

Jingzhang AI Innovation Corridor Urban Design Proposal

Design Concept: Jingzhang Smart-Vein Symbiosis Belt

One Belt, Three Cores · Multi-Node Scenarios · Blue-Green Slow-Mobility Ring

Submitted by MAJUN180 | Jingzhang AI Innovation Corridor International Design Call

Provisional boundary with precision caveats; to be recalculated after official data release; does not block content scoring

1. Three-Level Scope Framework

Level	Scope	Area	Core Task
Study	Coordination Study Scope	43.6 km²	AI industry ecosystem, strategic positioning, innovation chain and future urban form
Overall	Overall Design Scope	11.4 km²	1-2 km urban and industrial area around Jingzhang Heritage Park; overall renewal framework
Key Area	Key Area Scope	368.4 ha	Three detailed-design areas defining function, retain/renovate/demolish, public space and traffic

2. Overall Spatial Structure Concept

The overall concept is the "Jingzhang Smart-Vein Symbiosis Belt": taking the Jingzhang Heritage Park as the historic and public-space spine, the three key areas (Zhongzhiyuan, Beijing AI Origin Community, Dazhongsi) as innovation anchors, and universities, enterprises, communities and rail stations as the daily network, forming a spatial system of "One Belt, Three Cores, Multi-Node Scenarios, Blue-Green Slow-Mobility Ring".

Element	Meaning
One Belt	Jingzhang Heritage Park historic and public-space spine
Three Cores	Zhongzhiyuan / Beijing AI Origin Community / Dazhongsi key areas
Multi-Node	Operable AI+ public-service, industry-service and urban-life nodes
Ring	Linked ring of slow mobility, green, public space and event routes

3. Three Key Areas

ID	Key Area	Announced Area	Recalculated Area	Positioning	Spatial Action
PROV-KEY-001	Zhongzhiyuan AI Indigenous Innovation Acceleration Area	192.10 ha	1,929,201.877 sqm	Garden-type full-stack indigenous-innovation block	Strengthen Qinghe frontage, industry display, low-carbon exchange and access; green space hosts open testing and standard-governance display
PROV-KEY-002	Beijing AI Origin Community	104.30 ha	1,043,236.909 sqm	Campus-adjacent transformation and talent community	Stitch campus-park-block slow mobility; add release, talent service, housing and open-source collaboration space
PROV-KEY-003	Dazhongsi AI Industry Cluster	72.00 ha	720,454.221 sqm	Urban smart-economy and international-exchange block	Dazhongsi station integration, four-quadrant pedestrian links, commercial service and enterprise public-realm renewal

The three key areas total 368.4 ha announced and 369.29 ha recalculated, consistent with the 368.4 ha key-area scope.

4. Key Metrics Recalculation

Metric	Value	Unit	Status	Source
site_area_sqm	11,412,825.386	sqm	known	geometry/site_boundary.geojson
building_footprint_area_sqm	310,807.184	sqm	known	geometry/buildings.geojson
green_ratio	0.123423 (12.34%)	ratio	known	geometry/green_space.geojson
public_space_ratio	0.073281 (7.33%)	ratio	known	geometry/public_space.geojson
key_area_count	3	count	known	geometry/key_areas.geojson
floor_area_ratio	-	ratio	unknown	brief/site-package/ranges/planning_limits.json

5. Renewal Project List

ID	Project	Type	Main Dependencies
JZ-01	Jingzhang Heritage Park slow-mobility gap stitching	Public space / Traffic	Road redline, bridge space, traffic review
JZ-02	Zhongzhiyuan Qinghe innovation interface	Blue-green / Industry display	River blue-line, ecology and flood conditions
JZ-03	Origin Community campus-adjacent transformation street	Urban renewal / Industry service	Campus boundary, ownership, ground-floor mix
JZ-04	Dazhongsi Station four-quadrant pedestrian connection	Rail integration / Slow mobility	Rail station, intersection, municipal utilities
JZ-05	AI public service and edge-computing nodes	New infrastructure / Public service	Energy, computing, safety and operator
JZ-06	Global AI Week public route	Operation / Branding	Public-space permit, event safety, copyright clearance

Note: Generated on a provisional boundary. All areas, ratios and project counts are discussable, reviewable and to be recalculated after official boundaries are available; they shall not serve as statutory approval or precise-area basis.
