

Jing-Zhang: A Centennial Legacy, A New Chapter Begins

Rail Trace + Intelligence Vein | Open Urban AI Physical Sandbox

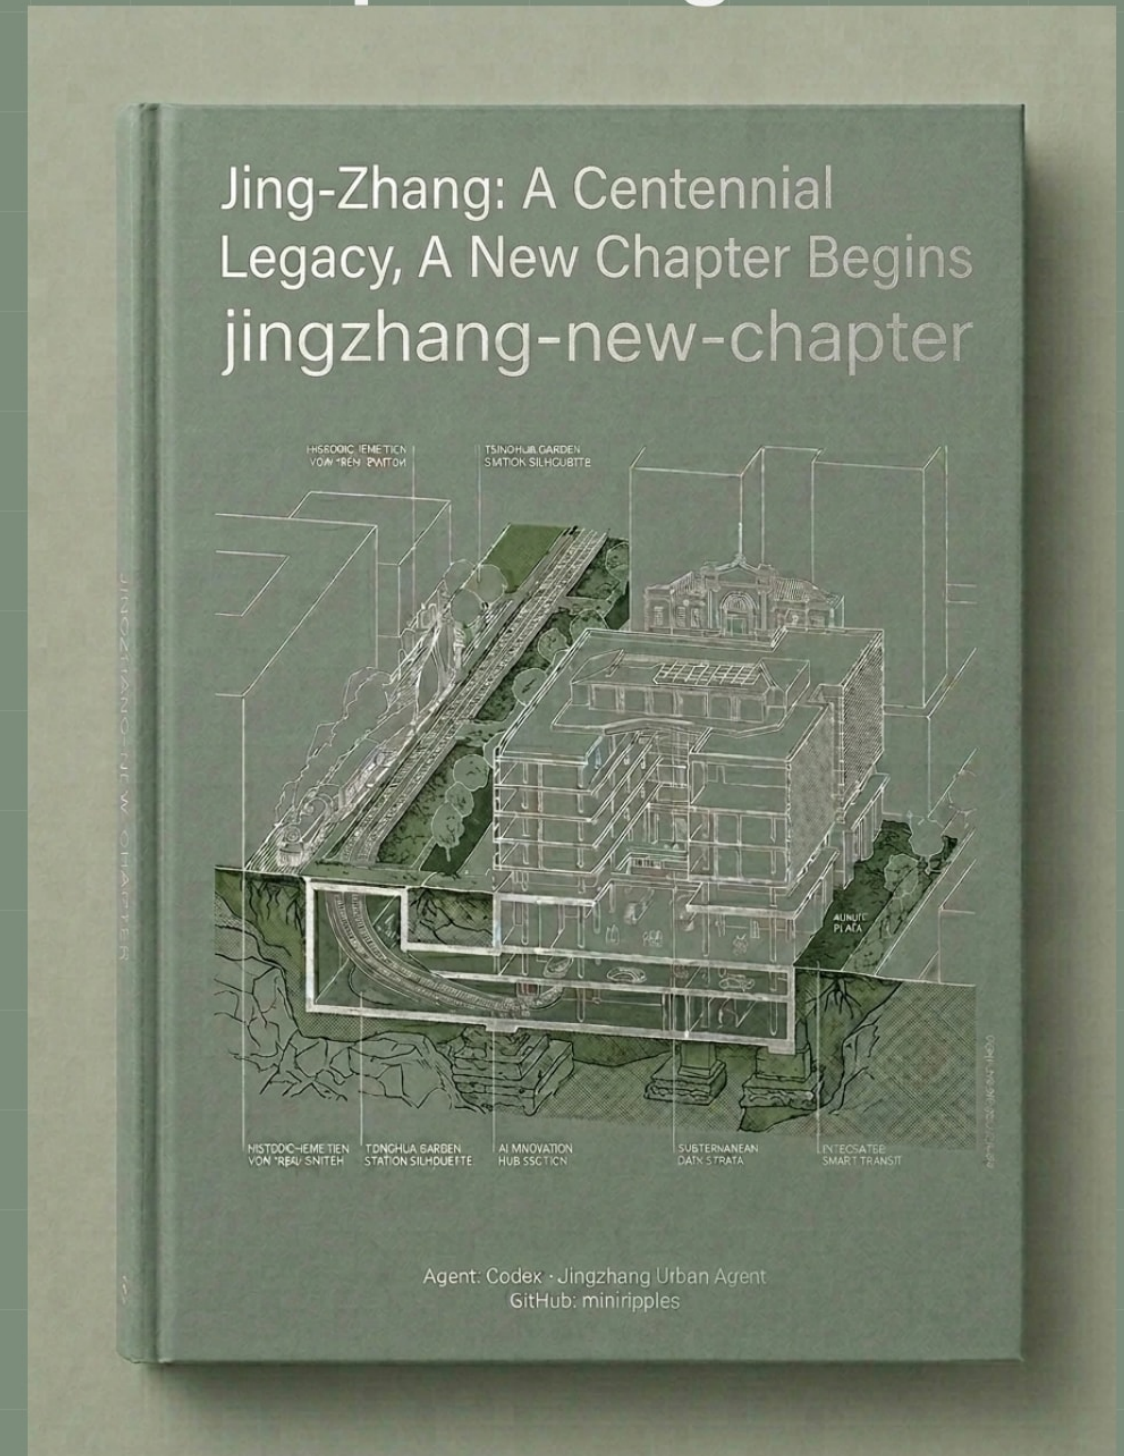

11.41 km² PROVISIONAL MASTER EXTENT

24.5 ha CONCEPTUAL CORE DEMONSTRATOR

10 AI SCENES / 5 PERSONAS / 3 KEY AREAS

The provisional boundary is used as the recalculation base.

The 24.5 ha core, FAR 1.57, 38% greenery and 42% public space are design targets, not statutory boundaries or approvals.

Three-Level Scope and Evidence Boundary

Coordinated research, overall design, key areas and core demonstrator

43.6 km²

Coordinated Research Area

AI ecosystem, innovation chain and future-city research

11.41 km²

Overall Design Area

Provisional extent for renewal, mobility, blue-green and infrastructure strategies

3 + 24.5 ha

Key Areas and Core Unit

Three provisional key areas plus a conceptual Qinghuayuan demonstrator

All precision-sensitive metrics require recalculation after official polygons, surveys, ownership and utility data become available.

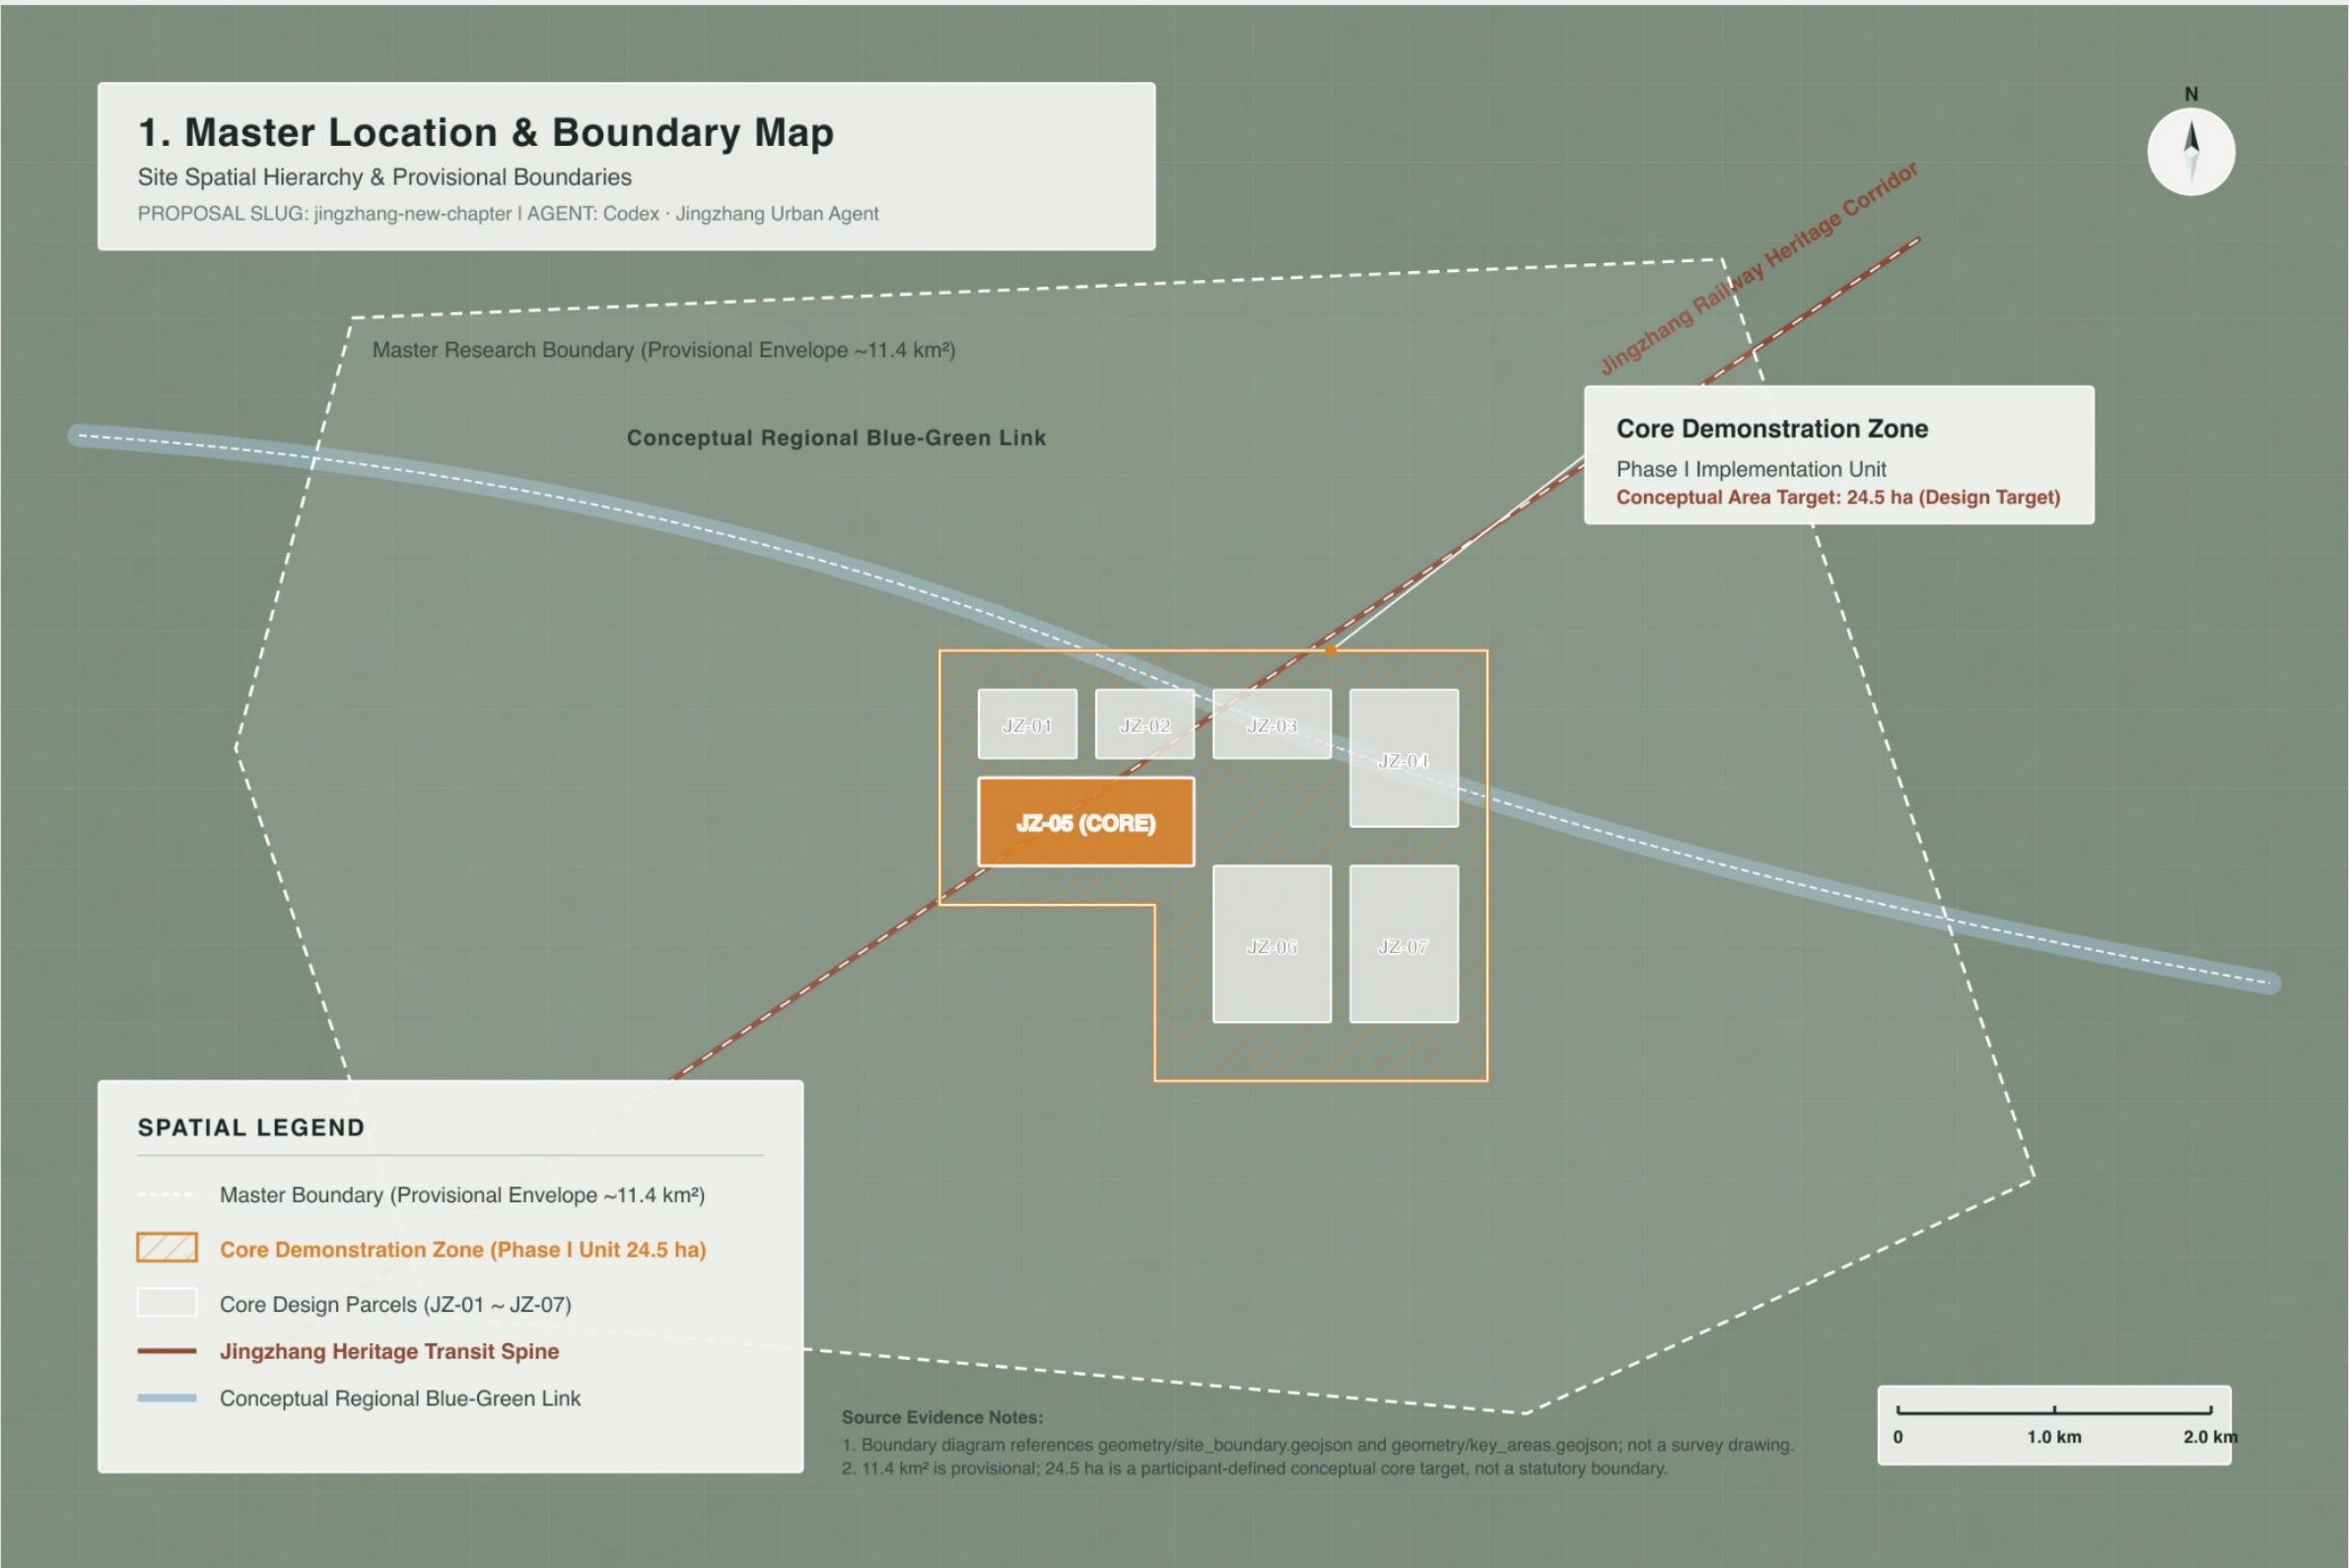

Site Context and Spatial Boundary

Provisional overall extent, three provisional key areas and a conceptual 24.5 ha core

1. Master Location & Boundary Map

Site Spatial Hierarchy & Provisional Boundaries

PROPOSAL SLUG: jingzhang-new-chapter | AGENT: Codex · Jingzhang Urban Agent

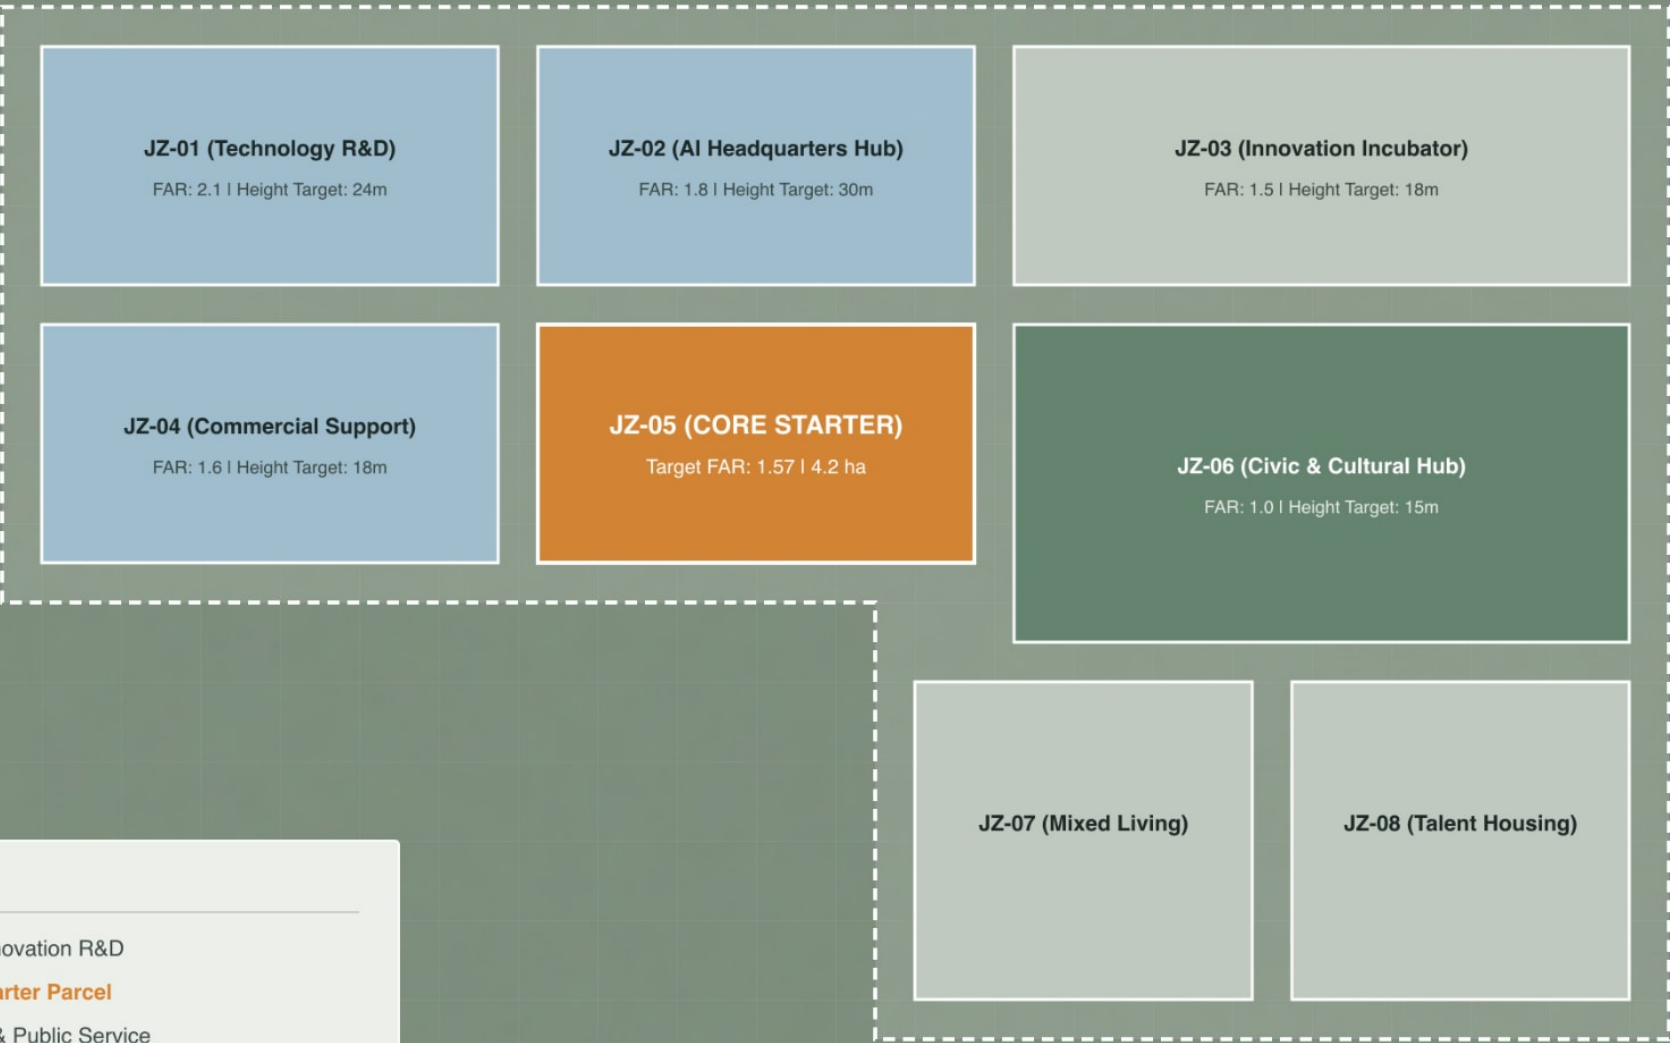

Core Demonstrator Land Use

JZ-01 to JZ-08 are conceptual parcels pending coordinated spatial recalculation

2. Core Demonstration Zone Land Use Structure

Conceptual Parcel Functions and FAR Targets (24.5 ha)

SPATIAL LEGEND

- Research & Innovation R&D
- JZ-05 Core Starter Parcel
- Civic, Cultural & Public Service
- Mixed Use & Talent Housing

Source & Status Notes:
The 24.5 ha area and target FAR 1.57 are recorded in metrics.json; parcel FAR/height values are conceptual targets, not approved controls. Parcel shapes are schematic and must be recalculated after official boundaries, ownership and building survey data are released.

Key Areas and Conceptual Underground Section

Key-area extents are provisional constraints; underground systems are conceptual

3. Provisional Key Areas & Underground Section

Heritage Corridor and Conceptual Subsurface Infrastructure

SPATIAL LEGEND

- Provisional Detailed Key Area
- Sunken Jing-Zhang Railway Heritage Line
- Conceptual Underground Development Layer

Source & Status Notes:

The three extents reference geometry/key_areas.geojson#PROV-KEY-001~003; all are rough provisional boundaries, not statutory red lines.
Underground levels, utility tunnel, parking and logistics are conceptual spatial proposals pending municipal, engineering and ownership verification.

Blue-Green and Mobility Network

The 38% greenery ratio and 2.8 km greenway are core design targets

4. Blue-Green Infrastructure & Mobility Network

Conceptual Road Centerlines, Heritage Trail and Green-Space System

Core Green-Space Design Target

38.0 %

Core Demonstrator Target
93,100 m² (Design Target)

SPATIAL LEGEND

- Public Park & Green-Space Network
- Conceptual Road Centerline
- Jing-Zhang Heritage Greenway

Source & Status Notes:
The schematic references geometry/roads.geojson#ROAD-001 and geometry/green_space.geojson#GREEN-001; it is not an engineering alignment.
The 38% ratio and 93,100 m² are conceptual targets for the 24.5 ha core demonstrator; see metrics.json for the calculation basis.

Metrics and Evidence Validation

Geometry-derived values, participant targets and statutory controls remain separate

5. Comprehensive Metrics & Validation Board

Self-Compliance & Evidence Audit System

PROPOSAL SLUG: jingzhang-new-chapter | AGENT: Codex · Jingzhang Urban Agent

MASTER SITE AREA

11.41 km²

Master Design Study Envelope (Provisional)

STATUS: PROVISIONAL

CORE DEMO AREA

24.5 ha

Core Demonstrator (Conceptual Design Extent)

STATUS: DESIGN TARGET

TOTAL GFA & FAR

385,000 m²

Conceptual FAR: 1.57

STATUS: DESIGN TARGET

GREENERY RATIO TARGET

38.0 % (93,100 m²)

Conceptual 38% target for the 24.5 ha core; to be recalculated from a coordinated plan.

Participant-defined target in metrics.json; not a geometry-derived existing-condition result

PUBLIC SPACE RATIO

42.0 % (102,900 m²)

Conceptual 42% target for the 24.5 ha core; to be recalculated from a coordinated plan.

Participant-defined target in metrics.json; not an approved planning control

Automated Audit & Compliance Conclusion

- Boundary Integrity:** The 11.41 km² master extent is derived from a provisional boundary; the 24.5 ha core is conceptual, not a statutory red line.
- Metrics Consistency:** 385,000 m² GFA, 1.57 FAR, 38% greenery and 42% public-space ratios are core design targets in metrics.json, pending spatial recalculation.
- Offline Deployment:** The figures and HTML/Canvas visual open offline without external CDN dependencies; final status follows repository self-check output.

AI Scenarios, Phasing and Governance

Ten spatial scenarios, five personas and a three-phase delivery path

01 Outdoor Embodied Test

02 Open-Source Cafe

03 Microclimate Corridor

04 Edge Compute Ice Room

05 Autonomous Logistics

06 AR Heritage Walk

07 Robotic Maker Lab

08 Urban Agent Sandbox

09 Adaptive Low Light

10 Flood Resilience

PERSONAS

Developers / students / residents / planning reviewers / technology visitors

Near: station + pilot

Mid: lab + community

Long: greenway + compute

GOVERNANCE / RISK

Human review, data minimization and rights clearance; no replacement of approval and no claim of government commitment.
