

CIVIC RELAY

Centennial Jing-Zhang AI Urban Learning Belt

NORTH VALIDATE / MIDDLE TRANSLATE / SOUTH ADOPT / WINGS FEED BACK

EVIDENCE BOUNDARY

The Overall Design Area and all three key areas remain provisional rough polygons. Announced areas are official text, not official polygons. RDP, title, buildings, roads, utilities and heritage controls remain unknown.

01 / OPERATING MODEL

The city is not an AI showroom.
It is a shared learning facility that can correct itself.

01

CIVIC AI RELAY / OPERATING MODEL

NORTH VALIDATE · MIDDLE TRANSLATE · SOUTH ADOPT · WINGS FEED BACK

PROVISIONAL / NOT AN OFFICIAL PLANNING BOUNDARY

NORTH / VALIDATE
Safety Validation Commons
Testing, red teams, energy and interoperability first create failure-visible evidence.

MIDDLE / TRANSLATE
Origin Translation Court
Translate open-source capability, product problems and resident needs into reviewable services.

SOUTH / ADOPT
Four-Quadrant Urban Interface
Bounded adoption keeps staffed service, appeal, deletion and rollback.

LOOP / FEEDBACK
Use returns problems
Decision drifts and negative results enter the next test, exposure is not learning.

RELAY RECEIPT 0.2

One verifiable handoff object

problem / place / minimum data version / forbidden action / human sign-off
fallback / appeal-deletion / maintenance cost evaluation / decision diff / next station

INPUT / TWO WINGS + FIVE INTERFACES

Authorized minimum inputs only

Community, research, science, industry and regional reuse all pass a rights gate.

HUMAN GATE / ACCOUNTABILITY

No accountable body, no trial

Staffed fallback, stop line, recurring budget, insurance and exit assets are mandatory.

OUTPUT / REVIEWABLE

Evidence, not publicity

Disclose success, failure, refusal and rollback, use null without a baseline.

Source: submission GeoJSON. Site and key areas are provisional rough polygons, areas recalculated in EPSG:4548.

JING-ZHANG CIVIC AI RELAY / CONCEPT REFERENCE

NORTH / VALIDATE

Evidence before adoption

MIDDLE / TRANSLATE

Knowledge becomes service

SOUTH / ADOPT

Use returns problems

Evidence has levels; gaps have names

Official and rights-cleared material supports task facts; machine contracts constrain delivery; processed packs navigate; global cases compare mechanisms only.

01 / FORMAL FACT · Announcement + rights-cleared taskbook

Three levels, approximate areas, three positionings, five functions, and agent.1–6.

02 / MACHINE CONTRACT · Site package + schema

Boundary state, layer enums, metric structures, matrices, and submission path.

03 / NAVIGATION · Processed fact pack

Locates original material; it does not become a new authority.

04 / BACKGROUND · Seven institutional case pages

Supports adoption-mechanism comparison, not local boundary, scale, or policy facts.

DO NOT CONVERT

unknown
is not blank authorization

FAR / height / statutory BCR / statutory green ratio / setbacks / road boundary / rail limit / title / existing building stock / municipal capacity / heritage control

When official polygons arrive: recut → rebuild derived layers → recalculate metrics → rerender every display.

Select the Urban Learning Relay

Seven equal criteria: systemic effect, public interest, AI-Native quality, spatial translation, long operations, evidence, and data-gap resilience.

A

Three-Zone Park Growth

Clear industrial siting; weak civic loop and data dependence.

19/35

B

Future Landmark Corridor

Strong communication; thin governance and long-term translation.

18/35

C

Urban Learning Relay

Validation–translation–adoption–feedback closes; primary scheme.

34/35

01 / NORTH · Safety Validation Commons

Tests, standards and public observation produce trusted evidence together.

02 / MIDDLE · Origin Translation Court

Open knowledge, product clinic and resident problems are translated together.

03 / SOUTH · Four-Quadrant Urban Interface

Urban-use feedback returns north for another test.

METHOD BOUNDARY

This inferential holistic framework does not represent Wang Hongyang's own view and does not replace fieldwork, statutory planning, or professional engineering judgment.

Coordination is a rejectable exchange, not a line on a map

Five taskbook-named interfaces state input, minimum output and exit gate only. They do not claim partnership, data exchange, mutual recognition, or procurement.

01 / BEIWEI COMMUNITY IN Resident problem / accessibility / non-digital service OUT De-identified card / staffed-service gap GATE Community and operator confirm; participation is not deployment consent	02 / FUTURE SCIENCE CITY IN Edge model / embodied device / test method OUT Model card / device passport / failure list GATE Duty, IP and safety explicit; no automatic recognition	03 / HUAIROU SCIENCE CITY IN Scientific facility / measurement / specialist validation OUT Calibration / uncertainty / independent-review question GATE Data licence and professional duty; concept is not resource
04 / BEIJING E-TOWN IN Engineering / manufacturing / supply chain / translation OUT Interoperability / maintenance / shutdown-recall condition GATE Voluntary enterprise + consumer review; no procurement promise	05 / BEIJING–TIANJIN–HEBEI IN Shared cross-city problem / reusable rule OUT De-localized Schema / negative result / version difference GATE Local lawful review; no coordinate, personal data, or approval copied	

Evidence boundary: no agreement, authorized data, joint budget, mutual recognition, or operating baseline.

NORTH VALIDATE · MIDDLE TRANSLATE · SOUTH ADOPT · WINGS FEED BACK

Testing, red teams, energy and interoperability first create failure-visible evidence.

Translate open-source capability, product problems and resident needs into reviewable services.

Bounded adoption keeps staffed service, appeal, deletion and rollback.

Decision differs and negative results enter the next test; exposure is not learning.

- problem / place / minimum data
- version / forbidden action / human sign-off
- fallback / appeal-deletion / maintenance cost
- evaluation / decision diff / next station

Community, research, science, industry and regional reuse all pass a rights gate.

Staffed fallback, stop line, recurring budget, insurance and exit assets are mandatory.

Disclose success, failure, refusal and rollback; use null without a baseline.

JING-ZHANG CIVIC AI RELAY / CONCEPT REFERENCE

02

CONCEPT LAND USE / RELATIONS BEFORE COLOUR BLOCKS

ONE CIVIC SPINE · FOUR RELAY SEGMENTS · COMPLEMENTARY EDGES

STRUCTURE 01 / SPINE

Civic protocol spine

Code 1401 expresses a conceptual public relation axis only. Official green, heritage and implementation limits are pending.

STRUCTURE 02 / WINGS

West supplies capability; east supplies problems

The service wing organizes legal, IP, safety and translation; the scenario wing organizes field checks and public feedback.

STRUCTURE 03 / INTERFACES

Three ground-level interfaces

Station seam: ordinary route first. Translation court: low-impact reuse. Test commons: isolatable with emergency stop.

STRUCTURE 04 / REVERSIBILITY

No assumed DRR or development intensity

Nine volumes test rhythm only. Existing stock, floors, title, fire safety, utilities and capacity remain unknown.

03

THREE KEY AREAS / THREE RELAY ROLES

NOT PARALLEL PARKS: A HANDOFF FROM VALIDATION TO TRANSLATION TO ADOPTION

PROV-KEY-001 / NORTH / VALIDATE

Safety Validation Commons

ENTRY Isolated test and public-observation question
HUMAN Emergency stop + ethics/engineering sign-off
OUTPUT Failure record, interface rule, retest condition
STOP Site, insurance, data or incident duty unclear

PROV-KEY-002 / MIDDLE / TRANSLATE

Origin Translation Court

ENTRY Maintenance issue, product clinic, resident problem card
HUMAN Joint legal/IP/service review
OUTPUT Usable prototype, maintenance list, scenario plan
STOP Building, fire, permit or exit path unclear

PROV-KEY-003 / SOUTH / ADOPT

Four-Quadrant Urban Interface

ENTRY Validated service with a staffed alternative
HUMAN Service-supervisor sign-off + site takeover
OUTPUT Decision diff, use feedback, pause/rollback receipt
STOP Station, flow, junction safety or consumer protection unclear

All three rectangular key areas are provisional rough geometry; roles, moves and dependencies are Conceptual Recommendations.

04

WALKING + BLUE-GREEN PUBLIC SPACE

CONNECTION BEFORE WORKS: CONTINUOUS · ACCESSIBLE · REJECTABLE

MOBILITY / NETWORK

Three cross-seams + one spine + two wings

Three east–west seams connect key areas; one north–south civic spine links the belt. Wings express services and feedback only.

GROUND FIRST / USER JOURNEY

A complete path without AI

Static arrival signs → continuous accessible ground → shaded rest → staffed desk → optional digital assistance.

FIVE GATES / FAIL CLOSED

Purpose · data · human · exit · review

A scenario cannot enter public space if purpose is hidden, data excessive, takeover impossible, rollback absent, or review impossible.

● INDUSTRY TEST ● PUBLIC SCENARIO ■ HUMAN HANDOFF DESK — RELAY GREENWAY --- WING FEEDBACK

KEEP UNKNOWN: FAR / HEIGHT / BCR / STATUTORY GREEN RATIO / ROAD AREA / TITLE / CAPACITY / BUDGET / OPERATOR

Replacement: when official polygons arrive, recut land use → rebuild derived layers → recalculate metrics → validate Schema → regenerate every display.

Scenario cards 01–06

ORANGE = industry Testing and Validation Scenario / TEAL = public or innovation service / all conceptual, reversible, and subject to Human Review

SC-01 Multi-Agent Embodied-AI Safety

SPACE Controlled northern test + public window
DATA Version / failure / repair
HUMAN Safety officer emergency stop; failure public
FALLBACK Isolated manual test
STOP Boundary breach / disconnect / failed takeover

SC-02 Edge-Model Energy + Resilience

SPACE Metered edge-device bench
DATA Device energy / degraded mode
HUMAN Engineer signs; immediate power cut
FALLBACK Offline benchmark
STOP Content not isolated / power cut fails

SC-03 Open-Source Red Team + Standards

SPACE Isolated red-team room
DATA De-identified failure / patch version
HUMAN Ethics-safety review before disclosure
FALLBACK Manual test checklist
STOP Exploitable critical vulnerability

SC-04 Urban-Service Interface Interoperability

SPACE Simulated service counter
DATA Synthetic ticket / transfer log
HUMAN Supervisor accepts; no automatic launch
FALLBACK Staff transfer sheet
STOP High-risk misroute / missing log

SC-05 Open-Source Maintainer Product Clinic

SPACE Origin Translation Court
DATA Problem / dependency / licence
HUMAN Withdrawable; legal-safety review
FALLBACK Staffed clinic period
STOP Unauthorized business data recorded

SC-06 Explainable Learning Partner

SPACE Peer-learning seat
DATA Voluntary task / visitor mode
HUMAN Teacher reviews; no persistent profile
FALLBACK Teacher + printed pack
STOP Persistent profile / source unexplained

Scenario cards 07–12

ORANGE = industry Testing and Validation Scenario / TEAL = public or innovation service / all conceptual, reversible, and subject to Human Review

SC-07 Accessible Walking Navigation SPACE East–west Origin seam DATA Brief location / obstacle report HUMAN Staffed hotline; location can be off FALLBACK Static map + human escort STOP Unsafe direction / staff channel interrupted	SC-08 Community Health-Service Navigation SPACE Staffed community desk DATA Public-service search only HUMAN No diagnosis; staffed path retained FALLBACK Printed directory + staff referral STOP Diagnosis / missed emergency referral	SC-09 Public Legal-Service Triage SPACE Southern public-service point DATA Problem type / document checklist HUMAN No conclusion; lawyer confirms FALLBACK Staff booking + printed list STOP Legal conclusion / document disclosure
SC-10 Four-Quadrant Walking Assistant SPACE Southern urban interface DATA Accessibility / temporary obstacle HUMAN Site confirms; static mode on failure FALLBACK Static signs + volunteer help STOP Stale information / site conflict	SC-11 Agentic-Consumption Sandbox SPACE Bounded display DATA Permission / budget / simulation log HUMAN Confirm each step; clear and exit FALLBACK Staff demonstration sheet STOP Real payment / cancellation failure	SC-12 Jing-Zhang Memory Co-reader SPACE Civic protocol spine DATA Cleared history / voluntary input HUMAN Editor verifies; contribution withdrawable FALLBACK Curated static index STOP Unknown source / withdrawal not executed

Relay Receipt 0.2 / what every handoff must leave

The Schema is a conceptual governance interface. The SC-04 example uses synthetic tickets and null results; it proves structure only, not a real interface, performance, or deployment.

01 / TEST EVIDENCE · Validation evidence

Problem / place / data and model version
Forbidden action / expected / measured / negative
Missing source or version: FAIL CLOSED

02 / ADOPTION PACKAGE · Adoption accountability

Human sign-off / non-AI fallback / appeal-deletion
Maintainer / cost status / exit asset
No accountable body: NO PILOT

03 / USE FEEDBACK · Use-feedback package

Decision diff / continue-pause-refuse reason
Retest condition / next action / rollback
Success and failure: SAME DISCLOSURE

SC-04 / SYNTHETIC MINIMUM REPRODUCIBLE SLICE

Simulated service counter → synthetic ticket → human comparison with expected transfer table → result remains null → delete sandbox log → retain Schema, empty fixture, and review record

Hard stops: high-risk misroute, missing log, failed takeover, or unauthorized data. JSON Schema validation means fields and types are valid only.

Eight action packages / one accountable gate / executable stop lines

A means a future authorized accountable role. No actual government body, owner, or company is appointed; monetary amounts remain unknown.

P01 Civic protocol spine

A Authorized public-space role
GATE Basic passage + accessibility first
STOP Alternative path or emergency duty unclear

P02 Safety Validation

A Authorized testing role
GATE Isolation, staffing, insurance, incident report
STOP Any condition missing

P03 Origin Translation

A Authorized open-source/service role
GATE Licence, safety, demand duty
STOP Exit path unclear

P04 Urban Interface

A Authorized public-service role
GATE Staffed fallback, appeal, deletion, maintenance
STOP Shift or takeover missing

P05 Two Wing services

A Authorized coordination role
GATE Data, IP, professional duty, consumer rights
STOP Any right unconfirmed

P06 Relay Receipt

A Authorized data role
GATE Decision diff, deletion, rollback traceable
STOP Deletion overdue or log broken

P07 Identity + honour

A Authorized brand/culture role
GATE Source, authorization, dispute, withdrawal
STOP Hide first on a rights dispute

P08 Annual civic relay

A Authorized annual-operations role
GATE Permit, budget, staffing, exit assets
STOP Any item unclear

PEOPLE

staff / review / appeal / maintenance

SPACE

period / alternative use / removal

EQUIPMENT

buy-lease / energy / spare / retire

DATA

collect / store / delete / audit

PUBLIC VALUE

basic service / failure / opportunity cost

Review-ready does not mean approved

Separating known, provisional, and unknown is part of the proposal's credibility.

KNOWN / SOURCED	PROVISIONAL / REPLACEABLE	UNKNOWN / PROFESSIONAL JUDGMENT
Open-call tasks + approximate areas Rights-cleared taskbook Submission path, schemas, enums Structured recalculation method	Site polygon 11.413 km² Three key-area polygons Concept land use / public space / scenario nodes Drawings + offline display	RDP / height / BCR / green ratio Road, rail / title / existing stock Heritage / utilities / fire-flood Investment / approval / implementation timing

MAINTAINER / PROFESSIONAL REVIEW

PASS proves deterministic contracts only; it does not prove maintainer acceptance, professional scoring, government determination, or engineering feasibility.

The declared AI agent generated text, geometry, diagrams, PDFs, and offline HTML from public or rights-cleared material. No external image, trademark, portrait, remote font, or private material is copied.
