

FG-01

FIFTH GROUND JINGZHANG: ground guaranteed, roofs gated

One GROUND mainline + three TRANSFER courts + three ROOF types + three equal FALLBACKS

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

CURRENT EVIDENCE DECISION

0 / 3 roof prototypes passed all five gates

- GROUND

ground public baseline
- TRANSFER

visible state and up/down decision
- ROOF

closed until five gates pass
- FALLBACK

equal ground activity

FIVE QUALIFICATION GATES

- STRUCTURE
- FIRE
- ACCESS
- WATER
- RIGHTS + OPS

Real building/professional evidence missing -> all roofs closed -> complete ground program continues

No factual claim is made about official boundaries, real buildings, load, fire, title, operation, cost, or authorization.

BOARD CLAIM

One ground mainline, three transfer courts, three roof types, and three equal ground fallbacks. Currently 0 / 3 roofs passed all gates.

NON-NEGOTIABLE BOUNDARY

Provisional geometry supports concept and package-internal calculation only. Without real buildings or five-gate professional evidence, no roof use, approval, sponsor, or site authorization is claimed. Ground fallback is first-class public service, not an inferior substitute after roof failure.

GROUND -> TRANSFER -> 5/5 ? ROOF : FALLBACK

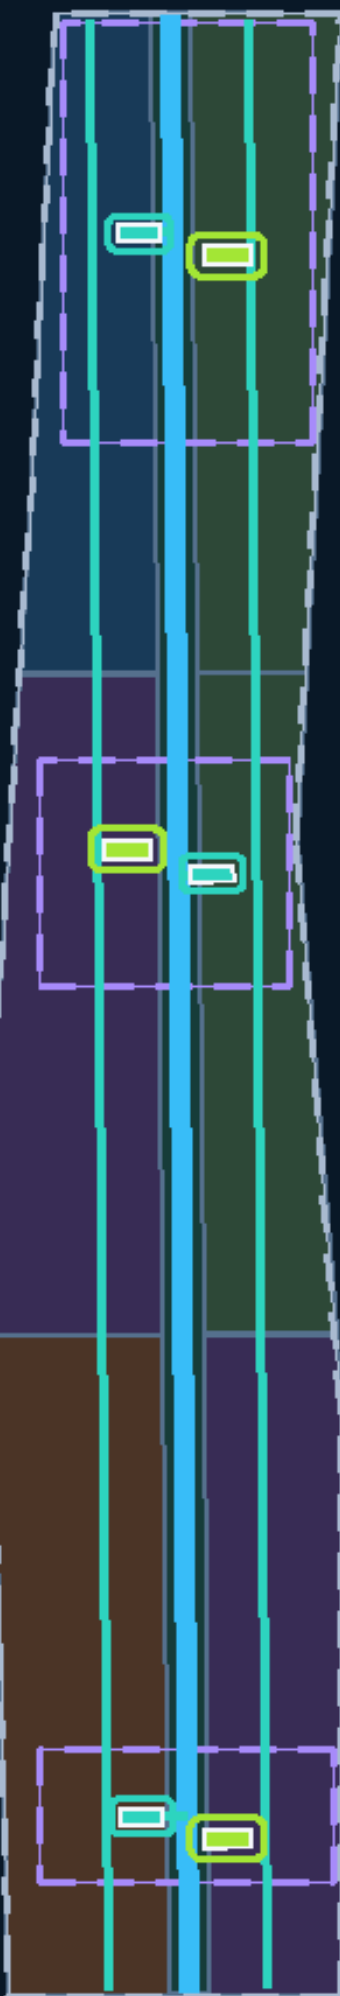

KEEP CLOSED is a valid outcome.

FG-02

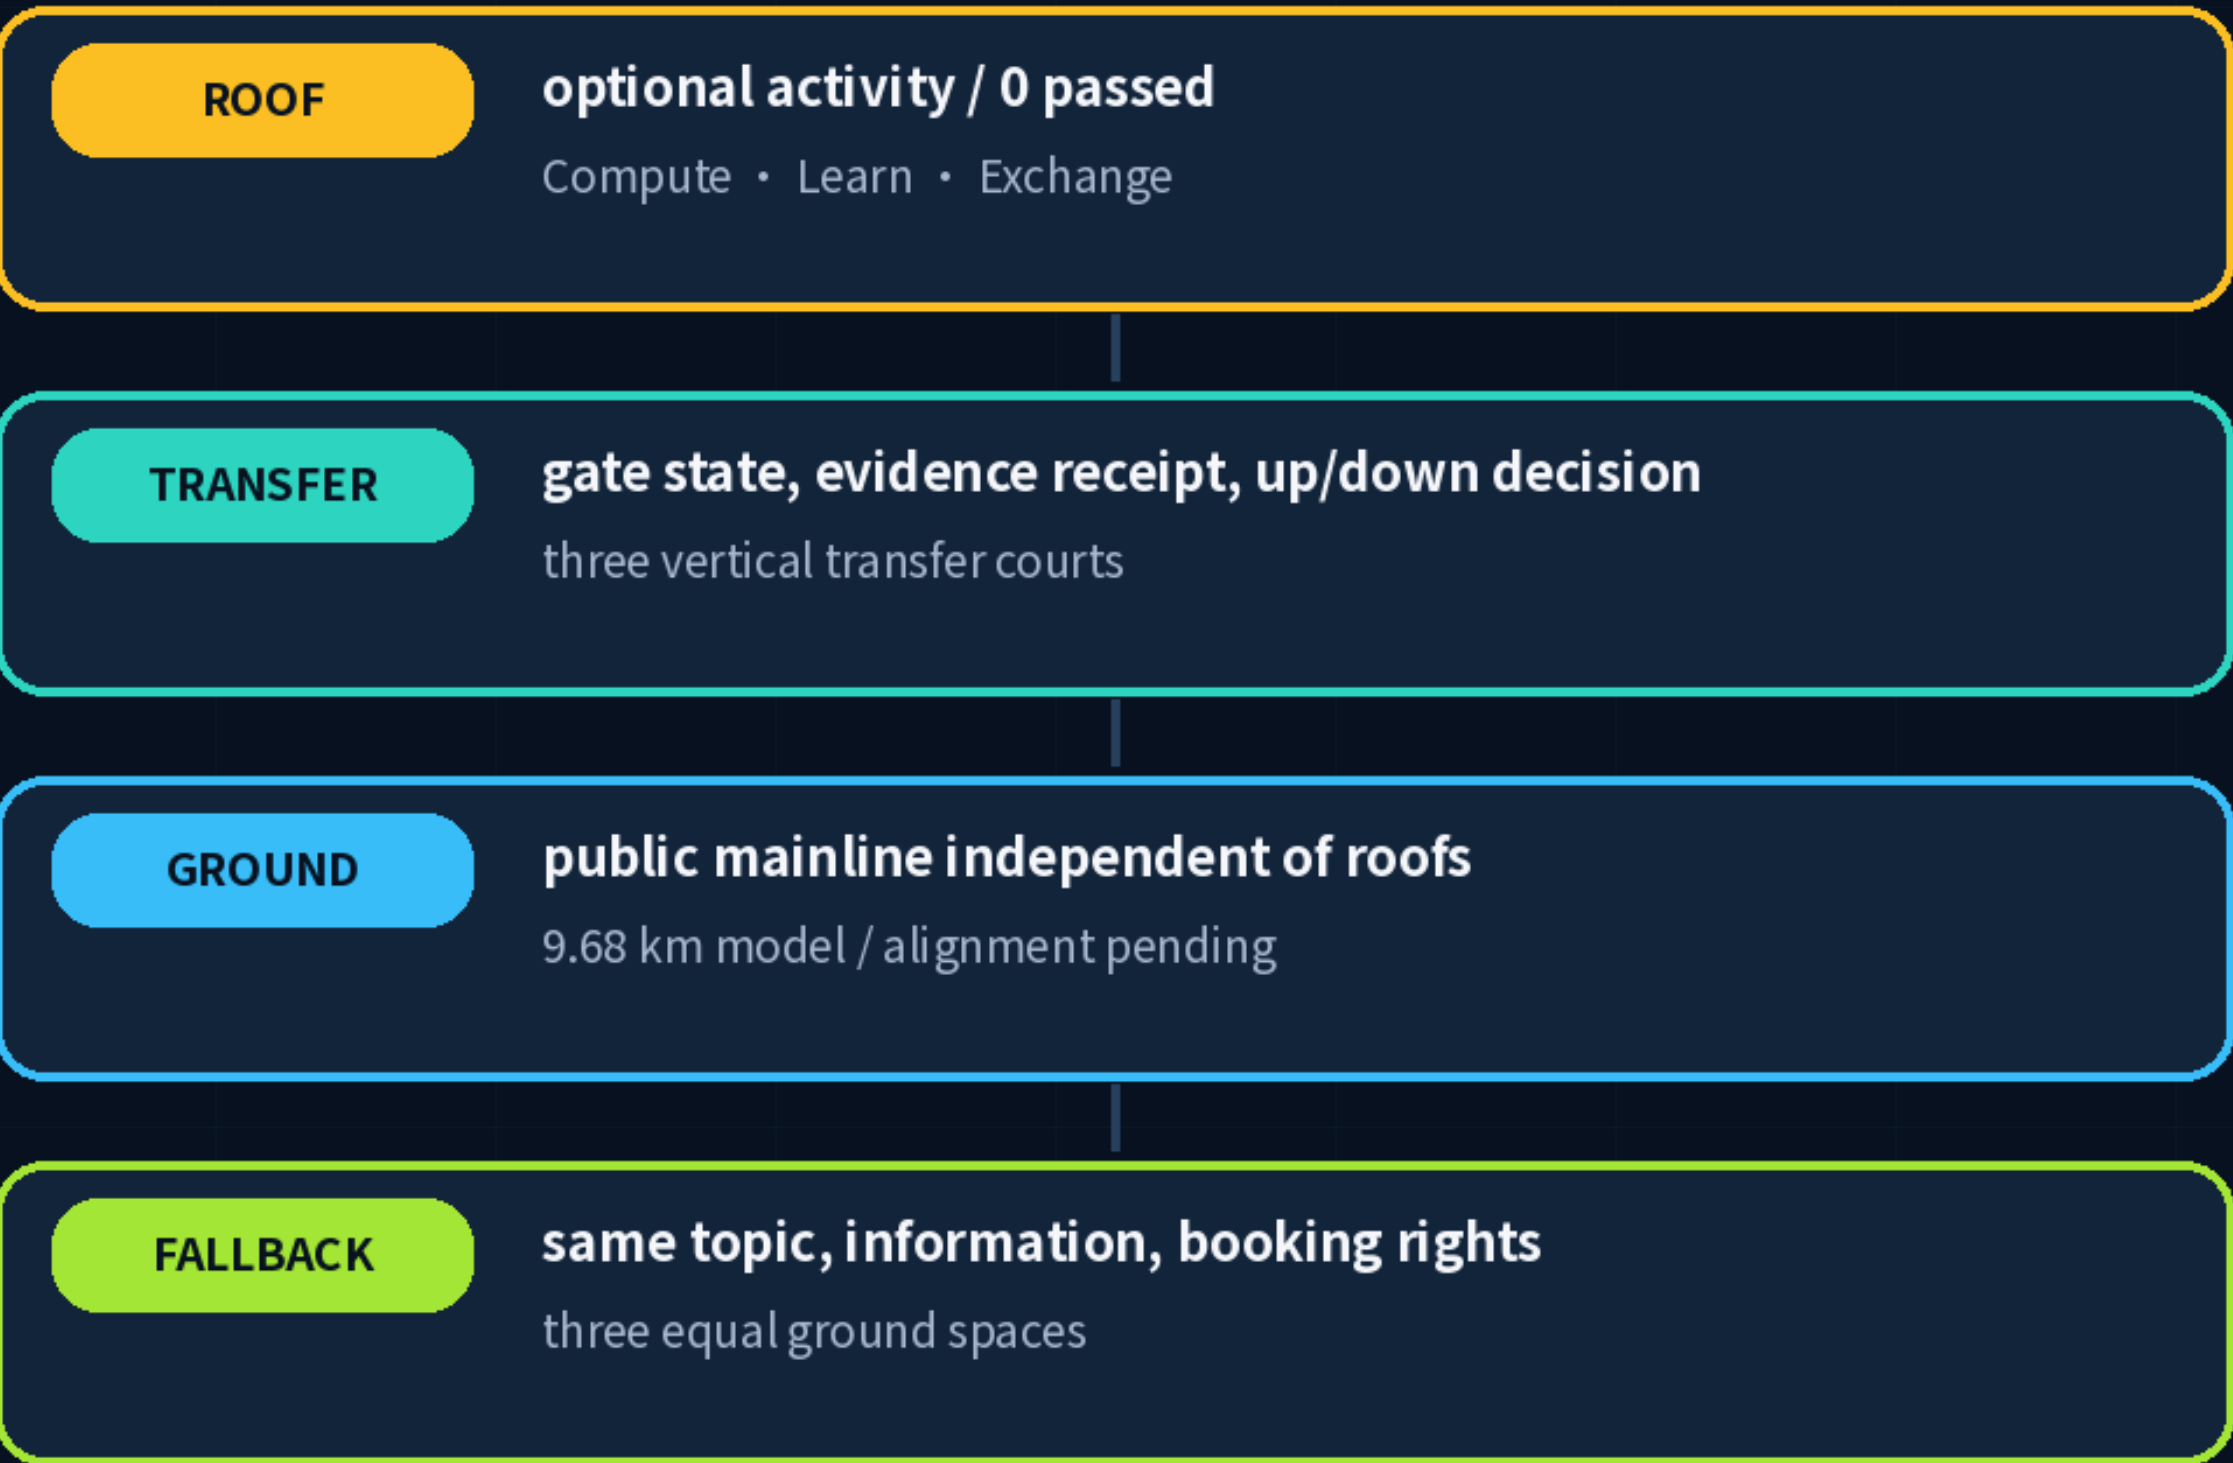

Land use is not roof eligibility: keep four levels separate

Seven seamless parcels support the ground baseline; ROOF stays an evidence-pending analysis helper

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

FOUR-LEVEL SERVICE SECTION

LAND USE CODES

- 1401 GROUND
- 0802 R&D
- 0803 CULTURE
- 0702 SERVICE
- 09 EXCHANGE

BOARD CLAIM

Land use completely covers the provisional SITE, but never equals roof eligibility; ROOF appears only as an evidence-pending activity type in constraints.

NON-NEGOTIABLE BOUNDARY

Provisional geometry supports concept and package-internal calculation only. Without real buildings or five-gate professional evidence, no roof use, approval, sponsor, or site authorization is claimed. Ground fallback is first-class public service, not an inferior substitute after roof failure.

GROUND -> TRANSFER -> 5/5 ? ROOF : FALLBACK

KEEP CLOSED is a valid outcome.

FG-03

Three zones, three roof types, three equal ground activities

Provisional key areas anchor activity types only; they prove no building, load, fire, title, operation, or authorization

NORTH

COMPUTE CANOPY

AI-tool trials / maintainer clinic

CURRENT ROOF DECISION

0 / 5 passed -> KEEP CLOSED

●

STRUCTURE

RIGHTS/OPS

NO REAL EVIDENCE

FALLBACK

GROUND EXCHANGE PLAZA

BOARD CLAIM

Structure, fire, accessibility, waterproofing/drainage, and rights/operations must all pass; any missing real evidence keeps the roof closed.

NON-NEGOTIABLE BOUNDARY

Provisional geometry supports concept and package-internal calculation only. Without real buildings or five-gate professional evidence, no roof use, approval, sponsor, or site authorization is claimed. Ground fallback is first-class public service, not an inferior substitute after roof failure.

GROUND -> TRANSFER -> 5/5 ? ROOF : FALLBACK

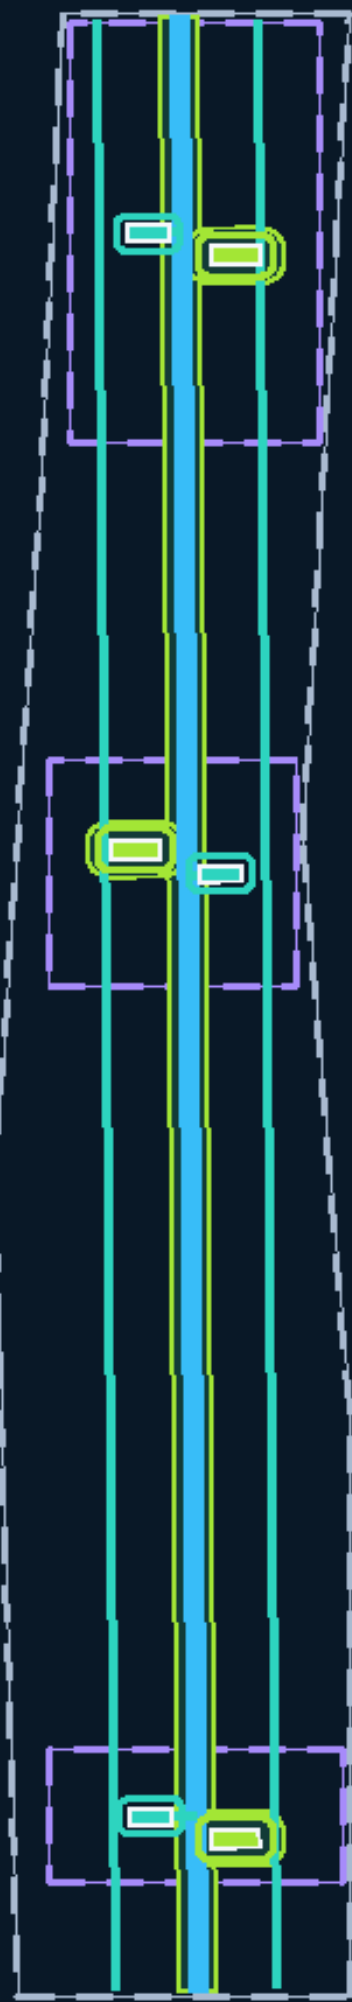

KEEP CLOSED is a valid outcome.

FG-04

Mobility and blue-green: continuity stays at grade; verticality remains reversible

No continuous aerial bridge; every transfer returns to an equal ground activity during non-pass, closure, repair, or weather

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

ONE COMPLETE PUBLIC JOURNEY

GROUND

arrive along ground mainline

TRANSFER

read five-gate state

ROOF

go up only at 5/5

FALLBACK

at 0/5 complete activity stays at grade

ZERO CONTINUOUS SKYBRIDGES

Road, transit, egress, parking, vertical transport, and municipal capacity all remain unverified.

BOARD CLAIM

Zero continuous skybridges. During non-pass, closure, repair, or weather triggers, transfer courts direct the complete activity to a ground fallback.

NON-NEGOTIABLE BOUNDARY

Provisional geometry supports concept and package-internal calculation only. Without real buildings or five-gate professional evidence, no roof use, approval, sponsor, or site authorization is claimed. Ground fallback is first-class public service, not an inferior substitute after roof failure.

GROUND -> TRANSFER -> 5/5 ? ROOF : FALLBACK

KEEP CLOSED is a valid outcome.

FG-05

Metrics are not promises: separate recomputable objects from real unknowns

The decisive number is 0: no roof passed five real-evidence gates; ground fallbacks cover all three activity types

THREE ZONES x FIVE-GATE SYNTHETIC LEDGER

NORTH	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES
CENTRAL	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES
SOUTH	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES

REAL UNKNOWNNS / NOT INVENTED

- real buildings and roofs

• structural reserve

• fire and egress

• accessible route
- waterproofing/drainage

• title and operator

• cost and schedule

• site authorization

BOARD CLAIM

All 15 gate records lack real evidence. Real buildings, load, fire, accessibility, waterproofing/drainage, title, operation, cost, and authorization all remain unknown.

NON-NEGOTIABLE BOUNDARY

Provisional geometry supports concept and package-internal calculation only. Without real buildings or five-gate professional evidence, no roof use, approval, sponsor, or site authorization is claimed. Ground fallback is first-class public service, not an inferior substitute after roof failure.

GROUND -> TRANSFER -> 5/5 ? ROOF : FALLBACK

KEEP CLOSED is a valid outcome.
