

COMMON TIME | EVIDENCE-GATED CIVIC-AI SPATIAL CONTRACT

Not a final-state masterplan: a spatial contract that makes civic-AI pilots auditable, stoppable and reversible.

This page claims no completed works, statutory boundary, approved budget or appointed owner.

REAL | documented public evidence

PROVISIONAL | relational geometry

GENERATED | illustration, not existing condition

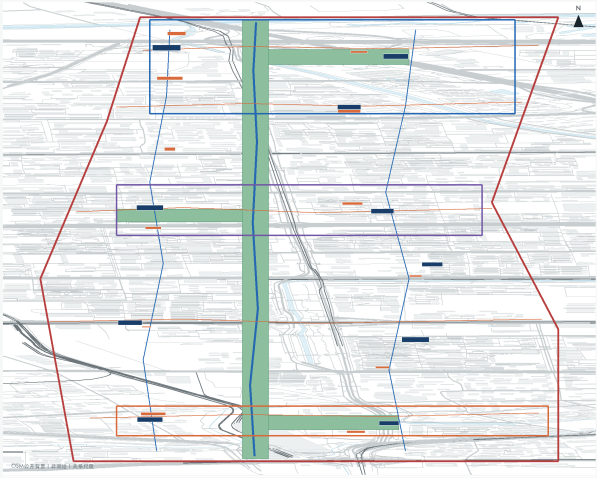

HOLD | unmet gate; no implementation

02 / RELATIONAL MASTERPLAN

ONE SPINE · THREE CLOCKS · TWO WINGS · TWELVE COMMONS

A relational masterplan: provisional geometry is not a statutory boundary.

STRUCTURE LEGEND

ONE SPINE | memory · ecology · slow mobility
THREE CLOCKS | VERIFY · LEARN · LIVE
TWO WINGS | technology service · urban needs
TWELVE COMMONS | arrival · test · learn · quiet

EVIDENCE GATES

VERIFY | reproducible and controlled testing
LEARN | guide transmission and correction
LIVE | bounded trial, human behaviour and retirement

INTERVENTION ORDER

01 SHARE | measure real additional use
02 RESTRICT | access, ground floor, shade, separation
03 ADD LIGHTLY | movable, maintainable, restorable
04 BUILD ONLY WITH EVIDENCE | boundary, title, heritage, capacity and TCO

COMMON TIME JING-ZHANG / V&O

CONCEPT PROPOSAL · NOT AN APPROVED PLAN · PROVISIONAL RELATIONSHIPS · PROFESSIONAL VERIFICATION REQUIRED

01 / RELATIONAL PLAN

Spatial relationships, never a statutory red line

02 / THREE KEY AREAS

THREE KEY AREAS: REAL CONTEXT, RELATIONAL PLAN, REALISTIC CONCEPT

Each area requires what is real, what is conceptual and what still requires verification.

COMMON TIME JING-ZHANG / V&O

03 / EVIDENCE LOOP

Three priority projects as executable contracts

Null evidence is never completed by AI

THREE PROJECT CONTRACTS | accountability, acceptance and stop rules in one view

01 / VERIFY

Qinghe old station / public intelligence garden

ACCOUNTABLE INTENT

HOLD | formal designation pending
Separate public explanation from controlled testing

INPUT GATE

Official geometry + heritage/flood review + field evidence

ADOPT

Three flows separate; risk explainable and reversible

STOP

Any life-safety or heritage gate remains open

02 / LEARN

AI Origin / civic learning interface

ACCOUNTABLE INTENT

HOLD | formal designation pending
A learning interface without crossing campus/resident limits

INPUT GATE

Tenure/security + IP + accessible offline equivalent

ADOPT

Traceable content; offline access; correctable errors

STOP

No human path or rights/permission unresolved

03 / LIVE

Dazhongsi / station arrival

ACCOUNTABLE INTENT

HOLD | formal designation pending
Fix real arrival first; permit limited AI advice second

INPUT GATE

Walkthrough + traffic/accessibility + heritage review

ADOPT

Continuous access; on-site human takeover for exceptions

STOP

Algorithm changes legal right-of-way or misleads the public

EVIDENCE-GATED ADOPTION | ADOPT ONLY AFTER THE THRESHOLDS PASS

1 / EVIDENCE

Cleared geometry, original field records and explicit nulls

→

2 / SANDBOX

Reversible, non-life-safety-critical pilots only

→

3 / CHECK

Independent safety, access, rights and privacy review

→

4 / DECIDE

ADOPT if passed; otherwise REVISE / RETIRE

Model output cannot turn UNKNOWN / HOLD into verified fact; an unmet gate routes the project to revision or retirement.

COMMON TIME / VERIFY · LEARN · LIVE

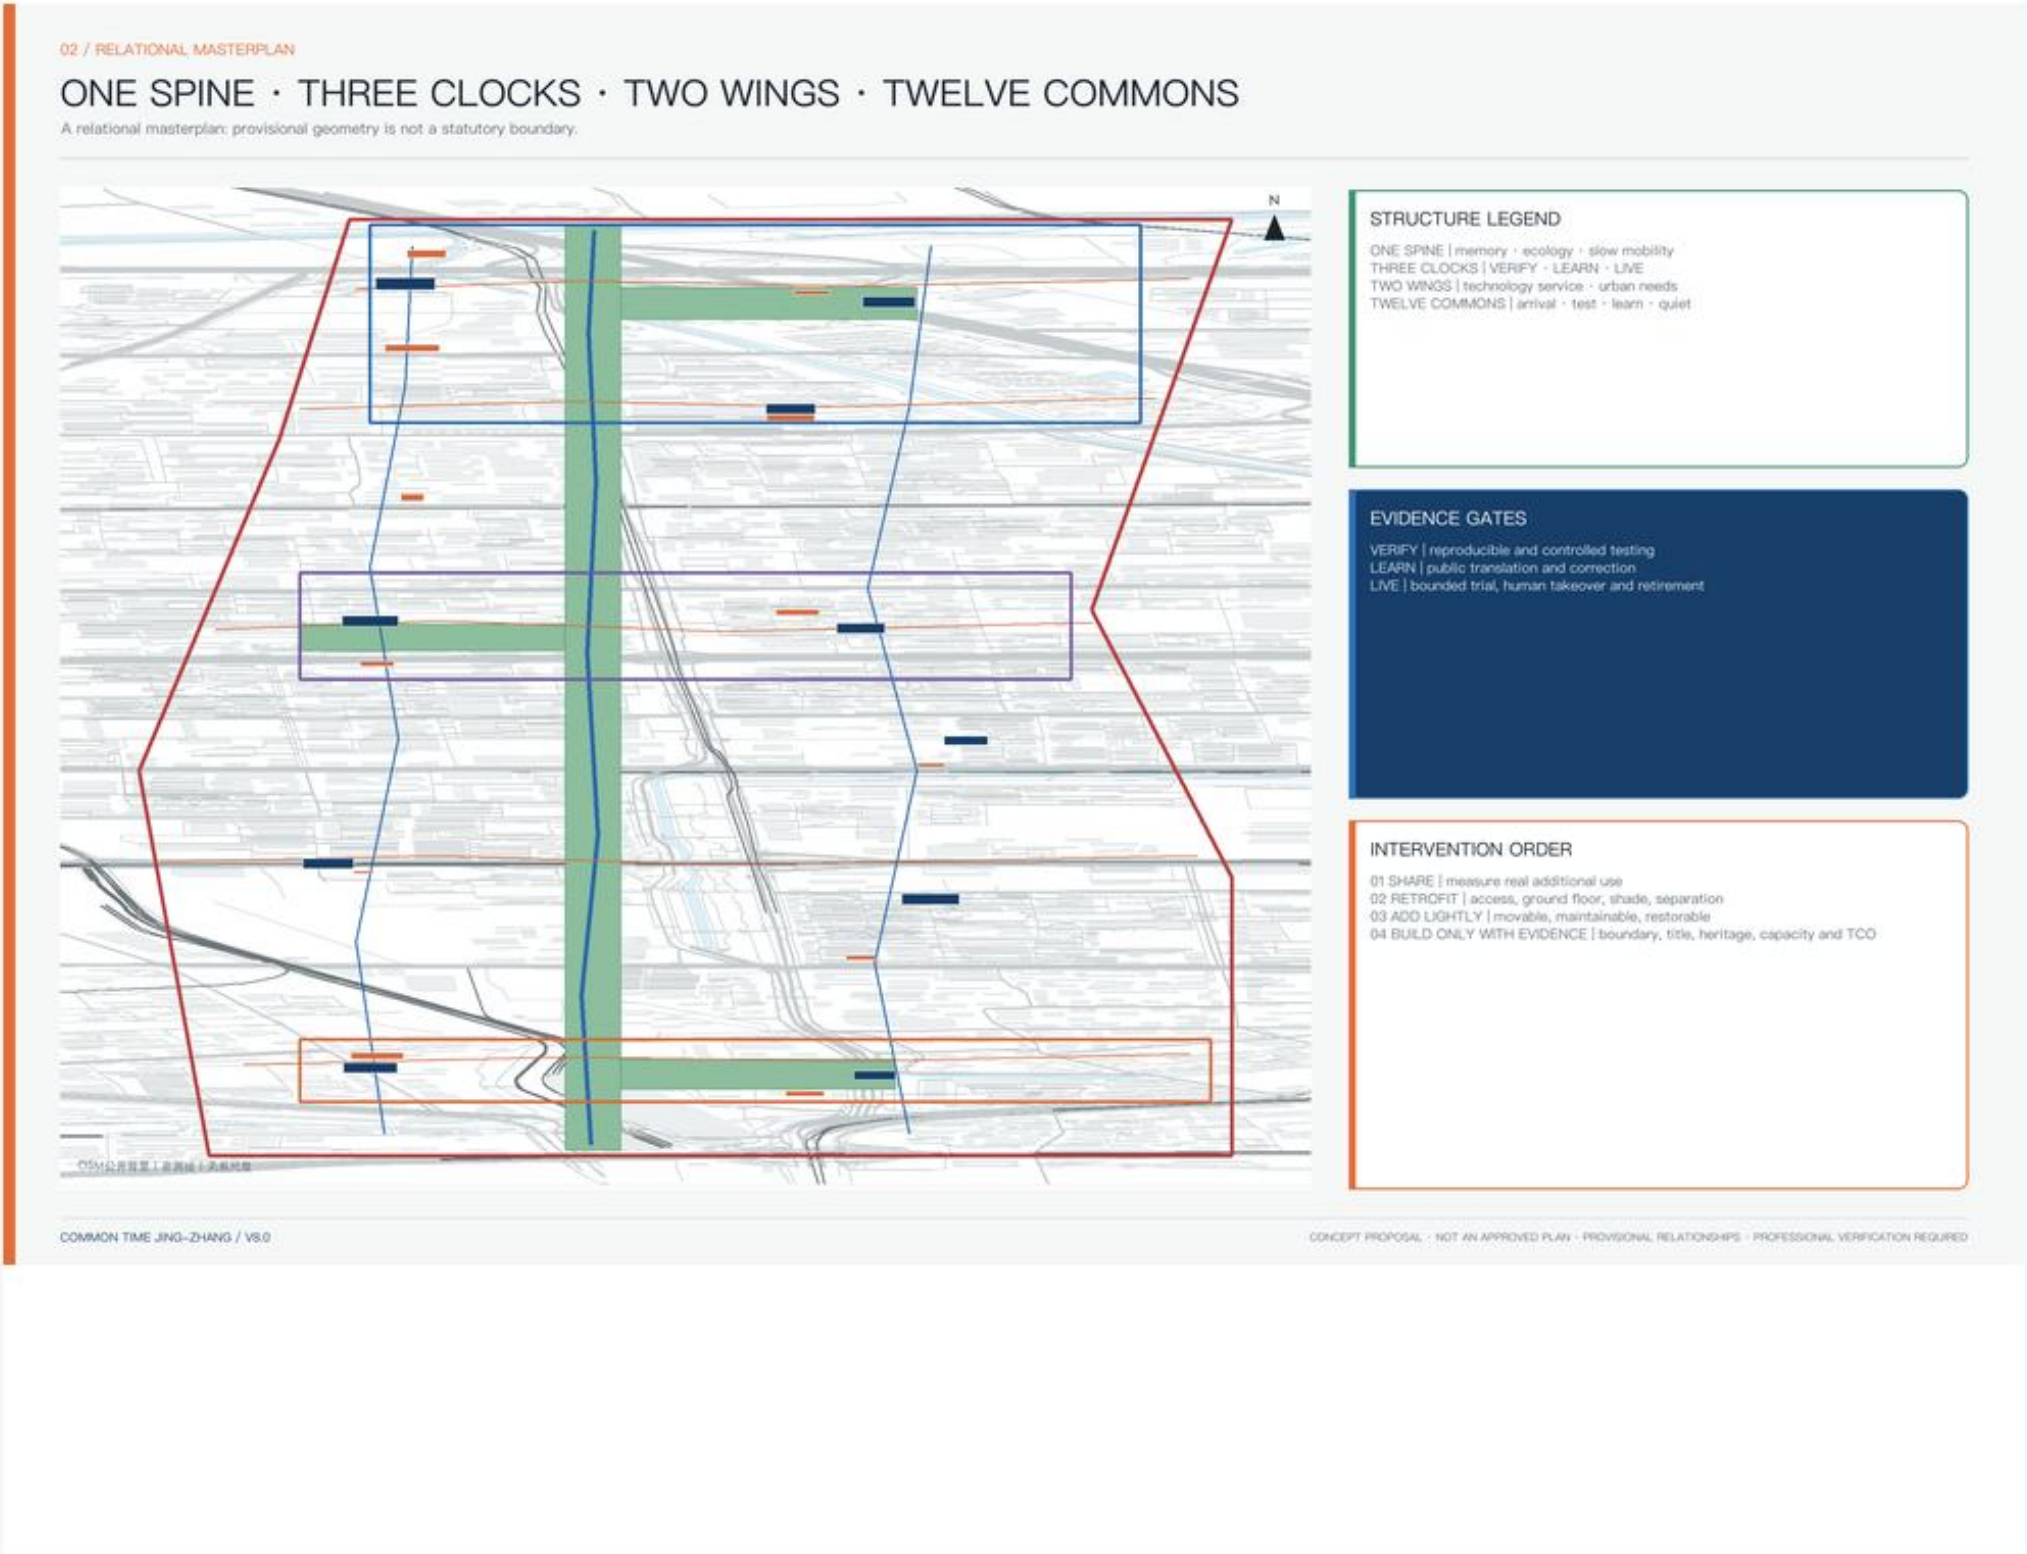

HOLD where evidence is incomplete | Review entry; never a substitute for statutory or professional approval

SITE EVIDENCE AND UNKNOWNNS

Public photographs do not replace a 2026 survey; official boundaries, title, heritage GIS, capacity and cost remain unknown.

THREE-LEVEL SCOPE

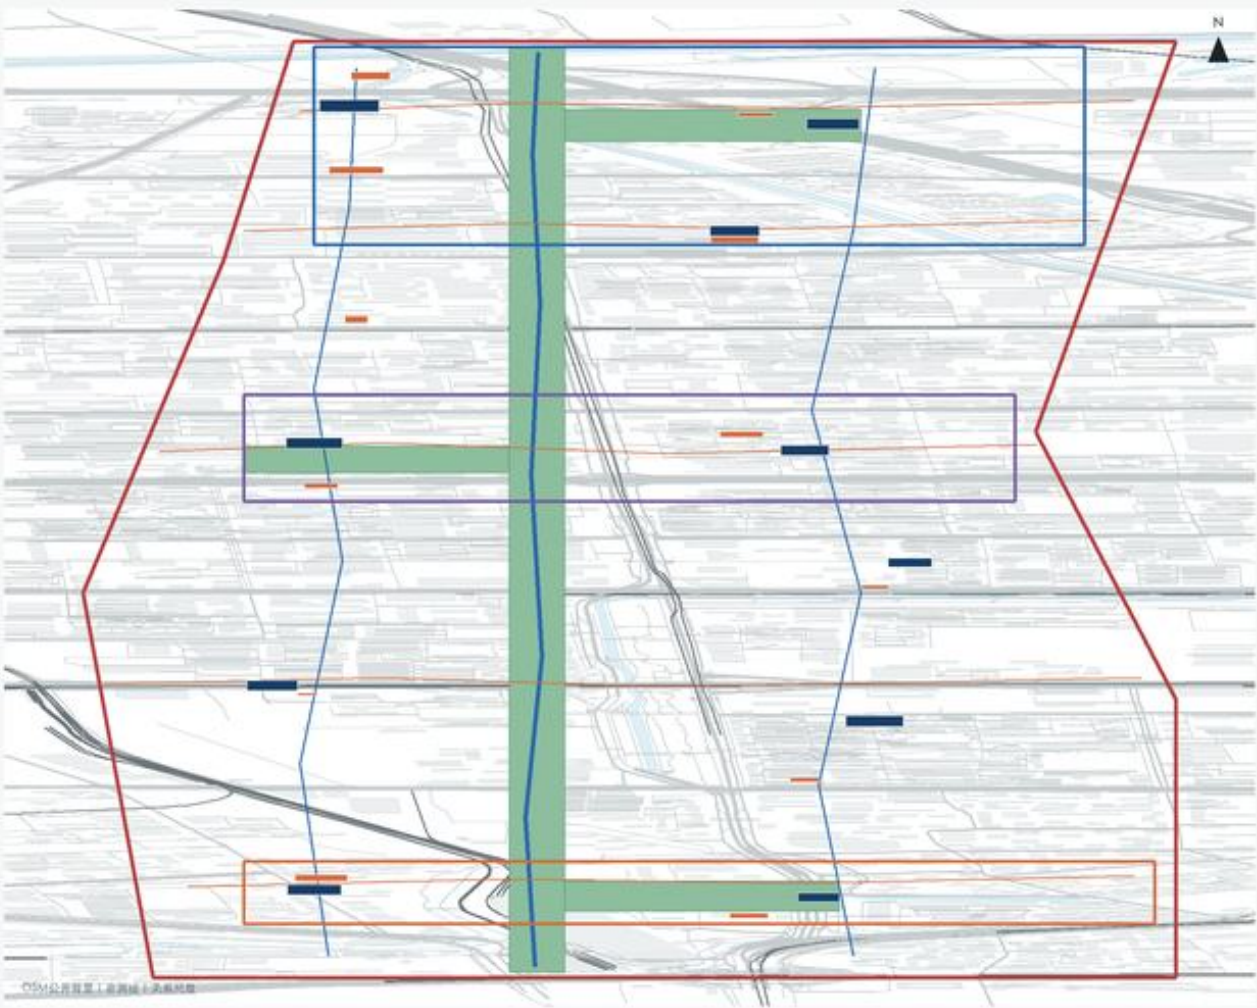

The research scope addresses industry circulation, the overall scope urban systems, and key areas prototype delivery.

RELATIONAL MASTERPLAN

02 / RELATIONAL MASTERPLAN

ONE SPINE · THREE CLOCKS · TWO WINGS · TWELVE COMMONS

A relational masterplan: provisional geometry is not a statutory boundary.

STRUCTURE LEGEND

ONE SPINE | memory · ecology · slow mobility
THREE CLOCKS | VERIFY · LEARN · LIVE
TWO WINGS | technology service · urban needs
TWELVE COMMONS | arrival · test · learn · quiet

EVIDENCE GATES

VERIFY | reproducible and controlled testing
LEARN | public translation and correction
LIVE | bounded trial, human takeover and retirement

INTERVENTION ORDER

01 SHARE | measure real additional use
02 RETROFIT | access, ground floor, shade, separation
03 ADD LIGHTLY | movable, maintainable, restorable
04 BUILD ONLY WITH EVIDENCE | boundary, title, heritage, capacity and TCO

COMMON TIME JING-ZHANG / V8.0

CONCEPT PROPOSAL · NOT AN APPROVED PLAN · PROVISIONAL RELATIONSHIPS · PROFESSIONAL VERIFICATION REQUIRED

One spine, three clocks, two wings and twelve time commons.

THREE OVERLAYS

03 / THREE OVERLAYS

FROM FALSE PRECISION TO UNKNOWN + SPATIAL ROLES + OPERATING TIME

Three aligned layers; land-use codes support topology and are not regulatory recommendations.

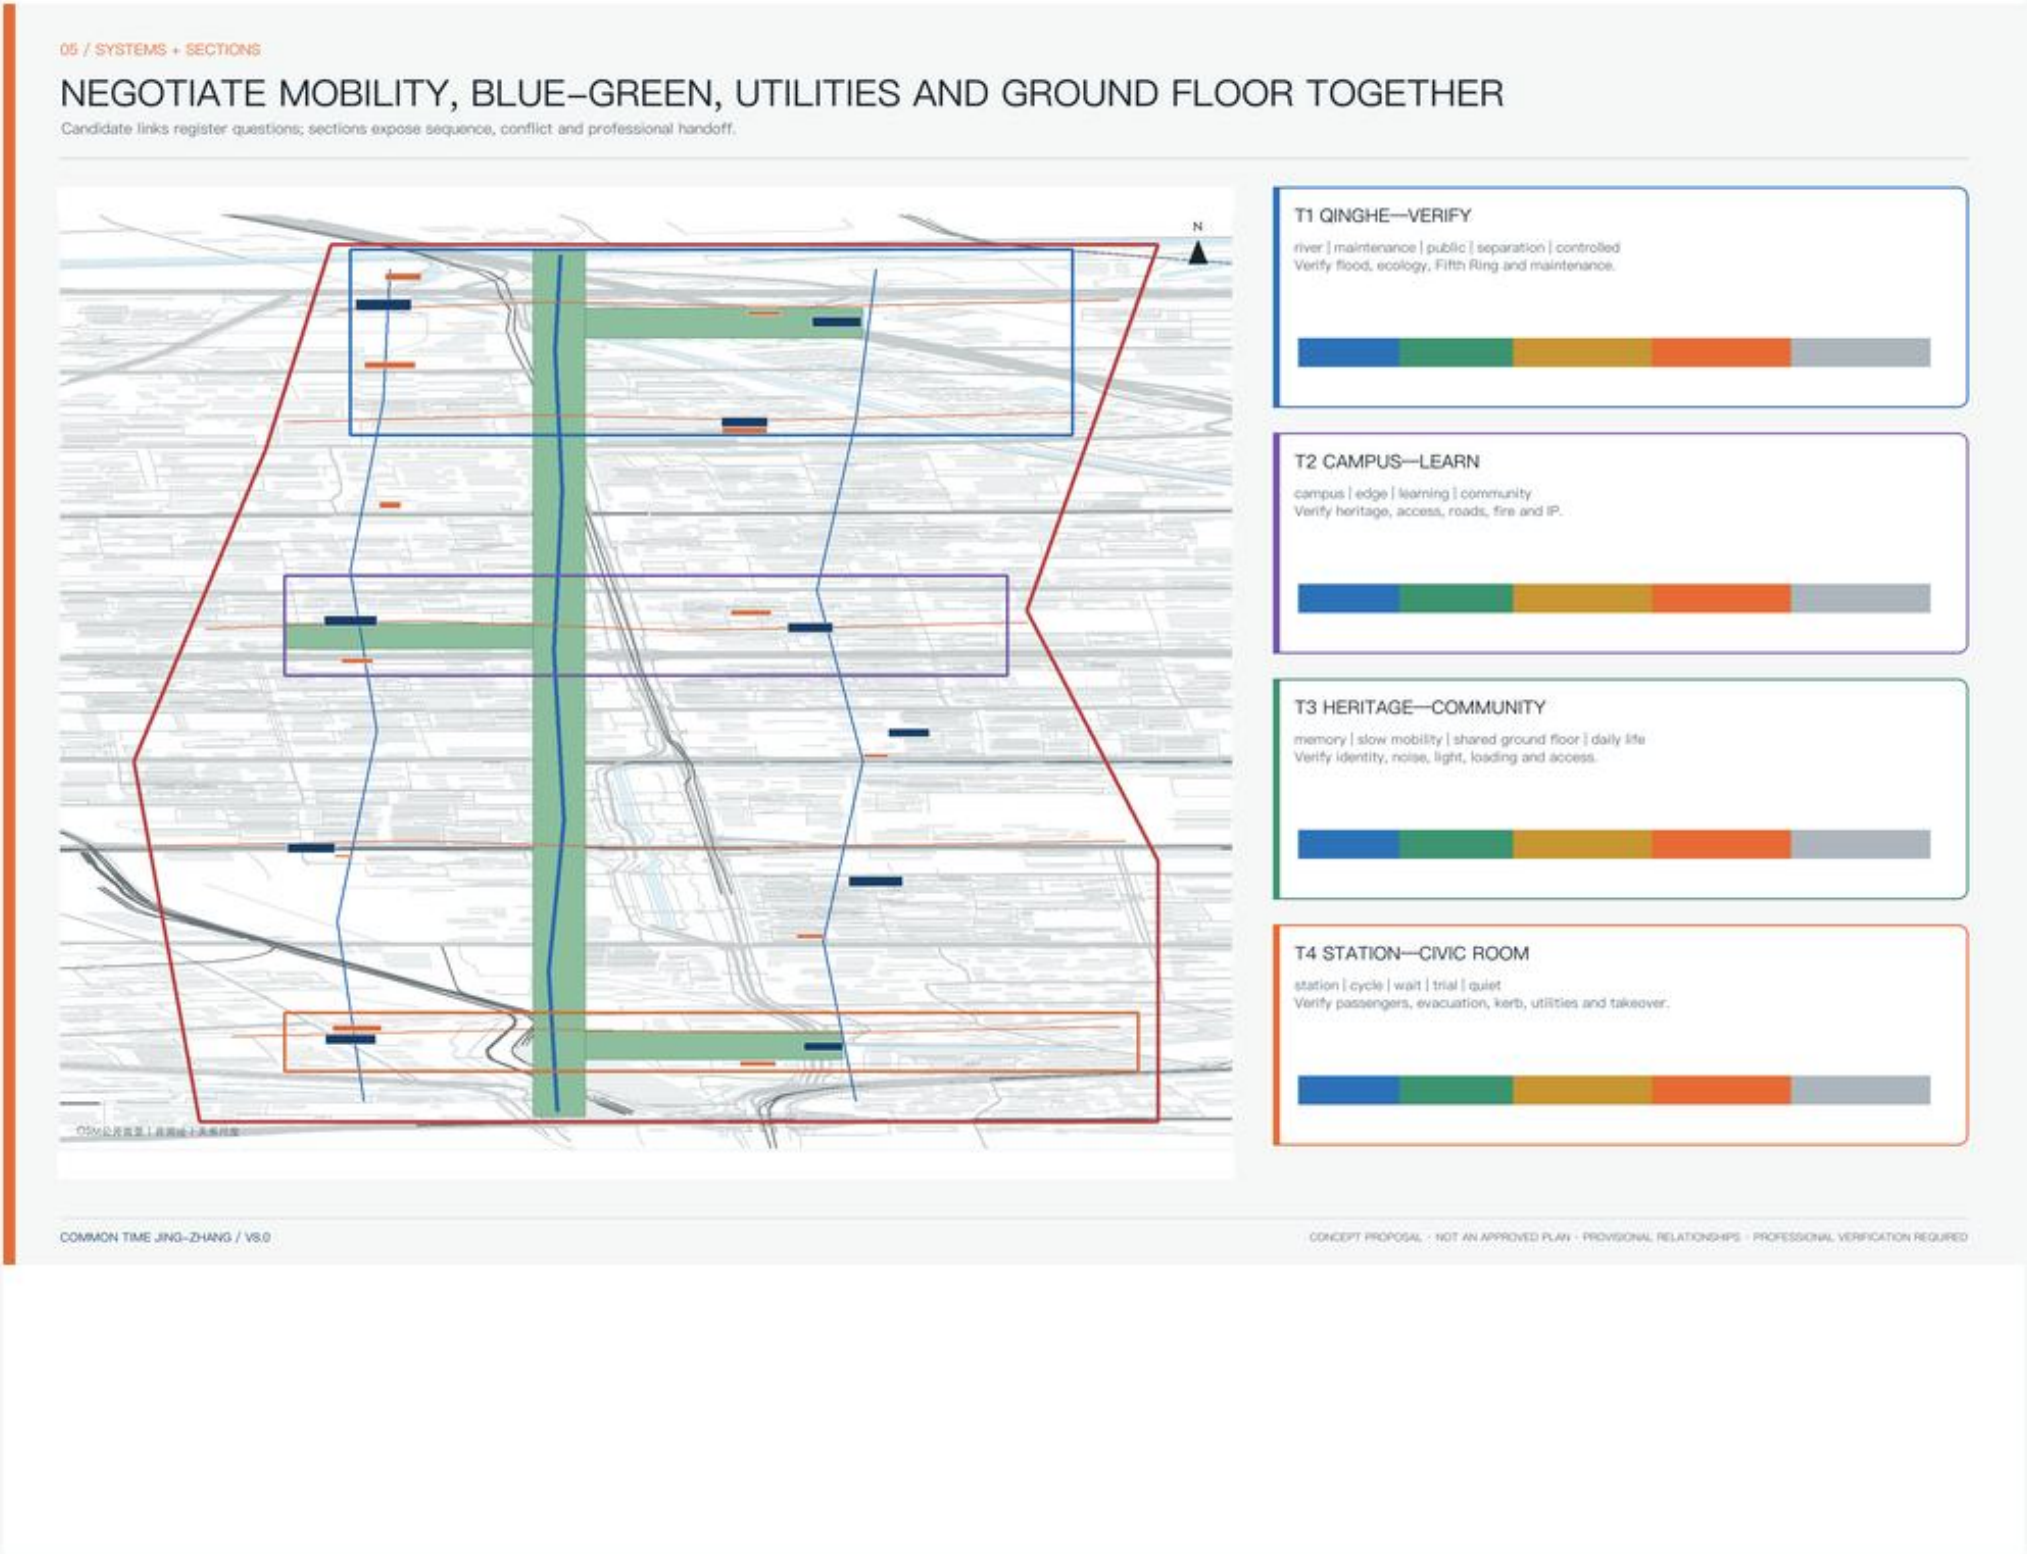

COMMON TIME JING-ZHANG / V8.0

CONCEPT PROPOSAL · NOT AN APPROVED PLAN · PROVISIONAL RELATIONSHIPS · PROFESSIONAL VERIFICATION REQUIRED

Spatial roles are not statutory land use; time-sharing does not alter lawful use.

SYSTEMS AND SECTIONS

Mobility, blue-green systems, utilities and ground floors require joint verification.

众智园 VERIFY

Controlled core—public explanation forecourt—Qinghe ecological edge; logistics avoid the public garden.

北京 AI 原点 LEARN

Knowledge source—translation passage—learning court—community edge; no merged access—control profiles.

大钟寺 LIVE

Four-quadrant arrival—civic forecourt—service ground floor—quiet rear edge; algorithms do not change lawful right of way.

SEPARATION OF DUTIES

problem owner ≠ supplier
supplier ≠ sole evaluator
operator ≠ appeal authority
procurement decision ≠ event popularity

CURRENT HOLD CONDITIONS

No construction or routine operation without official boundaries, real owners, professional approval, OPEX, equivalent human access and retirement funds.

CONCEPT PROPOSAL · NOT AN APPROVED PLAY · PROVISIONAL RELATIONSHIPS · PROFESSIONAL VERIFICATION REQUIRED

Each scenario binds purpose, minimum data, thresholds, stop, appeal, operation and retirement.

BLUE-GREEN NETWORK AND TIME COMMONS

05 / SYSTEMS + SECTIONS

NEGOTIATE MOBILITY, BLUE-GREEN, UTILITIES AND GROUND FLOOR TOGETHER

Candidate links register questions; sections expose sequence, conflict and professional handoff.

COMMON TIME JING-ZHANG / V8.0

T1 QINGHE—VERIFY

river | maintenance | public | separation | controlled
Verify flood, ecology, Fifth Ring and maintenance.

T2 CAMPUS—LEARN

campus | edge | learning | community
Verify heritage, access, roads, fire and IP.

T3 HERITAGE—COMMUNITY

memory | slow mobility | shared ground floor | daily life
Verify identity, noise, light, loading and access.

T4 STATION—CIVIC ROOM

station | cycle | wait | trial | quiet
Verify passengers, evacuation, kerb, utilities and takeover.

CONCEPT PROPOSAL · NOT AN APPROVED PLAN · PROVISIONAL RELATIONSHIPS · PROFESSIONAL VERIFICATION REQUIRED

No ecological-corridor claim until ecology, thermal comfort, accessibility and maintenance pass.
