

GREEN = open experience | AMBER = controlled pilot | RED = decommission & rollback
One spine (signal green belt) · Three cores (validation / open-source / experience beacons) · Two wings

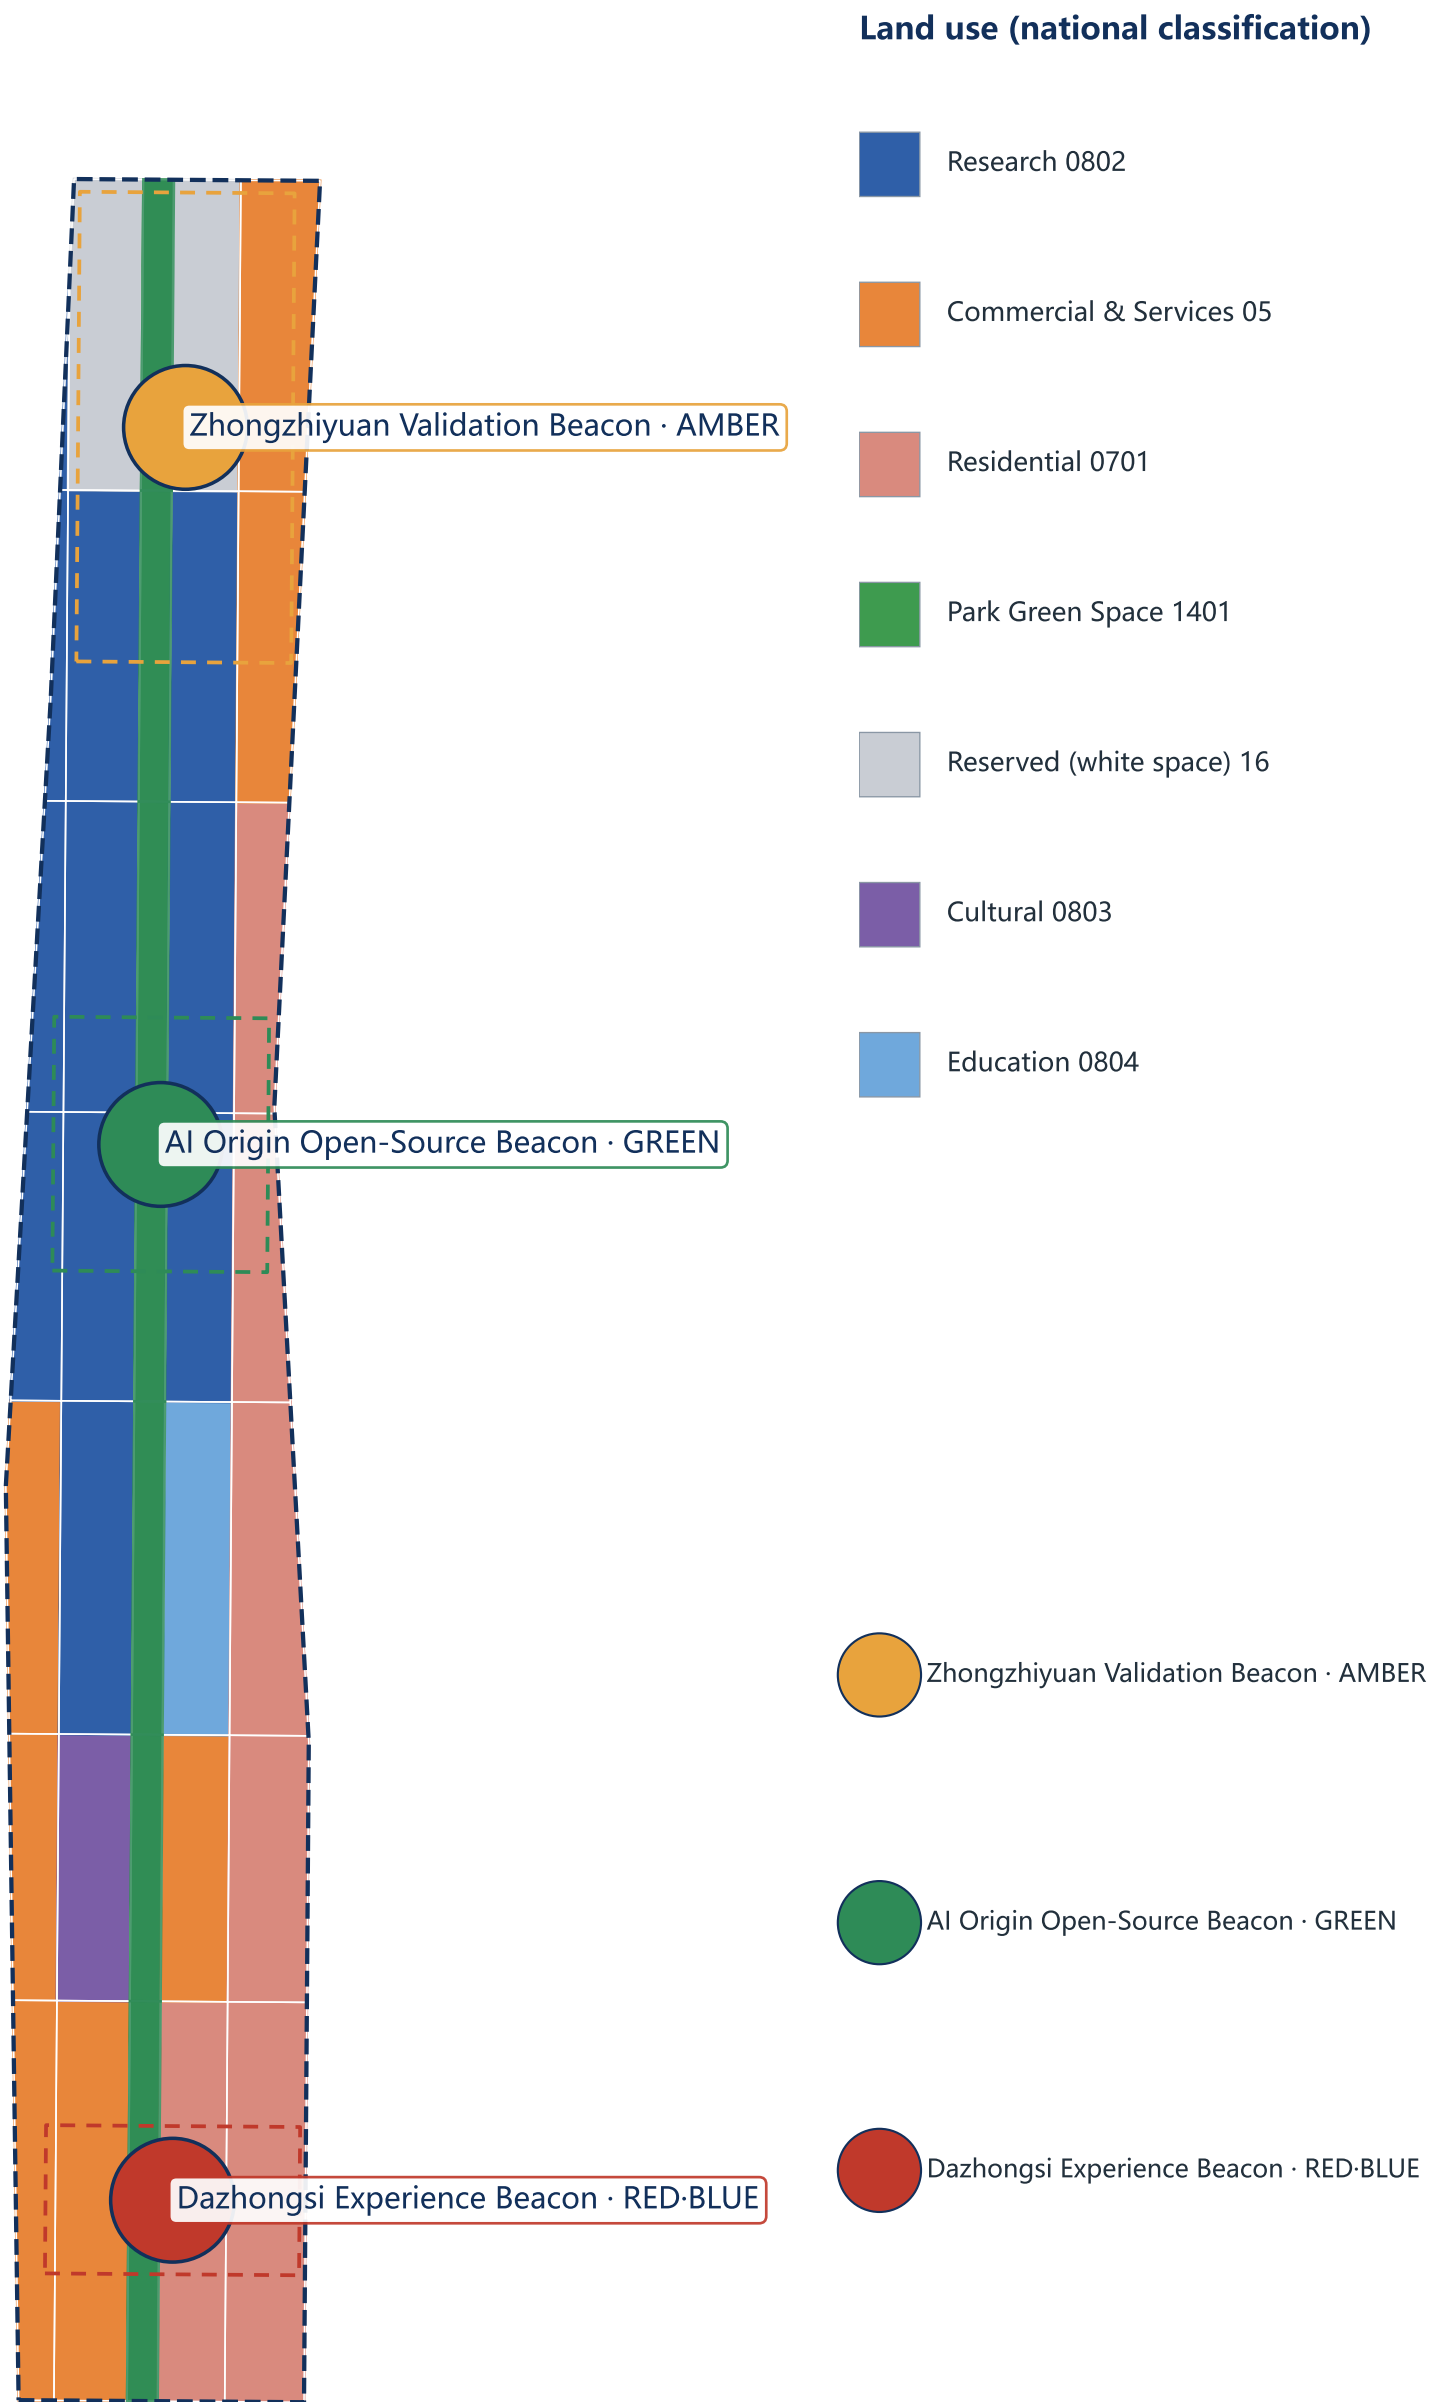

Fig.1 Overall concept: one spine, three cores, two wings and the tri-color signal language (provisional boundary)

All spaces and activities are open co-creation concept suggestions; they do not replace formal planning or official decisions.
Boundaries are provisional; used only for discussion and in-package self-check [source:BOUNDARY-SOURCE]

Land-use partition fully covers the provisional boundary (no gaps, no overlaps) · national classification

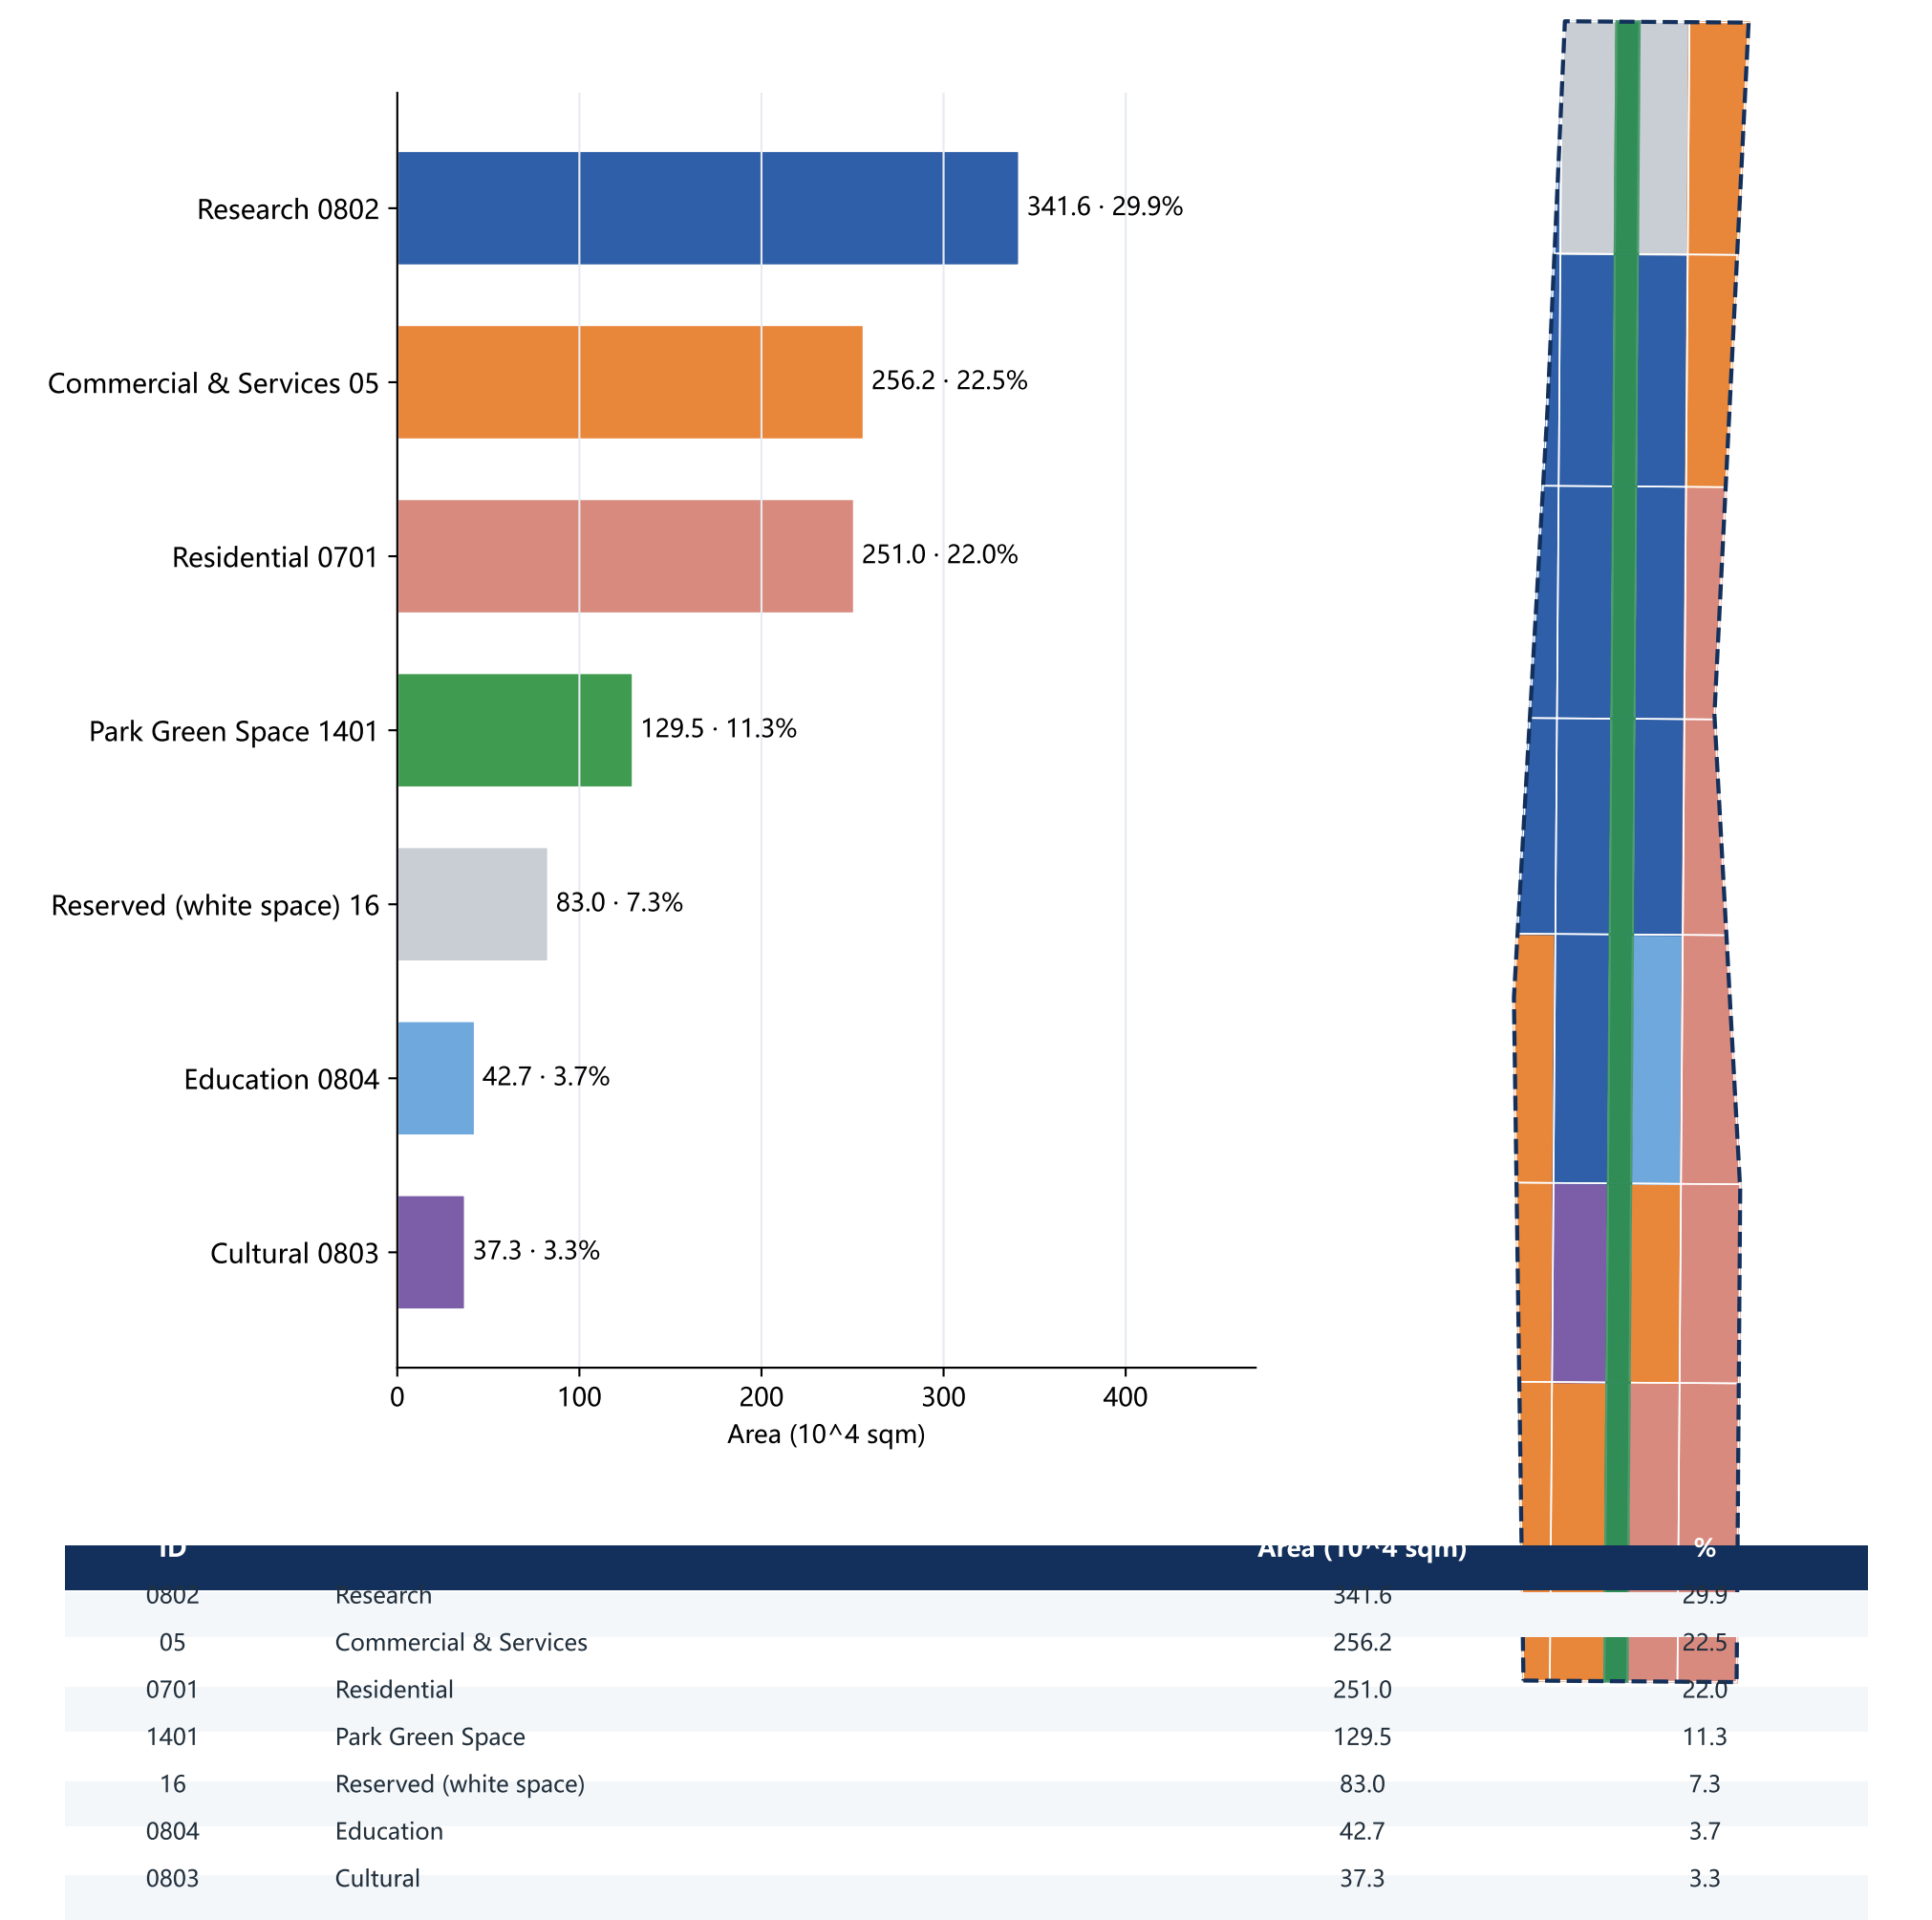

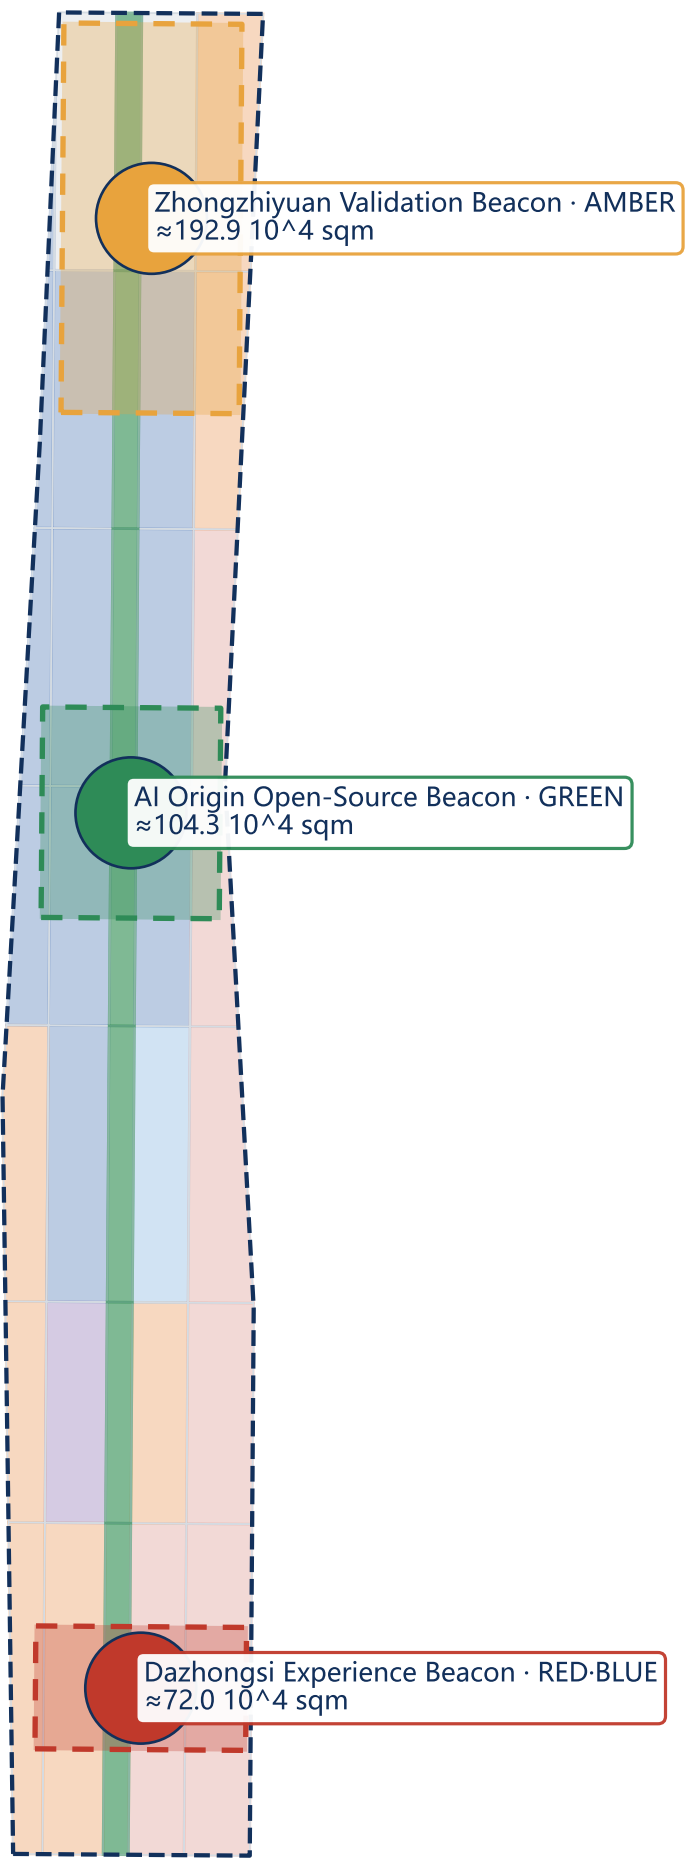

Fig.2 Land-use partition in national land classification; full cover of the provisional boundary (no gaps, no overlaps)

All spaces and activities are open co-creation concept suggestions; they do not replace formal planning or official decisions.
Boundaries are provisional; used only for discussion and in-package self-check [source:BOUNDARY-SOURCE]

■ Zhongzhiyuan Validation Beacon [PROV-KEY-001] · AMBER

Full-stack validation zone: Qinghe interface - validation axis - research units; three-tier gates: virtual evaluation -> controlled labs -> street pilots

[data:geometry/key_areas.geojson#PROV-KEY-001]

■ AI Origin Open-Source Beacon [PROV-KEY-002] · GREEN

Near-campus open-source community: campus-park stitching axis - open-source plaza - living blocks; open first, then transform: public knowledge into the public commons

[data:geometry/key_areas.geojson#PROV-KEY-002]

■ Dazhongsi Experience Beacon [PROV-KEY-003] · RED-BLUE

Intelligent-native experience zone: station-front quadrants - cultural experience strip - commercial ring; opt-in, opt-out and human review as the baseline

[data:geometry/key_areas.geojson#PROV-KEY-003]

Fig.3 Zhongzhiyuan Validation Beacon (amber) · AI Origin Open-Source Beacon (green) · Dazhongsi Experience Beacon (red-blue)

All spaces and activities are open co-creation concept suggestions; they do not replace formal planning or official decisions.

Boundaries are provisional; used only for discussion and in-package self-check [source:BOUNDARY-SOURCE]

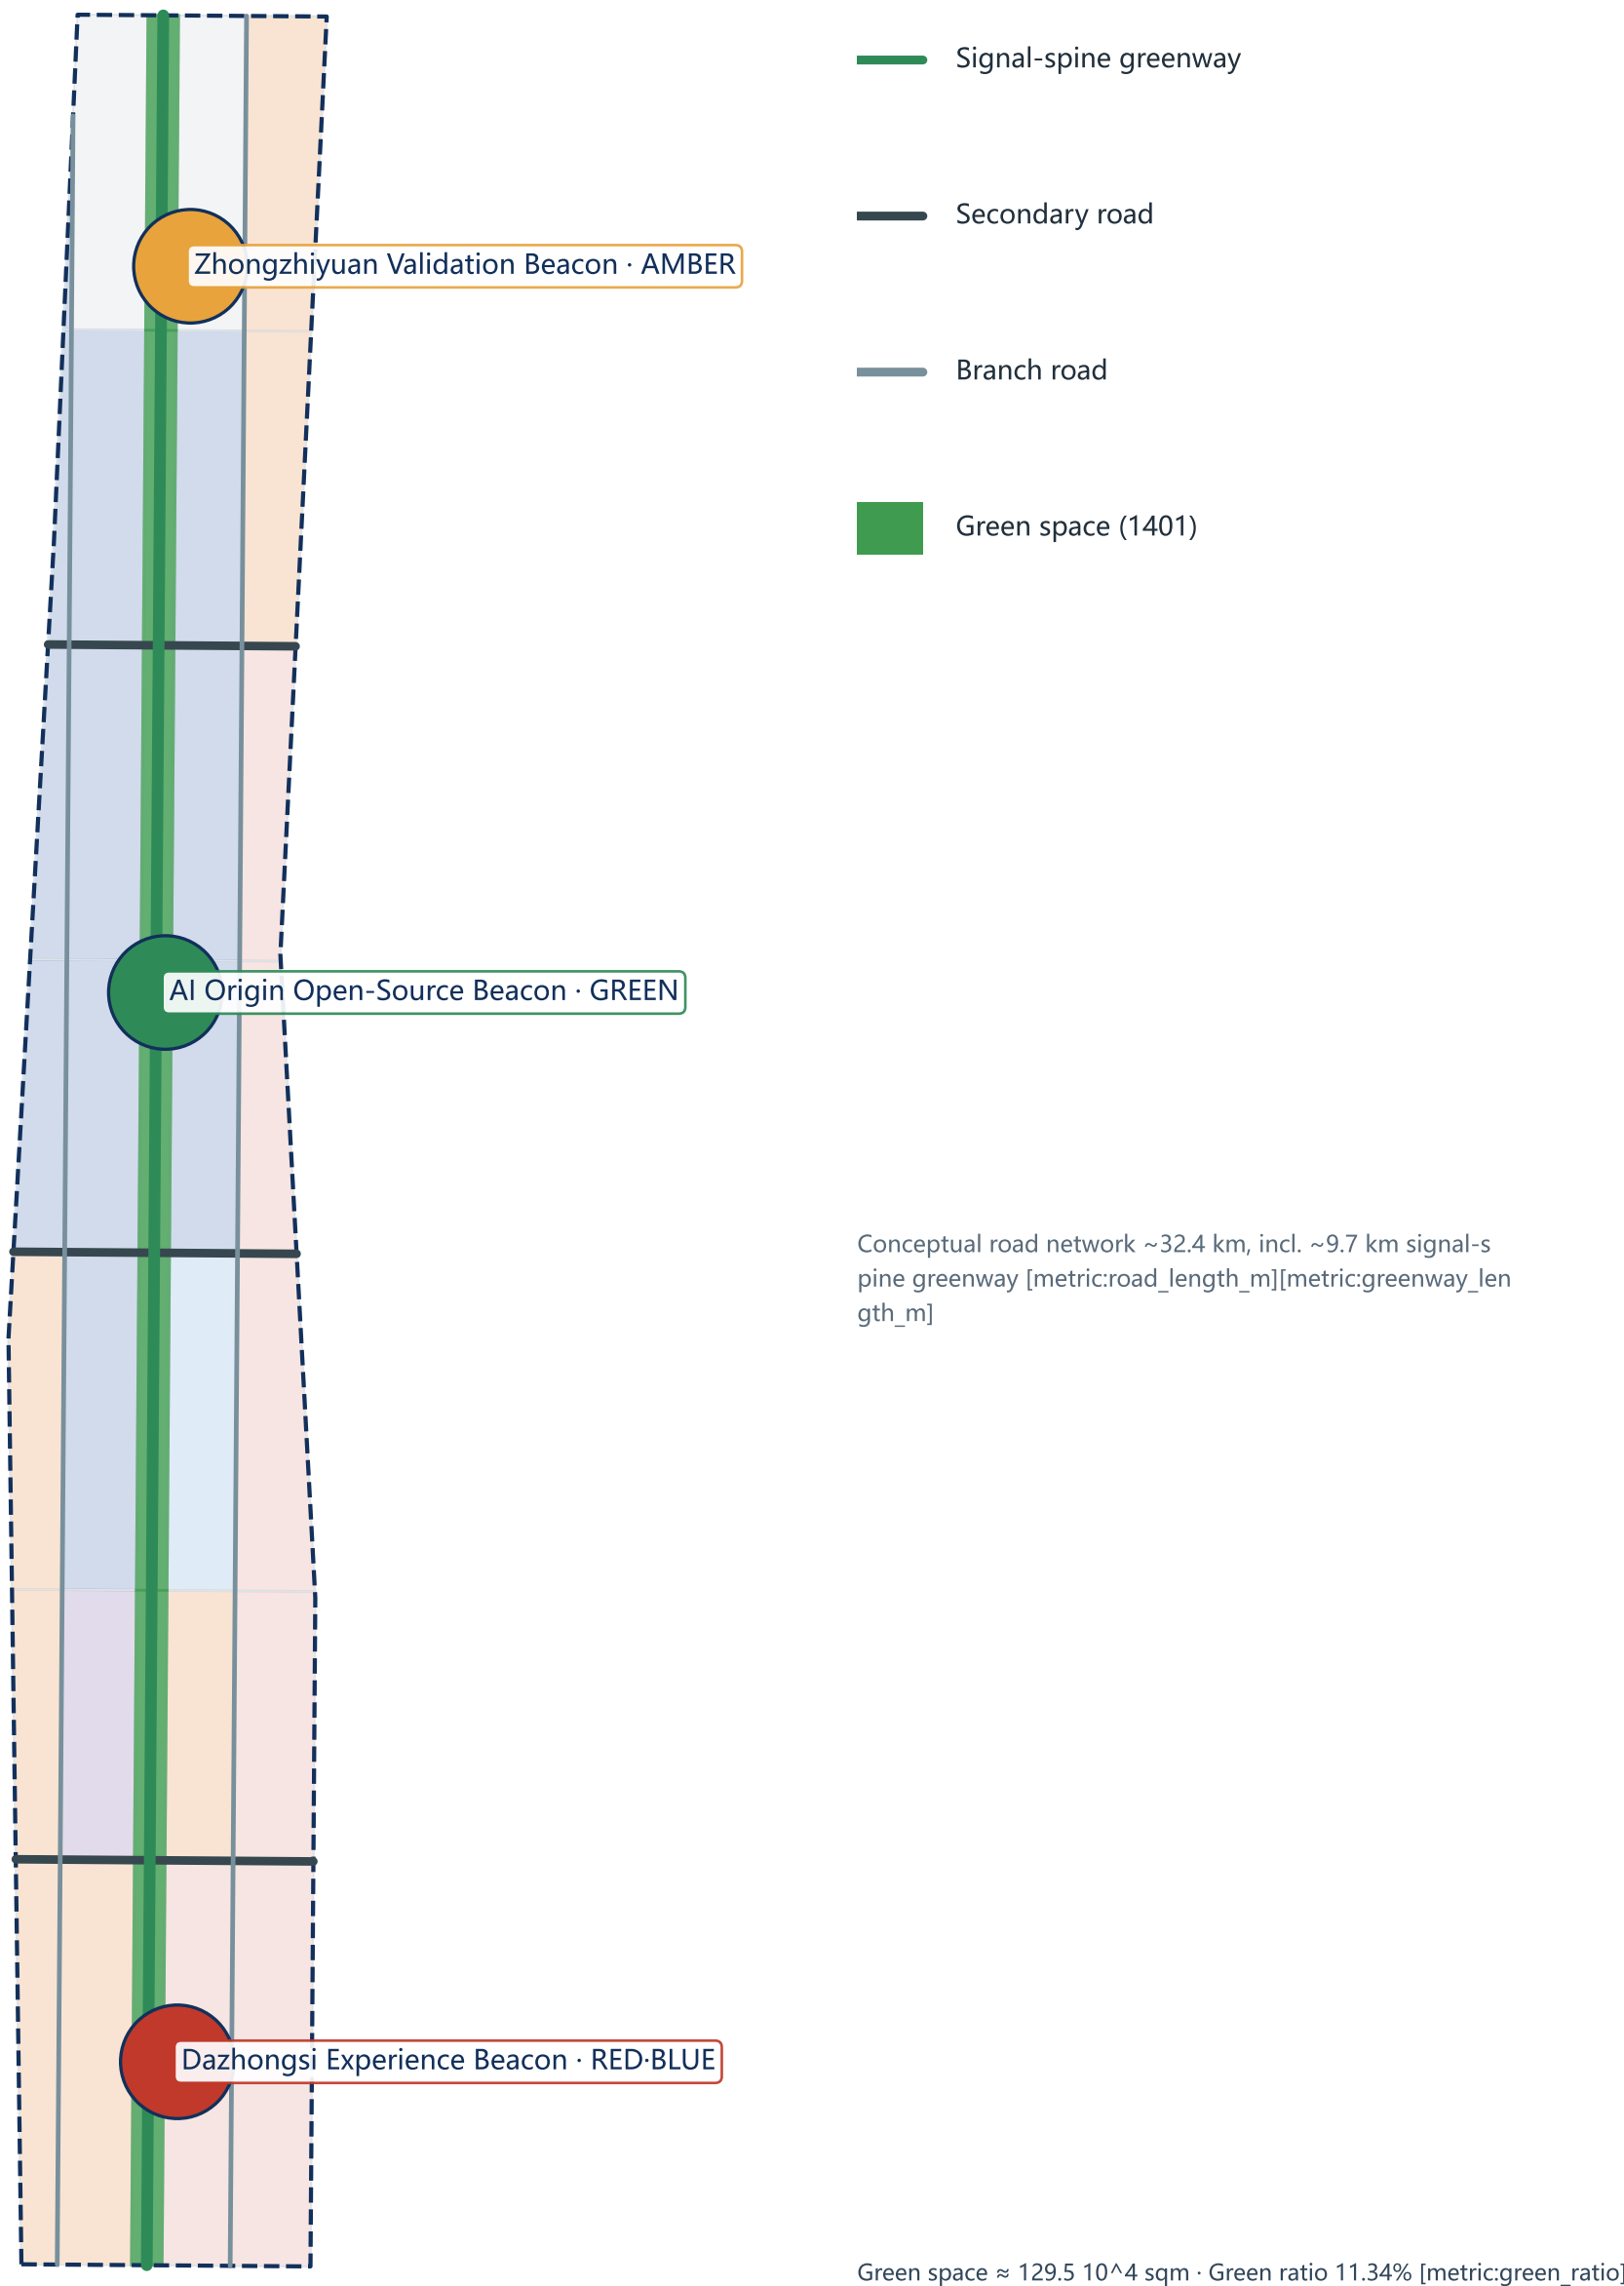

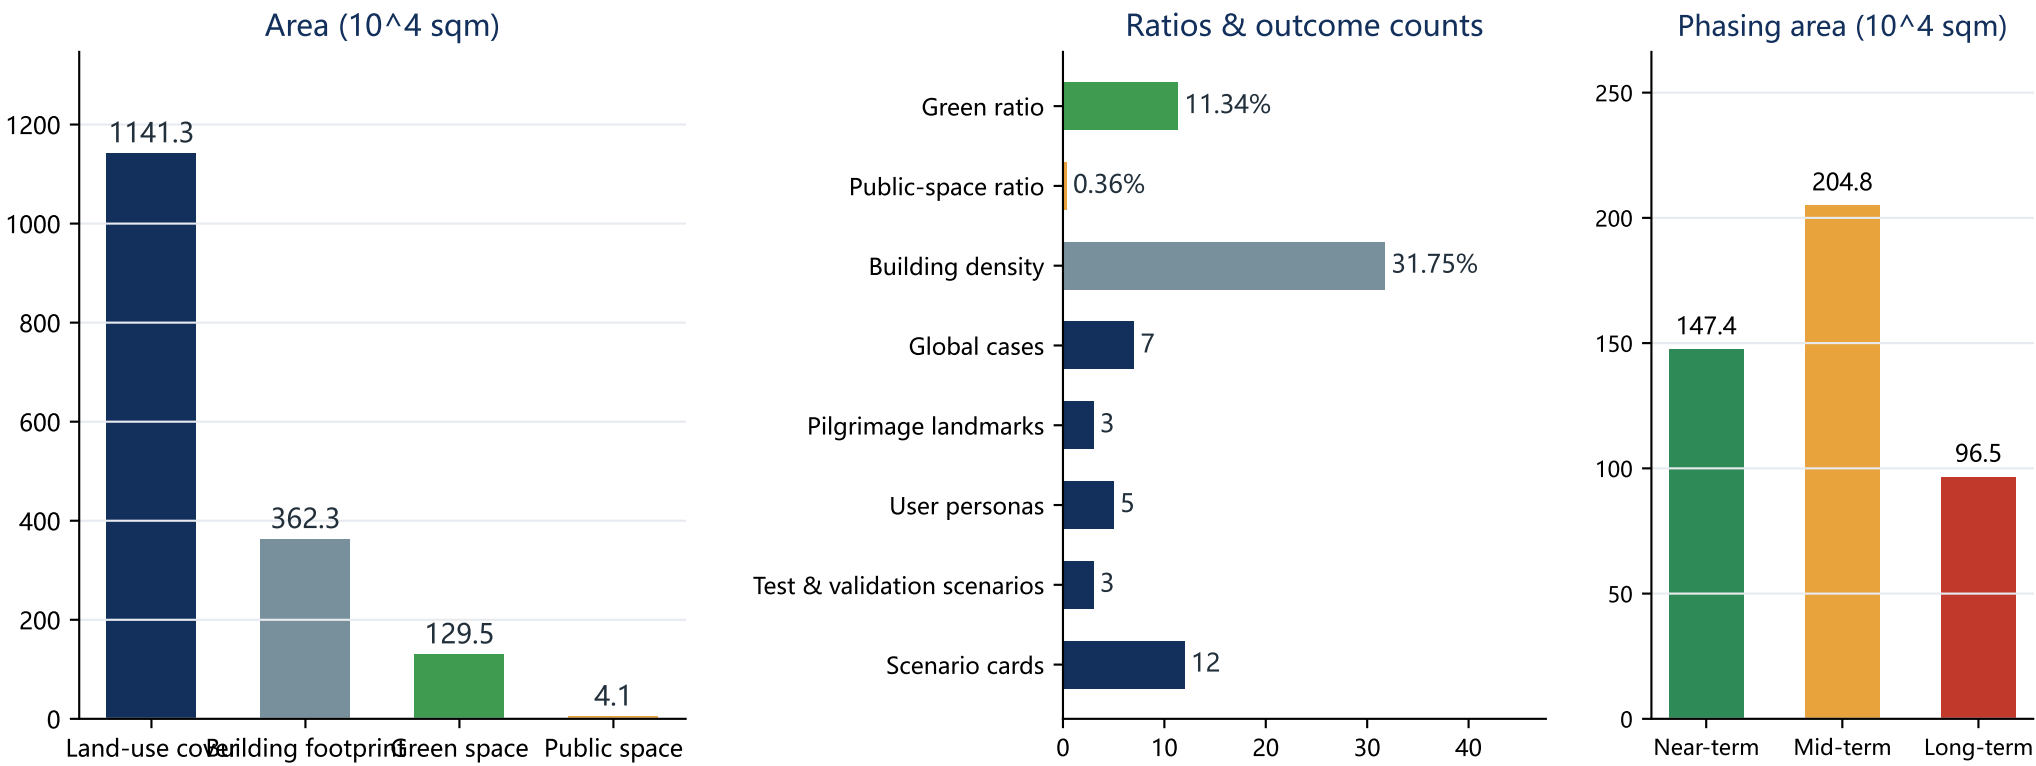

Fig.4 Signal-spine greenway links north-south; secondary and branch roads form micro-circulation; three beacon plazas anchor the public interface

All spaces and activities are open co-creation concept suggestions; they do not replace formal planning or official decisions.
Boundaries are provisional; used only for discussion and in-package self-check [source:BOUNDARY-SOURCE]

Spatial metric recomputation (EPSG:4548, provisional)

12 AI scenario cards (concept), 3 of them industry test & validation; 5 user personas; 3 AI pilgrimage landmarks.

ID	Scenario card	Signal
SC-01	Open-Source Release Hall (AI Origin)	GREEN
SC-02	Model Evaluation & Red-Team Sandbox (Zhongzhiyuan)	AMBER-TEST
SC-03	Edge-Compute Station (Signal Spine)	GREEN
SC-04	AI Slow-Traffic Navigation (Spine Greenway)	GREEN
SC-05	Dazhongsi International Roadshow Lounge	GREEN
SC-06	Qinghe Low-Carbon Innovation Corridor	AMBER
SC-07	Near-Campus Transfer Street (AI Origin)	GREEN
SC-08	Data-Elements Reception Hall (Dazhongsi)	AMBER
SC-09	AI Life-Service Model Street	GREEN
SC-10	Global AI Week Route	GREEN
SC-11	Full-Stack Model Controlled Trial (Zhongzhiyuan)	AMBER-TEST
SC-12	City-Agent Public Audit Desk (Zhongzhiyuan)	AMBER/RED-TEST

Renewal projects, phasing and risk notes

ID	Project	Phase
JZ-01	Stitch slow-traffic gaps along the signal spine	Near
JZ-02	Zhongzhiyuan Qinghe low-carbon interface	Near
JZ-03	AI Origin near-campus transfer street	Near
JZ-04	Dazhongsi station quadrant walkability	Mid
JZ-05	Three beacon plazas implementation	Mid
JZ-06	AI public services & edge-compute nodes	Mid
JZ-07	Global AI Week public route	Long

Risks & data gaps: official boundary and key-area polygons missing (does not block content scoring); regulatory controls, road redlines, ownership, municipal capacity and heritage controls a wait official attachments.

Boundary statement: all geometry is provisional_constraint; not an official redline, approval or precise-area basis; full recomputation once official polygons are released.

Compliance: compliance_matrix.json covers announcement 1.3/1.4/1.5 and agent.1-agent.6; standard_matrix.json covers all mandatory standards; design_depth_matrix.json all items complete.
