

Centennial Jingzhang AI Belt

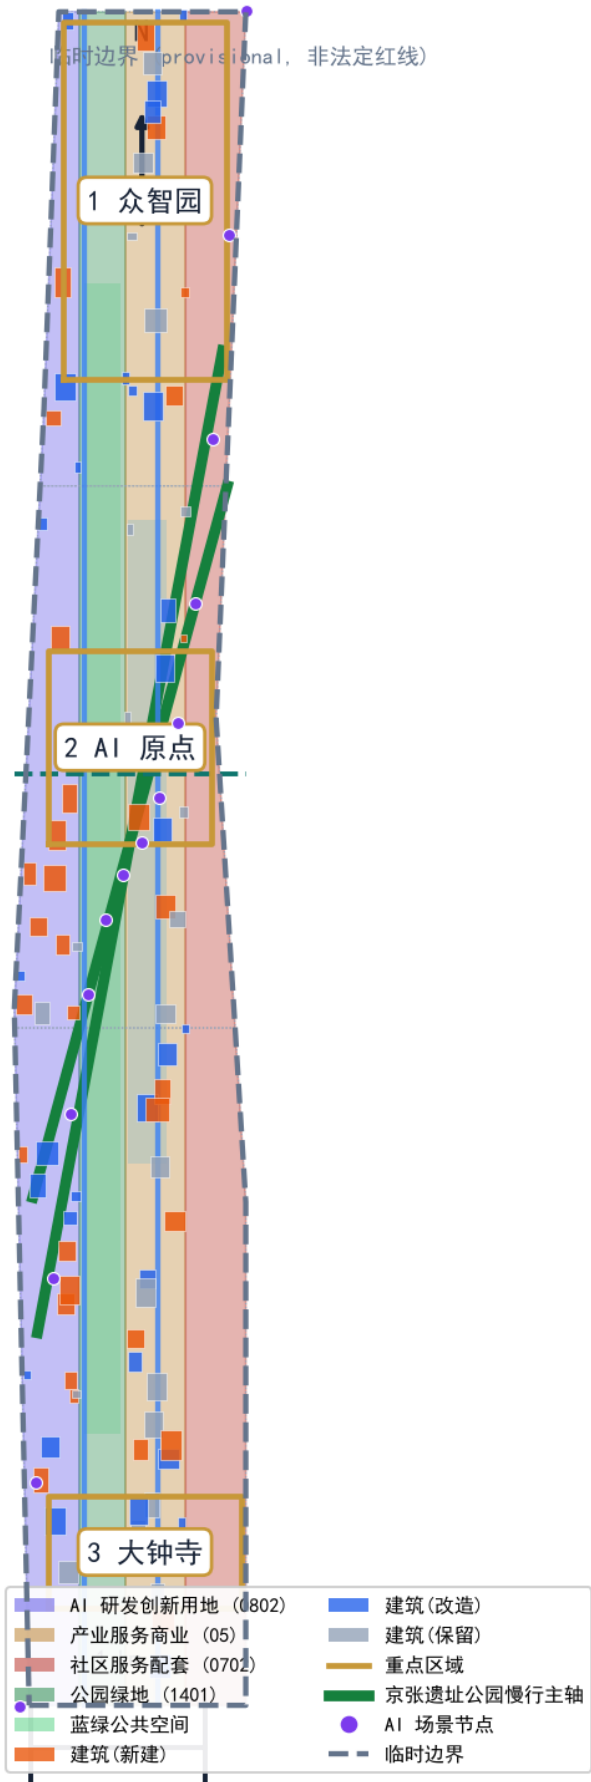

From railway heritage to an AI-native innovation district · Urban design proposal (A3 booklet)

1. Overall structure (one spine, three cores)

The Jingzhang railway heritage park slow spine links Zhongzhiyuan, Beijing AI Origin and Dazhongsi into a linear innovation district. Three-tier scope: study 43.6 km², overall 11.4 km², key areas 368.4 ha. All values below are directional estimates or parametric demonstrations from provisional boundaries, not approved planning controls.

总览地图 · 百年京张 AI 创新带

Overview: 用地分区、交通慢行、蓝绿公共空间、建筑更新与 AI 场景节点

投影示意 · 非测绘精度；周边路网/站点为示意，行政与遗产边界以官方为准

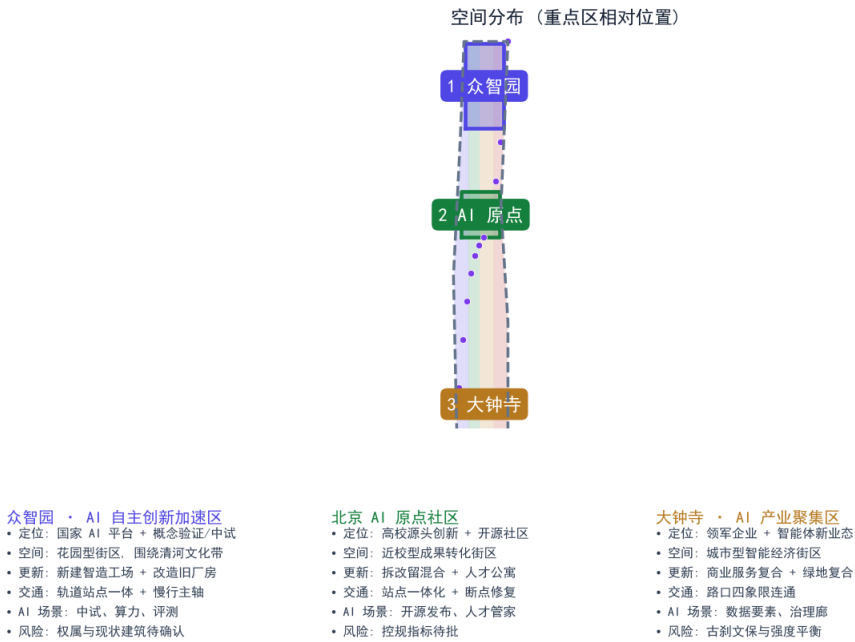

Metric	Value	Status
Site area	11.41 km²	directional
Building density	7.63%	parametric
FAR	0.79	parametric*
Green ratio	12.34%	directional
Public space ratio	7.33%	directional
Road ratio	8.48%	directional
AI scenario nodes	14	conceptual

* parametric demo, not approved; all values generated from provisional boundary (not an official redline) and assumed building model — magnitude reference only.

2. Key areas & land use

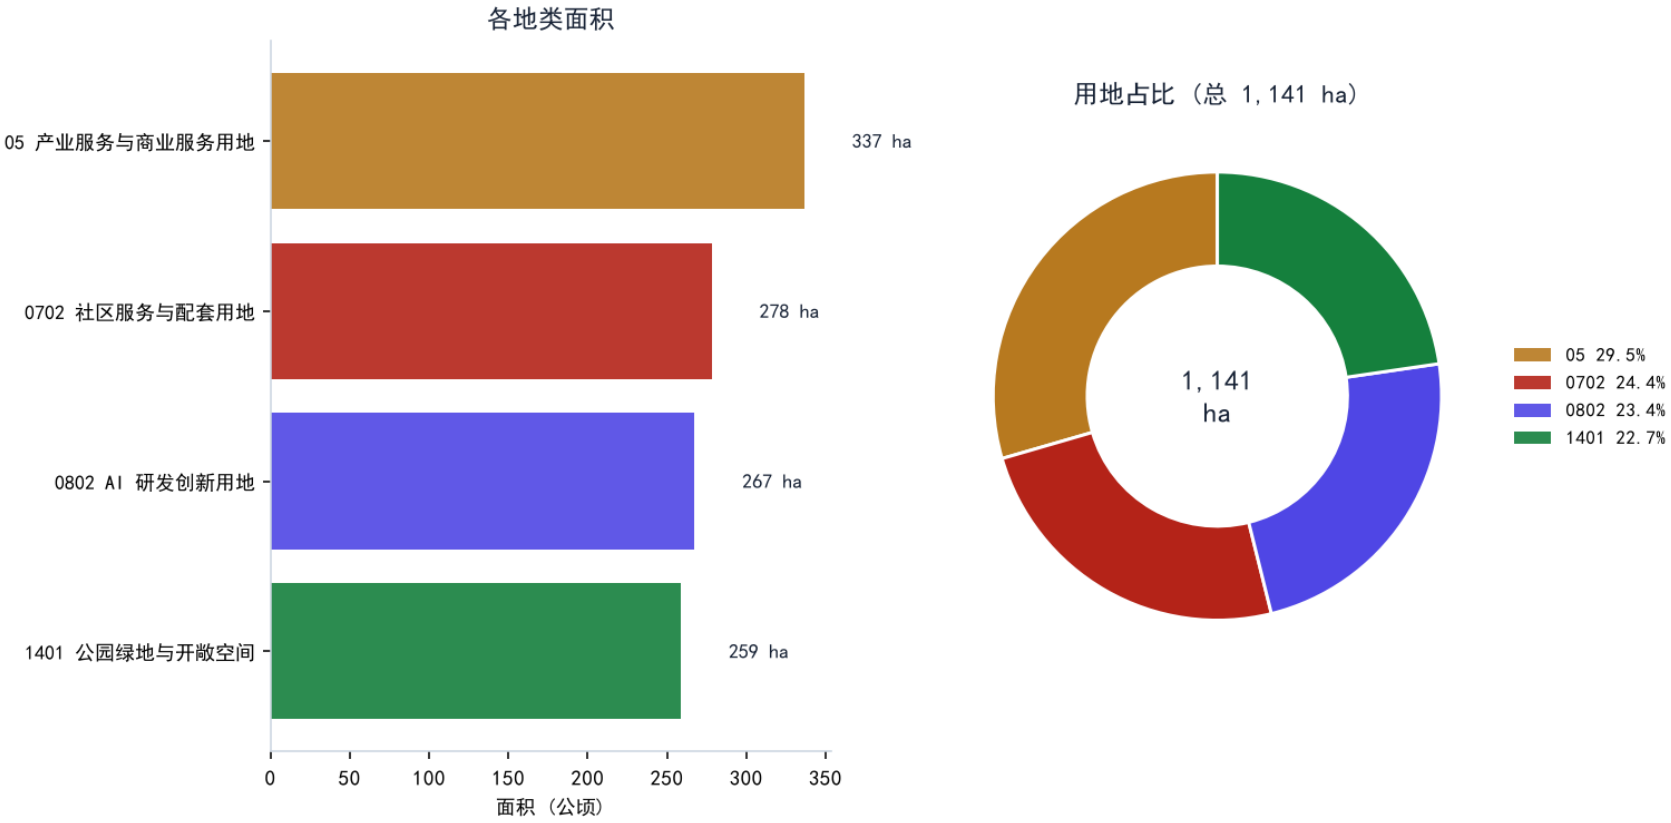

Zhongzhiyuan (192.1 ha) — incubation & industry services; Beijing AI Origin (104.3 ha) — talent living & scenario testing; Dazhongsi (72.0 ha) — digital consumption & culture. Land use dominated by R&D; (08H2), commercial (14) and green squares (14G).

三处重点区域 · 详细设计索引

用地结构 · Land-use structure

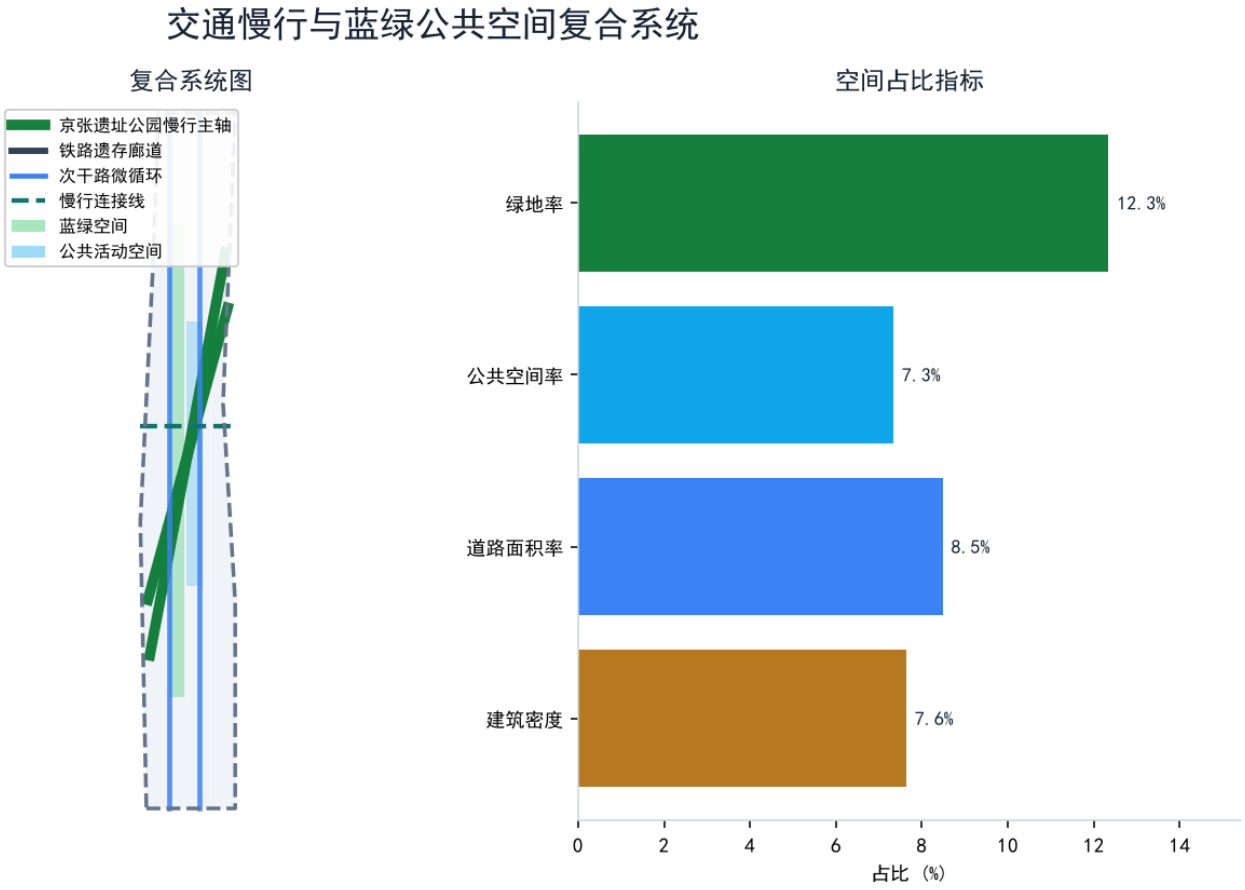

来源：geometry/land_use.geojson · metrics.json (geometry/land_use_area_* / site_area_sqm)

Metric	Value	Status
Site area	11.41 km²	directional
Building density	7.63%	parametric
FAR	0.79	parametric*
Green ratio	12.34%	directional
Public space ratio	7.33%	directional
Road ratio	8.48%	directional
AI scenario nodes	14	conceptual

* parametric demo, not approved; all values generated from provisional boundary (not an official redline) and assumed building model — magnitude reference only.

3. Mobility & blue-green network

A 'rail + slow mobility + micro-bus' green system: road ratio 8.48%, green ratio 12.34%, public-space ratio 7.33%. The slow spine connects the three districts; 5-min walk to rail.

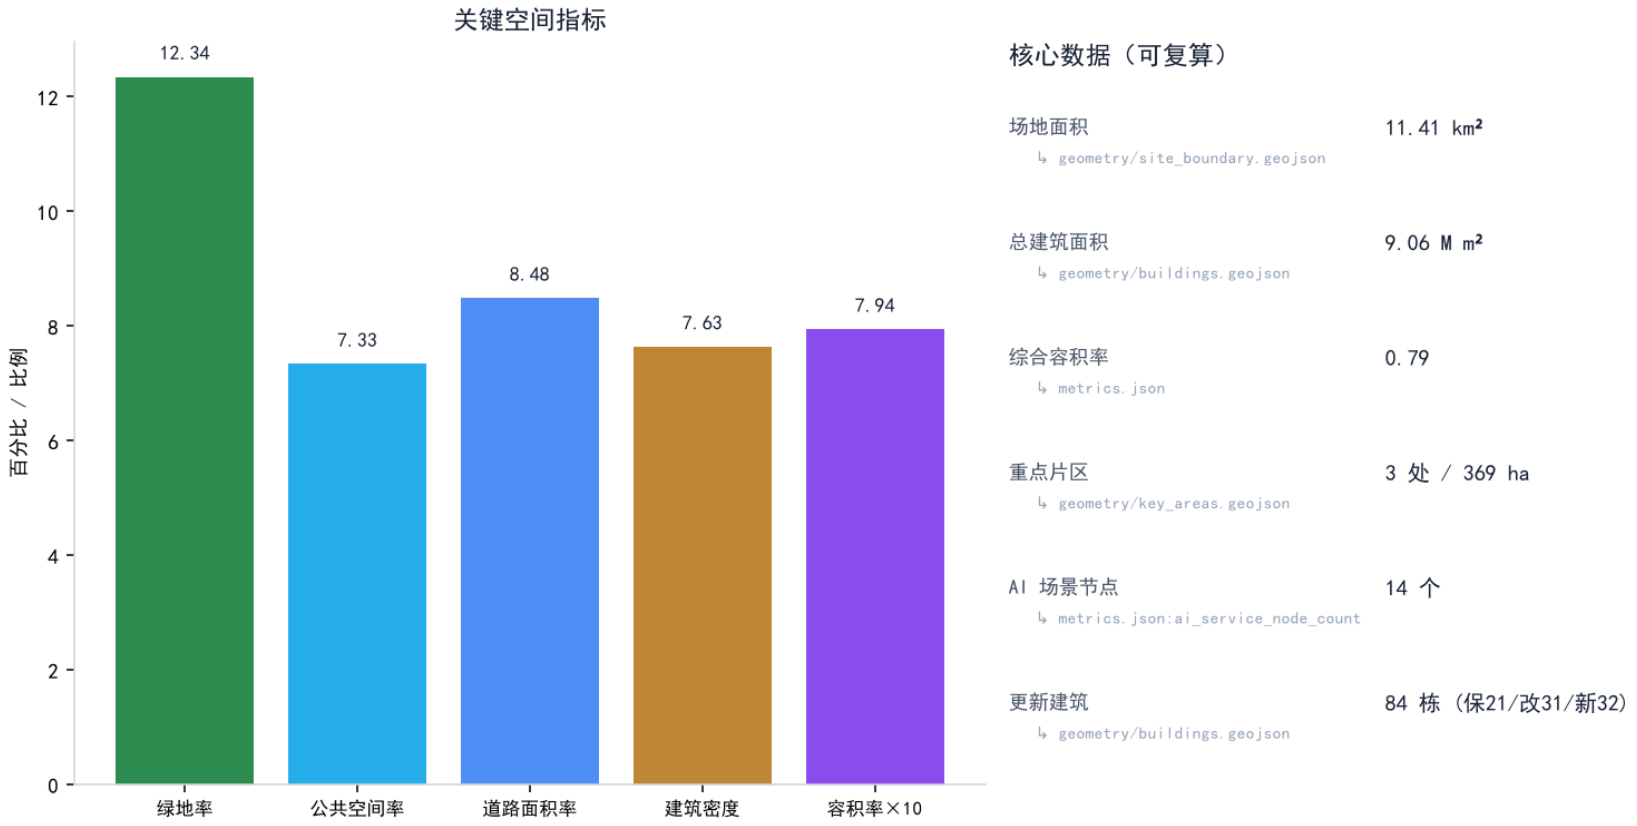

Metric	Value	Status
Site area	11.41 km²	directional
Building density	7.63%	parametric
FAR	0.79	parametric*
Green ratio	12.34%	directional
Public space ratio	7.33%	directional
Road ratio	8.48%	directional
AI scenario nodes	14	conceptual

* parametric demo, not approved; all values generated from provisional boundary (not an official redline) and assumed building model — magnitude reference only.

4. Building renewal & AI scenarios

Retain-renovate-new strategy; 84 buildings, density 7.63%, FAR 0.79. 14 conceptual AI service nodes along the spine cover incubation, elder care, guidance, energy, mobility and investment scenarios. Conceptual proposal, not for approval or engineering.

核心指标复算与证据链 · Metrics evidence

证据链: geometry/*.geojson → metrics.json → 正文 §11 · 临时边界下面积为方向性，官方红线到后重算

Metric	Value	Status
Site area	11.41 km²	directional
Building density	7.63%	parametric
FAR	0.79	parametric*
Green ratio	12.34%	directional
Public space ratio	7.33%	directional
Road ratio	8.48%	directional
AI scenario nodes	14	conceptual

* parametric demo, not approved; all values generated from provisional boundary (not an official redline) and assumed building model — magnitude reference only.

Note: generated from provisional boundaries; recompute when official SITE_BOUNDARY is released. GenAI-assisted; not for approval or engineering.
