

Jing-Zhang Authenticity Commons

If an error cannot be corrected through every channel that carried it, the AI service must not remain in Jing-Zhang.

Evidence southbound and correction northbound are the spatial structure; the public checks whether correction returned to where the error was seen.

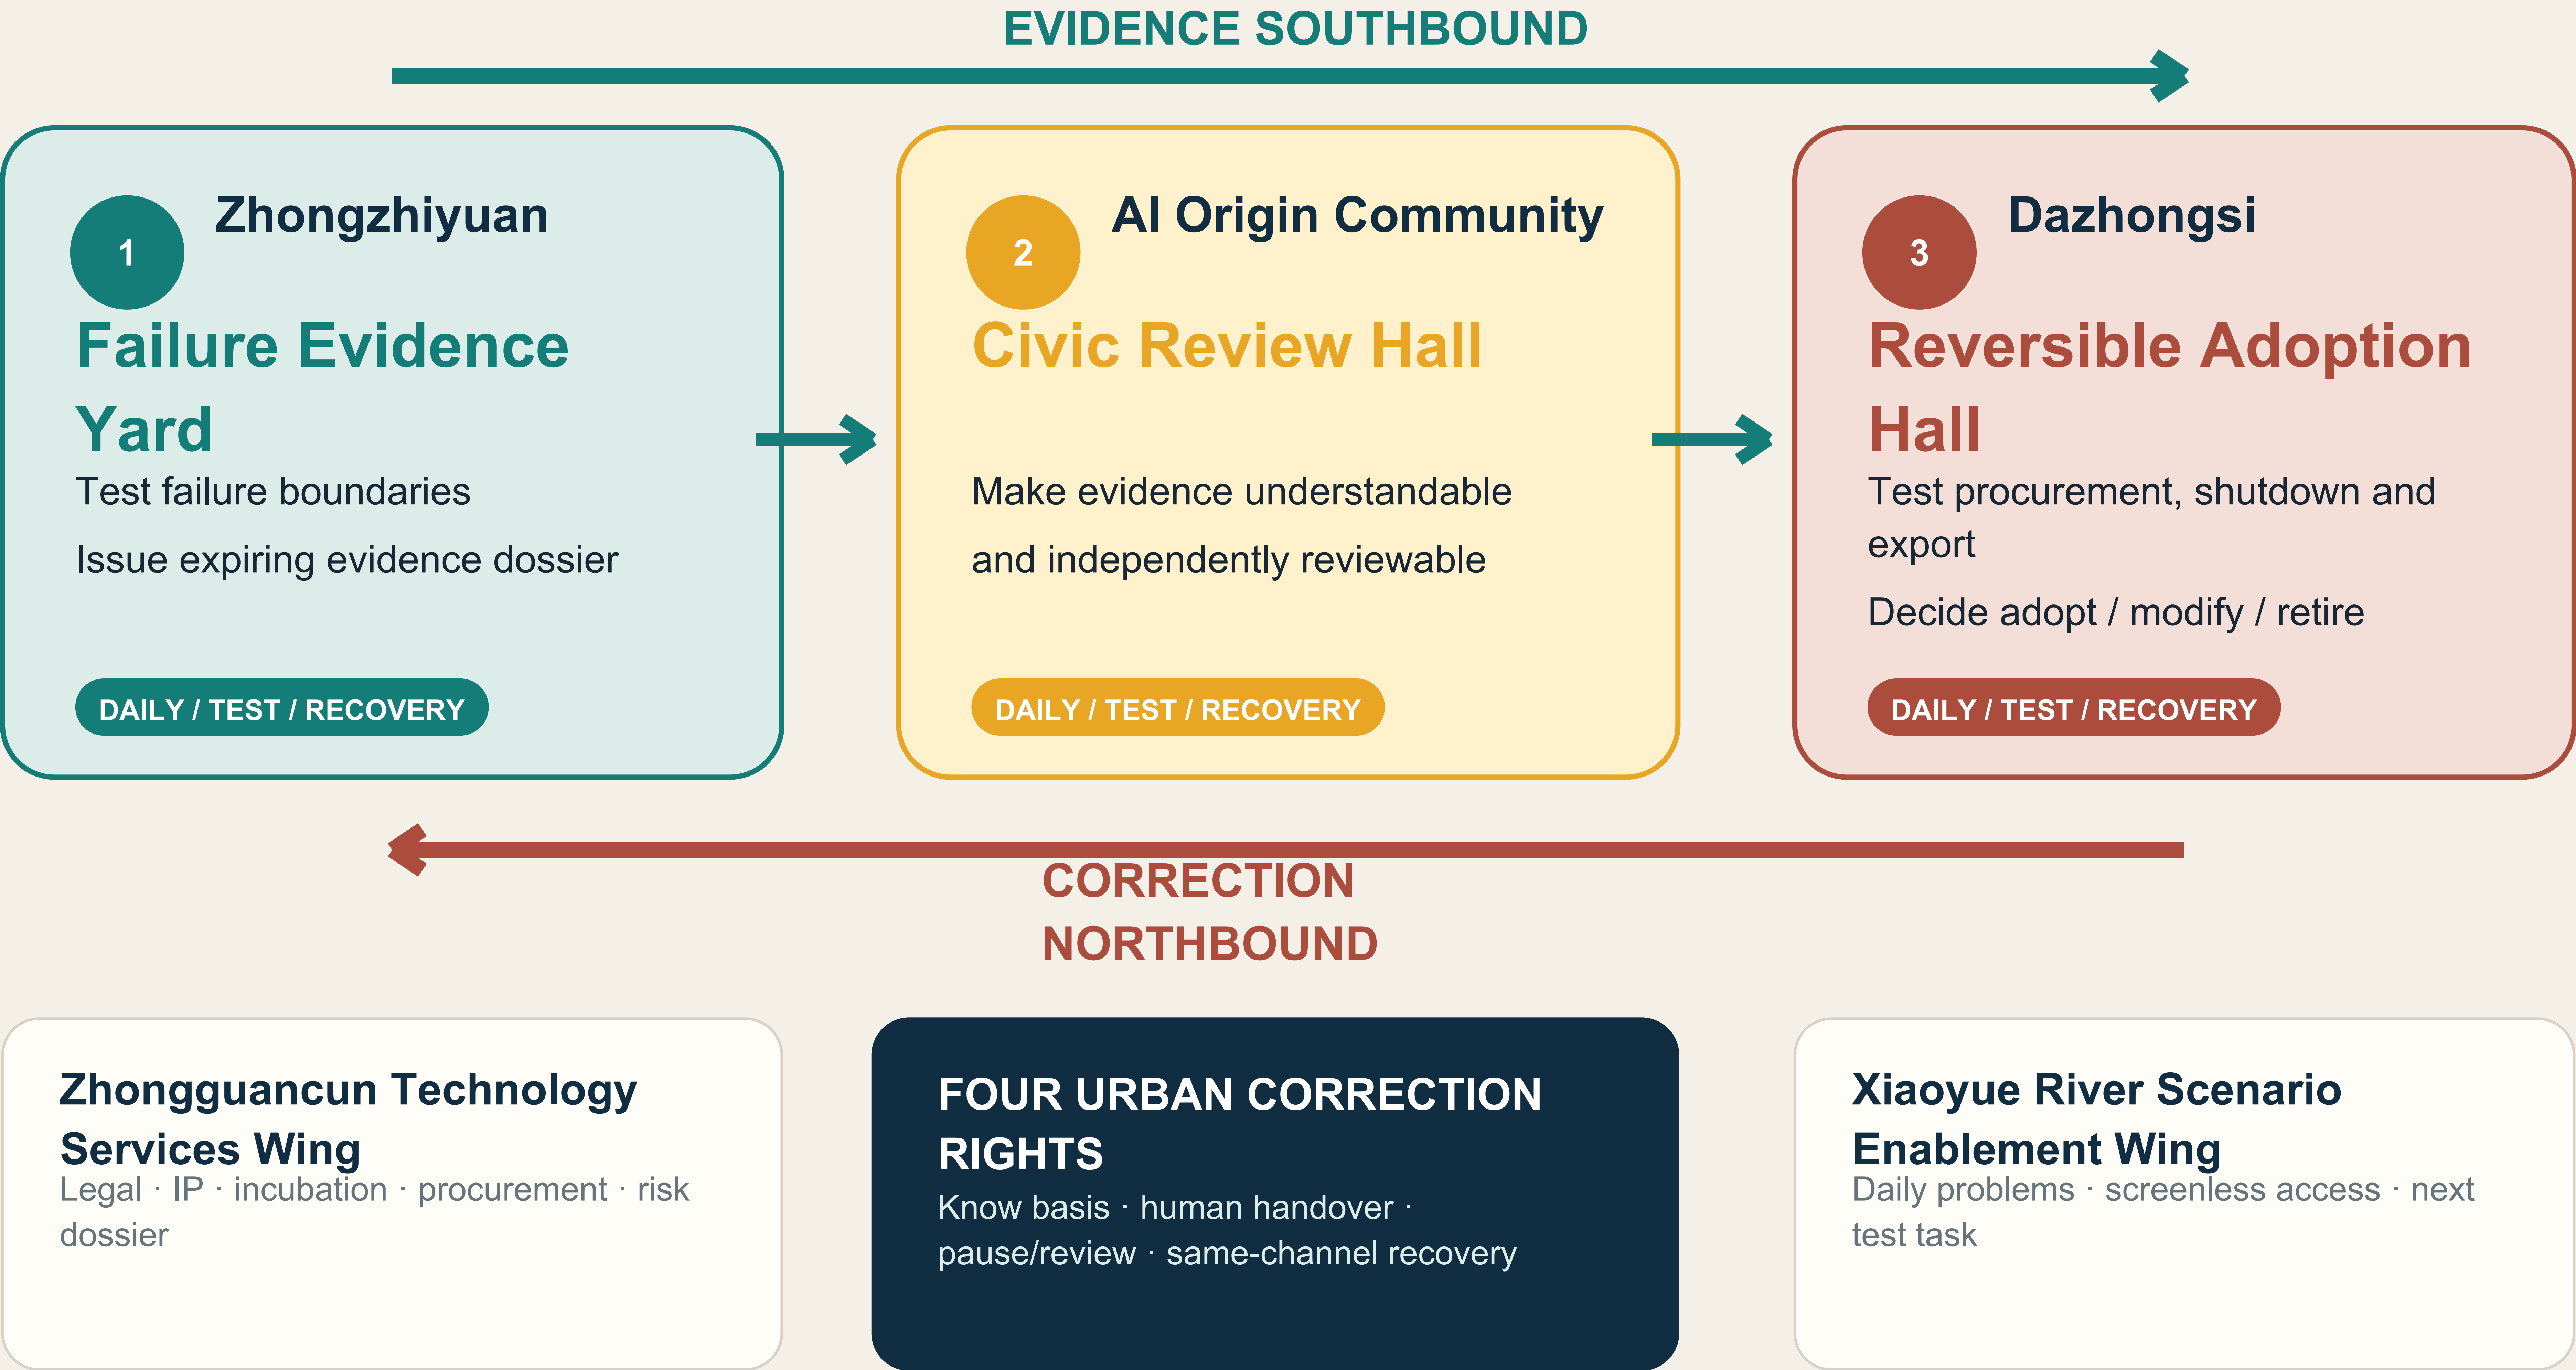

THE ONLY PASS/FAIL TEST

Success is not a machine truth verdict. It is pause, review, same-channel correction, retest, and a spatial/data recovery record.

Evidence Southbound, Correction Northbound

The three key areas are not three exhibitions. They form a civic service chain from testing to public review and reversible adoption, then return errors to origin.

90-day Reversible Pilot + Correction Receipt

Prove the workflow fails closed with synthetic material before seeking live-site authorisation; every operating baseline remains unmeasured.

Days 1–15

Baseline + authorise

Owner · lawful/synthetic material · channel inventory

STOP if any is missing

Days 16–45

Three-area relay

Failure dossier · public explanation · review receipt

Human review for adverse output

Days 46–70

Failure injection

Remove fields · break channels · block return

PAUSE if return fails

Days 71–90

Review + disposition

Limits · recovery record · adopt/modify/retire

RETIRE without recovery

MACHINE-READABLE CORRECTION RECEIPT

status synthetic drill, not field result

channels CHANNEL-SIGN-01 + CHANNEL-WEB-01

review AI reconstruction, not original record

return 2 / 2 original channels

retest RETEST-PUBLISH-001

disposition modify + retest before any live use

REMOVE A FIELD; SYSTEM MUST FAIL CLOSED

Accountable role missing

PAUSE □

Original-channel inventory missing

PAUSE □

Independent reviewer missing

PAUSE □

Recovery record missing

RETIRE □

Three Spatial Prototypes: Make the Protocol Walkable

Each site combines arrival, a staffed interface, a controlled work zone and a recovery exit; daily, test and recovery states share one responsibility contract.

01

Zhongzhiyuan · Failure Evidence Yard

Public gallery

Controlled test

Group-difference room

Isolation

Repair/retest

→

Separate public / material flows

DAILY · open intake

TEST · bounded operation

RECOVERY · isolate/fix/retest

Accessible route · human role · pause point · recovery exit

02

Separate public / material flows

DAILY · open intake

TEST · bounded operation

RECOVERY · isolate/fix/retest

Accessible route · human role · pause point · recovery exit

Three Overlapping Belts, Three Anchors, Six Stations, Two Wings

Functions are not parallel colour blocks; they overlap at six staffed interfaces. Boundaries and land use remain provisional concept layers pending official data.

Implementability: Ownership, Gates and Recoverable Resources

01

Know the Basis

Source/version/purpose/expiry

02

Human Handover

Equivalent service without phone

03

Pause and Review

Pause adverse propagation pending review

04

Same-channel Recovery

Correct original label/desk/page

PILOT-A MINIMUM RESPONSIBILITY PACKAGE

• Authorise: host A / pilot steward R

• Technical test: evaluation lead A / licensed team R

• Same-channel fix: channel owner A / case steward R

• Shutdown + recover: service owner A / operations lead R

S / M / L RESOURCE BANDS

S existing desk + trained staff + paper/phone

M adapted room + isolated kit + accessible fit-out

L multi-party facility; official spatial/engineering/cost evidence required

No fabricated cost: before quantities, ownership, building condition and authoritative local prices exist, do not assert a monetary total; lock only staffing, fit-out, equipment, data, accessibility, audit and recovery components.

Eleven Cases: Transfer the Mechanism, State the Red Line

Each item answers only three questions: what transfers, where it lands and what must not be copied. Full sources remain in global-cases.json / sources.json.

Evidence + Evaluation

C01 C2PA

Transfer Provenance + revoke

Apply Heritage/creator receipts

Red line Provenance ≠ truth

C02 DARPA
