

Human-first operating proposition

Concept geometry is provisional; every extension remains subject to professional review.

Jingzhang Human City OS

From an AI showcase to a city for people | Four value chains, one reversible city release

v0.2 · EVIDENCE GATES

16 scenarios · 3 gates · audited

A

Human dignity

Retention, transition, inclusion, wellbeing

B

Machine-ready

City APIs, silicon ROW, reversible space

C

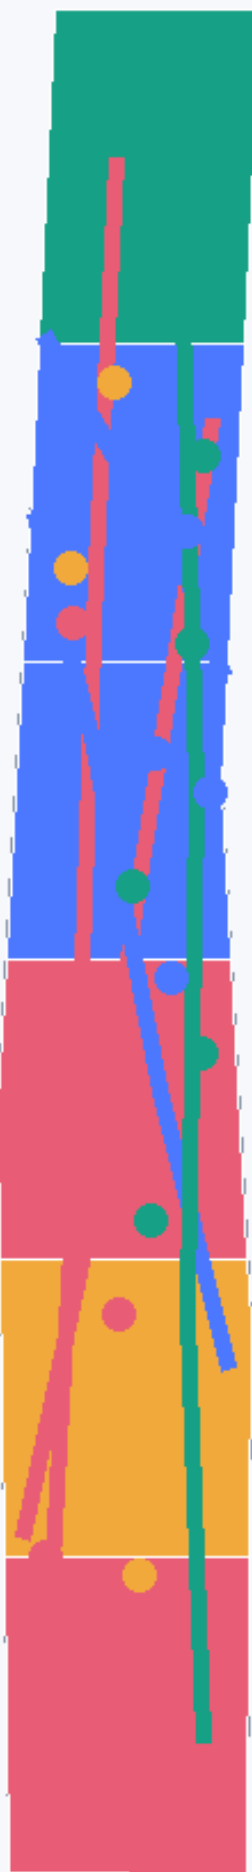

Hard constraints

Energy, climate, sandbox, data, releases

D

Spillovers

Tech, standards, knowledge, OPC, global services

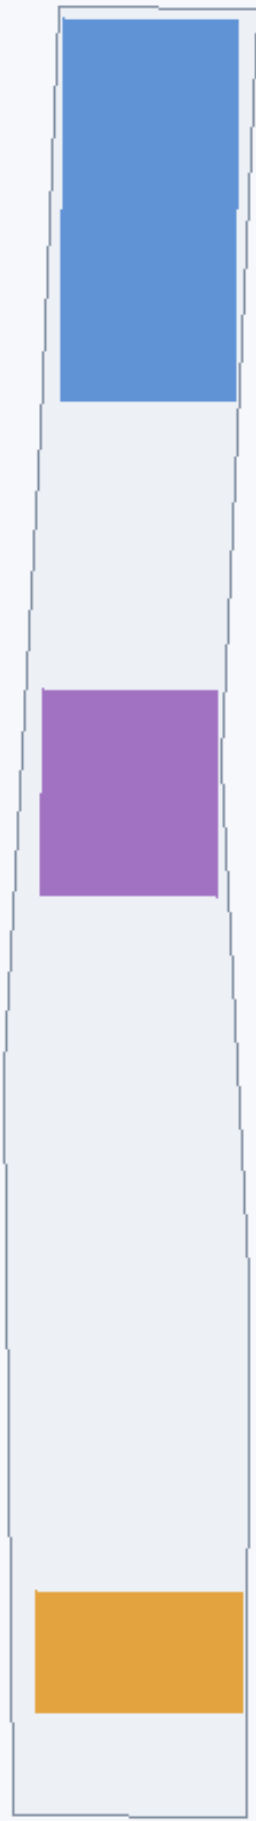

Provisional boundary for generation and design discussion only; recompute after official geometry release.

Three areas, three distinct answers

Rectangular key areas are provisional repository constraints; mechanisms and scenarios do not upgrade them to official geometry.

v0.2 · EVIDENCE GATES

3 test areas · evidence first · audited

01

Zhongzhiyuan

Embodied-AI testing + compute-energy audit + standards spillover

02

AI Origin Community

Reskilling + city API + intergenerational learning

03

Dazhongsi

Public-data authorization + global services + OPC commons

Provisional boundary for generation and design discussion only; recompute after official geometry release.

Spatial operating system

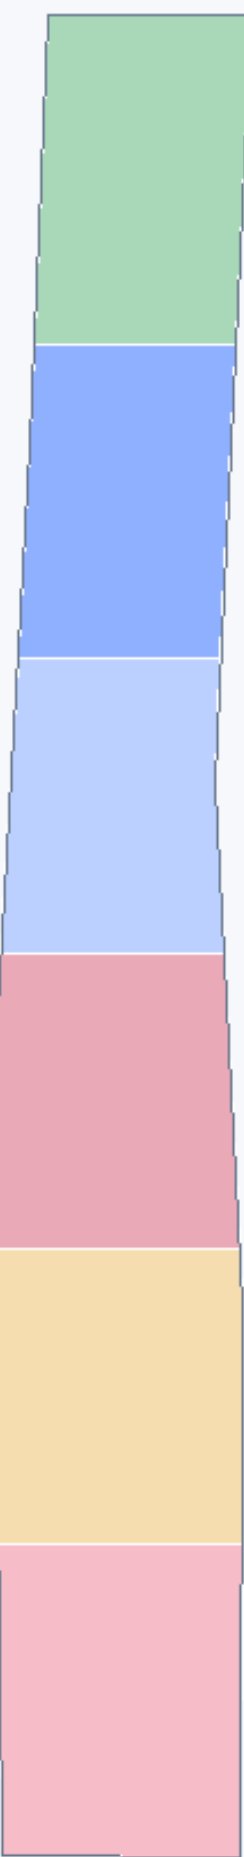

Concept geometry is provisional; every extension remains subject to professional review.

Six-layer Spatial Operating System

Statutory land use remains pending; this diagram shows conceptual functions, reversible space, and human support

v0.2 · EVIDENCE GATES

not permits · exits first · audited

Spatial allocations

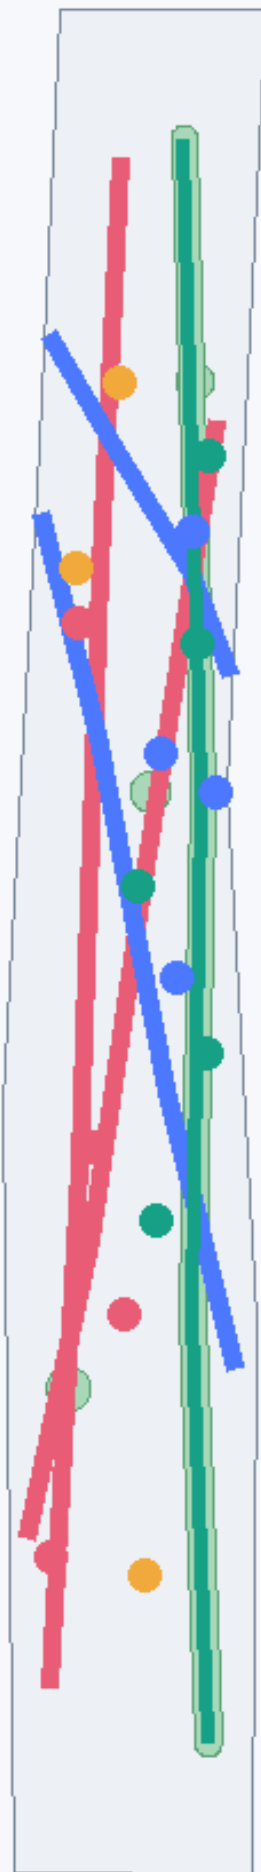

Provisional boundary for generation and design discussion only; recompute after official geometry release.

Dual human-machine mobility + blue-green resilience

All routes are functional concepts, not road redlines, flight paths, or engineering alignments

v0.2 · EVIDENCE GATES

people first · pause on risk · audited

Rules before movement

- Human-first routes
- Silicon right-of-way
- Resilience inspection
- Screen-free / sponge green
- Named accountable operator
- Insurance and incident response
- Data minimisation
- Human takeover
- Reversible pilot

Provisional boundary for generation and design discussion only; recompute after official geometry release.

Metrics and vetoable release gates

Concept geometry is provisional; every extension remains subject to professional review.

Metrics are evidence: known, unknown, reversible

Every known value is recomputed from EPSG:4548 geometry; social outcomes and energy performance stay unknown.

v0.2 · EVIDENCE GATES

metrics unchanged · unknowns retained

4

Human-first nodes

4

Machine-city nodes

6

Test scenarios

3

City releases

18.3%

Retention support area

15.1%

Reversible space

Must remain unknown

Resident retention rate

No household baseline

Operational PUE

No compute design or metering

Recovered heat

No heat demand or network

Provisional boundary for generation and design discussion only; recompute after official geometry release.

v0.2 CITY RELEASE GATES

A conceptual evidence protocol. It does not grant permission, confirm delivery, or change provisional geometry.

01

v0.1 · OBSERVE

Publish boundaries and human channels; receive objections.
Evidence: walk-through + gap ledger.
Pause: unconsented data or no human alternative.

CONCEPT ONLY

02

v0.2 · REVERSIBLE

Limit place, time, data, and accountability.
Evidence: authorization, metering, calibration, review.
Pause: safety event, unauthorized data, or barrier.

CONCEPT ONLY

03

v1.0 · REVIEWED

Re-review each extension; publish limits and withdrawals.
Evidence: health check, release note, reviewable drafts.
Pause: unverifiable evidence or harmed rights.

CONCEPT ONLY

NON-NEGOTIABLES

Human takeover · authorization and professional review · public objection and explanation · pause, withdrawal, and full recalculation when official constraints arrive

Source: v0.2 release-gate ledger + scenario cards · provisional spatial basis

v0.1 OBSERVE

human channels
objection & gap ledger

v0.2 REVERSIBLE

four limits
takeover & evidence

v1.0 REVIEWED

re-review every extension
publish withdrawals
