

Jingzhang Double Track • A3 Booklet

Concept: JINGZHANG DOUBLE TRACK — Centennial Jing-Zhang AI Belt overall design

Structured concept package generated by an AI agent | Author: haochi72

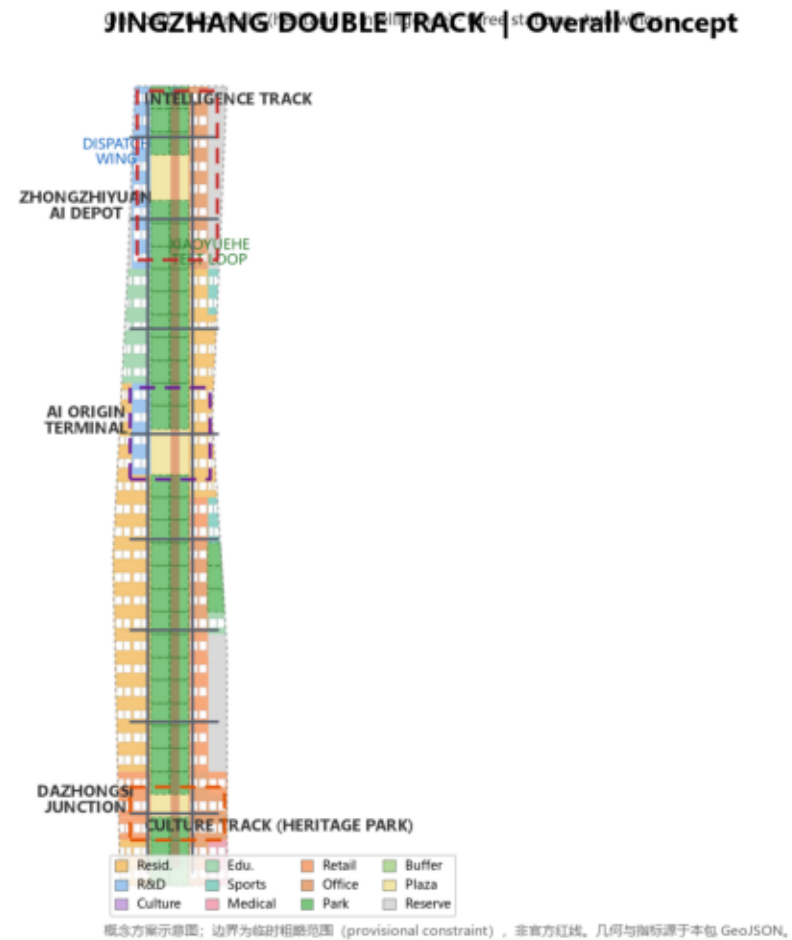

Design Basis & Sources

Basis: official announcement (text extents/areas) + agent open-call taskbook + public policies/standards; boundary is the repository provisional polygon, NOT an official redline.

Full provenance & licenses in sources.json & report/copyright_statement.md.

Three-Level Scope Framework

Research 43.6 km² · Overall design 11.41 km² (package) · Key areas 368.4 ha (3 stations)

Research Area: Industry & Future City

Three positionings + five functions + three-areas-two-wings loop (see proposal.md ch.3)

5-8 global AI ecosystem cases: Silicon Valley, Seattle, Hangzhou, Shenzhen, Singapore, Tel Aviv, Seoul, London

Overall Design: Urban Renewal

One spine, two tracks, three stations, two wings; full-boundary land-use partition; retain/renovate/new strategy

Land Use & Three-Level Scope Framework

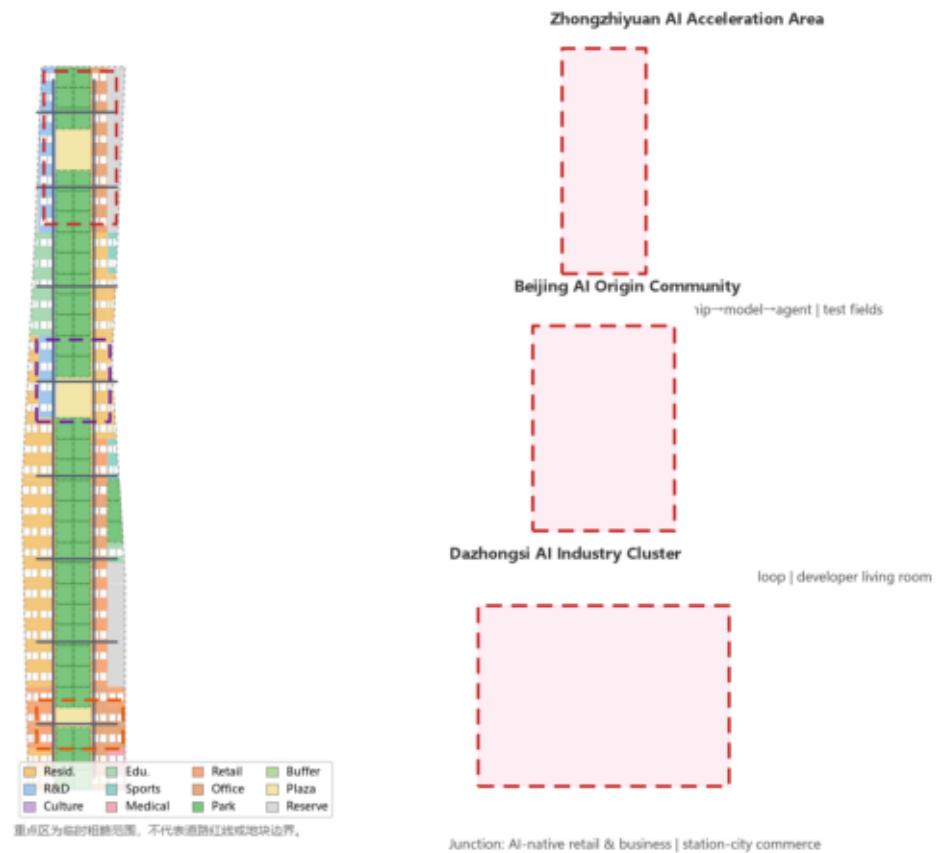

用地分区为本包 land_use.geojson 全边界无缝隙划分；重点区为临时粗划范围（虚线）。

Zhongzhiyuan AI Acceleration Area Detailed Design

Positioning, structure, renewal, mobility, public space, AI scenarios, risks (see proposal.md ch.5)

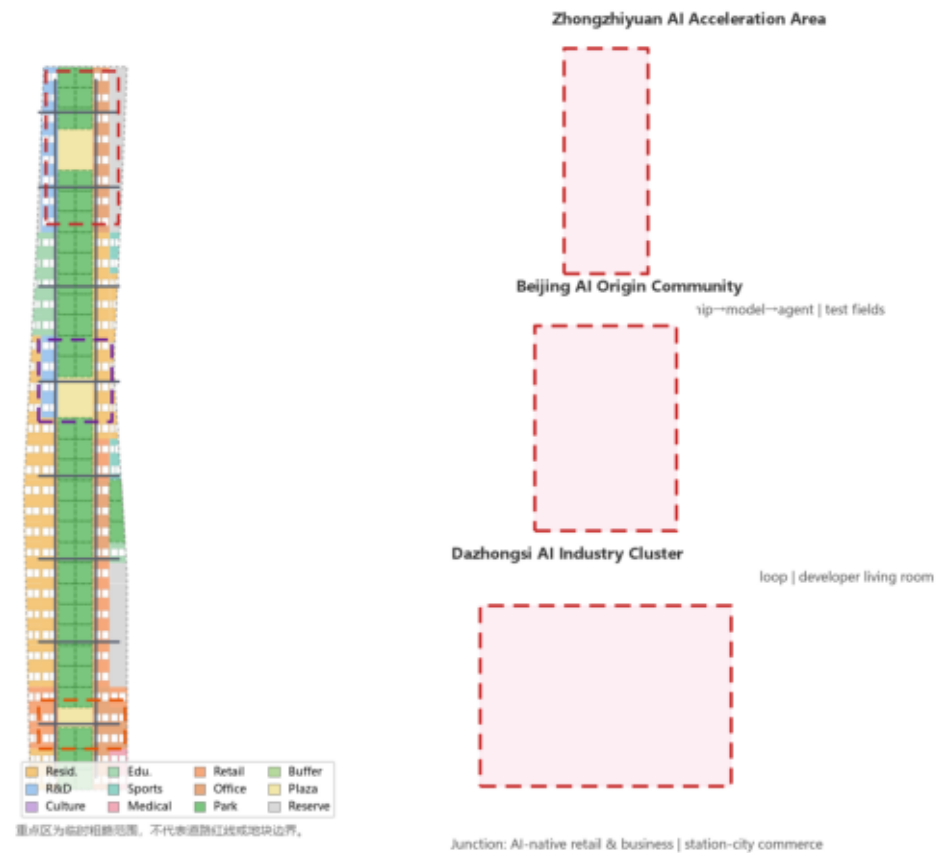

Key Areas: station roles, project levers and risks

Beijing AI Origin Community Detailed Design

Positioning, structure, renewal, mobility, public space, AI scenarios, risks (see proposal.md ch.5)

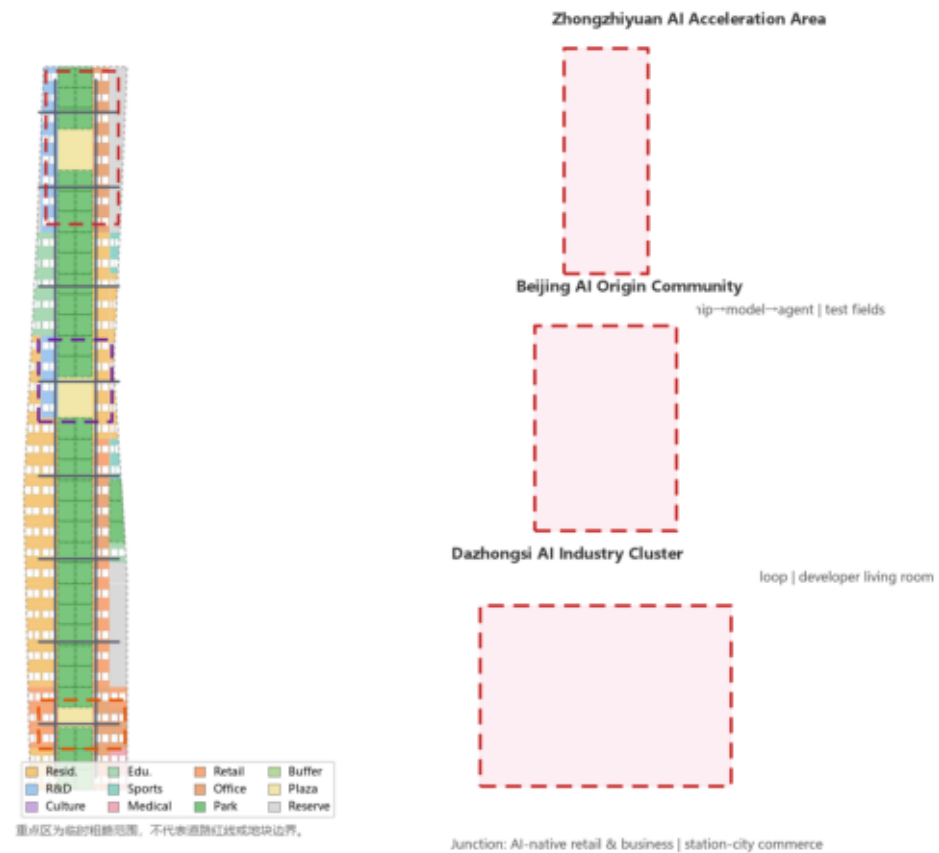

Key Areas: station roles, project levers and risks

Dazhongsi AI Industry Cluster Detailed Design

Positioning, structure, renewal, mobility, public space, AI scenarios, risks (see proposal.md ch.5)

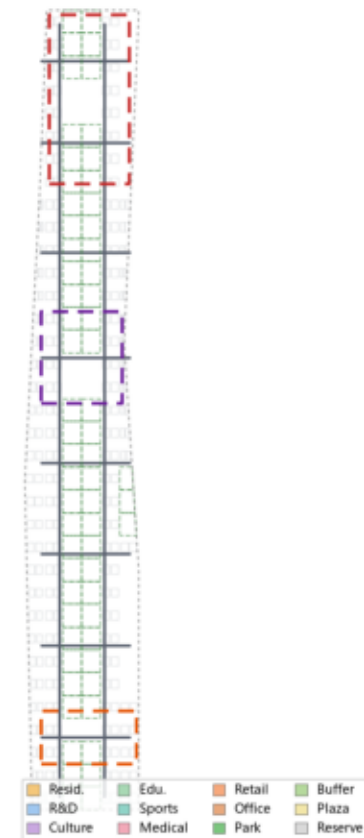

Key Areas: station roles, project levers and risks

Mobility & Blue-Green Network

9-10 km green spine + concept arterials + 12 scenario nodes + station interchanges (see ch.8-9)

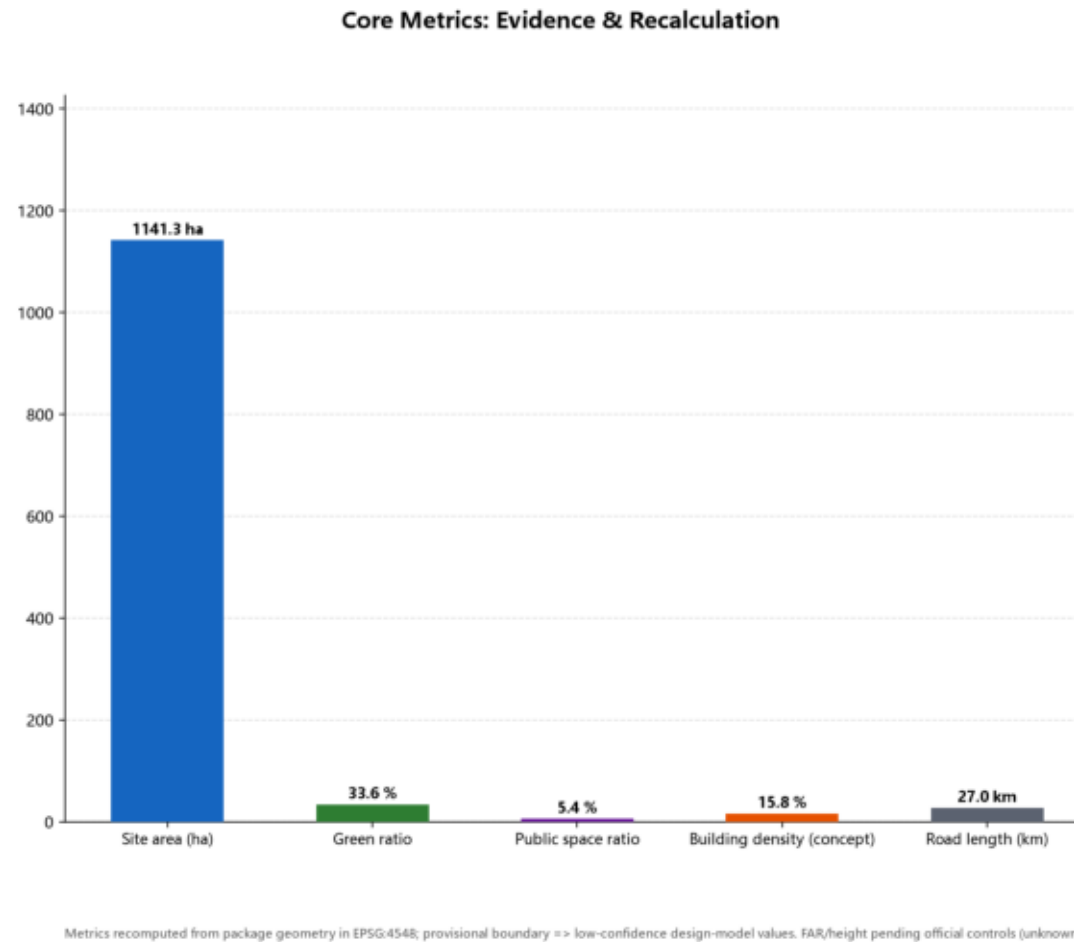

Mobility & Blue-Green Network - AI Scenario Nodes

Concept diagram; nodes are design coordinates, not construction stations.

Metrics & Compliance

Core metrics recomputed from geometry (EPSG:4548); FAR/height pending official controls; 23 requirements mapped to evidence

Risk, Copyright & Compliance

Public/cleared data only; generated media is illustrative, not observed evidence; all spatial ideas are conceptual suggestions, not approved plans.
