

Jingzhang AI Innovation Corridor Urban Design Proposal

Jingzhang Smart-Vein Symbiosis Belt · One Belt, Three Cores · Multi-Node Scenarios · Blue-Green Slow-Mobility Ring

A. Overall Spatial Structure Concept

The spatial structure centers on the "Jingzhang Smart-Vein Symbiosis Belt". The Jingzhang Heritage Park forms a north-south historic and public-space spine (One Belt); Zhongzhiyuan, Beijing AI Origin Community and Dazhongsi form three innovation anchors (Three Cores); AI+ public-service, industry-service and urban-life nodes are distributed along rail stations, universities, enterprises and communities (Multi-Node Scenarios); slow mobility, green, public space and event routes close into a loop (Blue-Green Slow-Mobility Ring).

One Belt	Jingzhang Heritage Park historic and public-space spine (north-south)
Three Cores	① Zhongzhiyuan ② Beijing AI Origin Community ③ Dazhongsi
Multi-Node	AI+ public service / industry service / urban-life operable nodes
Ring	Slow mobility + green + public space + event routes linked loop

B. Three Key Areas Index

ID	Key Area	Announced	Recalculated	Positioning
PROV-KEY-001	Zhongzhiyuan AI Indigenous Innovation Acceleration Area	192.1 ha	1,929,201.877 sqm	Garden-type full-stack indigenous-innovation block
PROV-KEY-002	Beijing AI Origin Community	104.3 ha	1,043,236.909 sqm	Campus-adjacent transformation and talent community
PROV-KEY-003	Dazhongsi AI Industry Cluster	72.0 ha	720,454.221 sqm	Urban smart-economy and international-exchange block

C. Core Metrics Table

Metric	Value	Unit	Status	Source
site_area_sqm	11,412,825.386	sqm	known	geometry/site_boundary.geojson
building_footprint_area_sqm	310,807.184	sqm	known	geometry/buildings.geojson
green_ratio	0.123423 (12.34%)	ratio	known	geometry/green_space.geojson
public_space_ratio	0.073281 (7.33%)	ratio	known	geometry/public_space.geojson
key_area_count	3	count	known	geometry/key_areas.geojson
floor_area_ratio	-	ratio	unknown	brief/site-package/ranges/planning_limits.json
