

SAME-ROUTE CONTINUITY: THE PERSON DECIDES

ENTRY — QUEUE — ROUTE — SERVICE — FAILURE — EVACUATION — REUNIFICATION

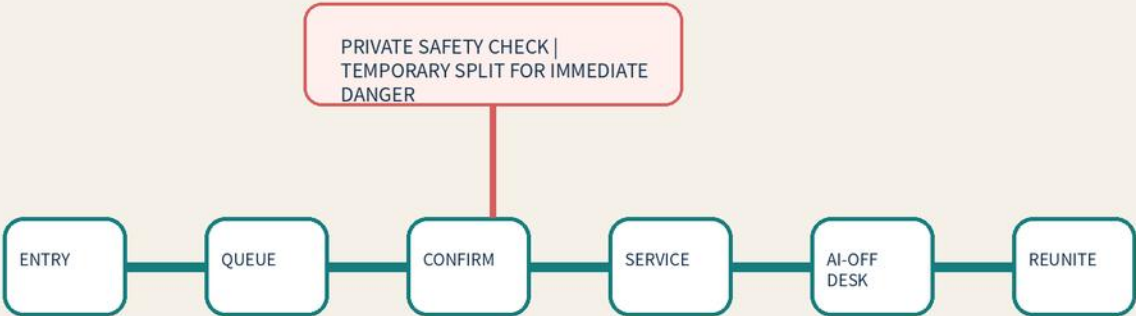

PERSON DECLARES → TEMPORARY PASS →
MOVE TOGETHER → DELETE ON
REVOCATION

SAFETY EXCEPTION
Private coercion check
Temporary split only for immediate
danger
Named commander owns
reunification

PUBLIC RESULT ON FAILURE
No forced solo continuation or penalty
Queue position and pending matter
preserved
Paper and human path survives AI-off

CONTINUITY CARRIERS: ORDINARY ROUTES BEFORE AI ROUTING

A SUPPORT RELATIONSHIP IS NOT PROXY AUTHORITY; NAMED PEOPLE HANDLE SAFETY EXCEPTIONS

Failure does not force solo continuation, cancel queue position, or create a negative record.
Paper passes, static signs, named staff, and visible reunion points remain available.

PROVISIONAL ROUGH BOUNDARY | CONCEPT ONLY | NOT AN OFFICIAL REDLINE

PROVISIONAL ROUGH BOUNDARY | CONCEPT ONLY | NOT AN OFFICIAL REDLINE

PERSON CONTROL

The person declares, changes, and revokes the temporary relation without public diagnosis, kinship, or guardianship proof.

NO AUTOMATIC PROXY

The supporter receives no automatic signature, identity, data, guardianship, or emergency authority.

ORDER PRESERVED

Outage, revocation, or safety exceptions preserve queue and pending matter through people, paper, and named reunion.

THREE-AREA TEST AND AUDIT

SPATIAL ROLES, EVIDENCE, METRICS, EXIT

THREE KEY AREAS, THREE DIFFERENT QUESTIONS

ONE CONTINUITY CHAIN, DIFFERENT TEST ROLES; FAILURES RETURN TO HUMAN SERVICE

01

ZHONGZHIYUAN

WHERE DOES THE SYSTEM SPLIT THE PAIR?

gates, queues, routing, failure injection

02

AI ORIGIN

DOES THE PERSON REALLY DECIDE?

declare, revoke, private check, no proxy grant

03

DAZHONGSI

CAN ORDER AND REUNION SURVIVE DANGER?

human desk, paper pass, meeting point, closure receipt

PROVISIONAL ROUGH BOUNDARY | CONCEPT ONLY | NOT AN OFFICIAL REDLINE

DIFFERENT AREA ROLES

Zhongzhiyuan detects splits, AI Origin tests person choice, and Dazhongsi tests safety exceptions, AI-off, and reunion.

KNOWN STRUCTURE

Twelve scenarios, six personas, four human roles, seven continuity gates, and three landmarks prove only reviewable structure.

FIELD RESULTS UNKNOWN

Split rate, chain coverage, revocation completion, reunion time, and ordinary-service continuity await participatory and professional review.

PROVISIONAL ROUGH BOUNDARY | CONCEPT FOR PROFESSIONAL DEVELOPMENT

SEPARATE KNOWN PROTOCOL COUNTS FROM UNKNOWN FIELD OUTCOMES

PASS MEANS REVIEWABLE, NOT FIELD-PROVEN, LEGAL, OR APPROVED
