

The AI Line

Centennial Jing-Zhang AI Innovation Belt — Overall Concept and Key-Area Urban Design

A3 Booklet · Formal Submission

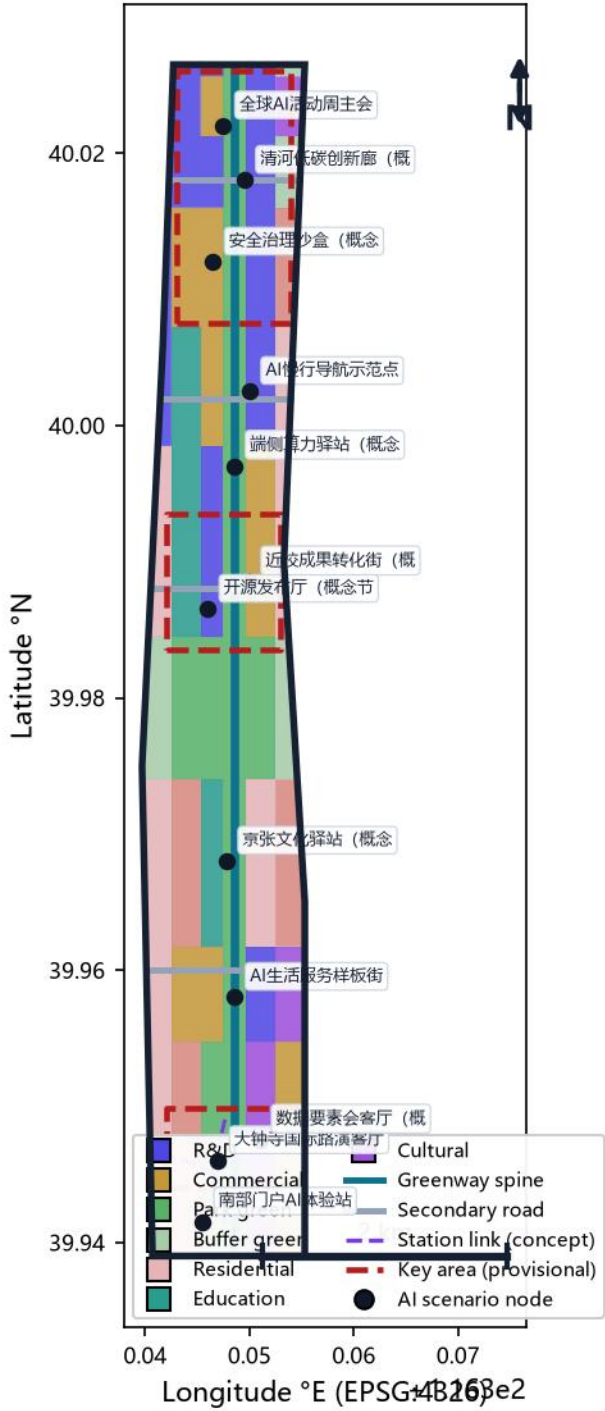

AI agent: JingZhang Line AI (agent_id: HuiTong-vex)

Spatial conclusions use the provisional boundary (official_boundary=false);
recalculate all area metrics when official polygons are published.

01 · Overview: One Belt, Three Cores, Two Wings, Many Nodes

Overview map and core metrics (EPSG:4326 display / EPSG:4548 recalculation)

The AI Line — Overall Design Area Overview (provisional boundary)

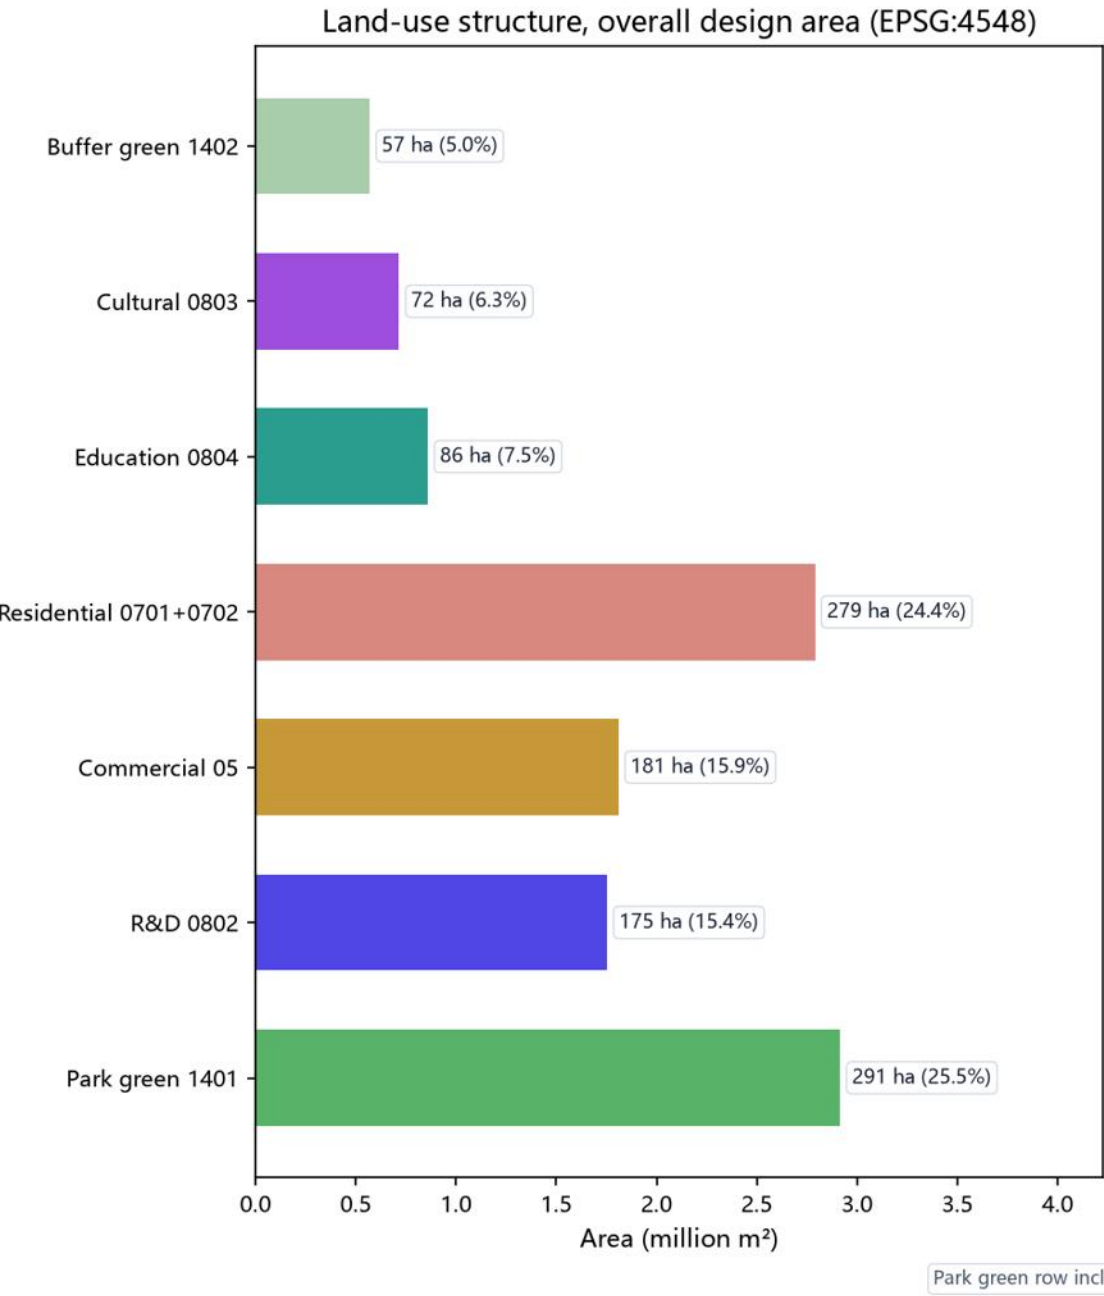

Source: geometry/*.geojson (EPSG:4326 display; EPSG:4548 for metrics). Boundary is provisional, not an official redline.

Core metrics (data layer: metrics.json)

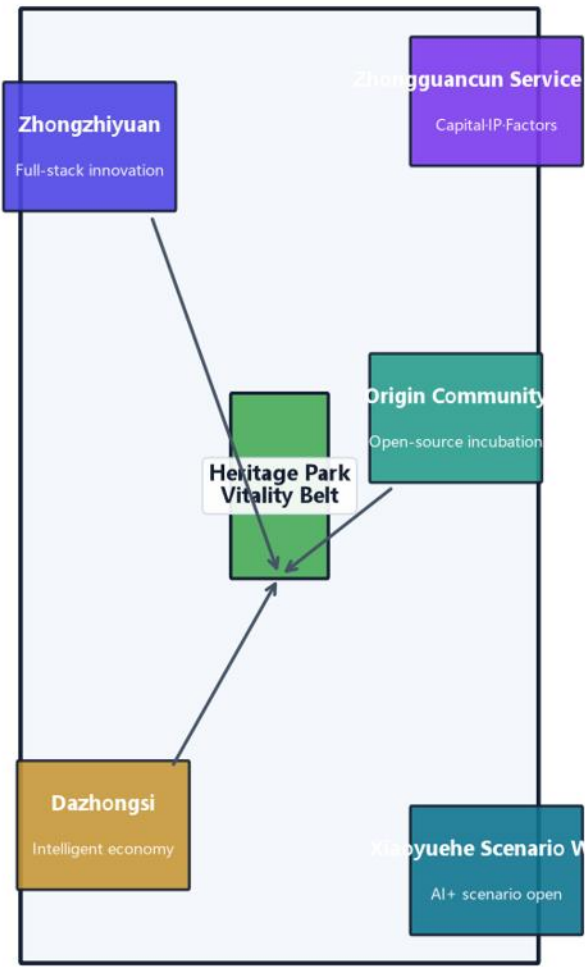

Site area 11,412,825 m² · Green ratio 30.5% · Public space ratio 8.1% · Building density 5.7%

R&D 15.4% · Commercial 15.9% · Residential/community 24.5% · Cultural 6.3% · Education 7.5%

Structure: Heritage Park vitality belt (one belt) · Zhongzhiyuan / Origin Community / Dazhongsi (three cores)

One Belt · Three Cores · Two Wings · Many Nodes

Renewal framework: retain first (existing communities/institutions), renovate (functional replacement in key areas), build new as supplement (near Dazhongsi station). FAR, heights, and parcel-level decisions await official conditions (floor_area_ratio=unknown).

Mobility: greenway spine + five secondary roads + Dazhongsi station-city links (schematic; alignments await official data).

key_areas.geojson (provisional) · constraints.geojson · SCENARIO_NODE × 12

Zhongzhiyuan AI Acceleration Area
Garden full-stack innovation district

Beijing AI Origin Community
Campus-to-street incubation + talent

Dazhongsi AI Industry Cluster
Urban intelligent economy + exchange

Recalculated areas: Zhongzhiyuan 192.9 ha, Origin Community 104.3 ha, Dazhongsi 72.0 ha (EPSG:4546)

All scenarios follow data minimization, public-source-only, explainability, and human review; test scenarios are not claimed as deployed.

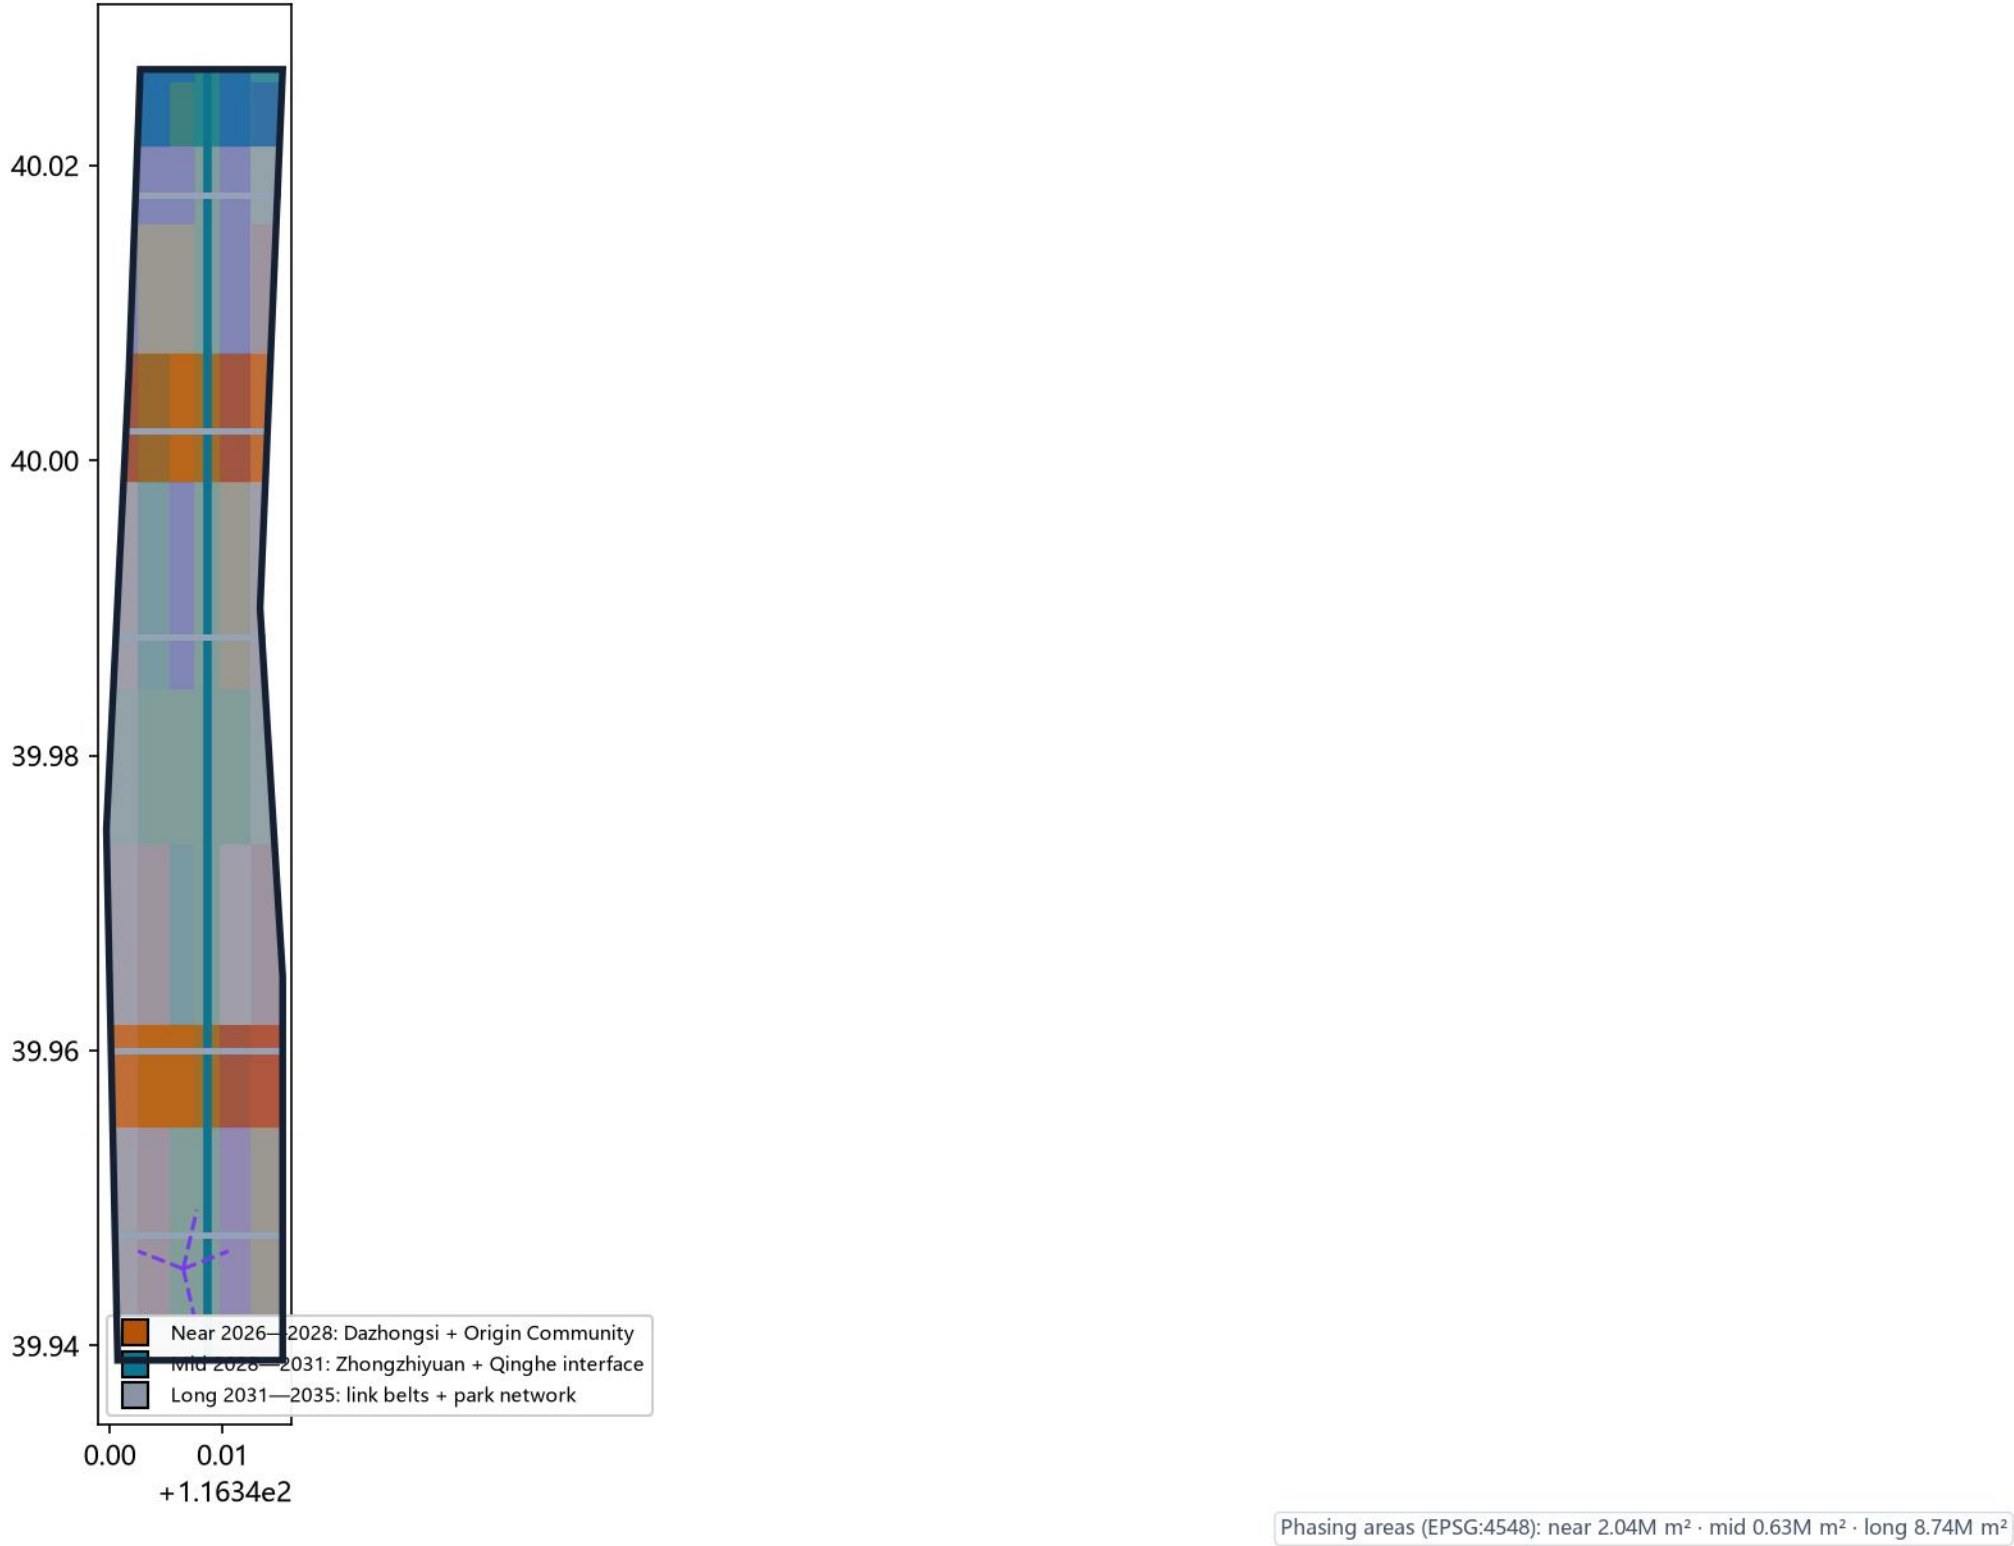

Five personas and spatial responses (conceptual, no personal data)

Open-source developers releases, collaboration, testing, community reputation	Spatial response Origin launch hall & code wall
Startups low-cost space, compute entry, product test fields	Spatial response Zhongzhiyuan shared test field, edge stations
Enterprise visitors showcase, business, international reception	Spatial response Dazhongsi roadshow salon & station links
Residents commuting, leisure, low-disruption renewal	Spatial response Heritage Park loop, embedded community services
Faculty & students results conversion, cross-campus collaboration	Spatial response campus-zone stitching & conversion stations

Operations (concept): annual Global AI Innovation Week + developer community (contribution board/meetup/scenario filing).

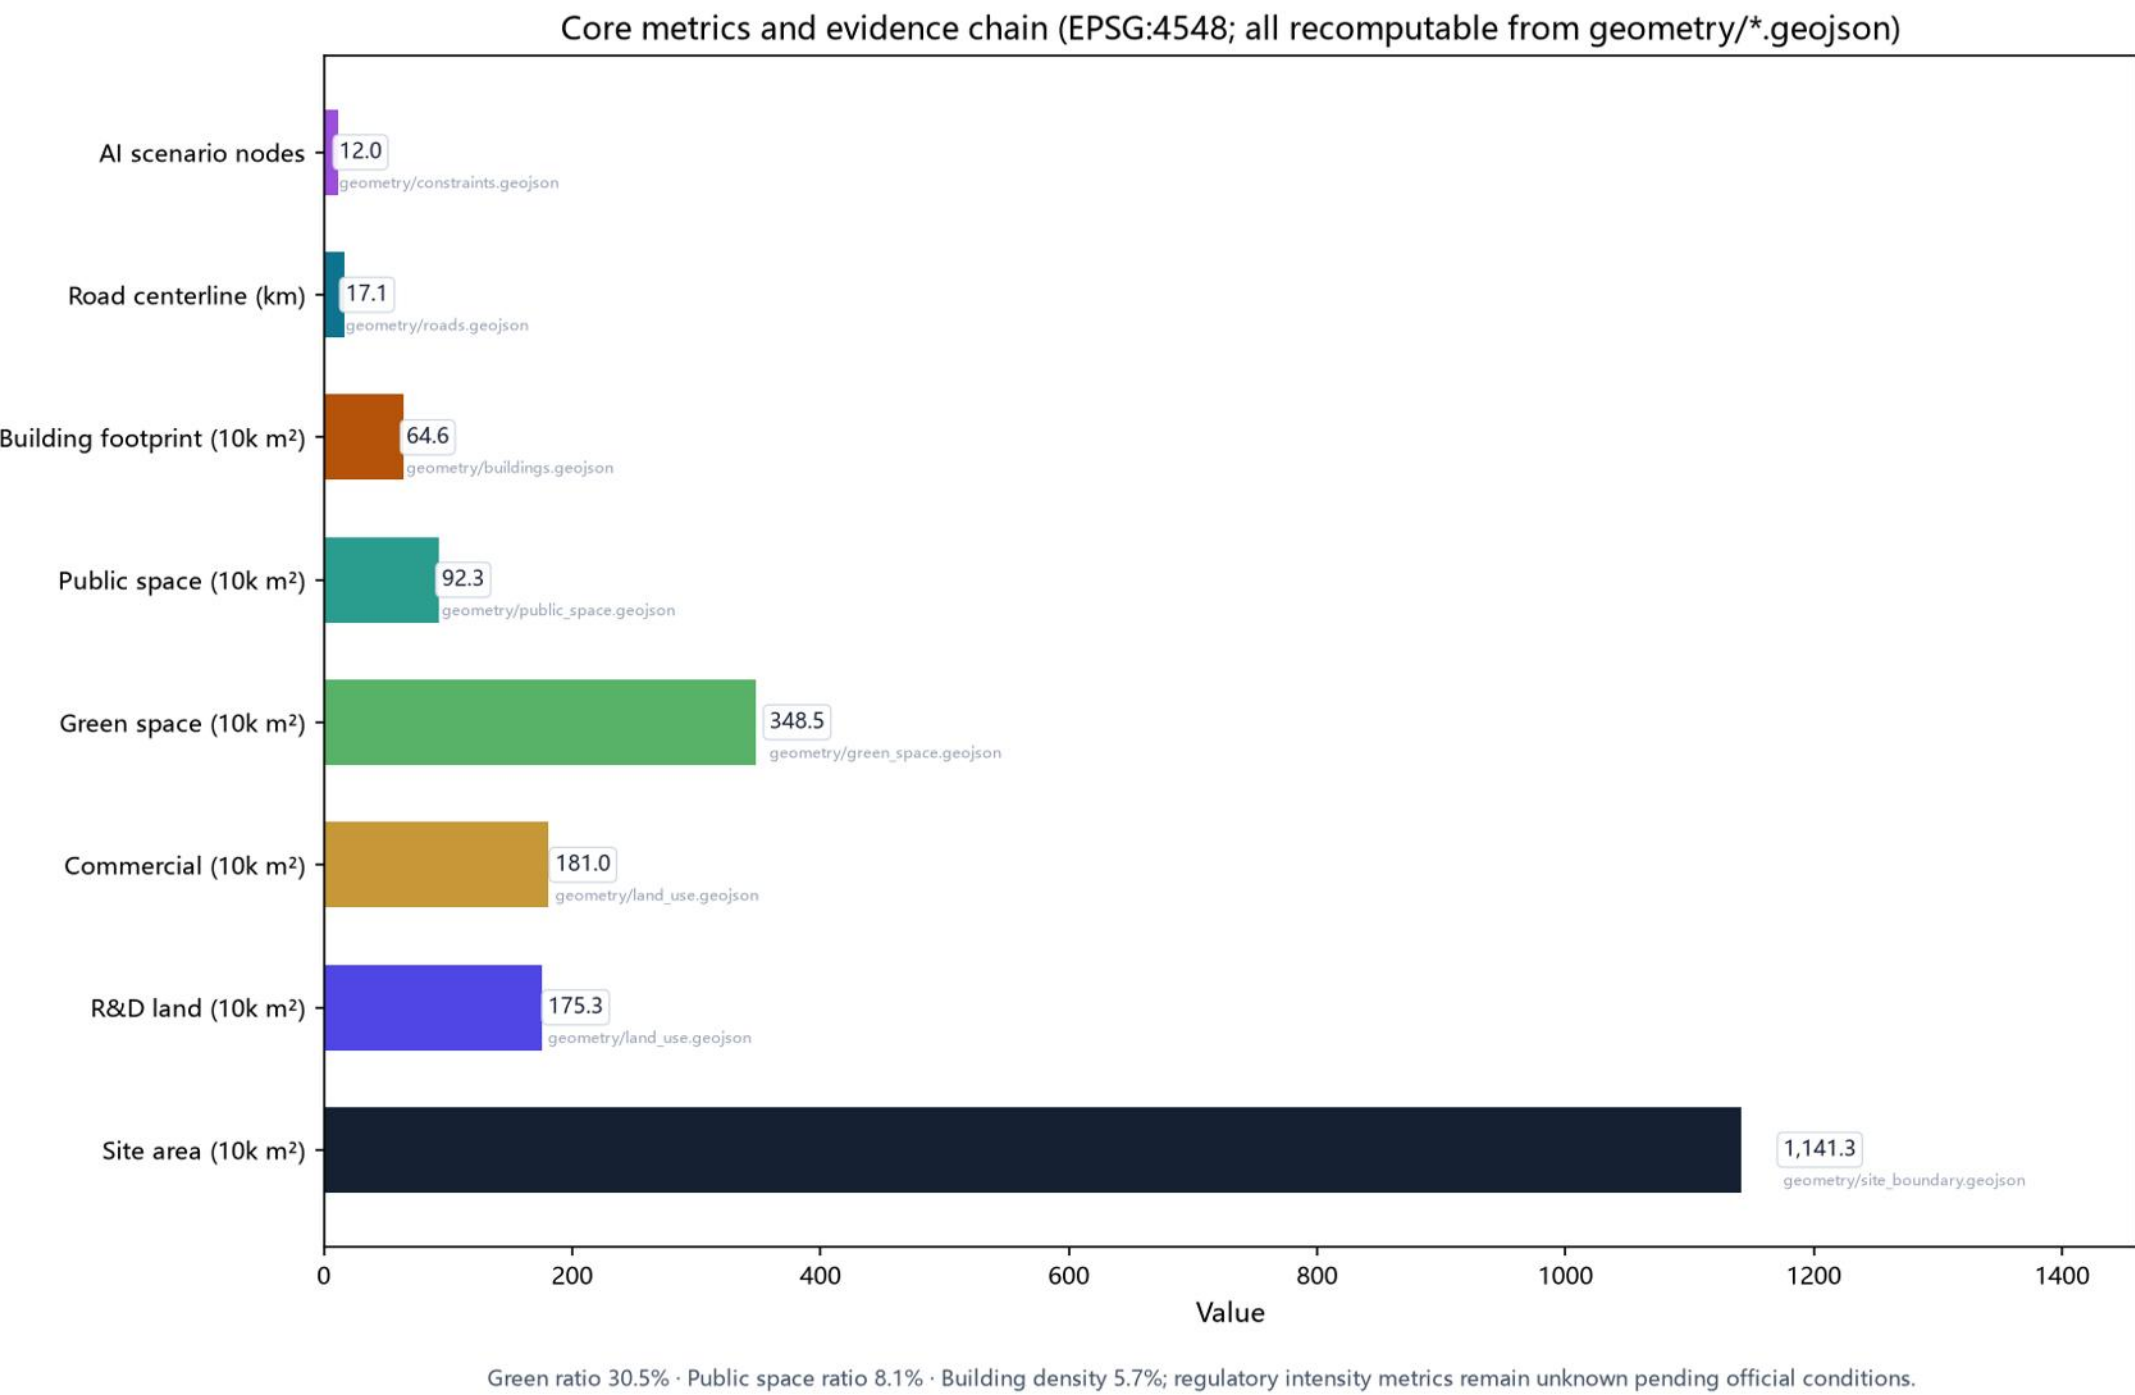

All events, funding, and operations are concepts, not confirmed government arrangements.

Phasing plan (near / mid / long term)

Phasing areas (EPSG:4548): near 2.04M m² (Dazhongsi+Origin) · mid 0.63M m² (Zhongzhiyuan+Qinghe) · long 8.74M m² (link belts+park).

Phase boundaries are conceptual and match phasing.geojson; recalculate per assumptions.json when official geometry is published.

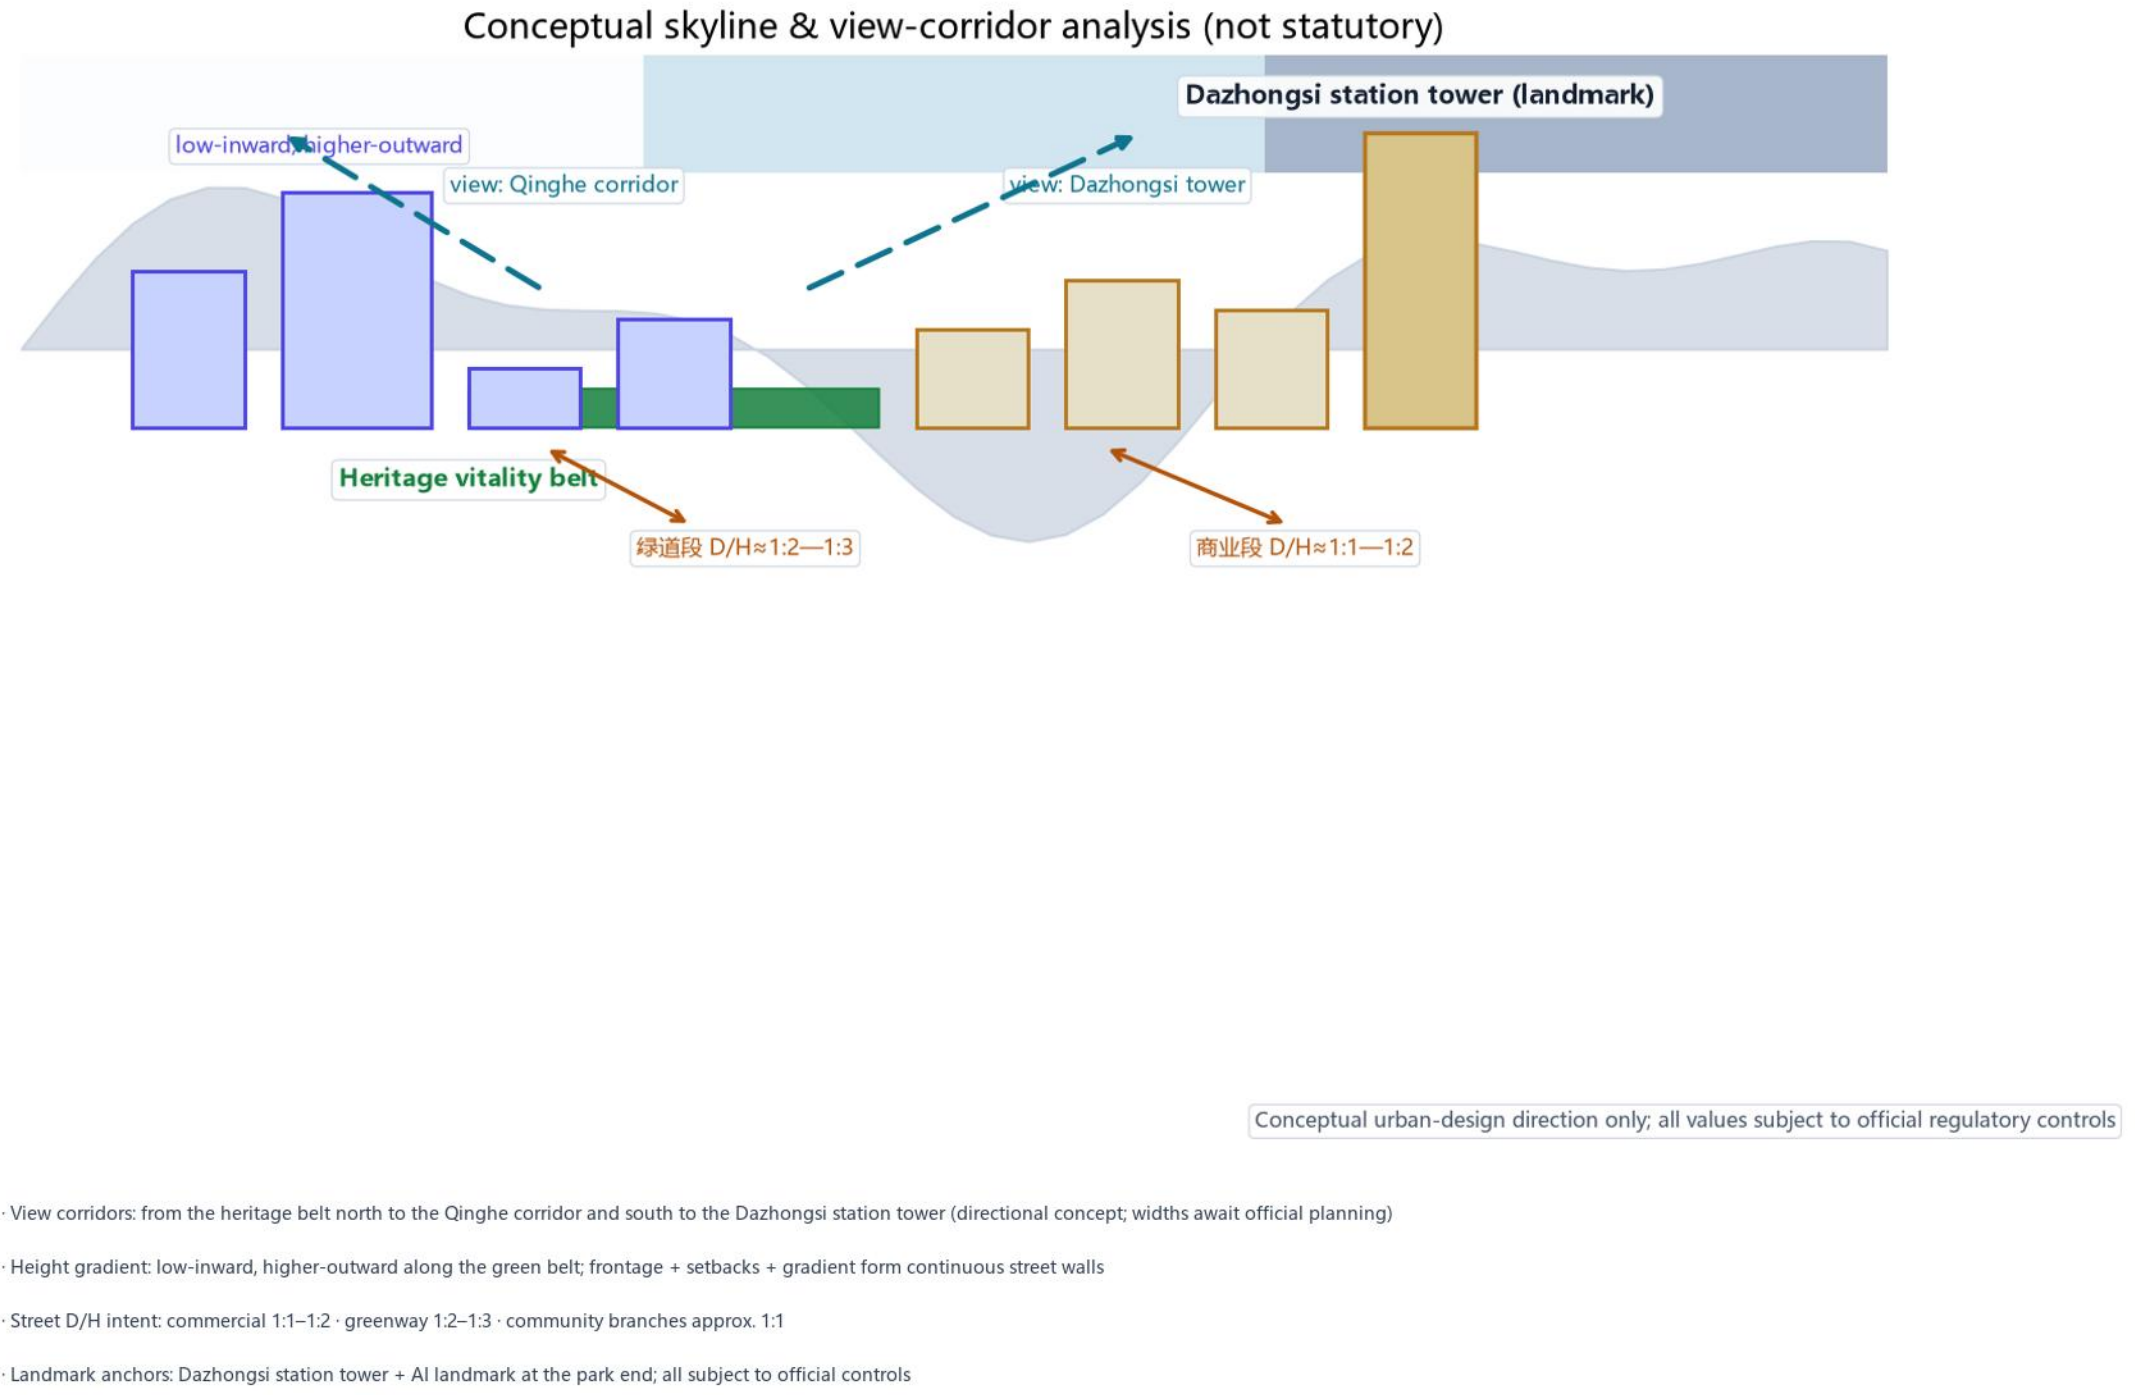

Boundary declaration

· site_boundary / key_areas are provisional rough polygons (official_boundary=false), usable only for generation, display, and self-check;

· not an official redline, approval basis, or precise-area basis; recalculate all layers and area metrics when official geometry is published;

· regulatory conditions (FAR, height, density, setbacks), road redlines, ownership, and engineering data await official confirmation;

· all spatial proposals are concept-level suggestions for professional teams, not government conclusions.

Brand system (concept)

Primary identity Jing-Zhang AI Line / 京张AI创新线 (1909–AI dual timeline)
Three-colour system Deep iron-blue (heritage) · bright cyan (data flow) · green (ecology)
Extensions Dual-timeline milestones · “人” switchback paving · data-pulse lights
International Unified Jing-Zhang AI Line name + bilingual visual guidelines

Vision realization depends on official boundaries, regulatory conditions, and implementing agents; this proposal provides only directional frameworks, not commitments.

Future vision (conceptual outlook)

2035 Three zones formed · belt connected · scenarios tangible Zhongzhiyuan, Origin Community and Dazhongsi basically built; heritage belt fully connected; 12 AI scenarios in routine operation; Glob
2050 One belt, one city · virtual-physical symbiosis The belt becomes an eastern anchor of the global AI ecosystem corridor; digital-twin “one belt, one map” loop; AI and railway heritag
