFORMANCE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

TABLETOP RULE REPLAY: 12/12 matched; FIELD RUNS 0; RULE CONSISTENCY ONLY

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

- EU repair rules, French repairability/durability indices, digital product passports, and global e-waste monitoring.
- CTI, remanufacturing processes, VDA 5050, and RepairMonitor remain bounded method references.

One spine, three works, nine zones, two circuits

Industrial infrastructure that returns urban AI equipment to accountable service

Nine zones form a spatial service process, not a set of generic industry labels

02 / LAND USE + PROCESS

Land uses are clipped by the provisional boundary; nine polygons cover it with 0.001 sqm gap and zero overlap

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

- The public front office serves residents, property managers, and operators.
- The middle office matches passports, work orders, parts, and qualified facilities.
- The back office diagnoses, replaces, refurbishes, calibrates, and retests by risk zone.

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Three key areas and fifteen modules

Industrial infrastructure that returns urban AI equipment to accountable service

Three spatial types, three works, one professional relay with no skipped stop

STAFFED INTAKE + ACCESS RETEST · PARTS COMMONS + CALIBRATION · ISOLATION + SYSTEM REGRESSION

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

03 / KEY-AREA HANDOFF

- Zhongzhiyuan: system diagnostics and recertification.
- AI Origin: instruments, protocols, and skills.
- Dazhongsi: terminal after-sales and circular procurement.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Six-frame replay | one asset, three works, one failure

A3 · 07/12

Industrial infrastructure that returns urban AI equipment to accountable service

One asset, three works, one failure, and a final human decision

06 / ONE-ASSET SERVICE REPLAY

SYNTHETIC TABLETOP REPLAY | each frame shows place, asset state, human duty, input evidence, and output/stop

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

SYNTHETIC 12/12 | AI-AUTHORITY 4/4 | FIELD RUNS 0 | INSTITUTIONAL SIGN-OFF 0

NOT PROOF OF SAFETY, PERFORMANCE, AUTHORIZATION, OR PUBLIC ACCEPTANCE

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Users × human accountability | AI assists only within a whitelist

Industrial infrastructure that returns urban AI equipment to accountable service

AI may classify, retrieve, orchestrate approved tests, and check evidence gaps. Warranty, risk, compatibility, calibration, safety, accessibility acceptance, and R5 release remain accountable human decisions. Four of four synthetic overreach branches were refused or held; field runs remain zero.

Industrial infrastructure that returns urban AI equipment to accountable service

Nine zones form a spatial service process, not a set of generic industry labels

02 / LAND USE + PROCESS

Land uses are clipped by the provisional boundary; nine polygons cover it with 0.001 sqm gap and zero overlap

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

- The fifteen footprints are programme placeholders, not surveyed building classifications.
- Use lawful existing space and reversible intervention first.
- FAR, height, statutory coverage, and building-level DRR await official evidence.

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Mobility, blue-green, and public space

Industrial infrastructure that returns urban AI equipment to accountable service

Public movement, ordinary equipment logistics, and licensed outbound transfers remain separated

04 / MOBILITY + BLUE-GREEN

Roads are conceptual centre lines, not road red lines, engineered sections, or confirmed station links

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

- Public routes, scheduled equipment logistics, and qualified outbound movements remain separated.
- Green and public space support shade, waiting, learning, transparent service, and risk buffers.

Nine project packages and three operating phases

Industrial infrastructure that returns urban AI equipment to accountable service

Three spatial types, three works, one professional relay with no skipped stop

03 / KEY-AREA HANDOFF

STAFFED INTAKE + ACCESS RETEST · PARTS COMMONS + CALIBRATION · ISOLATION + SYSTEM REGRESSION

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

- Phase 1: protocols, skills, and a small parts pool.
- Phase 2: northern system equipment and cross-vendor tests.
- Phase 3: southern terminal after-sales and circular procurement.
- Each phase must operate a real intake-to-return or compliant-handover loop.

HANDOFF OBJECTS | work order → rights record → part/calibration evidence → regression + failure record → limited-release summary

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

Metrics, evidence, risk, and submission boundary

Industrial infrastructure that returns urban AI equipment to accountable service

What is formed, what remains missing, and what is tabletop-only

SEPARATE DESIGN QUANTITIES, STATUTORY CONTROLS, READINESS, AND FIELD PERFORMANCE

CONCEPTUAL DISPLAY | provisional rough boundaries, not official planning lines

TABLETOP RULE REPLAY: 12/12 matched; FIELD RUNS 0; RULE CONSISTENCY ONLY

Source: submission GeoJSON, metrics, matrices, and narrative. Figures aid reading and do not replace machine evidence.

COMMUNITY-DISPLAY-ONLY · 2026-08-14

- Design quantities derive from provisional geometry and are not statutory controls.
- Operating performance requires real work orders and no invented success rates.
- Validation proves internal consistency and reviewability, not planning approval or product certification.
