

A3 Booklet | The Dao Belt · Twin-Track Quest

封面 / Cover

The Dao Belt · Twin-Track Quest | Concept / Provisional

A3 Booklet | The Dao Belt · Twin-Track Quest

01 总览 · 双轨主轴 / Site Overview

A3 Booklet | The Dao Belt · Twin-Track Quest

02 用地结构 · 三坊槽位 / Land-Use Structure

A3 Booklet | The Dao Belt • Twin-Track Quest

03 三坊详细设计索引 / Three Halls

A3 Booklet | The Dao Belt · Twin-Track Quest

04 交通 · 慢行 · 蓝绿 / Mobility · Blue-Green

A3 Booklet | The Dao Belt • Twin-Track Quest

05 核心指标与证据链 / Core Metrics

Core Metrics Recalculation | Evidence chain (+ compute-bill transparency)

Area/ratio/layer metrics recomputable; regulatory metrics unknown; compute bills shown per block

Differentiation: compute bills shown per block/period like utilities | one AI-dark segment as baseline

A3 Booklet | The Dao Belt • Twin-Track Quest

06 设计依据与三层范围 / Basis & Three Scopes

Basis: Haidian Branch, Beijing Municipal Commission of Planning & Natural Resources, pre-qualification announcement for the Centennial Jing-Zhang AI Innovation Belt International Urban Design Call.

Site package: brief/site-package (provisional boundaries, key areas, enums, metrics, sources).

Three scopes: coordination research ~43.6 km²; overall design ~11.4 km² (heritage-park + 1-2 km, regulatory-design depth); key detailed area ~368.4 ha (three halls).

History: Jingzhang (1909) was the first trunk railway built under Chinese-led engineering, not China's first operating railway (the earlier Wusong railway was). Zhan Tianyou directed a collective effort; the Qinglongqiao switchback line was a key engineering decision.

All spatial conclusions are conceptual; FAR/height/redlines/retain-renovate pending official conditions.

A3 Booklet | The Dao Belt · Twin-Track Quest

07 原点坊 · 聚场坊 · 出道坊 详设 / Hall Design Detail

Origin Hall @ Zhongzhiyuan: full-stack autonomy & provability governance. The Provability Table (PSR) registers each AI scenario with model card + reproduction fingerprint + cleared-data list; neighbors check it like price tags. Convergence Yard @ AI Origin Community + Wudaokou: open-source & talent. The Oral-History Pickup Stand (CVM) archives engineers' and residents' oral histories as vector index, three-chamber reviewed. Frontier Gate @ Dazhongsi: intelligent economy & global comms. Dazhongsi 4-quadrant walkability + Quest Gate: a wall that holds one open question a year instead of a monument; the public asks, developers prototype. Each hall splits into 3 conceptual parcels (YD-A01..03 / JC-A01..03 / DC-A01..03) with actions, gaps, measurement metrics, and forbidden claims.

A3 Booklet | The Dao Belt ▪ Twin-Track Quest

08 更新项目与治理矩阵 / Renewal & Governance

- JZ-01 Heritage-park walking-gap stitching & twin-track nodes (public space/transport)
- JZ-02 Origin Hall Qinghe innovation interface & provability table (blue-green/governance)
- JZ-03 Convergence Yard campus-facing transformation street & oral-history stand (renewal/open-source)
- JZ-04 Frontier Gate Dazhongsi 4-quadrant walkability & Quest Gate (transit integration/reverse landmark)
- JZ-05 Light-track demo installation & Track-Light public-compute point (new infrastructure)
- JZ-06 Dao Week annual route & AI-dark segment (operations/brand/contrast)
- 10-column governance matrix: responsible role / permits & clearing / resource level / cost range (pre-FS) / Go-NoGo pilot / 12-month KPI / exit condition / annual review / metric / forbidden claim. Three phases.

A3 Booklet | The Dao Belt • Twin-Track Quest

09 差异化与城市自白 / Differentiation

Differentiation: avoids the saturated 'belt/vein/spine/axis/ring + three-cores-two-wings + 12 cards + 5 landmarks' template; bets on the quest narrative, provability, visible compute bills, and an AI-dark contrast segment.

AI-dark segment / starlit arcade: intentionally low-energy, no active AI, so the city 'also has eyes closed'.

Compute-bill transparency: public AI compute energy shown per block/period like a utility meter.

City's own words: this city does not answer for you; it hangs your question on a wall, then turns and keeps building the road.

All content is conceptual; it does not replace formal planning or constitute government approval.
