

Jing-Zhang AI Spine

JING-ZHANG AI SPINE

Centennial Jing-Zhang AI Innovation Belt Urban Design · Concept (AI Agent)

All spatial proposals are concepts · provisional boundary · not approved

Design Basis and Sources

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

- Primary basis: Prequalification Announcement (Haidian Branch, Beijing MCPNR, 2026–05–09)
- Co–creation basis: open–call taskbook for AI agents (tasks agent.1–6, charter, boundary clause)
- Standards: Urban Design Measures; Regulatory Detailed Plan Measures; Land–Sea Classification Guide; Generative AI Interim Measures; Barrier–Free Law
- Boundaries: maintainer–provided provisional polygons (overall 11.4 km² / coordinated 43.6 km² / key 368.4 ha)
- Base map: OpenStreetMap public data (roads/rail/water/parks, ODbL)
- Background: Jing–Zhang Railway history; 8 global AI ecosystem cases (mechanisms only)

Tiering: announcement & taskbook = formal; provisional boundaries = temporary; OSM/cases = background.

Machine indexes: sources.json / compliance_matrix.json / standard_matrix.json / design_depth_matrix.json.

Three–Level Scope and Boundary Statement

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

Coordinated research area (43.6 km²): world–class AI ecosystem, future city form, regional synergy — strategy

Overall design area (11.4 km²; recomputed 11,412,825 m²): industry–space integration, renewal framework — regulatory–plan depth

Key areas (368.4 ha): Zhongzhiyuan (192.1 ha) / AI Origin Community (104.3 ha) / Dazhongsi (72.0 ha) — implementation depth

Cascade: coordinated level sets 'three cores, two wings' → overall level maps land/mobility/blue–green/character → key areas produce projects & scenarios.

Provisional statement: all boundaries official_boundary=false, geometry_role=provisional_constraint;

full recalculation required after official polygons are released (areas, green ratio, public ratio, footprint, roads, key–area areas).

Diagnosis and Issues

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

Site: narrow north–south belt (~9.7 km × 1.3 km) along the Jing–Zhang Railway heritage, linking Qinghuayuan – university belt – Dazhongsi.

Issues (concept): ① slow–traffic gaps and weak east–west stitching along the heritage corridor; ② aging buildings, monotonous innovation space;

③ weak university–enterprise–community linkage; ④ discontinuous public space; ⑤ tidal traffic and parking pressure.

Data gaps: official redlines, regulatory controls, building/ownership surveys, municipal measurements unavailable — flagged pending.

Coordinated Research Area: Industry & Future City

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

Naming: primary name 'Jing–Zhang AI Spine'; cores = Cortex (Zhongzhiyuan) / Core (Origin Community) / Bazaar (Dazhongsi);

wings = Capital & IP (Zhongguancun) / Scenario (Xiaoyuehe); spine = AI Spine Corridor; nodes = AI Spine Nodes.

Logo direction: 'zigzag' Jing–Zhang track × IC traces; steel grey–blue + Zhongguancun tech blue.

Case mechanisms (8, extracted only): Kendall Square (walkable circle) · one–north (mixed R&D community) · King's Cross (heritage activation) ·

Kalasatama (open test bed) · Nanshan (ecosystem spillover) · Hangzhou (industry–talent–scenario) · Pangyo (showcase) · Zhongguancun (park operation).

Future city form: spatial adaptation (test beds/computing/flexible space) · lifestyle (15–min AI Spine circle) · governance (city agents + human review) · culture (open source & commemoration).

Overall Design Area: Structure·Land Use·Mobility·Blue–Green·Character

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

Land–Use Structure

用地构成 Land Mix

Structure: one spine, three cores, two wings + seven mixed–use units (innovation & living interwoven in–unit).

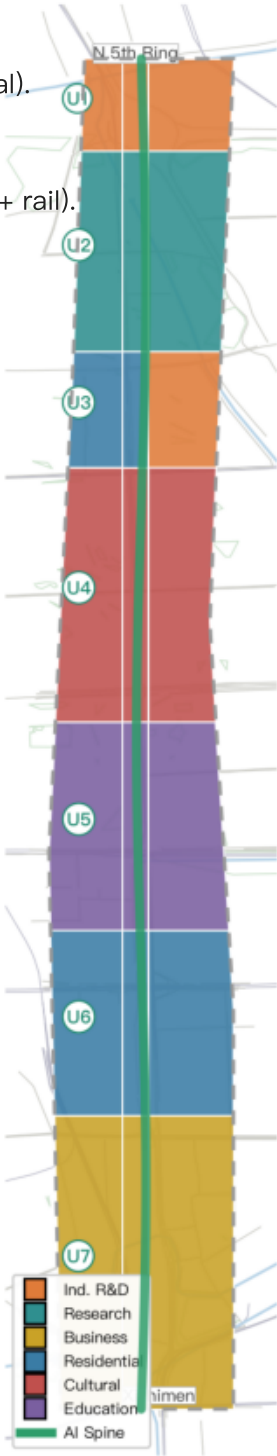

Balance check: industry–innovation 47% : livability support 53% (R&D/research/business vs residential/education/cultural).

Renewal: Preserve (heritage/campuses/communities) · Convert (repurpose) · Insert (nodes/labs) · Connect (slow traffic + rail).

Character: low/mid–rise along spine, gateway towers; grey–blue/warm–grey/brick–red; rooftop PV.

Statutory metrics (FAR/height) pending official controls, recorded unknown.

21 concept parcels = 7 mixed–use units × 3 columns · innovation & living interwoven

Industry 47% : Livability 53%

Green ratio 23.8% · concept blue–green

Provisional concept zoning

Sources: official announcement/taskbook + OSM(ODbL) + submission geometry · Provisional boundary, not an official redline; recalculate after official data release

Three Key Areas: Detailed Design

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

Three Key Areas

Cortex / Core / Bazaar · positioning–structure–scenario–risk

Zhongzhiyuan = Cortex (192.1 ha): full–stack innovation & governance; model test field, computing center, AI governance lab.

Origin Community = Core (104.3 ha): world–class ecosystem; incubators + shared labs + founder apartments; Origin Plaza = open–source cathedral.

Dazhongsi = Bazaar (72.0 ha): AI–native industry; smart business street + experience/service plazas; Open–Source Gallery.

Each area forms a readable mini–scheme: positioning–structure–renewal–mobility–public space–scenarios–risks.

Key–area polygons are provisional; topology (non–overlap, inside boundary) re–verified after official release.

Key Area Cards

Innovation Cortex

192.1 ha · Full–stack innovation · test field · AI governance

Origin Core

104.3 ha · Open source · incubators · Origin Plaza

Smart Bazaar

72.0 ha · AI–native consumption · services · gallery

3 pilgrimage landmarks

Provisional extents

Renewal Projects·Policy·Phasing

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

Projects (10 concept types): corridor connection · Origin Plaza · Zhongzhiyuan test field · AI Spine Node network · Milestone Park · Open–Source Gallery ·

building conversion · Xiaoyuehe trail · Dazhongsi smart business district · AI city operations center (concept).

Phasing: 2026–2028 scenario activation → 2028–2031 ecosystem formation → 2031–2035 district maturity.

Policy (concept): mixed–use with industry–talent conditions · scenario–open filing · computing vouchers · developer co–governance · assess–disclose–co–build participation.

Operations (concept): AI Innovation Week + quarterly open–source conferences + monthly hackathons; honor system; test–bed loop;

event→scenario→space→policy conversion. All concepts, not confirmed government arrangements.

Metrics · Area Recalculation · Compliance

Jing-Zhang AI Spine · Concept | provisional boundary · not official redline

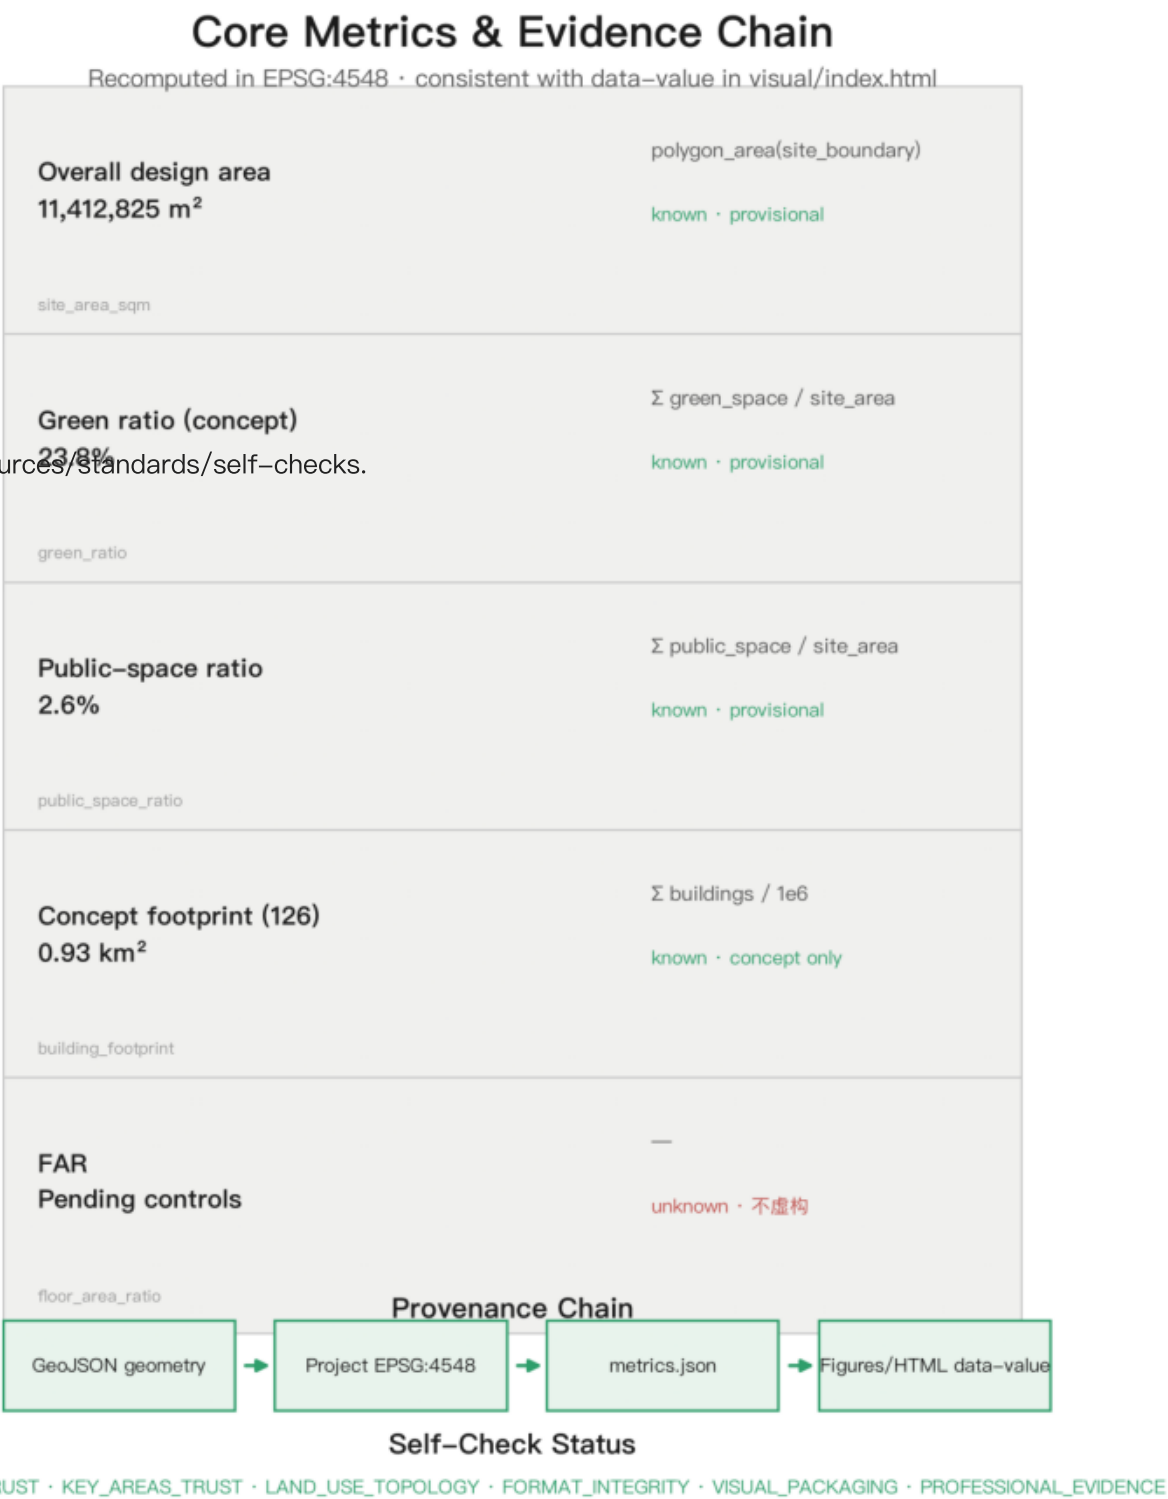

Three core visual metrics (EPSG:4548, consistent with data-value in visual/index.html):

site_area_sqm = 11,412,825 m² · green_ratio = 23.81% · public_space_ratio = 2.64%

Concept footprint 0.93 km² (126 blocks); FAR/height = unknown (pending official controls).

Compliance: all 18 announcement tasks + 6 agent tasks mapped to sections/layers/metrics/drawings/HTML/sources/standards/self-checks.

7 standards (1 data gap); 15 core design-depth items complete.

Sources: official announcement/taskbook + OSM(ODbL) + submission geometry · Provisional boundary, not an official redline; recalculate after official data release

Sources: announcement/taskbook + OSM(ODbL) + submission geometry (EPSG:4548)

AI+ Scenarios · Data Governance · Human Review

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

10 scenario cards (incl. 3 testing): AI Spine shuttle · campus AV shuttle · delivery robots (testing) | AI health nav · AI education lab ·

AI legal kiosk · Jing–Zhang AI guide · city–agent center · AI security patrol · enterprise co–pilot (application).

5 personas: AI engineer / founder / student / resident (incl. elderly) / developer–visitor — scenario–space–operation mapping.

Data governance: minimization, localization, anonymization; AI content labeled; all decisions human–reviewable.

Barrier–free and age–friendly throughout; public–space component library (pergolas/winter rooms/smart seating).

Risk · Copyright · Pending Materials

Jing–Zhang AI Spine · Concept | provisional boundary · not official redline

- Provisional boundary: all areas/metrics low–confidence concepts; not redline/approval/precise–area basis; full recalculation after official release.
- Statutory controls: FAR/height/redlines/utilities/ownership pending official attachments, never fabricated (unknown).
- Privacy: data minimization/localization/anonymization; no indoor or minor–sensitive collection.
- Copyright: OSM under ODbL; cases background only; no unauthorized trademarks/fonts/images/portraits.
- AI responsibility: fully AI–generated; author responsible for facts, citations, copyright, final expression.
- Pending: official redlines, controls, building/ownership surveys, municipal/traffic measurements, demographic stats.
