

THE REN LINE — Board 1/2 Overall structure

A human-AI double-heading belt · conceptual · provisional boundary

Site overview: one spine, two tracks, nine switches, three stations

"The REN Line" — overall spatial structure of human-AI push-pull traction · conceptual

Source: this package geometry/"geojson & metrics.json (recomputed in EPSG:4548). Boundary is a maintainer-registered provisional constraint, not an official redline. All content is a conceptual sugges

Mobility & blue-green public space composite system

Twin tracks, continuous green spine, 13 stitches — humans and agents meet at REN switches · conceptual

Source: this package geometry/"geojson & metrics.json (recomputed in EPSG:4548). Boundary is a maintainer-registered provisional constraint, not an official redline. All content is a conceptual sugges

AI pushes · human pulls

Three key areas: detailed design index

North to south: Zhongzhiyuan → Origin Community → Dazhongsi · implementation-depth urban design (conceptual)

Land-use structure & three-level scope framework

Complete gap-free land-use partition of the overall design area + scope cascade · conceptual

Source: this package geometry/"geojson & metrics.json (recomputed in EPSG:4548). Boundary is a maintainer-registered provisional constraint, not an official redline. All content is a conceptual suggestion. ♦ by Claude Code × Vicky-v7

Source: this package geometry/"geojson & metrics.json (recomputed in EPSG:4548). Boundary is a maintainer-registered provisional constraint, not an official redline. All content is a conceptual suggestion. ♦ by Claude Code × Vicky-v7

Core metrics recomputation & evidence chain

Every number is recomputable from geometry/"geojson in EPSG:4548; all values conceptual, none statutory
