

THE NEXT RUN

VERIFY · LEARN · EARN

AI innovation should first help people already at work keep up.

NOT A TRAINING CENTRE, BUT URBAN CAREER-TRANSITION INFRASTRUCTURE

Before entering public space, every AI project files a Career Return Ticket covering occupation, shift, place, human owner and exit. One spine keeps ordinary movement; three yards verify, teach and provide paid practice; six gates link transit, workplaces, campuses, communities and ground floors.

CAREER RETURN TICKET

- 01 Pay / public return
- 02 Named human owner
- 03 Equivalent AI-off route
- 04 Minimisation & retention
- 05 Stop · appeal · restore

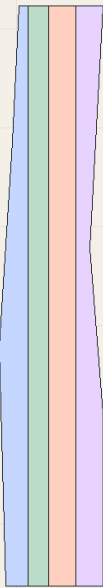

02 / STRUCTURE

PROVISIONAL GEOMETRY · CONCEPT ONLY · RECOMPUTE WITH OFFICIAL DATA

LAND USE & SPATIAL FRAMEWORK

Complete partition of the provisional polygon; concept names do not replace statutory classes

- Research / verify
- Park green
- Business / earn
- Community service

- ONE SPINE**
ordinary movement, static wayfinding, rest and AI-off route
- THREE YARDS**
VERIFY safety · LEARN openly · EARN through paid practice
- SIX GATES**
link transit, campus, workplace, community and ground floor
- 12 STATIONS**
each has a data boundary, human owner and exit
- TWO WINGS**
technology services in; lived feedback out

03 / KEY AREAS

THREE KEY AREAS

Three urban spaces on one career-transition chain

PROVISIONAL GEOMETRY · CONCEPT ONLY · RECOMPUTE WITH OFFICIAL DATA

VERIFY

Zhongzhiyuan Skills Proving Works

synthetic faults · low-speed yard · edge interoperability · engineer release

- MINIMUM PILOT one reversible space
- HUMAN OWNER named professional
- WITH AI OFF original bench & staffed service

LEARN

AI Origin Open Learning Junction

evening shifts · accessibility QA · open release · data stewardship · care

- MINIMUM PILOT one reversible space
- HUMAN OWNER named professional
- WITH AI OFF original bench & staffed service

EARN

Dazhongsi Paid Practice Market

shop briefs · stated pay · human review · hiring appeal · global service

- MINIMUM PILOT one reversible space
- HUMAN OWNER named professional
- WITH AI OFF original bench & staffed service

LANDMARKS · FIRST WRENCH · OPEN BADGE WALL · NEXT RUN HALL

TWELVE PUBLIC OCCUPATION PATHS

SC-01 · Zhongzhiyuan Embodied-AI maintenance engineer release	SC-02 · Zhongzhiyuan Edge interoperability professional acceptance	SC-03 · Zhongzhiyuan Human handover drill shift lead	SC-04 · AI Origin Accessibility QA human finding
SC-05 · AI Origin Open release clinic licence check	SC-06 · AI Origin Data stewardship access logs	SC-07 · AI Origin Multilingual mediation speaker confirms	SC-08 · Dazhongsi Small-shop co-design owner adopts
SC-09 · Dazhongsi Paid product trial human review	SC-10 · Dazhongsi Digital curation human collation	SC-11 · six gates Night handover named post	SC-12 · corridor Jobs & courses wall no auto rejection

SC-01–03 are industrial validation; automated scores cannot decide hiring and every scenario retains human and AI-off routes.

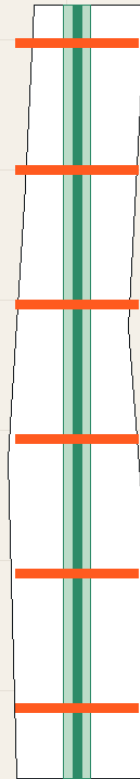

THE ORDINARY CITY WORKS FIRST

04 / MOBILITY

MOBILITY, GREEN SPINE & SKILLS GATES

The ordinary city works first; smart layers occupy removable side pockets only

PROVISIONAL GEOMETRY · CONCEPT ONLY · RECOMPUTE WITH OFFICIAL DATA

FIXED SEQUENCE AT EACH GATE

01 PAPER JOBS & COURSES

02 STAFFED ADVICE & APPEAL

03 CYCLE PARKING

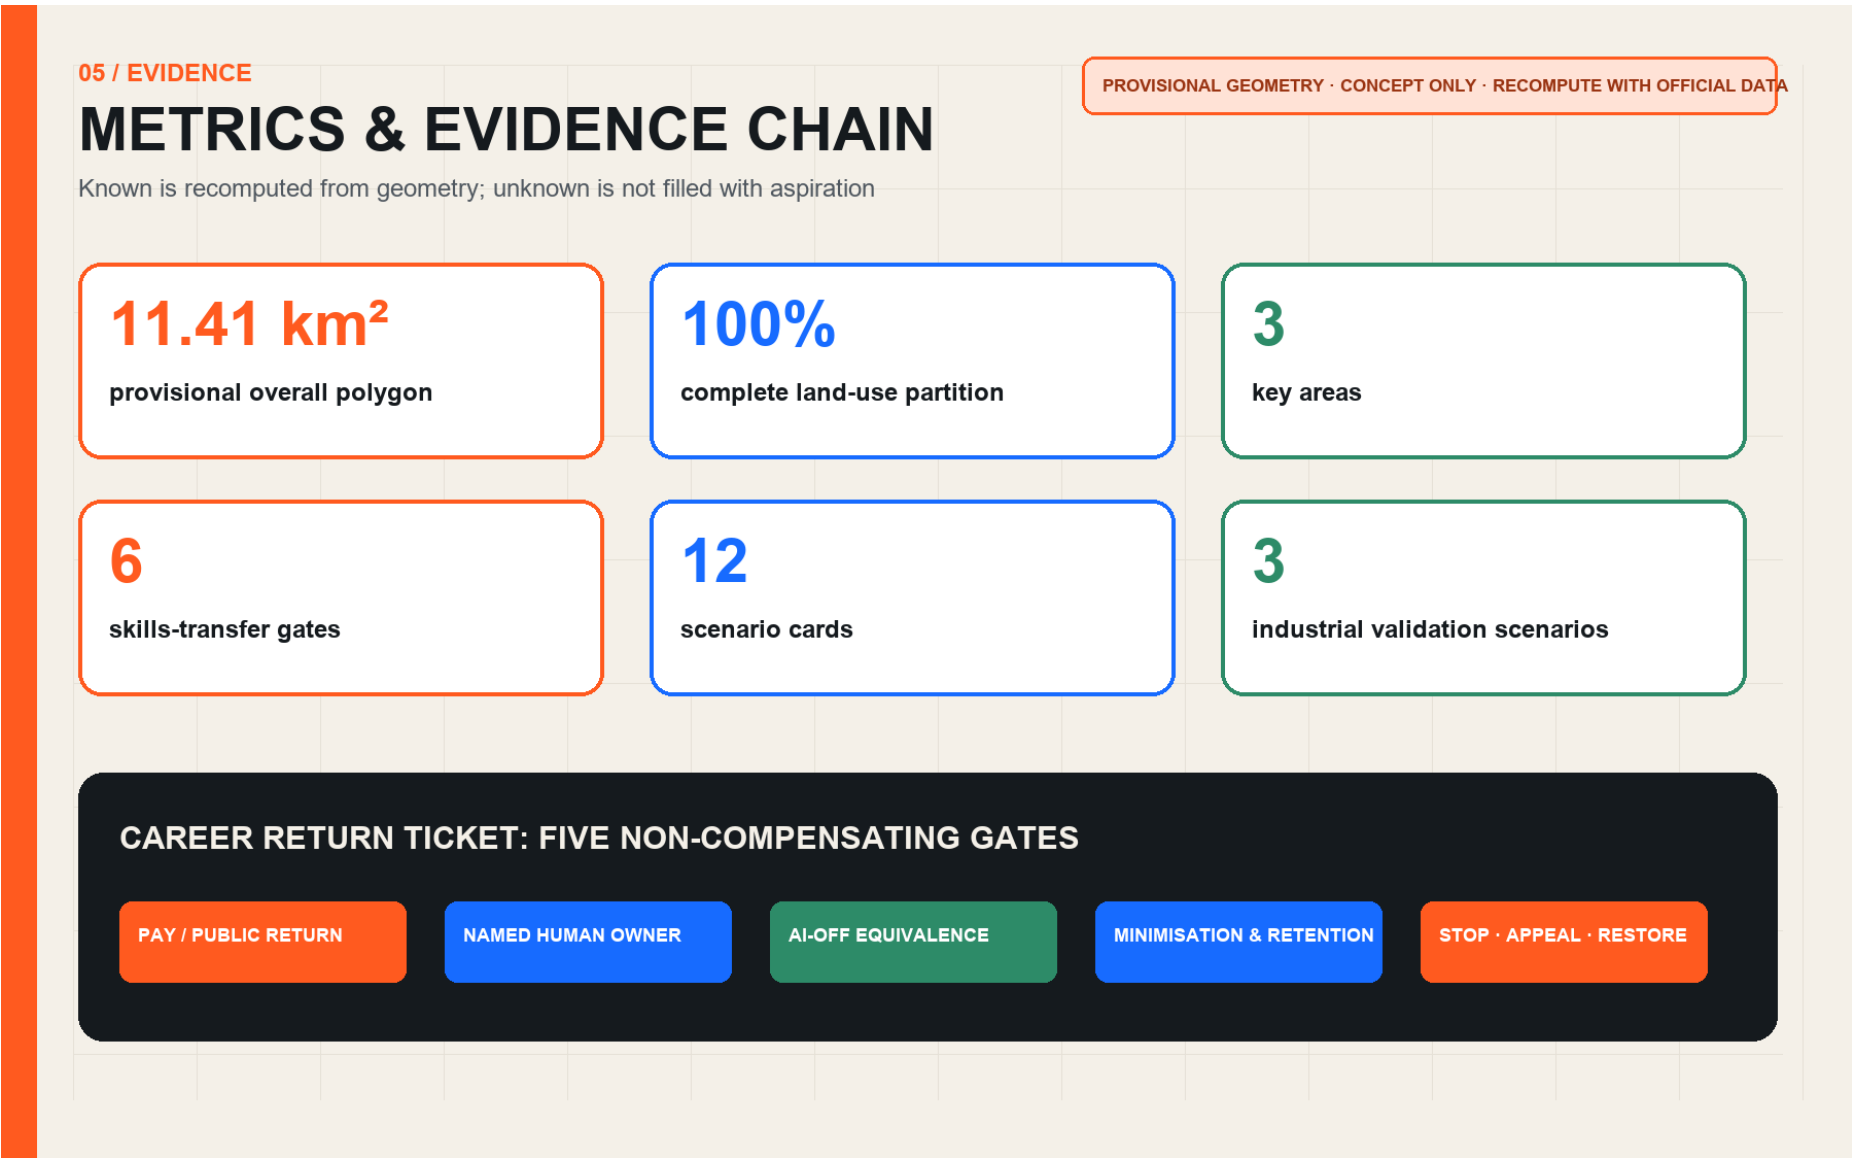

04 WATER, REST, ACCESS

05 OPTIONAL SMART NAVIGATION

No facial recognition, individual trajectory retention or automated enforcement. Paper work orders and staff continue offline.

- Continuous walking, cycling, access, static wayfinding and rest do not depend on AI.
- Smart devices occupy removable side pockets and never narrow egress or ordinary service.
- Each gate starts with paper information and staffed advice before optional smart navigation.
- Paper work orders continue offline; no facial recognition, individual tracking or automated enforcement.

PHASING: VERIFY BEFORE
MINIMUM PILOTS

00

Phase 0, 0-6 months: official data, survey, ownership and co-design

01

Phase 1, 6-18 months: one reversible minimum pilot in each key area

02

Phase 2, 18-36 months: expand to six gates and twelve stations after review

03

Phase 3: discuss permanent works only after controls, funds, operators and approvals

Full sources, rights, formulas, assumptions and checks are in the structured JSON evidence files.

Risks: provisional offset, concept misreading, unpaid labour, automated-score bias, equipment safety, rights, displacement of ordinary service and operating interruption.
