

ONE ERROR, EQUAL REMEDY | OPERATING PROTOCOL

A3 / 1: lifecycle, roles, space, and verification

SIX NAMED HUMAN ROLES

incident owner; independent professional; scope reviewer; authorized service owner; notice safety; independent appeal

FIVE SPATIAL CARRIERS

ordinary entry → evidence preserve → scope review → equal remedy → independent appeal and deletion receipt

FOUR DETERMINISTIC TESTS

version trace; human scope review; notice/exit safety; AI-off equivalence. All 60 fixtures record expected, actual, and failed branches.

PUBLIC RESULT ON FAILURE

disputed automation stays off; ordinary service keeps order, time, and open matters; ambiguity goes to humans; exit deletes temporary links.

SIX TASK-SPECIFIC DELIVERABLES

A3 / 2: each task has structured evidence, a visible board, and a dashboard anchor

AGENT.1

Identity + structure

Error node, remedy ripples, ordinary-service baseline; distinct duties across three areas and two wings.

- **identity**
- **structure map**
- **regional loop**

AGENT.2

Ecosystem + industry space

Six cases stay question prompts; eight inputs connect version evidence, space, and public accountability.

- **case table**
- **ecosystem map**
- **industry-space map**

AGENT.3

Scenarios + tests

12 scenarios, 6 personas, 4 tests, and 60 row-level fixtures; AI makes no final decision.

- **scenario cards**
- **personas**
- **expected / actual / failure**

AGENT.4

Landmarks + components

Three legible responsibility landmarks, six removable components, and non-ranking honor display.

- **landmark catalog**
- **component kit**
- **honor system**

AGENT.5

Culture + communication

Preserve the shared fact, review each person at the stop, repair fairly, and support a clear exit.

- **spatial story**
- **signage**
- **global copy**

AGENT.6

Events + operations

Quarterly rehearsal, semiannual omission audit, annual AI-off trace, and forum form a stoppable loop.

- **annual system**
- **developer path**
- **conversion / stop**
