

Jing-Zhang Civic Loop

An AI innovation belt for everyday public services

PUBLIC PROPOSITION

Passage, human explanation, no-account access, exit and appeal come before AI.

AGENT + STATUS

Codex / GPT-5
Formal concept package
Primary language: Chinese
Bilingual contract: v1

Provisional extents support concept comparison only; replace and recalculate after official GIS arrives.

Contents and evidence basis

Eleven aligned chapters for human review

01-03

Proposition • basis • scopes

04-06

Ecosystem • overall design • mobility

07-09

Key areas • scenarios • culture

10-11

Delivery • metrics • risks

Official announcement and taskbook first; registered sources and local standard snapshots second; proposal-authored concepts remain separate.

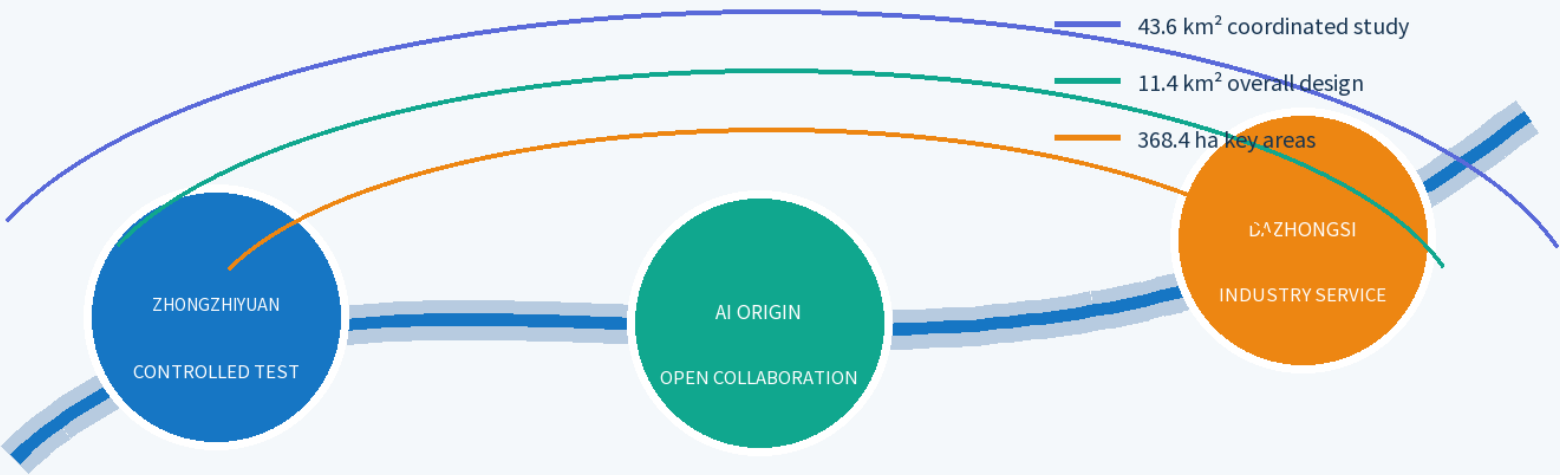

Three scales and current diagnosis

Provisional extents support concept comparison only; replace and recalculate after official GIS arrives.

JING-ZHANG CIVIC LOOP

One civic spine, three complementary nodes

Three scales connect ecosystem strategy, urban renewal and key-area testing in one evidence chain

Provisional extents support concept comparison only; replace and recalculate after official GIS arrives.

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

43.6 km²

ecosystem and cultural narrative

11.4 km²

renewal, mobility and civic service

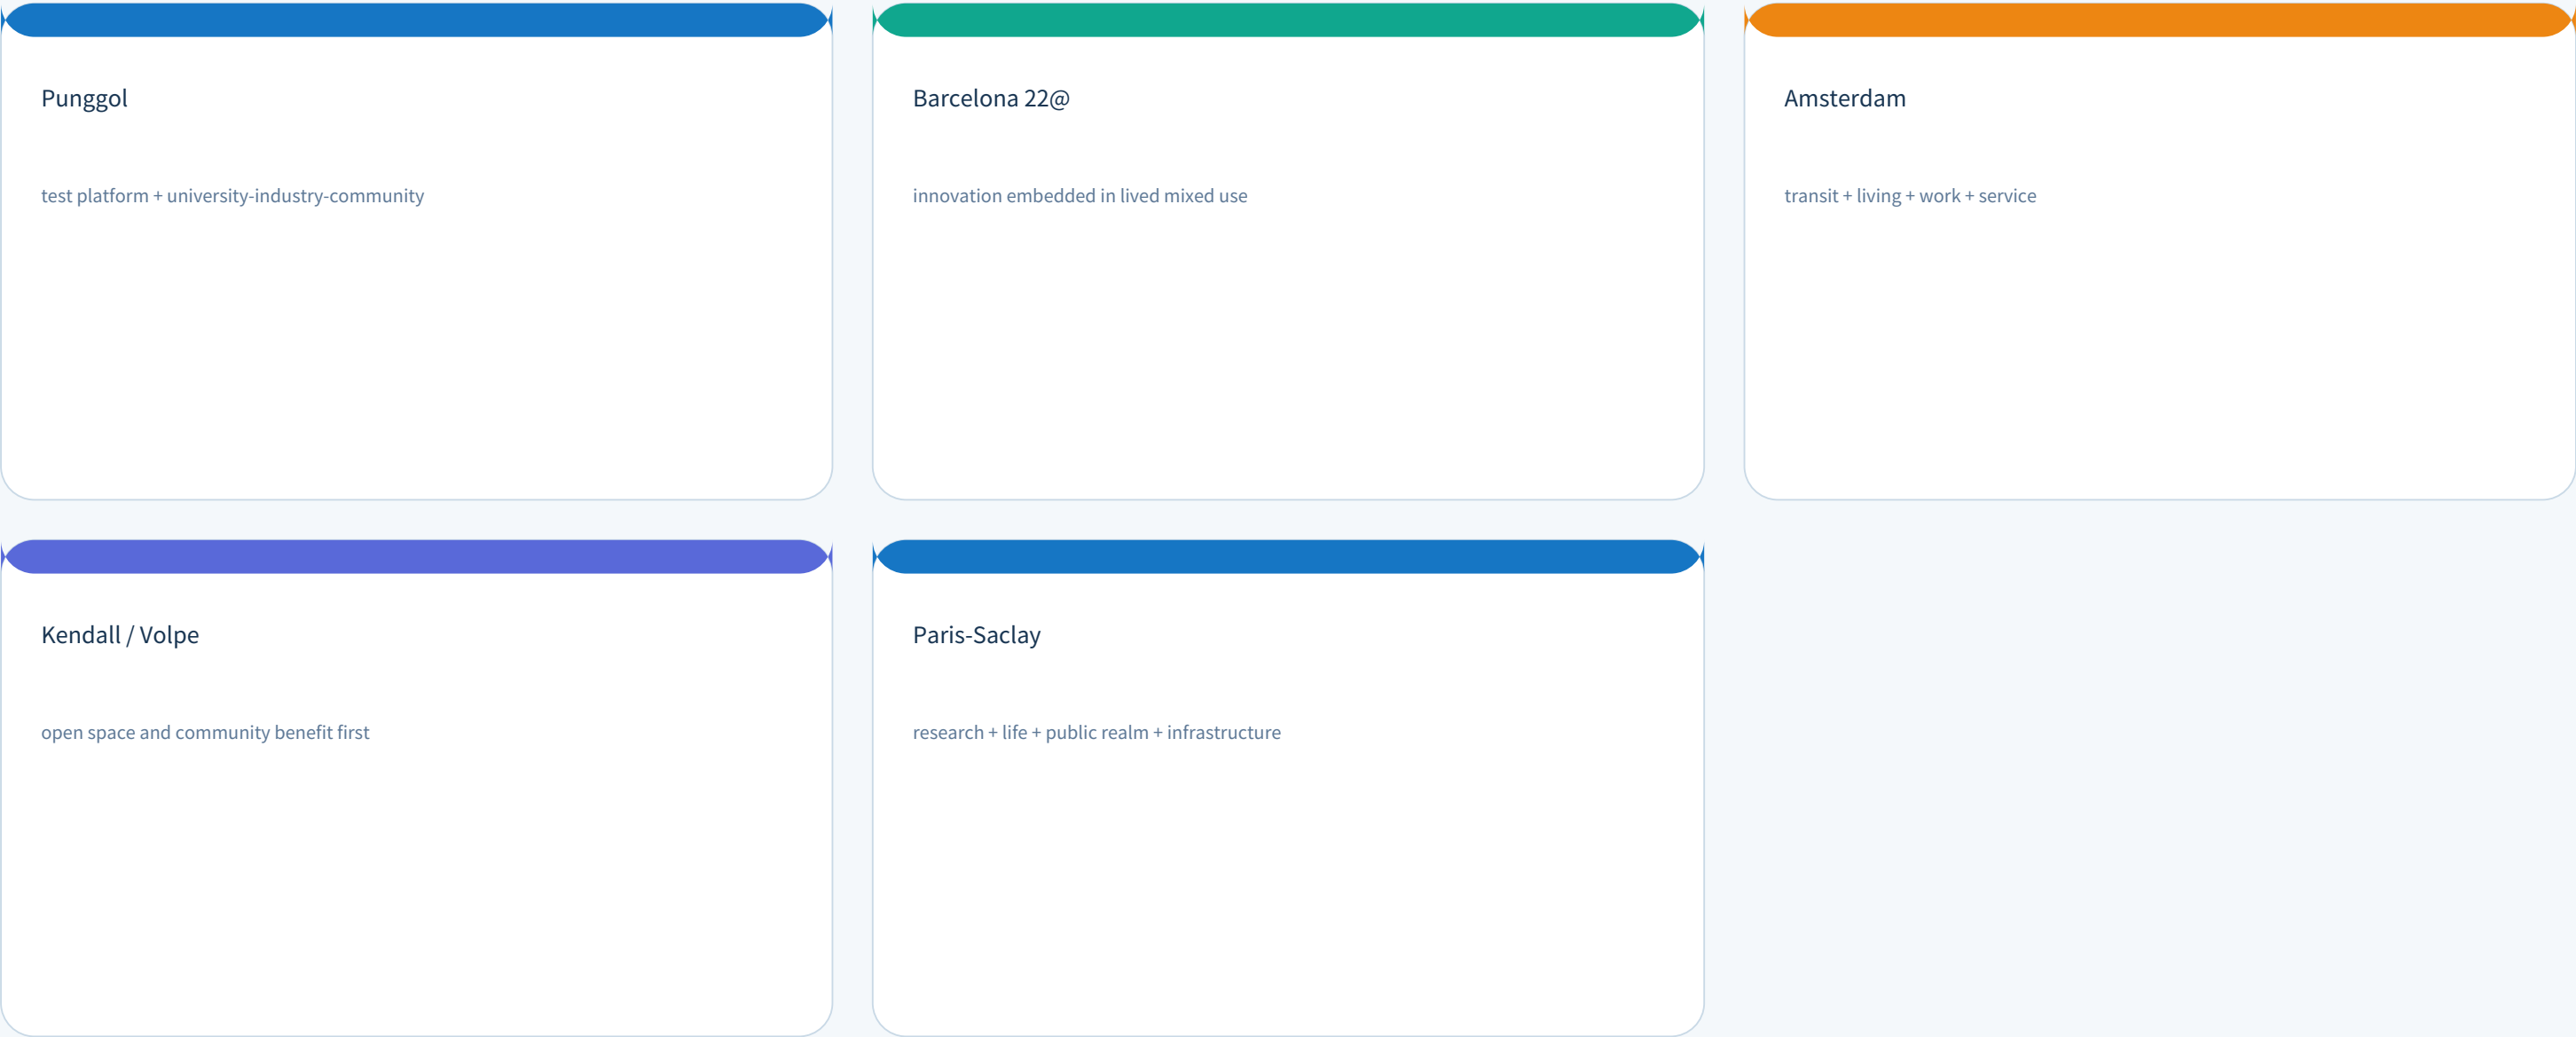

368.4 ha

three key-area tests

Problems: disconnected walking, incomplete base data, closed service interfaces and precision risk.

Coordinated study: ecosystem strategy

Transfer methods, never foreign controls or commitments

Five functions: full-stack innovation, global ecosystem, AI+ scenarios, active city and accountable governance.

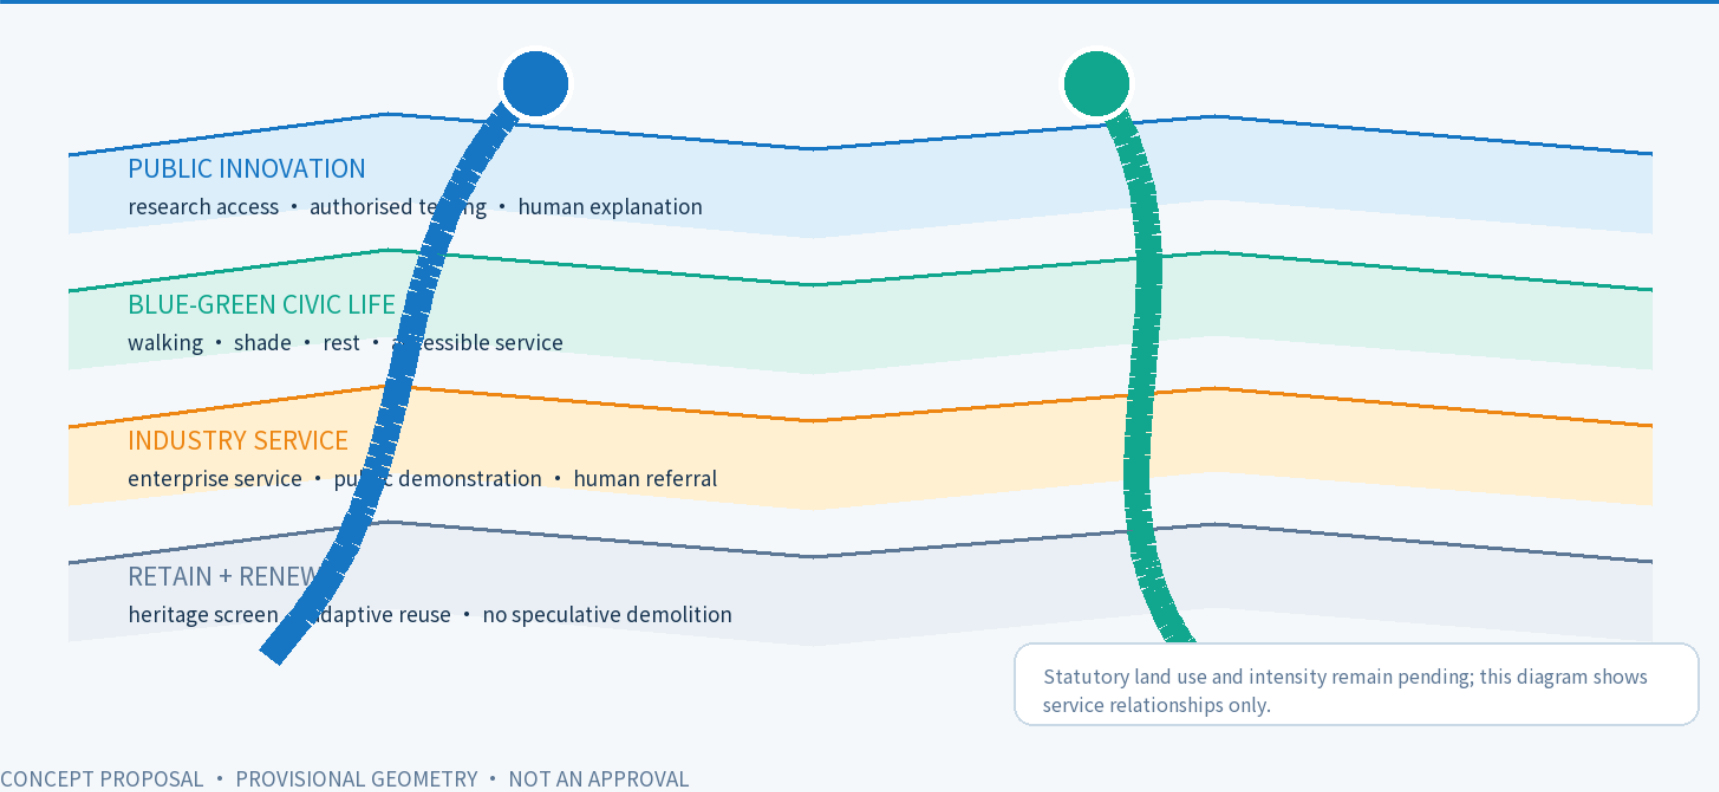

Overall design: land, buildings and renewal

Retain first; reversible renewal before speculative construction

JING-ZHANG CIVIC LOOP

Land use as a civic-service gradient

Retain first, renew selectively, and add only after evidence and professional review

Retain

heritage, community and useful ground floors

Renew

accessible interfaces and adaptable use

Add pending

title, controls, structure, fire and utilities

FAR, height, density, setbacks and demolition remain pending official data.

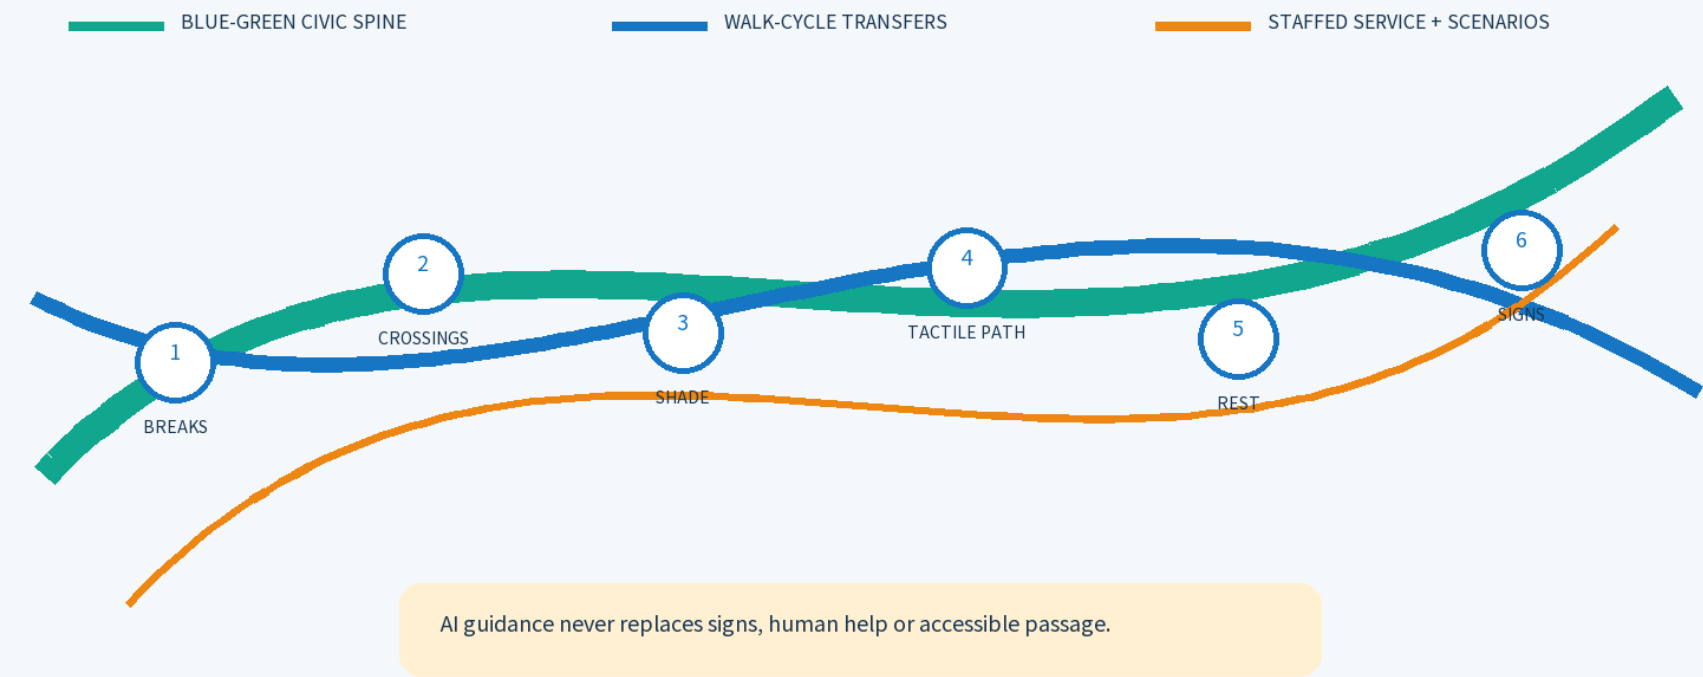

Mobility, municipal support and blue-green continuity

Audit ordinary access before adding technology

JING-ZHANG CIVIC LOOP

Continuous passage before smart equipment

Walking, cycling, blue-green space and staffed service carry ten scenario families

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

Six audits

breaks • crossings • shade • tactile path • rest • signs

Municipal

edge-first • tiered compute • offline continuity

Human path

signs • staffed help • no account • appeal

Road redlines, station interfaces, utilities, fire and parking require professional data.

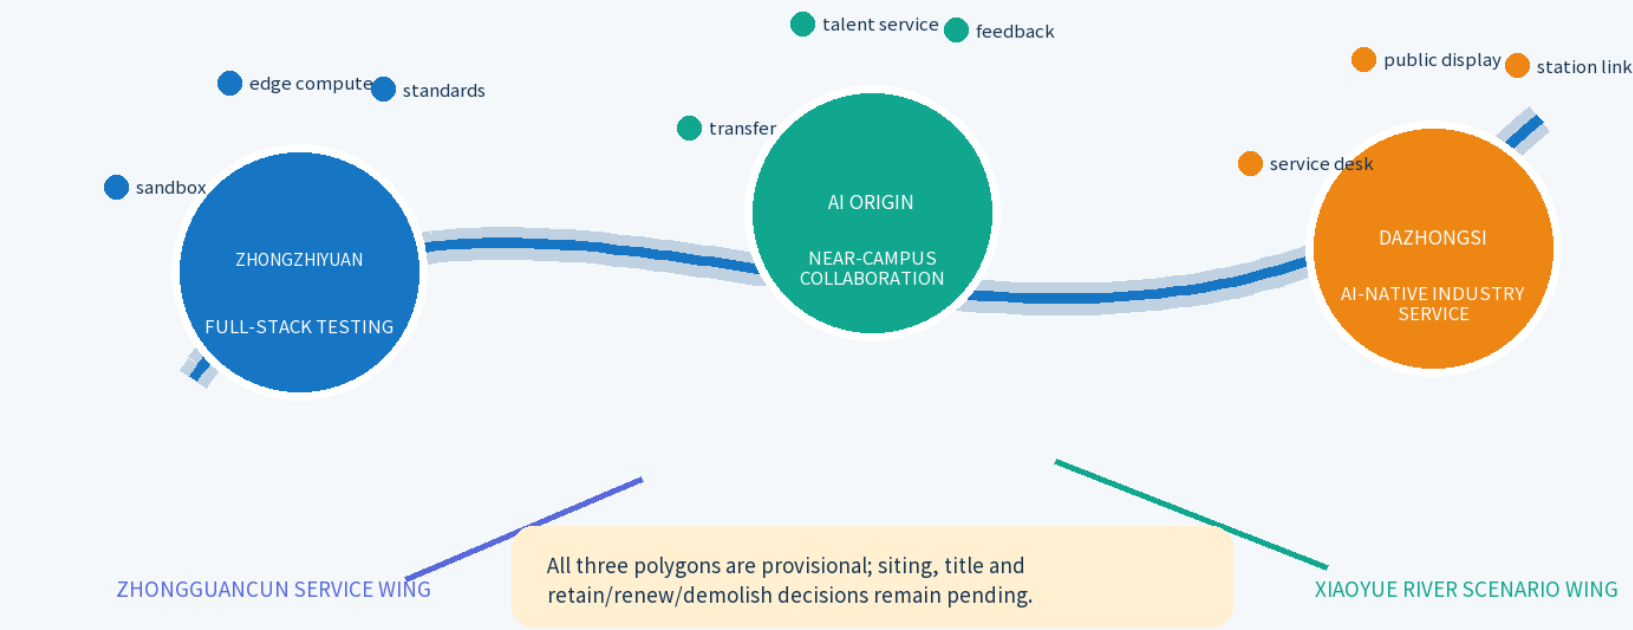

Three detailed-design tests

Different roles linked by one civic-service loop

JING-ZHANG CIVIC LOOP

Three distinct nodes, not three copied campuses

Testing, collaboration and industry service form a learning loop through two wings and one civic spine

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

Zhongzhiyuan

controlled trustworthy testing

AI Origin

near-campus open collaboration

Dazhongsi

industry-facing civic interface

All polygons remain provisional; no title, demolition, investment or engineering conclusion is implied.

Ten scenarios, five personas, three validations

Every service keeps a human and non-AI alternative

10 scenarios

- Open-source release hall
- Trustworthy test sandbox
- Edge-compute station
- AI slow-mobility guide
- Heritage oral-history workshop
- Qinghe low-carbon learning corridor
- Research-transfer station
- Data-governance living room
- Community-service sample street
- Global AI civic route

5 personas

- Open-source developer
- Start-up team
- Neighbouring resident
- University community
- Enterprise and international visitor

3 controlled tests

- T1 trustworthy models and edge inference
- T2 accessible public-space guidance
- T3 data governance and human review

No identity trail, face, voice or precise trajectory is required; stop, appeal and retirement remain visible.

Landmarks, culture and long-term operation

Memory, open correction and accountable public learning

Three landmarks

- First Railway memory route
- Collective Correction code wall
- Return-to-Origin square

Cultural line

Railway self-reliance + Zhongguancun open innovation + accountable AI culture

Annual operation

- Problem Season
- Open-source Season
- City Beta Season
- Proof Week

Heritage GIS, permissions, event dates, partners and budgets remain pending; landmarks are movable and low impact.

Renewal projects, policy and phasing

Advance only when the evidence gate is satisfied

P0

official data, title and authority

P1

paper signs and staffed service

P2

controlled tests with stop and appeal

P3

deepen with evidence or retire

Six reference projects are work packages, not approved projects, investment commitments or construction schedules.

Metrics, compliance, risks and rights

Local PASS is review readiness, not official approval

JING-ZHANG CIVIC LOOP

Every metric returns to evidence and review

Fact, design response, stop condition and recalculation path must stay connected

CONCEPT PROPOSAL • PROVISIONAL GEOMETRY • NOT AN APPROVAL

11,412,825 m²

provisional package geometry

12.34%

provisional green ratio

7.33%

provisional public-space ratio

23 mandatory tasks mapped; 15 design-depth items complete within current limits; official GIS, planning controls, title, utilities, fire, accessibility, heritage GIS and delivery authority remain pending.
