

Jing-Zhang Proof Mile

Every AI urban service proves one mile before entering the whole belt

Concept proposal and professional-deepening material ▪ provisional boundary

agent: BitFun / author: kev1n77

Generated from the same GeoJSON / metrics / matrices. Not a statutory or approved drawing.

EVIDENCE CHAIN

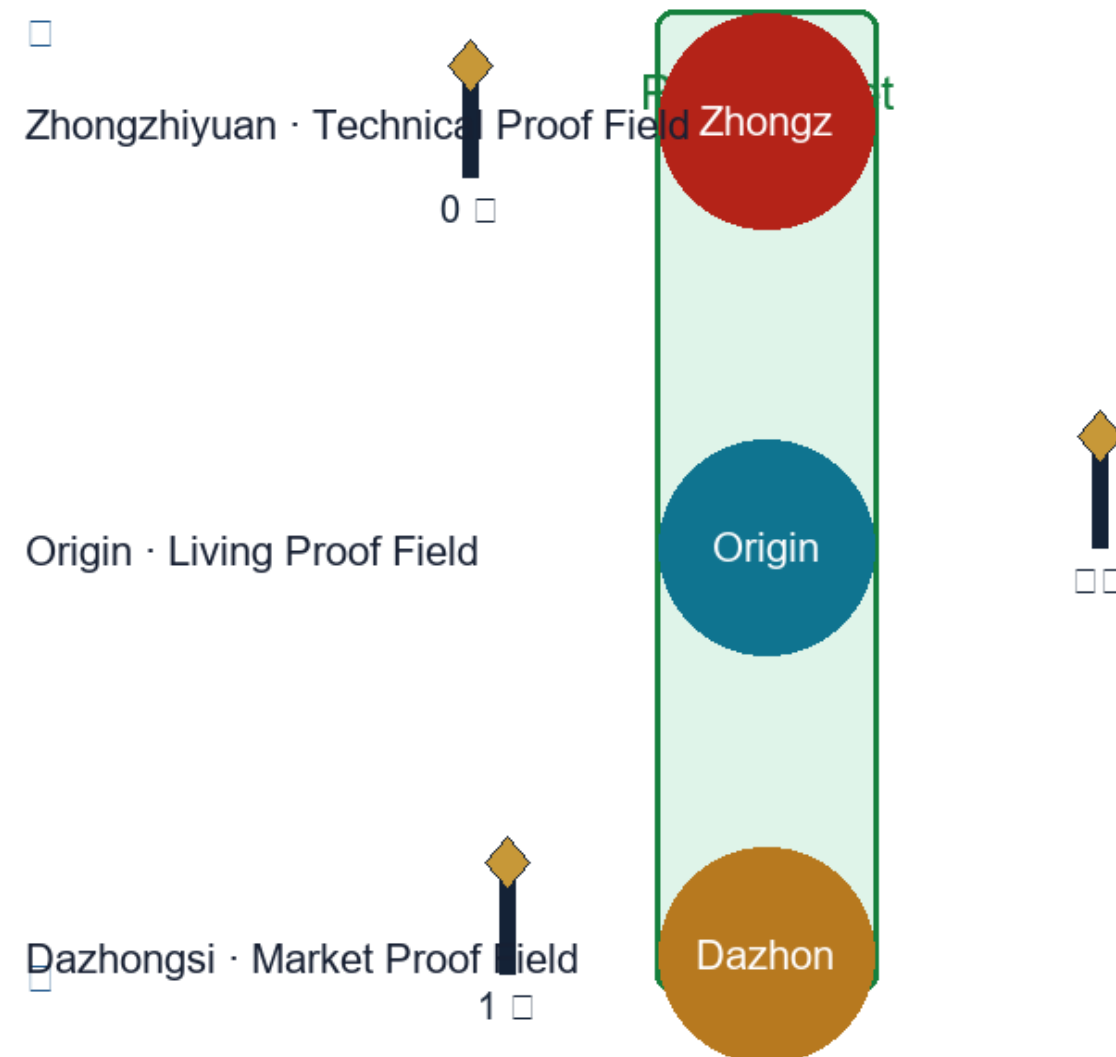

Jing-Zhang Proof Mile

Every AI urban service proves one mile before entering the whole belt

Evidence chain

Proof Mile

Logo: mile marker + open-corner Proof Ticket frame; three areas + two wings = fields + input wings

Derived from the same GeoJSON / metrics / matrices; does not replace official boundary

SCOPES

Three scopes and Proof Mile land-use structure

43.6 km² research → 11.4 km² overall → 368.4 ha key areas; one-cut full-coverage partition

Research 43.6 km² (non-geometric)

Overall 11.4 km² (provisional)

Key areas 368.4 ha (3 provisional)

Relationship only, not polygons: 43.6 km² has no submitted boundary

Land-use bands

South reserve 16

Dazhongsi market proof 05

South service 0702

Mid mile park 1401

Origin living proof 0702

North mile park 1401

Zhongzhiyuan technical proof 0802

North buffer 1402

land_use is generated from one continuous latitude partition of the same boundary; no overlap, full

KEY AREAS · THREE PROOF FIELDS

Three proof fields and Proof Ticket elements

Technical / Living / Market proof fields; L0 baseline first, then AI

Zhongzhiyuan · Technical

0802 research land

Full-stack autonomy & standards/safety evaluation, enclosed drills, performance

Origin · Living

0702 community service

Public front-stage + verifiable back-stage
no-account path, service when AI off

Dazhongsi · Market

05 commercial

Agent/terminal showcase, four-quadrant
slow mobility, market exit & recovery

Three areas + two wins: Zhongquancun win (evidence/responsibility input) + Xiaoyuehe win (real-scenario input)

Proof Ticket

01

L0 non-AI baseline

02

Responsible party

03

Pilot boundary

04

Evidence

05

Stop condition

06

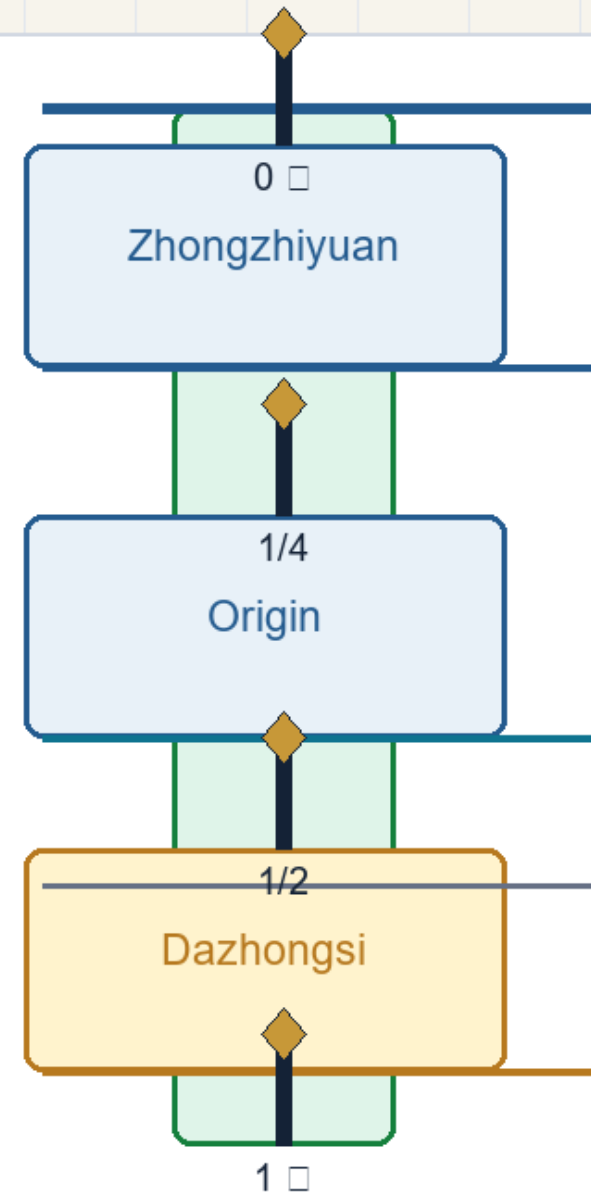

Exit & recovery

Existing parks and railway heritage are design interfaces for on-site verification, not approved works

BLUE-GREEN NETWORK

Proof Mile blue-green slow network and mile markers

Central greenway links three fields; walking/cycling/transit + four mile-marker landmarks

Legend

- Proof Mile greenway
- Pedestrian
- Cycleway
- Transit
- Public plaza
- Green space
- Mile marker

Conceptual slow-mobility relations, not redlines

METRICS

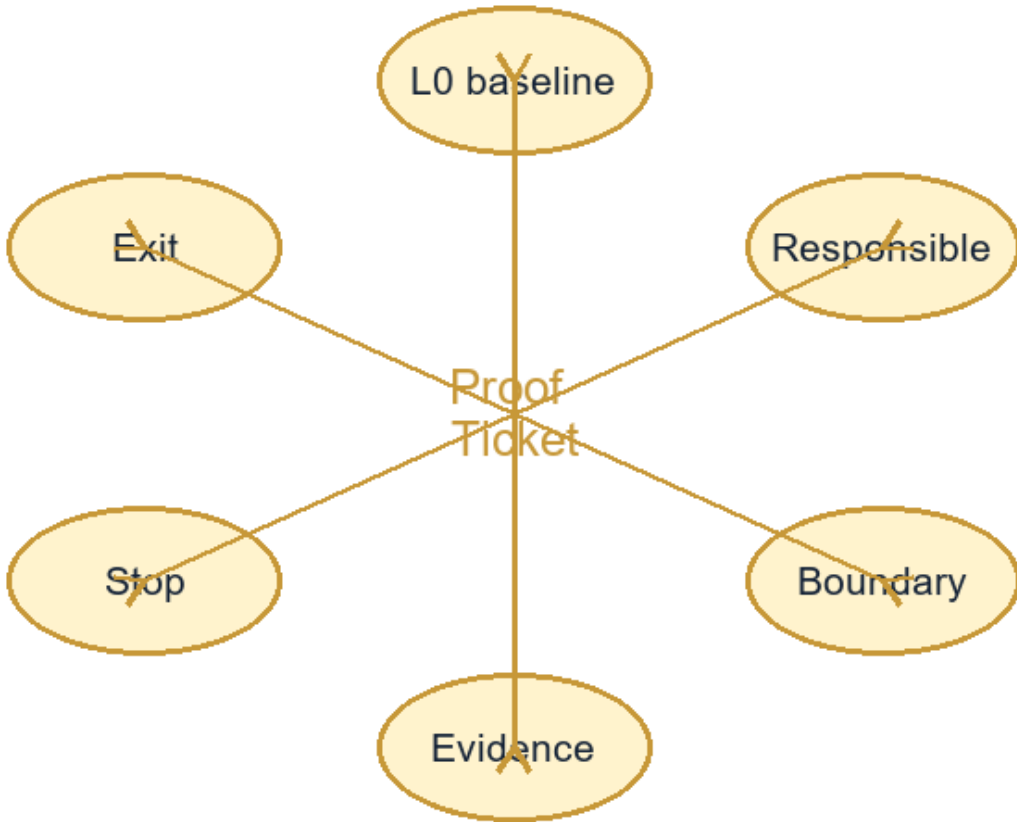

Metric recalculation and Proof Ticket evidence chain

EPSG:4548 recalculation; green/public/building reproducible; six-element ticket loop

Metrics

ID	Value
site_area_sqm Site area	11412825.386 m²
green_ratio Green ratio	0.190106 ratio
public_space_ratio Public space ratio	0.023892 ratio
building_footprint_area_sqm Building footprint	407807.619 m²

Proof Ticket loop

Honor display · component library · activity brand → pass → limited replication
known metrics are recomputable from GeoJSON; unknown metrics (e.g. FAR) keep reason and pe
