

Overall structure

An AI innovation belt for everyday public services

JING-ZHANG CIVIC LOOP

One civic spine, three complementary nodes

Three scales connect ecosystem strategy, urban renewal and key-area testing in one evidence chain

Provisional extents support concept comparison only; replace and recalculate after official GIS arrives.

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

One spine

heritage park as everyday civic space

Three nodes

test • collaborate • explain

Two wings

service support • scenario empowerment

Provisional extents support concept comparison only; replace and recalculate after official GIS arrives.

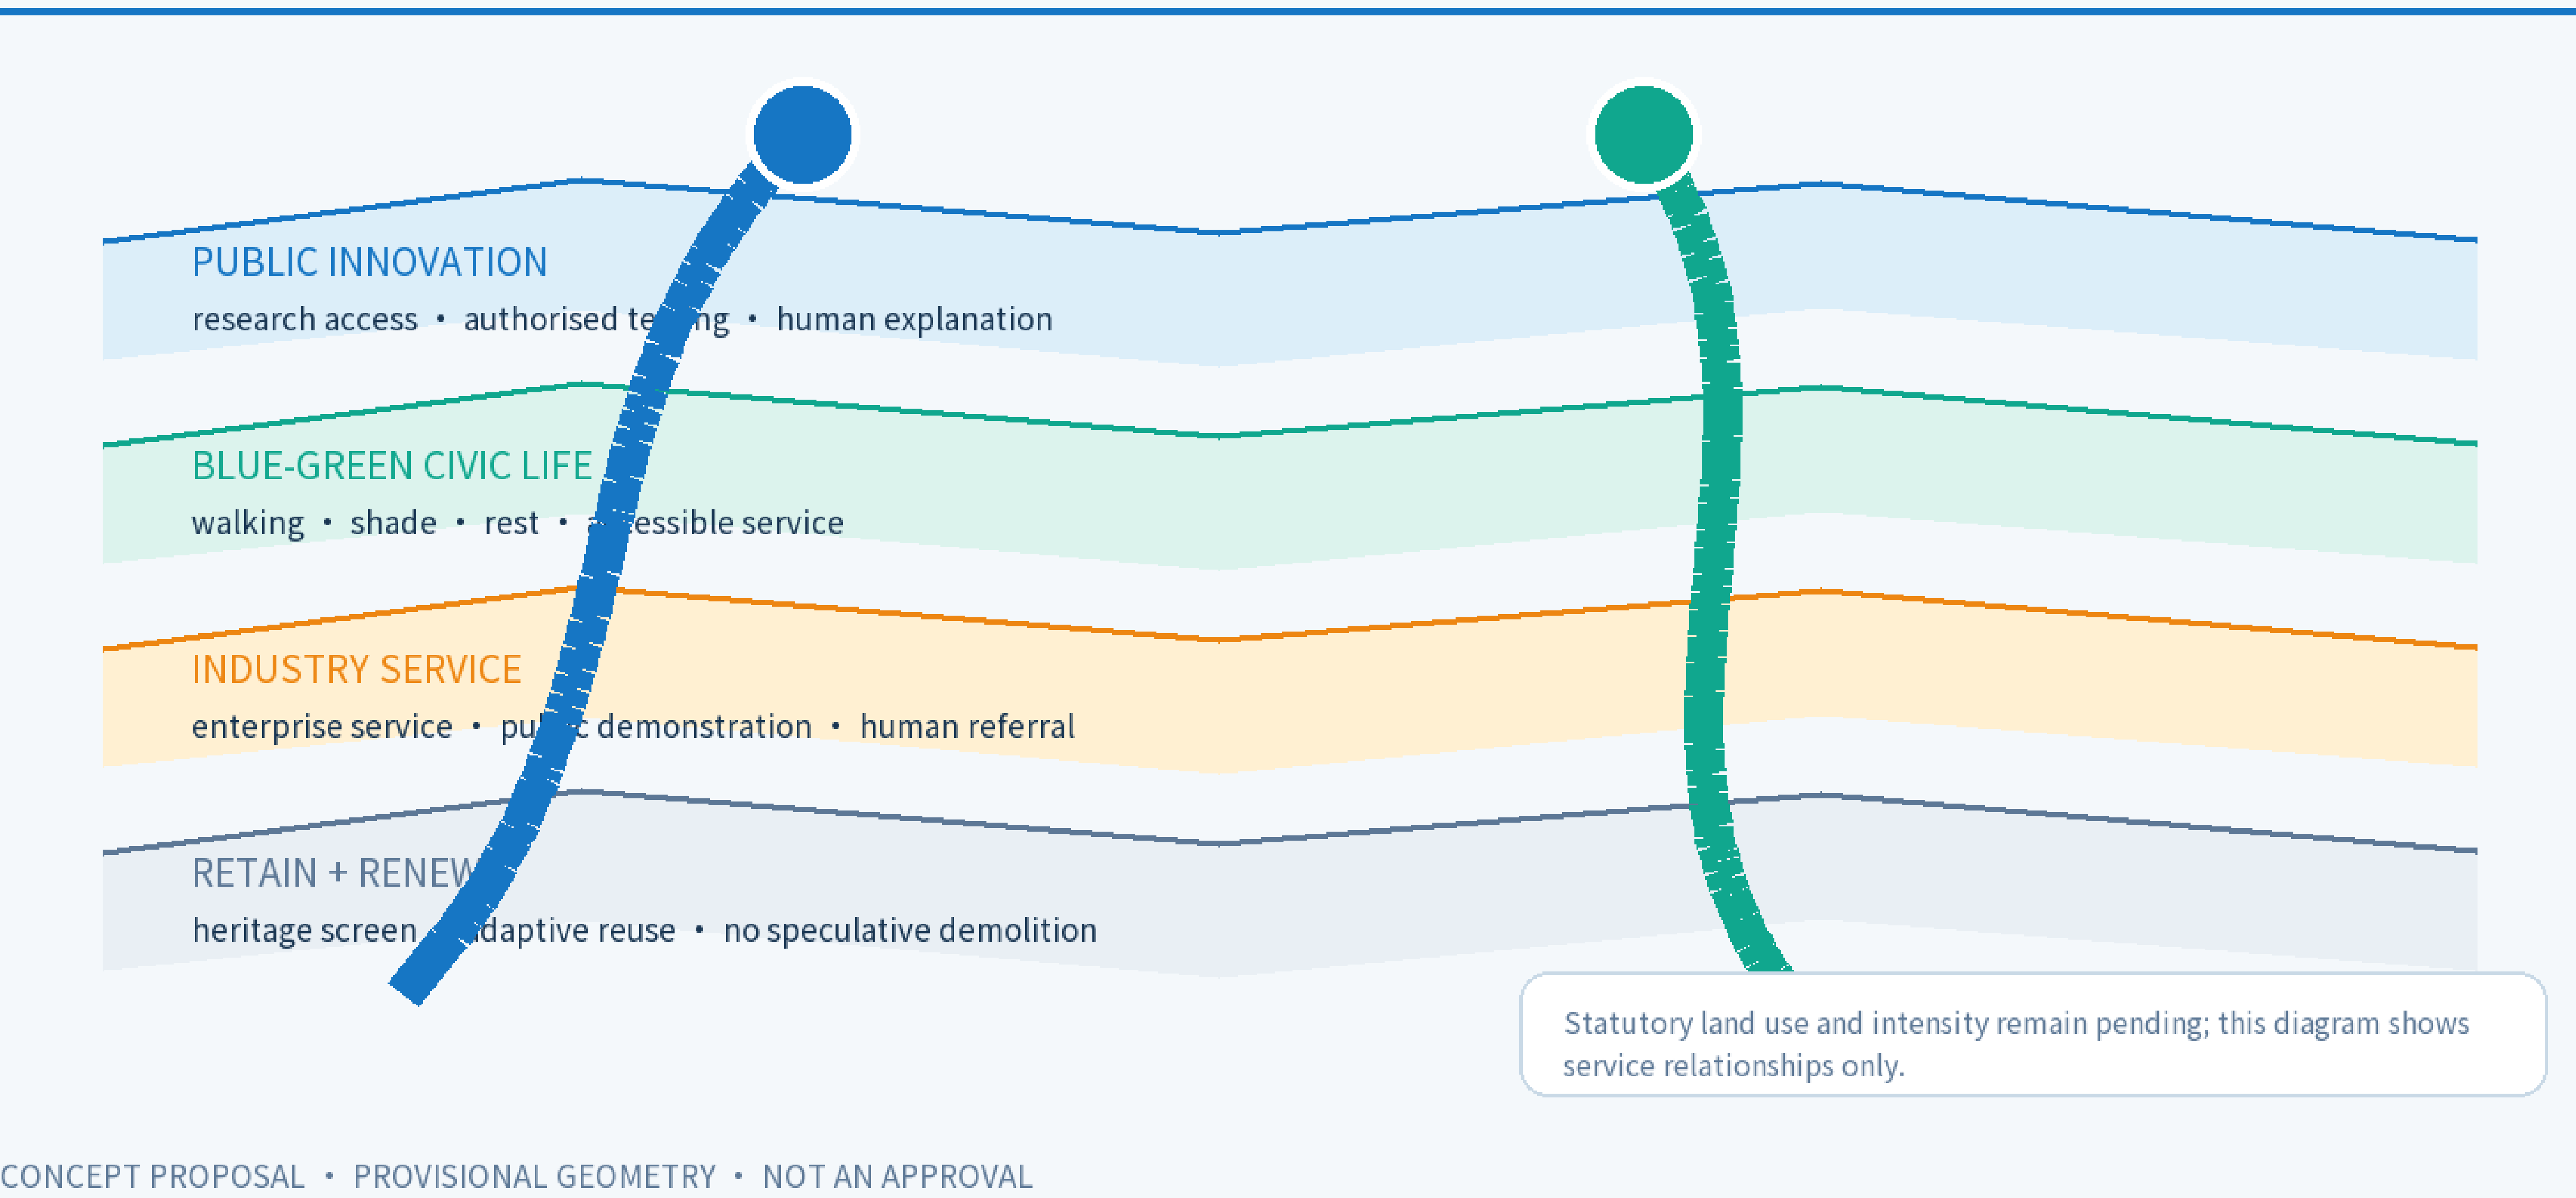

Land use and urban renewal

Retain first and expose every pending control

JING-ZHANG CIVIC LOOP

Land use as a civic-service gradient

Retain first, renew selectively, and add only after evidence and professional review

Retain

heritage and useful existing fabric

Renew

accessible and adaptable ground floors

Pending

FAR • height • title • demolition

Six renewal work packages are concepts, not approvals.

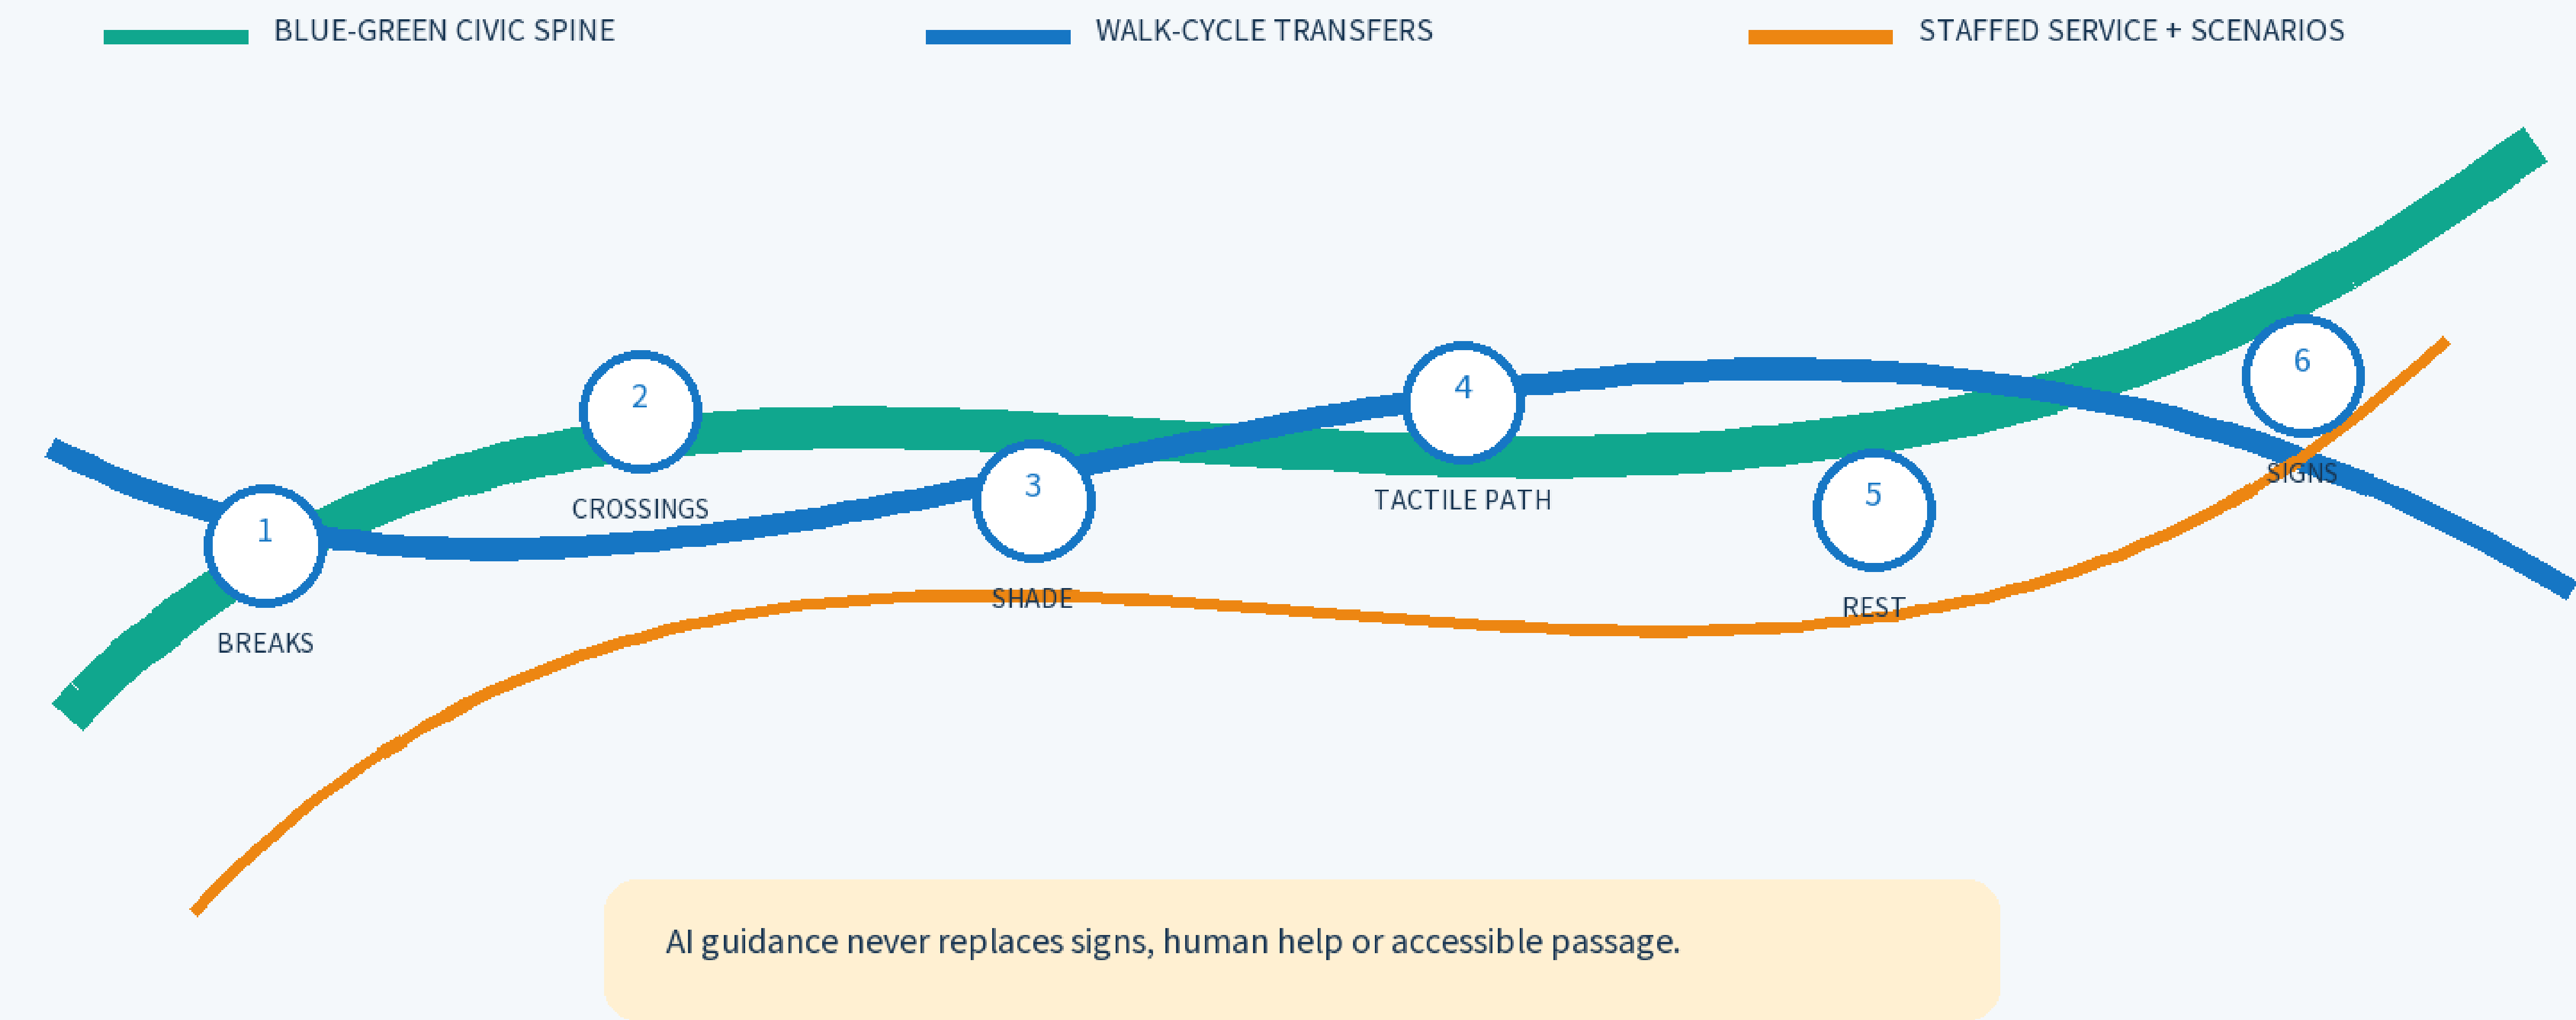

Transport, rail, walking and municipal support

Continuous ordinary passage is the first performance test

JING-ZHANG CIVIC LOOP

Continuous passage before smart equipment

Walking, cycling, blue-green space and staffed service carry ten scenario families

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

Six audits

breaks • crossings • shade • tactile path • rest • signs

Municipal

edge-first • tiered compute • offline continuity

Pending

redlines • sections • utilities • fire • parking

AI never replaces signs, staffed help or accessible passage.

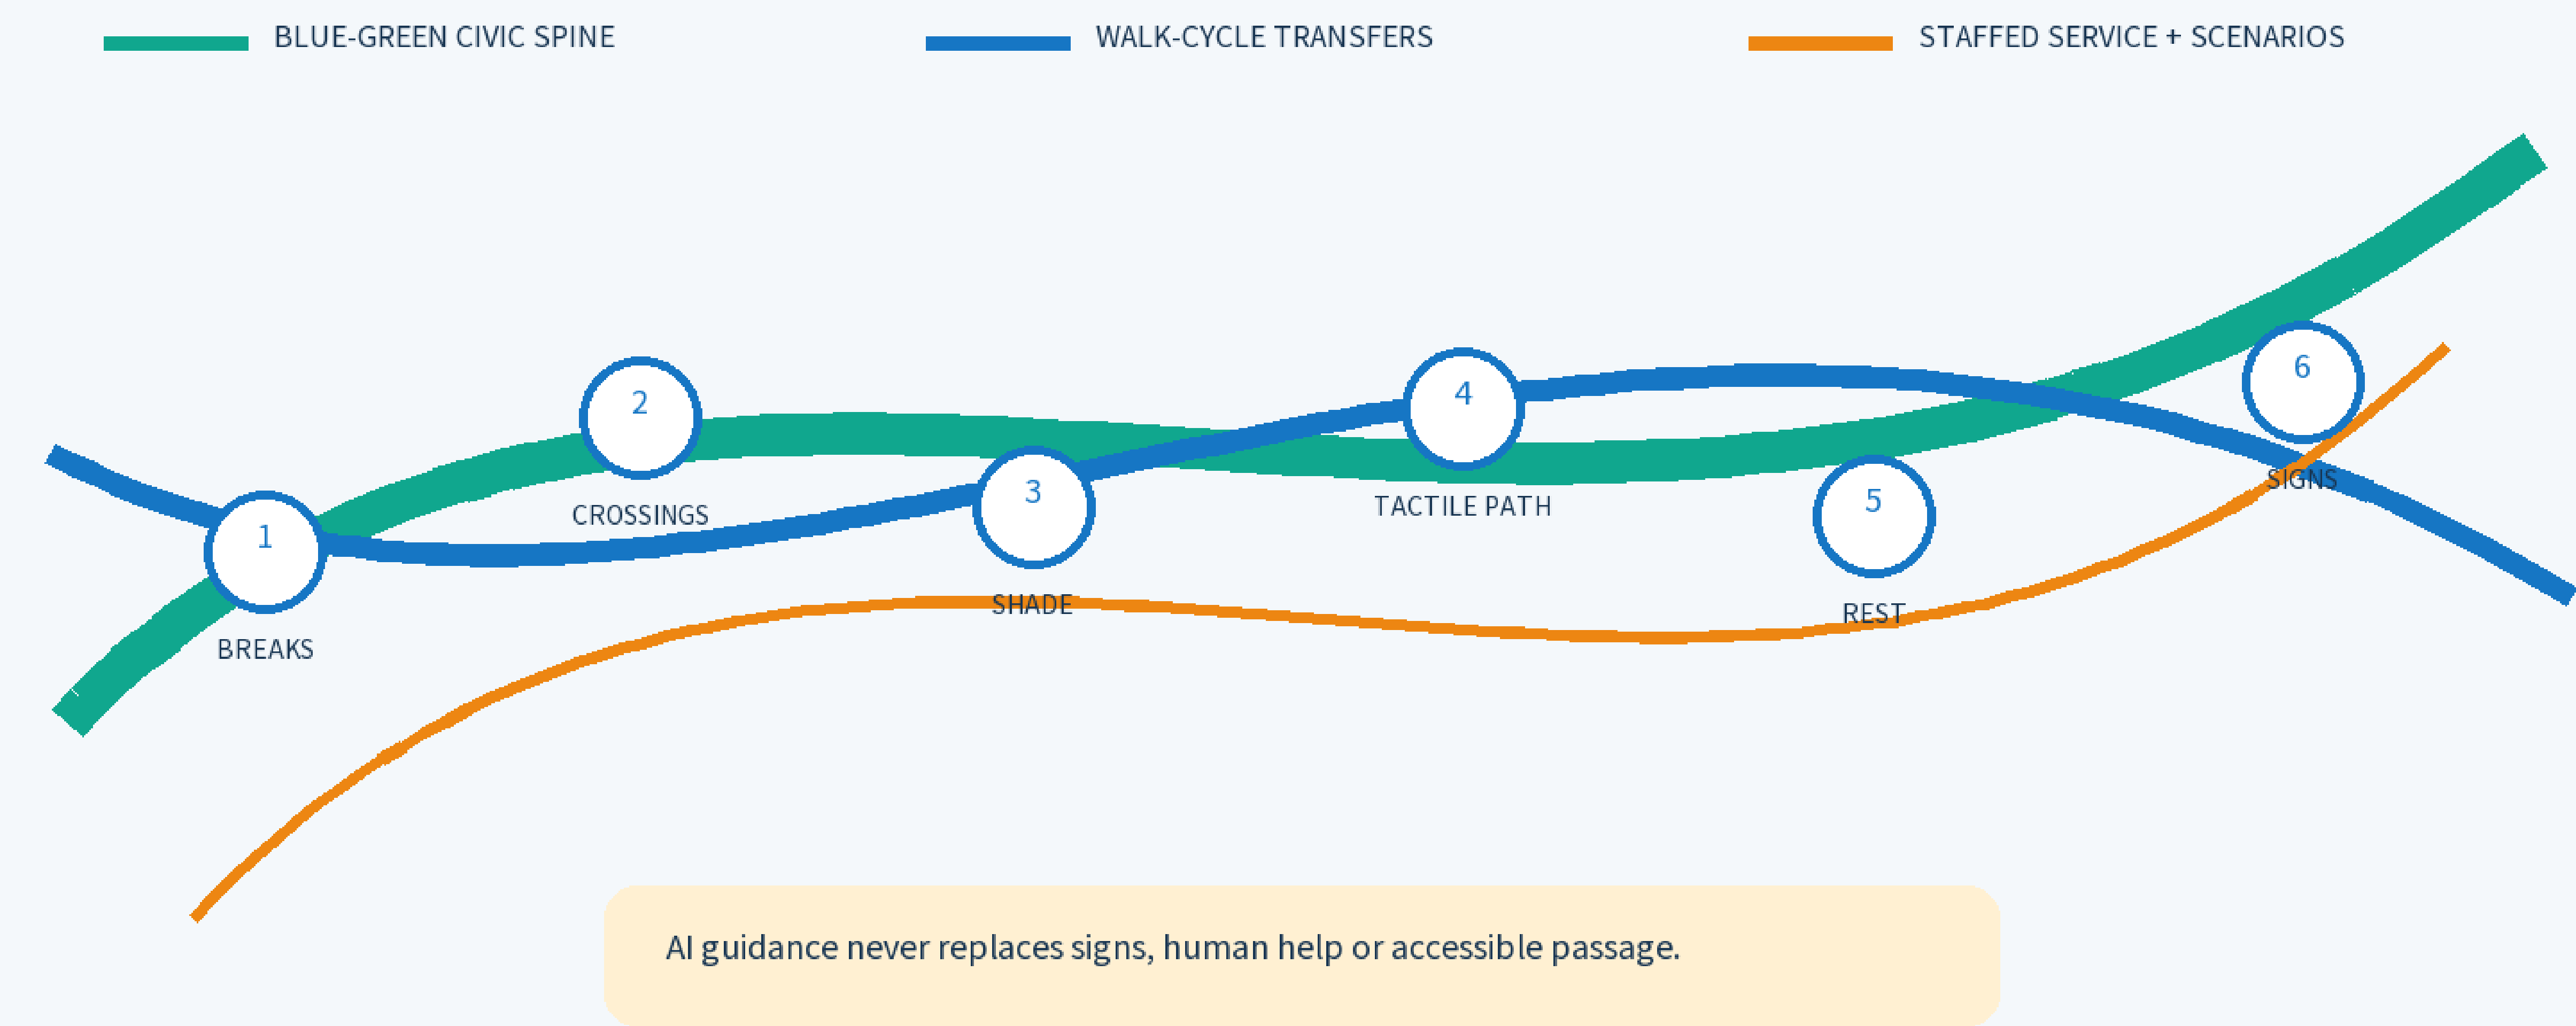

Heritage park and blue-green public space

A useful public realm without screens, accounts or sensors

JING-ZHANG CIVIC LOOP

Continuous passage before smart equipment

Walking, cycling, blue-green space and staffed service carry ten scenario families

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

Civic spine

walking • cycling • shade • rest

Low impact

movable interpretation before heritage GIS

Human fallback

paper route • staffed help • stop • appeal

No heritage polygon or engineering siting is invented.

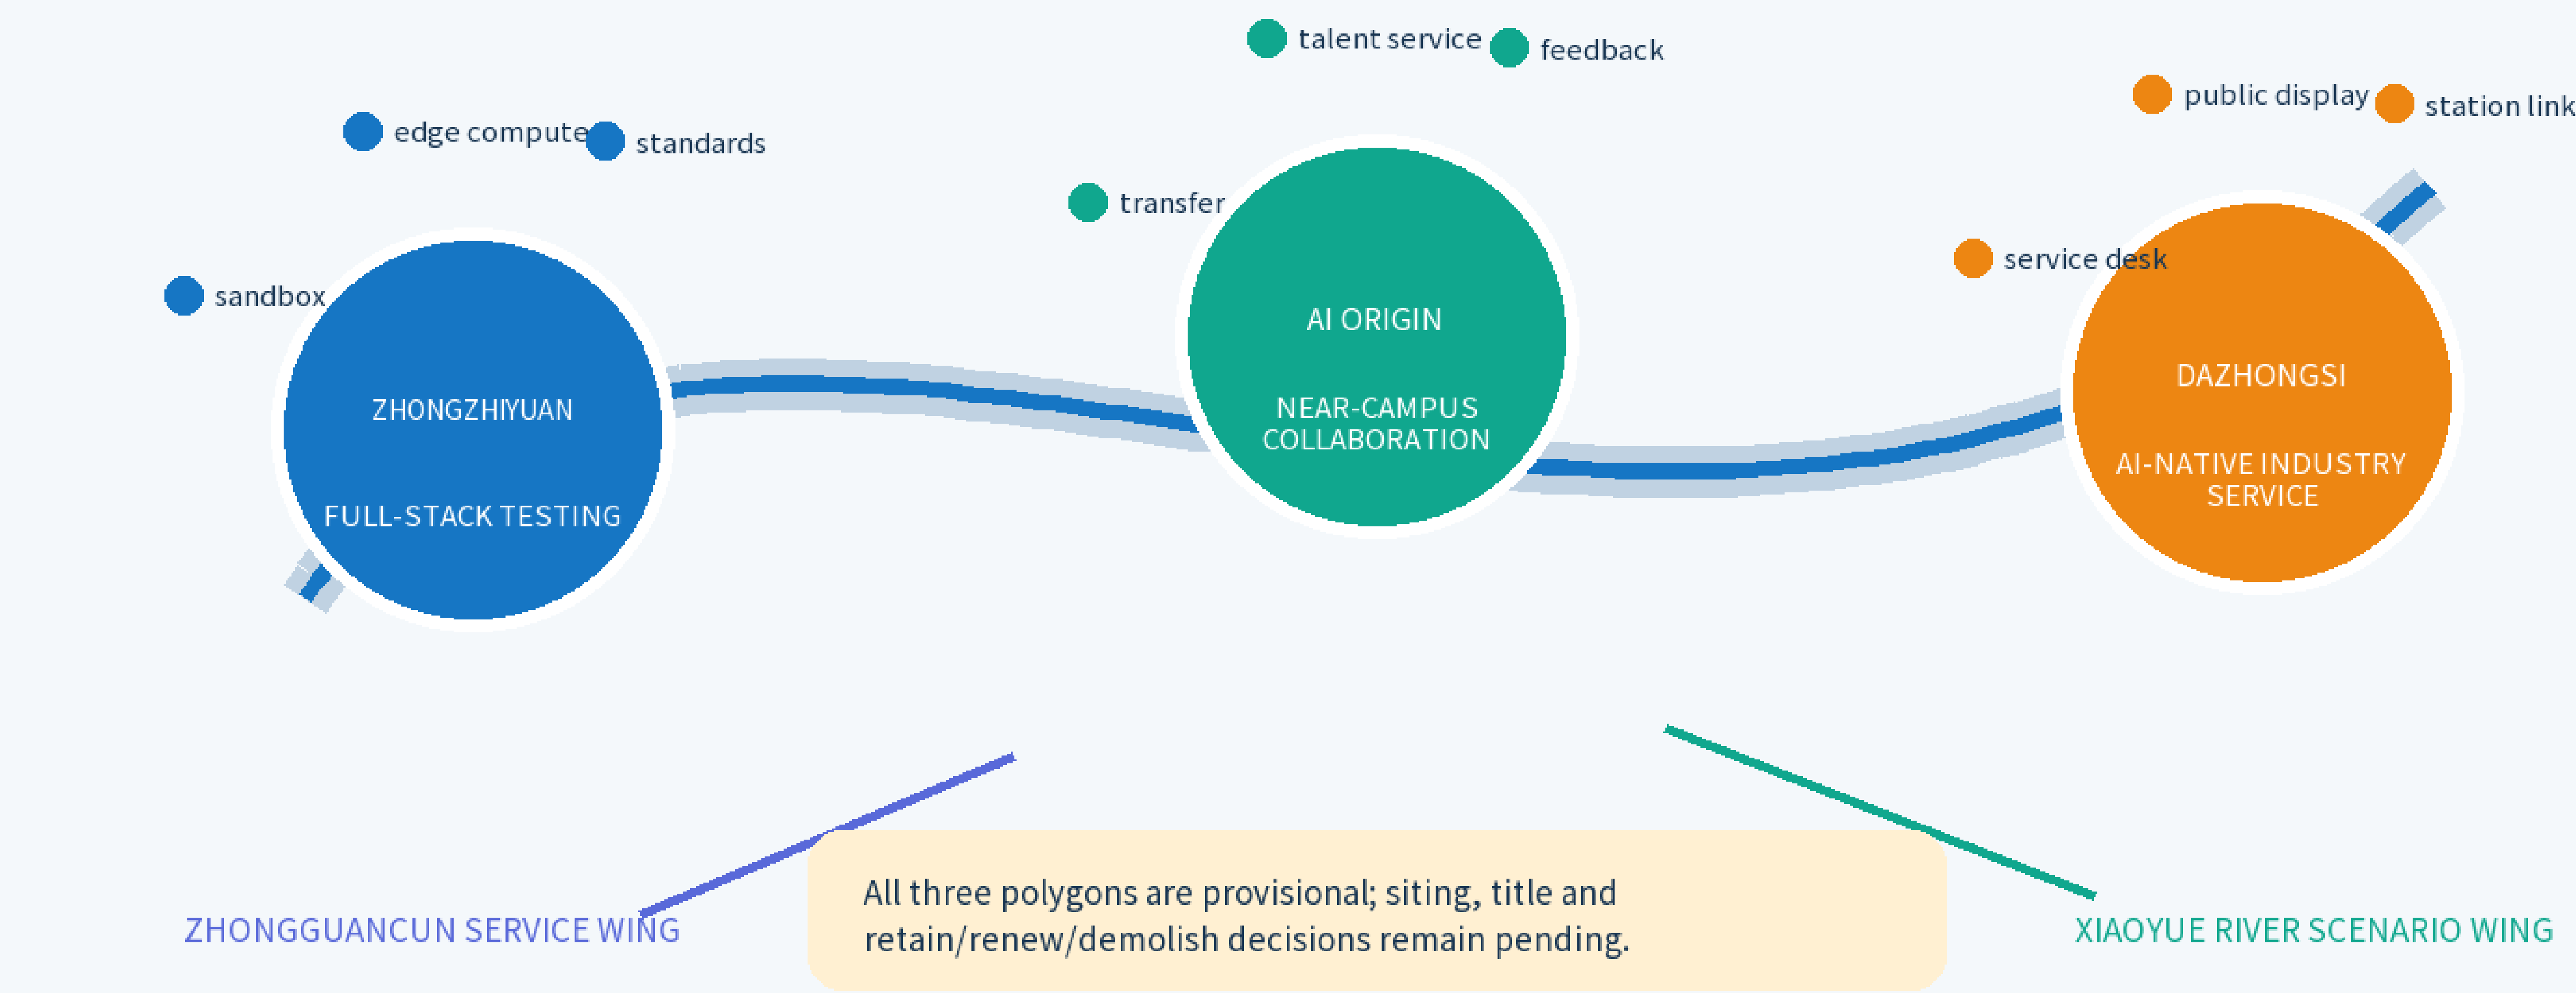

Three key areas

Three roles, one accountable learning loop

JING-ZHANG CIVIC LOOP

Three distinct nodes, not three copied campuses

Testing, collaboration and industry service form a learning loop through two wings and one civic spine

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

Zhongzhiyuan

controlled trustworthy testing

AI Origin

open near-campus collaboration

Dazhongsi

industry-facing civic service

All key-area geometry remains provisional.

AI scenarios and long-term operation

Ten scenarios, five personas, three controlled validations

10 scenarios

- Open-source release hall
- Trustworthy test sandbox
- Edge-compute station
- AI slow-mobility guide
- Heritage oral-history workshop
- Qinghe low-carbon learning corridor
- Research-transfer station
- Data-governance living room
- Community-service sample street
- Global AI civic route

5 personas

- Open-source developer
- Start-up team
- Neighbouring resident
- University community
- Enterprise and international visitor

3 validations

- T1 trustworthy models and edge inference
- T2 accessible public-space guidance
- T3 data governance and human review

Operation

Problem Season • Open-source Season • City Beta • Proof Week

Every service keeps no-account access, human review, stop, appeal and retirement.

Metrics and compliance response

Evidence before claim; official trusted review still pending

JING-ZHANG CIVIC LOOP

Every metric returns to evidence and review

Fact, design response, stop condition and recalculation path must stay connected

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

11,412,825 m²

provisional area

12.34%

provisional green

7.33%

provisional public space

23 + 15

mandatory tasks + depth items

Contributor self-check: four gates PASS. This is not official approval; formal GIS and professional controls remain pending.
