

FOUR GATES

No silent scope expansion • Human fallback • Portable receipts • Reversible by default

CITY HANDSHAKE | OVERALL STRUCTURE

Site boundary, public corridor, handshake ports and provisional key areas

CITY HANDSHAKE

One spine · Three ports · Four gates | Bounded delegation, auditable action, reversible return

Conceptual Land-Use Structure

No false precision: key-area allocation + explicit reserve

Legend

- 0802 R&D / protocol innovation
- 0804 Validation / education
- 0702 Public service
- 0701 Residential
- 05 Commercial
- 1401 Park / green
- 16 Reserved / undecided

- All colored blocks are design proposals, not existing or statutory land use.
- Large code-16 reserve prevents false precision before controls/ownership arrive.
- Recalculate topology, areas and drawings after official data release.

LAND USE = design proposal; SITE/KEY AREA = provisional constraint

CITY HANDSHAKE | MOBILITY AND KEY AREAS

Slow travel, blue-green public space and three provisional detailed-design areas

Three Civic Handshake Ports

Make the rules · Use the rules · Stress-test them in real transactions

ZHONGZHIYUAN · Protocol Foundry

reversible testing / protocol production

- Protocol lab
- Red-team yard
- Open assurance workshop
- LM-01 Red-Line Pavilion

Provisional geometry: 192.9 ha
NOT official polygon

AI ORIGIN COMMUNITY · Mandate Common

daily delegation / human fallback

- Community mandate station
- Human service counter
- Permission/data receipt viewer
- LM-02 Handshake Hall

Provisional geometry: 104.3 ha
NOT official polygon

DAZHONGSI · Handoff Market

high-frequency trade / responsibility handoff

- Agent commerce interface
- Refund/dispute handback
- Robot handoff & stop
- LM-03 Return Gate

Provisional geometry: 72.0 ha
NOT official polygon

Three ports share ONE four-gate protocol

Slow Mobility · Blue-Green · Human Handoff Network

AI is not a new transport mode. Responsibility return is the new transfer.

Network rules

- Agent navigation cannot remove no-device paths
- Every smart entrance keeps a human/static entrance
- High-risk services return responsibility at ports
- Service remains usable after outage/model failure/expiry
- The Jing-Zhang greenway is the low-tech visible public substrate

- 京张绿道 / Greenway
- 城市握手脊 / Handshake Spine
- 公共交接空间 / Handoff public space
- 三类握手端口 / Handshake port

Concept mobility only · No road redline or engineering claim

CITY HANDSHAKE | METRICS AND EVIDENCE

Known values are provisional recomputations; unknown controls remain unknown

Metrics & Evidence Chain

Compute what is computable. Keep unavailable controls unknown.

SITE AREA

11.41 km²

GREEN

11.15 %

PUBLIC

4.41 %

SCENARIOS

12 cards

PERSONAS

6 types

LANDMARKS

3 nodes

Evidence chain

Public/cleared source

Provisional geometry

Design layers

EPSG:4548 recalculation

Boards / HTML

Recompute when official data arrive

FAR / height / road redlines / utility capacity: UNKNOWN. This is deliberate evidence discipline, not a fabricated completion.

Known metrics are recomputable from submitted geometry; operational performance remains unclaimed.

READINESS

SELF-CHECK: PASSED

SPATIAL: PASSED

VISUAL: PASSED

EVIDENCE: PASSED

DATA BOUNDARY

Official SITE_BOUNDARY and KEY_AREA are not yet supplied in the public package.

Recompute layers, metrics and drawings when official geometry is released.
