

FG-01

FIFTH GROUND JINGZHANG: ground guaranteed, roofs gated

One GROUND mainline + three TRANSFER courts + three ROOF types + three equal FALLBACKS

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

CURRENT EVIDENCE DECISION

0 / 3 roof prototypes passed all five gates

GROUND ground public baseline

TRANSFER visible state and up/down decision

ROOF closed until five gates pass

FALLBACK equal ground activity

FIVE QUALIFICATION GATES

STRUCTURE

FIRE

ACCESS

WATER

RIGHTS + OPS

Real building/professional evidence missing -> all roofs closed -> complete ground program continues

No factual claim is made about official boundaries, real buildings, load, fire, title, operation, cost, or authorization.

CORE CLAIM

One ground mainline carries the complete base program. Three transfer courts extend activity upward only on complete real evidence. Zero roofs currently passed.

EVIDENCE ENTRY

geometry/roads.geojson • simulation.json • metrics.json

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

Sources, boundaries, and what zero means

Provisional geometry is not an official alignment; zero is not physical ineligibility

FG-05

Metrics are not promises: separate recomputable objects from real unknowns

The decisive number is 0: no roof passed five real-evidence gates; ground fallbacks cover all three activity types

THREE ZONES x FIVE-GATE SYNTHETIC LEDGER

NORTH	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES
CENTRAL	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES
SOUTH	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES

REAL UNKNOWNS / NOT INVENTED

- real buildings and roofs
- structural reserve
- fire and egress
- accessible route
- waterproofing/drainage
- title and operator
- cost and schedule
- site authorization

CORE CLAIM

Every real building, load, fire, accessibility, waterproofing/drainage, title, operation, cost, and authorization fact remains unknown.

EVIDENCE ENTRY

`sources.json` • `assumptions.json` • `risk.json`

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

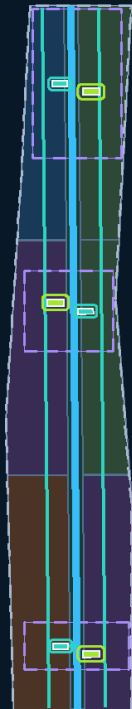

Land use does not equal roof qualification

FG-02

Land use is not roof eligibility: keep four levels separate

Seven seamless parcels support the ground baseline; ROOF stays an evidence-pending analysis helper

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

FOUR-LEVEL SERVICE SECTION

ROOF

optional activity / 0 passed

Compute • Learn • Exchange

TRANSFER

gate state, evidence receipt, up/down decision

three vertical transfer courts

GROUND

public mainline independent of roofs

9.68 km model / alignment pending

FALLBACK

same topic, information, booking rights

three equal ground spaces

09 EXCHANGE

CORE CLAIM

Seven seamless land-use polygons cover the provisional SITE. ROOF remains an evidence-pending analysis helper in constraints.

EVIDENCE ENTRY

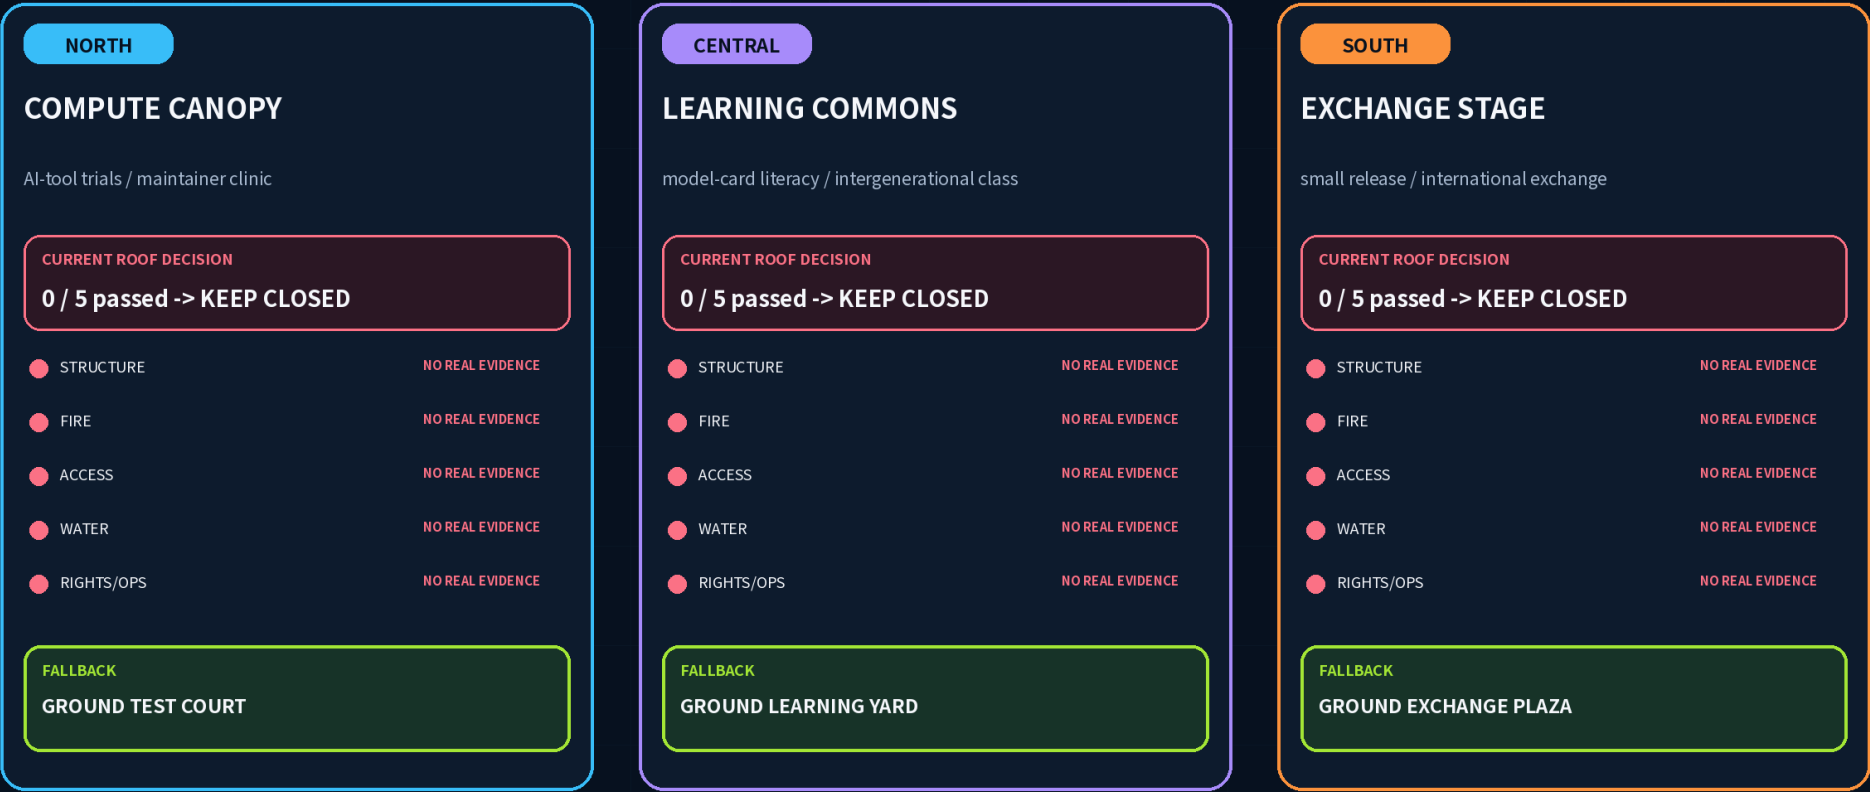

geometry/land_use.geojson • metrics.json

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

FG-03

Three zones, three roof types, three equal ground activities

Provisional key areas anchor activity types only; they prove no building, load, fire, title, operation, or authorization

CORE CLAIM

The three activity types differ, but all require five passed gates, equal ground service, closure, and exit.

EVIDENCE ENTRY

geometry/key_areas.geojson • geometry/constraints.geojson

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

FG-05

Metrics are not promises: separate recomputable objects from real unknowns

The decisive number is 0: no roof passed five real-evidence gates; ground fallbacks cover all three activity types

THREE ZONES x FIVE-GATE SYNTHETIC LEDGER

NORTH	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES
CENTRAL	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES
SOUTH	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES

REAL UNKNOWNS / NOT INVENTED

• real buildings and roofs

• waterproofing/drainage

• structural reserve

• title and operator

• fire and egress

• cost and schedule

• accessible route

• site authorization

CORE CLAIM

All 15 synthetic gate records are unpassed because real evidence is absent; each points to a complete ground fallback.

EVIDENCE ENTRY

simulation.json • sources.json

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

FG-04

Mobility and blue-green: continuity stays at grade; verticality remains reversible

No continuous aerial bridge; every transfer returns to an equal ground activity during non-pass, closure, repair, or weather

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

ONE COMPLETE PUBLIC JOURNEY

GROUND

arrive along ground mainline

TRANSFER

read five-gate state

ROOF

go up only at 5/5

FALLBACK

at 0/5 complete activity stays at grade

ZERO CONTINUOUS SKYBRIDGES

Road, transit, egress, parking, vertical transport, and municipal capacity all remain unverified.

CORE CLAIM

All cross-area continuity stays at grade. TRANSFER is a decision forecourt, not a promise of lift, stair, or roof existence.

EVIDENCE ENTRY

geometry/roads.geojson • geometry/green_space.geojson

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

Twelve AI+ scenario cards and six personas

Six industry tests + six public/cultural/operational scenarios

FG-01

FIFTH GROUND JINGZHANG: ground guaranteed, roofs gated

One GROUND mainline + three TRANSFER courts + three ROOF types + three equal FALLBACKS

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

CURRENT EVIDENCE DECISION

0 / 3 roof prototypes passed all five gates

GROUND ground public baseline

TRANSFER visible state and up/down decision

ROOF closed until five gates pass

FALLBACK equal ground activity

FIVE QUALIFICATION GATES

STRUCTURE

FIRE

WATER

RIGHTS + OPS

Real building/professional evidence missing -> all roofs closed -> complete ground program continues

No factual claim is made about official boundaries, real buildings, load, fire, title, operation, cost, or authorization.

CORE CLAIM

Every scenario has human review, stop conditions, privacy boundaries, and a ground version; roofs never monopolize essential content.

EVIDENCE ENTRY

proposal.md • compliance_matrix.json

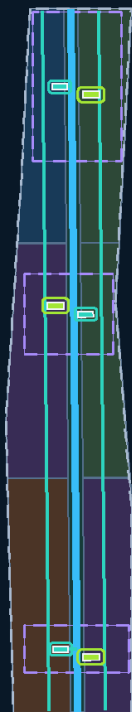

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

FG-02

Land use is not roof eligibility: keep four levels separate

Seven seamless parcels support the ground baseline; ROOF stays an evidence-pending analysis helper

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

FOUR-LEVEL SERVICE SECTION

09 EXCHANGE

CORE CLAIM

Six footprints are concept interfaces with no real-building match. Retain, repair, strengthen, or no action all require building-specific evidence.

EVIDENCE ENTRY

geometry/buildings.geojson • assumptions.json

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

Ten concept projects and reversible phasing

Ground first -> survey -> gates -> open / close / exit

FG-04

Mobility and blue-green: continuity stays at grade; verticality remains reversible

No continuous aerial bridge; every transfer returns to an equal ground activity during non-pass, closure, repair, or weather

PROVISIONAL GEOMETRY / NOT AN OFFICIAL ALIGNMENT

ONE COMPLETE PUBLIC JOURNEY

GROUND

arrive along ground mainline

TRANSFER

read five-gate state

ROOF

go up only at 5/5

FALLBACK

at 0/5 complete activity stays at grade

ZERO CONTINUOUS SKYBRIDGES

Road, transit, egress, parking, vertical transport, and municipal capacity all remain unverified.

CORE CLAIM

Remaining closed is a successful outcome; cost, sponsor, schedule, procurement, and authorization all await real data.

EVIDENCE ENTRY

geometry/phasing.geojson • spatial.json • metrics.json

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.

A reviewable concept is not an approved project

FG-05

Metrics are not promises: separate recomputable objects from real unknowns

The decisive number is 0: no roof passed five real-evidence gates; ground fallbacks cover all three activity types

THREE ZONES x FIVE-GATE SYNTHETIC LEDGER

NORTH	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES
CENTRAL	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES
SOUTH	STR NO EVIDENCE	FIRE NO EVIDENCE	ACC NO EVIDENCE	WATER NO EVIDENCE	RIGHTS NO EVIDENCE	FALLBACK CONTINUES

REAL UNKNOWNS / NOT INVENTED

- real buildings and roofs
- waterproofing/drainage

- structural reserve
- title and operator

- fire and egress
- cost and schedule

- accessible route
- site authorization

CORE CLAIM

Grantable original work uses CC-BY-4.0; third-party terms remain separate. Next comes official geometry, real buildings, and five-gate evidence, not more roof styling.

EVIDENCE ENTRY

risk.json • report/copyright_statement.md • self_check.json

CONCEPT / PROVISIONAL: no official boundary, real roof pass, engineering feasibility, operator, cost, investment, or site authorization is claimed.
