

Jing-Zhang Climate Symbiosis Corridor

1/6

AI for urban cooling, water retention, energy coordination, and biodiversity

Conceptual illustration; provisional boundaries are not official redlines.

Jing-Zhang Climate Symbiosis Corridor

AI for urban cooling, water retention, energy coordination, and biodiversity

2/6

Concept: One Spine, Three Anchors, Six Gar

A cool mobility spine links climate data, sponge facilities, inclusive services, and low-carbon renewal

Provisional rough boundary · Conceptual recommendation · Recommendation with its

01 Cool mobility spine

02 Climate Data Tower

03 Four-Season Plant Lab

04 Visible Rainwater Plaza

AI for urban cooling, water retention, energy coordination, and biodiversity

Land Use and Climate Functions

A complete partition assigns climate roles to research, blue-green, service, and all-age community land

Provisional rough boundary · Conceptual recommendation · Recompute with

0802 Climate innovation and retrofit

1401 Continuous blue-green park

05 Climate services and mixed use

0702 All-age community services

AI for urban cooling, water retention, energy coordination, and biodiversity

Three Key Areas, Three Validation Roles

Provisional rough boundary · Conceptual recommendation · Recompute with

Zhongzhiyuan tests systems, AI Origin supports open collaboration, and Dazhongsi translates services

N

Zhongzhiyuan: system tests

M

AI Origin: open collaboration

S

Dazhongsi: urban translation

Jing-Zhang Climate Symbiosis Corridor

5/6

AI for urban cooling, water retention, energy coordination, and biodiversity

Cool Mobility × Blue-Green Sponge × Inclusivity

Provisional rough boundary · Conceptual recommendation · Recompute with

Continuous north-south movement and east-west stitches coordinate shade, water, habitat, and rest

75% walk-shade target

5 rain-garden modules

6 inclusive rest/service nodes

0 individual tracking or face ID

AI for urban cooling, water retention, energy coordination, and biodiversity

Evidence Chain and Annual Climate Check-L

Provisional rough boundary · Conceptual recommendation · Recompute with

Targets, measured outcomes, and missing inputs stay distinct to prevent false performance claims

75%

Walk-shade target
