

Jing-Zhang Co-Lab Belt /

A provisional design reading derived from the same GeoJSON layers

LEGEND

- land use
- blue-green
- public nodes
- buildings
- mobility

Conceptual evidence layer; provisional geometry is not an official redline or approval basis.

Land-use structure / one spine, three stations

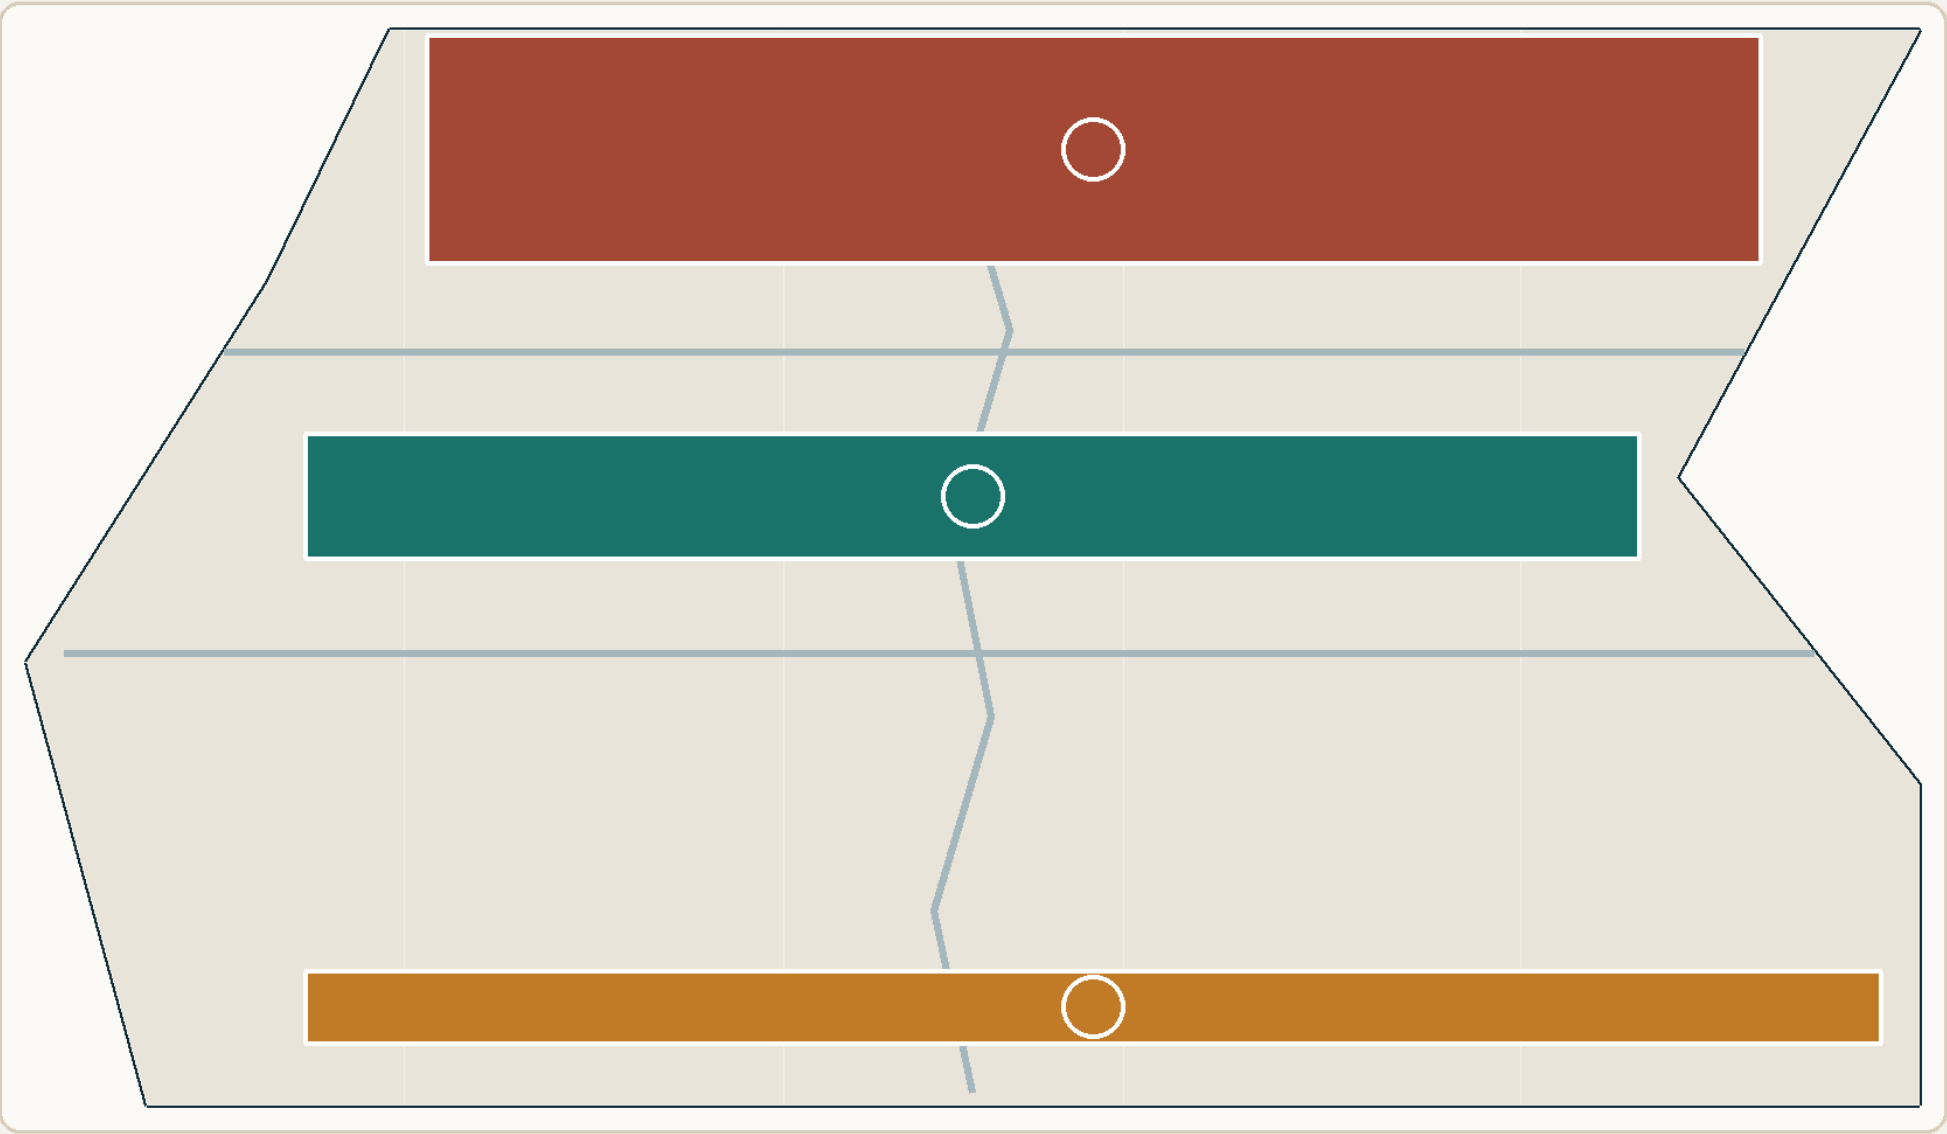

Five adjacent concept polygons cover the provisional site without gaps

Conceptual evidence layer; provisional geometry is not an official redline or approval basis.

Three key areas / differentiated stations

Provisional areas guide function and operation; they are not parcels or redlines

provisional

Conceptual evidence layer; provisional geometry is not an official redline or approval basis.

Mobility spine and blue-green network

North-south heritage route plus east-west stitching branches

LEGEND

- north-south heritage spine
- east-west stitching branches
- green and public nodes

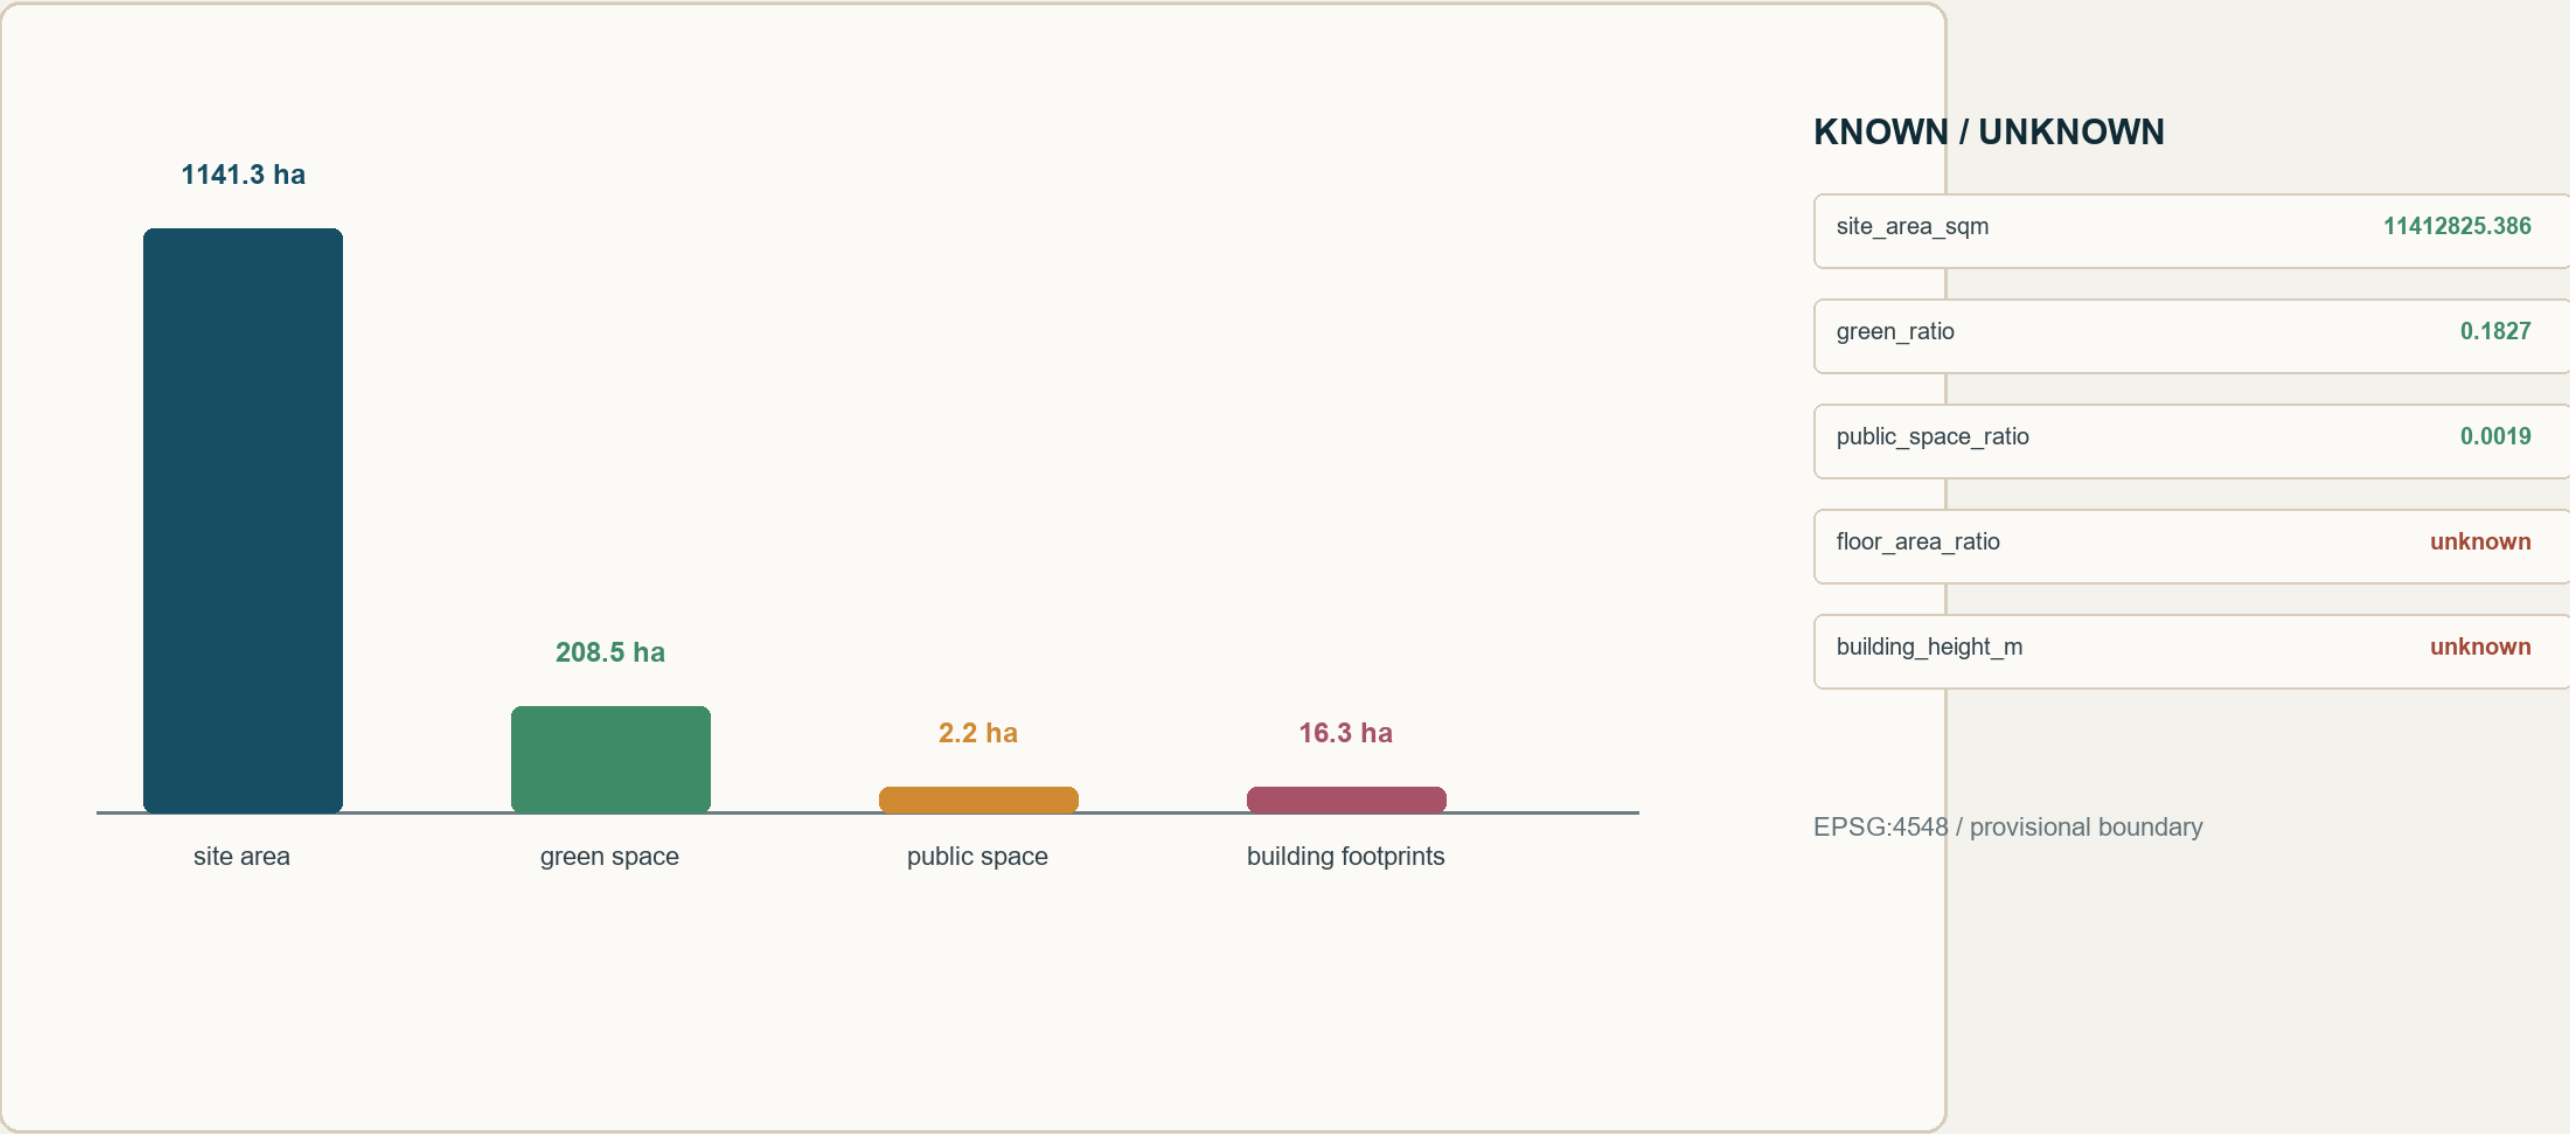

18 m discussion width

replaceable assumption

Conceptual evidence layer; provisional geometry is not an official redline or approval basis.

Metrics and evidence chain

Known values are recomputed in EPSG:4548; controls remain explicit unknowns

Conceptual evidence layer; provisional geometry is not an official redline or approval basis.
