

SILICON IRONWAY 京张智轨

An AI Innovation Belt on a Century-Old Railway · One Spine, Three Stations, Two Wings

Boundary statement: All geometry is based on the repository provisional boundary (EPSG:4326 / EPSG:4548), for concept generation, display, and self-check only; not an official redline or precise-area basis; recalculate the full chain when official polygons are published.

Core Metrics

Site area	11.41 km² (11,412,825 m²)
Key-area total	3.69 km²
Green ratio	19.6%

Public-space ratio	5.3%
Blue-green & public	24.9%
Building footprint	3.51M m² · 411 处
Road centerline	49.6 km
Scenario cards	12 (含 3 测试场景)
Personas	5 类
Pilgrimage landmarks	3 处
Renewal projects	9 项
Control indicators	unknown · pending official conditions

Three Key Areas

Origin Depot · Beijing AI Origin Community	104.3 ha	Open-source release · near-campus transformation · talent zone: Origin Square, transformation street, talent stations
Marshalling Station · Zhongzhiyuan	192.1 ha	Marshalling test · governance hub · Qinghe interface: test field, signal tower, Qinghe innovation square
Transfer Hub · Dazhongsi	72.0 ha	AI-native consumption · data factors · international exchange: four-quadrant links, bell-tower square, data-factor living room

Task Coverage (agent.1–agent.6)

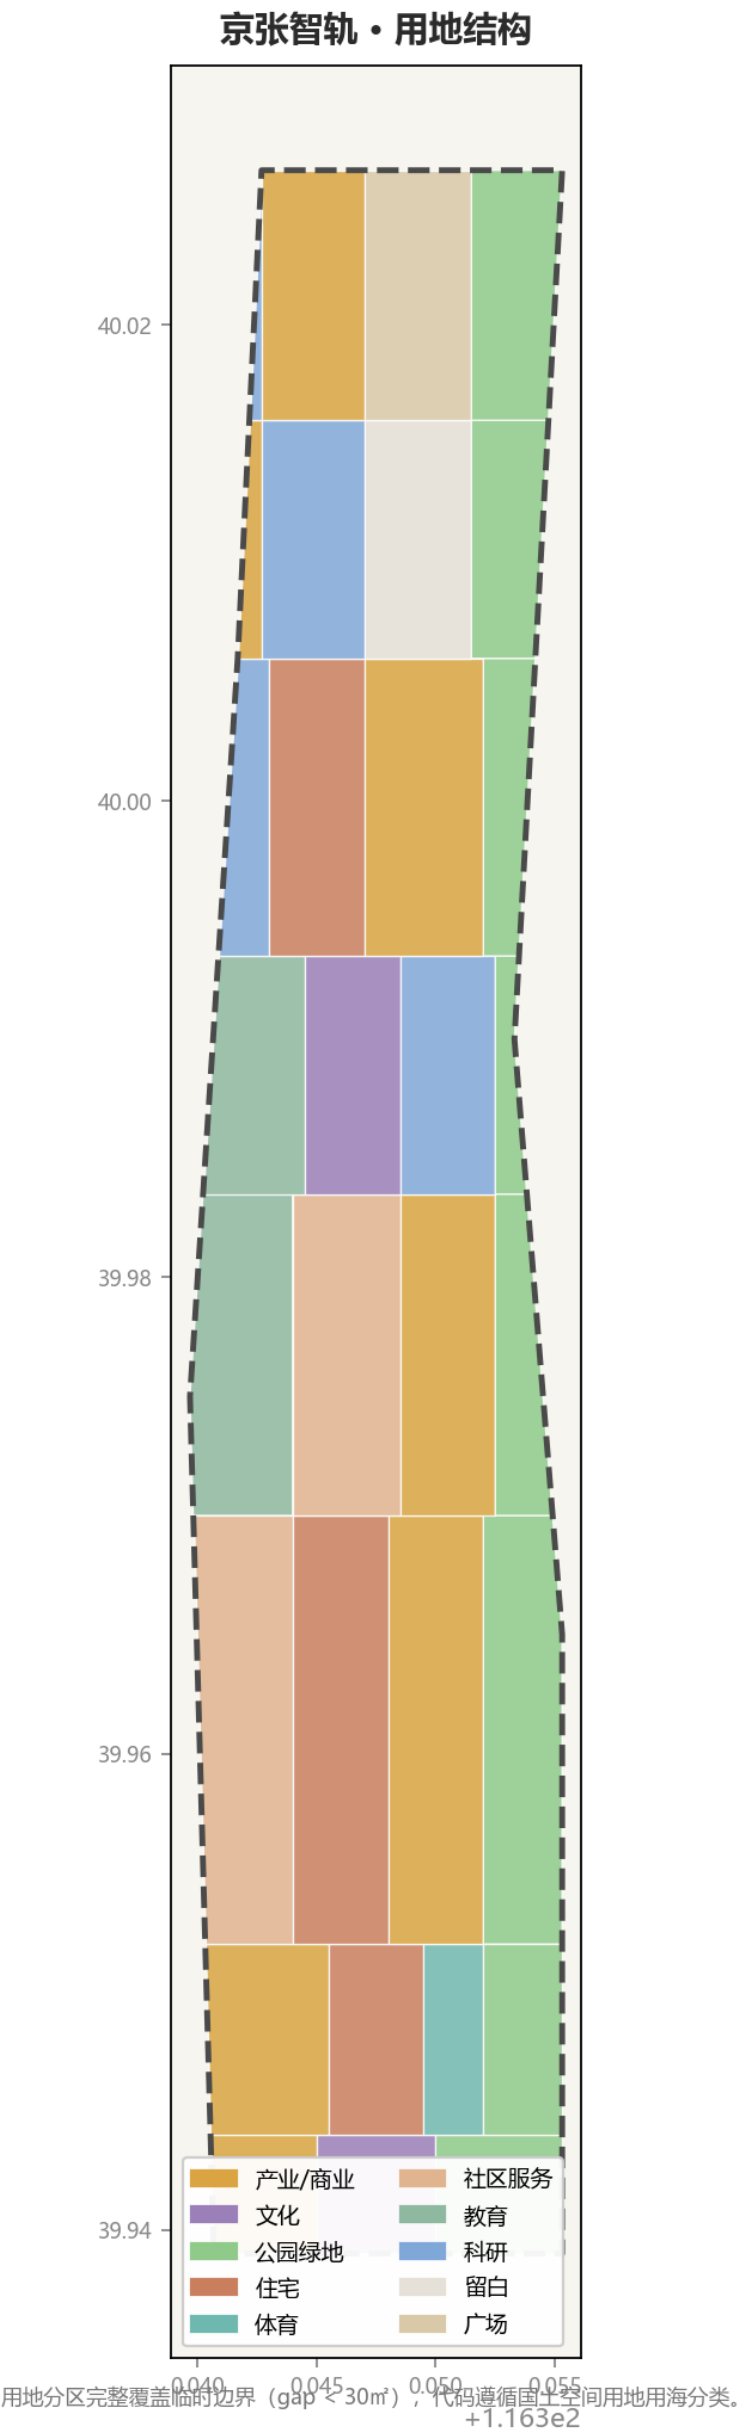

agent.1	Concept & naming: SILICON IRONWAY · zig-zag logo · three positionings, five functions, three areas, two wings
agent.2	Full-stack system: 8 global cases · origin-marshalling-transfer ecosystem map · eight factor mechanisms
agent.3	Scenarios & vibrant city: 12 scenario cards (incl. 3 test scenes) · 5 personas · Ironway Signal protocol
agent.4	Public space & landmarks: 3 pilgrimage landmarks · milestone honor system · five-component kit
agent.5	Culture: three departures of one track (1909 railway → 1980 Zhongguancun → 2026 AI track)
agent.6	Events & operation: annual calendar · developer community · scenario opening · international conversion

This proposal is an AI-generated open co-creation concept from public/cleared data; it does not replace formal planning or constitute government approval; control indicators (FAR, height, density, setbacks) are pending official regulatory conditions.
