

Jing-Zhang Open Origin Belt: From the Herringbone Railway to an Open-Source

AI Agent Urban Design · Centennial Jing-Zhang AI Innovation Belt Open Call

Core idea: using the 'herringbone railway → open-source branch' narrative, the design organizes the Centennial Jing-Zhang heritage, the AI Origin Community, and youth-friendly public space into a recalculable, discussable urban operating system pending official boundary recalculation.

Overall design area: 11.41 km² (recalculated); key areas total 369 ha (three sites). Green ratio 25.4%, public space ratio 2.2%. Road network 57.7 km, greenways 20.3 km. Building footprints 94 units (indicative), scenario nodes 10.

Jing-Zhang Open Origin Belt · Site Overview (provisional boundary)

Three Key Areas

Zhongzhiyuan AI Innovation Accelerator

Garden-style full-stack innovation block · Qinghe frontage · open testing · standards governance

Beijing AI Origin Community

University-adjacent transformation & talent community · campus stitching · open-source release · talent zone

Dazhongsi AI Industry Cluster

Urban intelligent economy & exchange block · station integration · 4-quadrant links · smart terminals

Ten AI Scenario Nodes (selected)

01 Open-source release hall · 02 Safety governance sandbox · 03 Edge-compute station · 04 AI slow-traffic navigation · 05 Dazhongsi roadshow lounge · 06 Qinghe low-carbon corridor · 07 Transformation street · 08 Data-elements lounge · 09 Youth night vitality belt · 10 Global AI week route

Phasing

Phase 1 pilot (2026-2028)

Heritage park slow-traffic stitching, Qinghuayuan Station cultural plaza, Wudaokou youth plaza, Dazhongsi station 4-quadrant pedestrian links

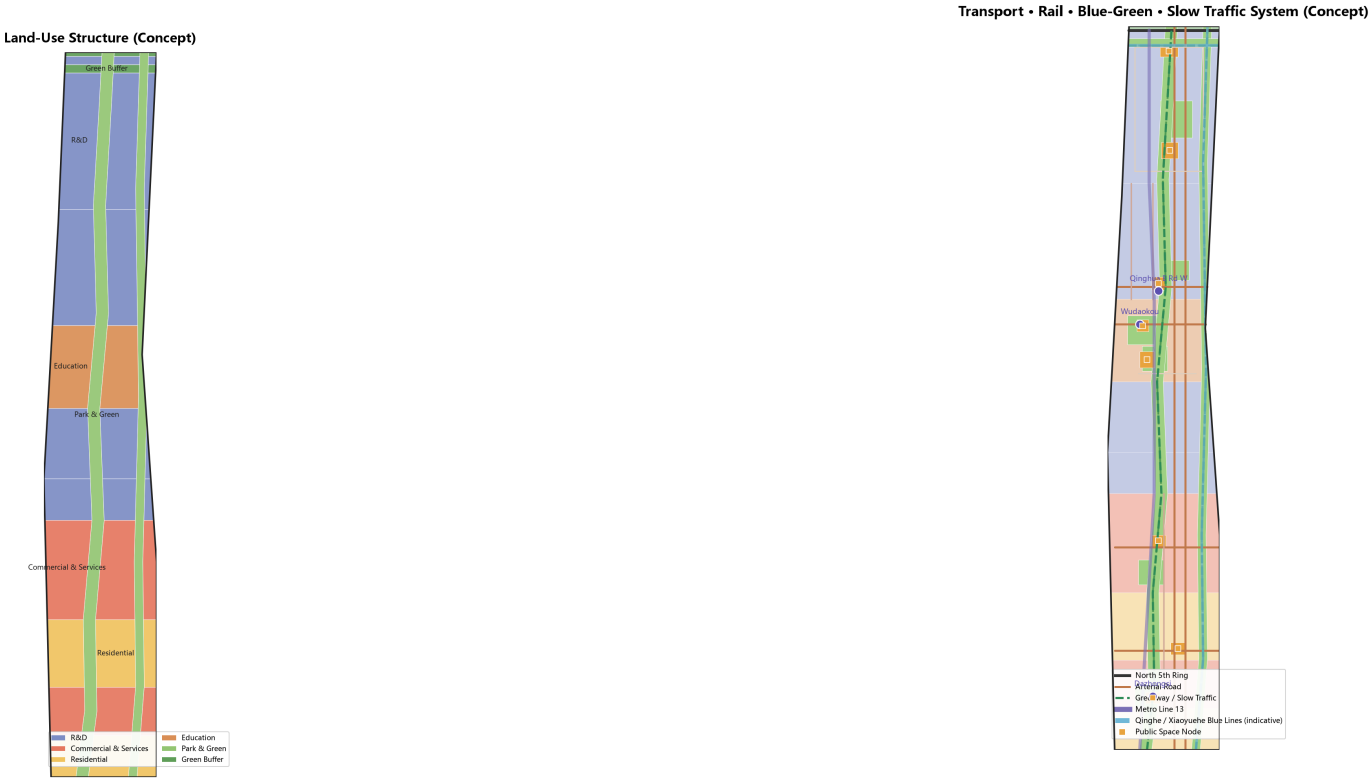

Phase 2 renewal (2028-2031)

Zhongzhiyuan Qinghe innovation frontage, transformation street, data-elements lounge

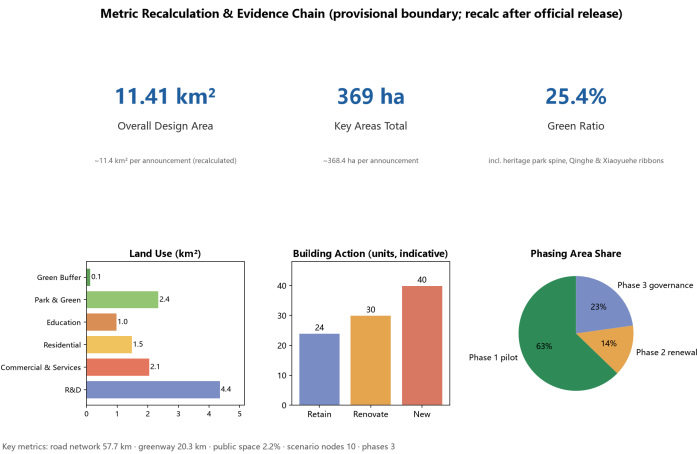

Phase 3 governance (2031+)

Xiaoyuehe scenario wing, Zhongguancun services wing, operations & governance framework

Land Use & Transport Blue-Green System

Metric Recalculation & Evidence Chain (provisional boundary)

Disclaimer: this package uses provisional boundaries; all areas, ratios, and layers must be recalculated after official data release. Building heights, FAR, road redlines, and engineering conditions await formal regulatory confirmation. All scenarios and operating mechanisms are conceptual and do not replace statutory planning approval. This proposal does not claim official approval, adopted regulatory plans, final land ownership, or guaranteed implementation.
