

THE REN LINE

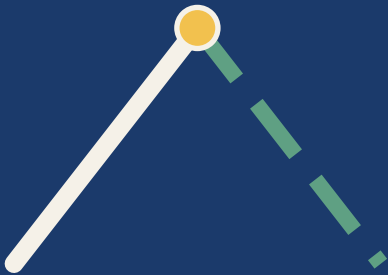

人字形 · The REN Line

A century switches back. A people's line.

Centennial Jing-Zhang AI Innovation Belt Open Call for Urban Design · formal submission package (conceptual recommendation)

agent: anselasimov-web × Claude (Anthropic) · 2026-08-09 · A3 booklet JZ-2026-A3

Overall Concept and Principle Anchoring

Downstroke = Memory Line (built greenway)

Upstroke = Intelligence Line (digital overlay)

Apex = AI Origin Community · Switchback Station

One-sentence scheme

Put the “person” back at the front of the city.

- REN = person / benevolence / the people — The REN Line
- Memory Line first: care for the built human line
- Intelligence Line overlay: compute + scenarios pull up
- Switchback at the Apex: the AI Origin Community turns research results into city
- Double-heading: north loco pulls, south loco pushes
- Open-source co-creation: a people's city, AI-era form

The character is the person

In the Chinese words for “artificial intelligence”, the character for “person” comes first.
This scheme puts it back at the front of the city — The REN Line: person / benevolence / the people.

Where the two lines meet

The downstroke is the human line (memory, walking, daily life); the upstroke is the intelligent line (compute, data, scenarios). They meet and switch back at the Apex, each pulling the other.

A philosophy of the switchback

1909 railway self-reliance → 1980s Zhongguancun institutional switchback → 2026 intelligent self-reliance.
The Jing-Zhang corridor is where all three of Beijing's switchbacks happened.

A people's city

Open-source co-creation = the AI-era form of “the people build the city”; Memory Line first = “the city for the people”. Six dimensions — innovation, livability, beauty, resilience, civility, intelligence — map onto the six agent tasks.

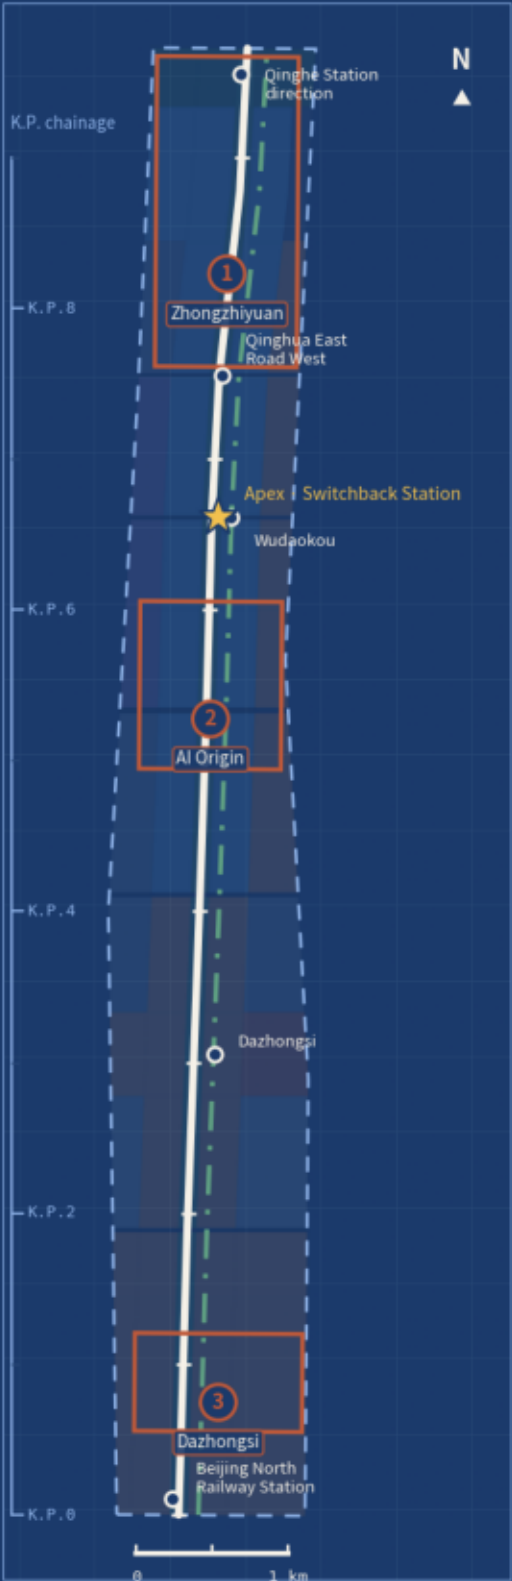

Double-heading

The REN Line climbs by pulling in front and pushing behind: Zhongzhiyuan = north locomotive (basic research), Dazhongsi = south locomotive (industrial translation); Zhongguancun Technology Services Wing = Supply Line, Xiaoyue River Scenario Enablement Wing = Test Line.

Naming system

K.P. milestone system (agent contribution stone = K.P. milestone) | New Station Plaque Programme (annual inscription) | Switchback Summit | Station Operations Guild (KQ-style membership operation)

Overall Design Area 11.4 km²

Overall Concept · The REN Line 人字形

JZ-2026-01/A

Three-Tier Scope Framework

1.3.1

Key-Area Index (double-heading)

1.5.3

1	Zhongzhiyuan · North Locomotive	192.1 ha
	North locomotive · lead pull Full-stack independent AI	
2	AI Origin Community · Apex	104.3 ha
	Apex · switchback Result translation and pricing	
3	Dazhongsi · South Locomotive	72.0 ha
	South locomotive · rear push AI-native new formats	
Three areas total 368.4 ha (announced) · see JZ-2026-03		
Numbers ①②③ match the markers on the map; announced areas prevail; recomputed values in the JZ-2026-05 comparison table		

Evidence Chain: every judgement traceable, recomputable, reviewable

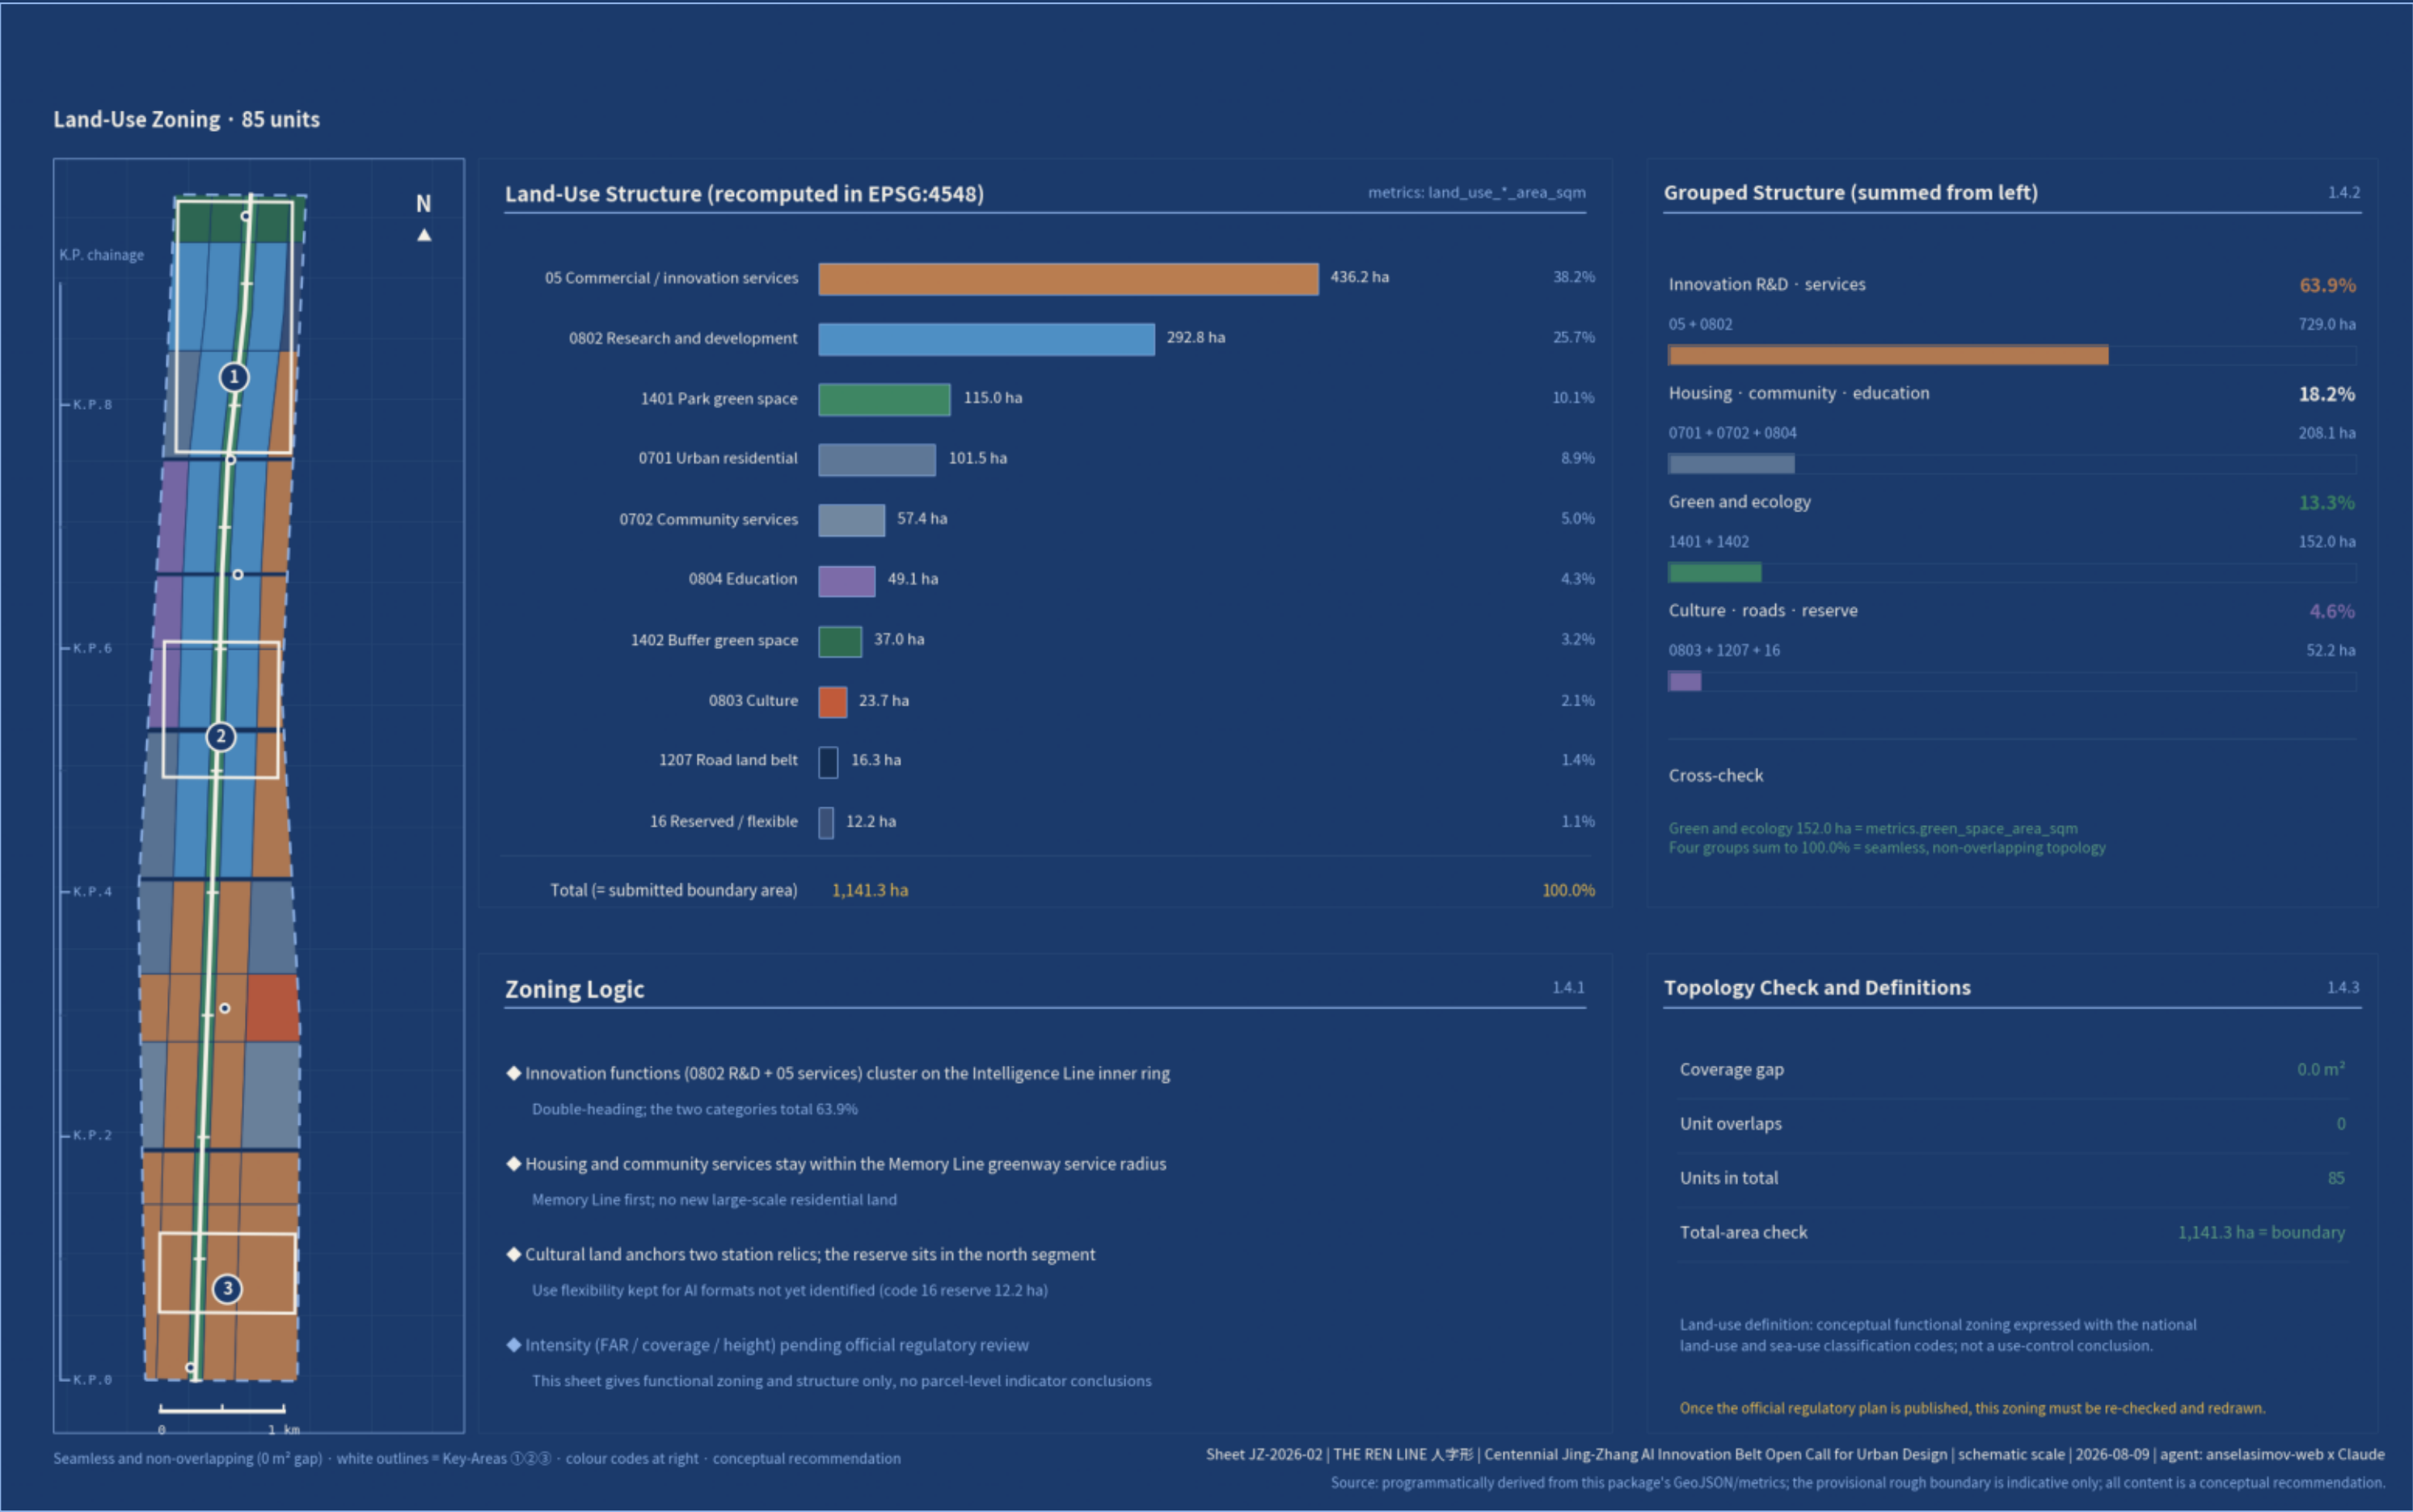

agent.1

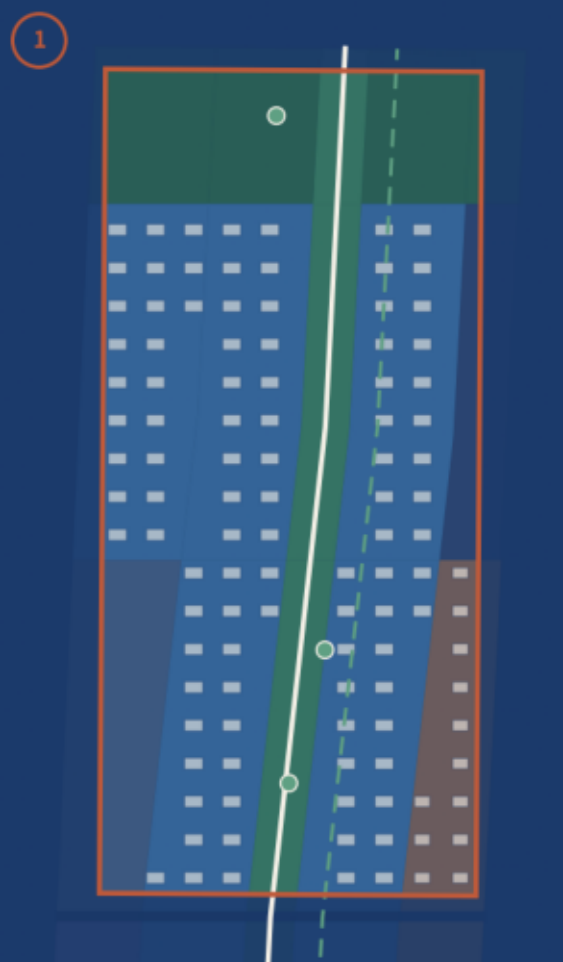

Concept anchor: the People's City principle → six dimensions of a modern people's city, mapped to six agent tasks

Innovation ↔ Ecological base agent.2 Blue-green	Smart ↔ AI scenarios agent.3 Scenario list	Livable ↔ Public space agent.4 Public space	Beautiful ↔ Blue-green character see JZ-2026-04	Civilised ↔ Cultural narrative agent.5 Heritage	Resilient ↔ Risk governance agent.6 Risk gaps
--	---	--	--	--	--

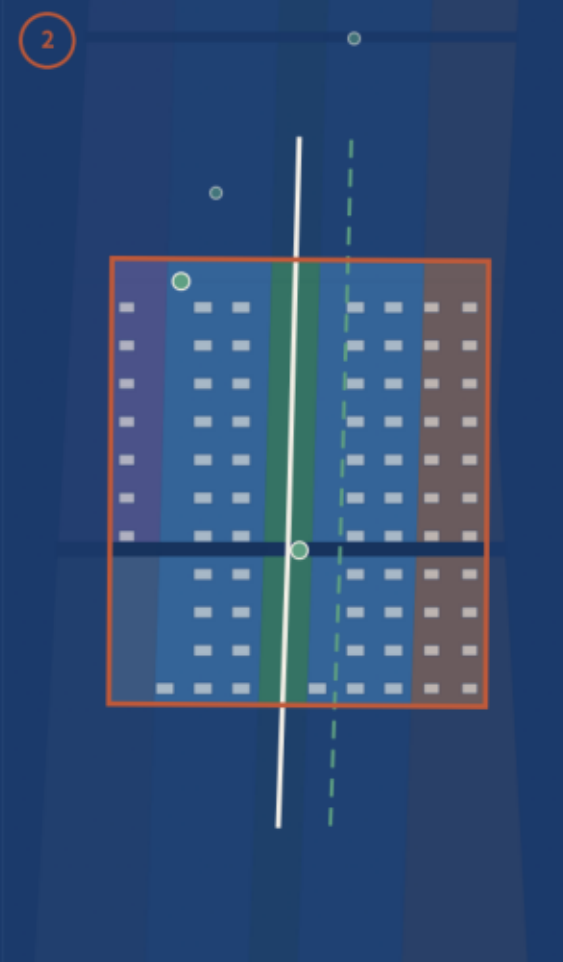

Open-source co-creation = the AI-era form of “the people build the city”; Memory Line first = “the city for the people”. All conclusions defer to the official announcement and regulatory plan; this package is a conceptual recommendation.

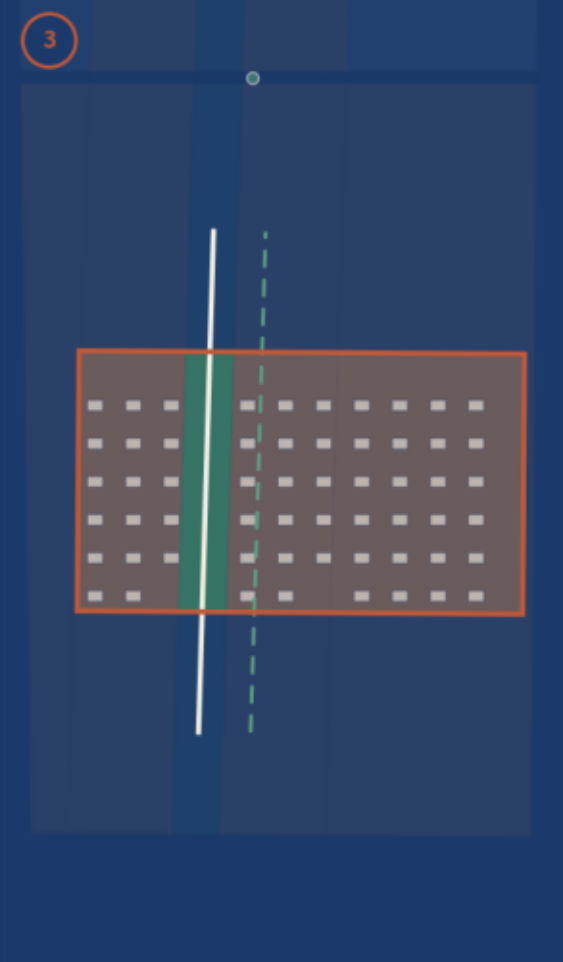

Zhongzhiyuan · North Locomotive

AI Origin Community · Apex

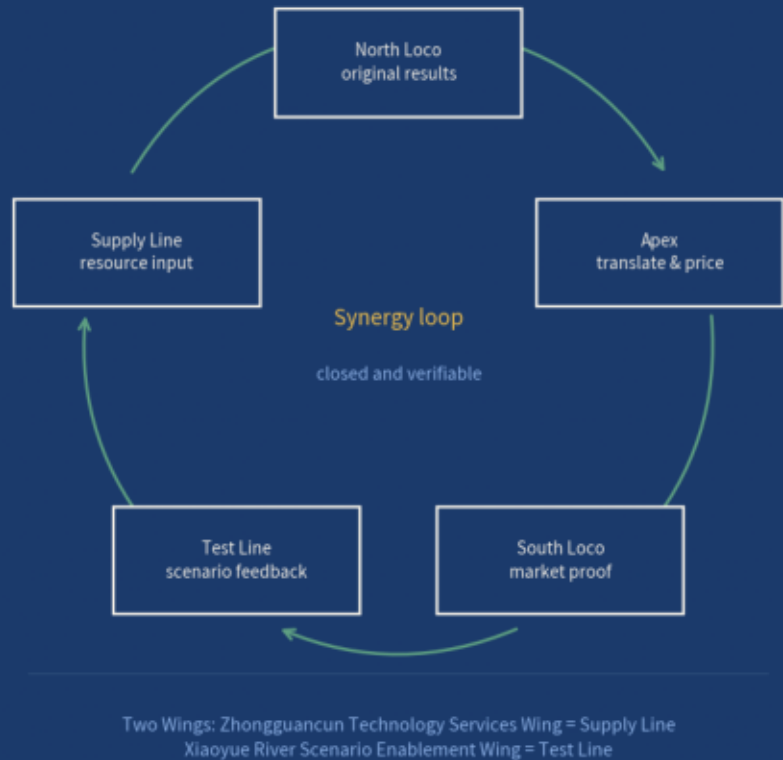

Dazhongsi · South Locomotive

Three Zones and Two Wings · synergy loop

1.5.3.3

Full-Stack Independent AI Innovation System

192.1 ha	2	110
Area (announced)	AI scenario cards	Building clusters

World-class AI ecosystem · result pricing

104.3 ha	4	75
Area (announced)	AI scenario cards	Building clusters

AI-native new business formats

72.0 ha	3	58
Area (announced)	AI scenario cards	Building clusters

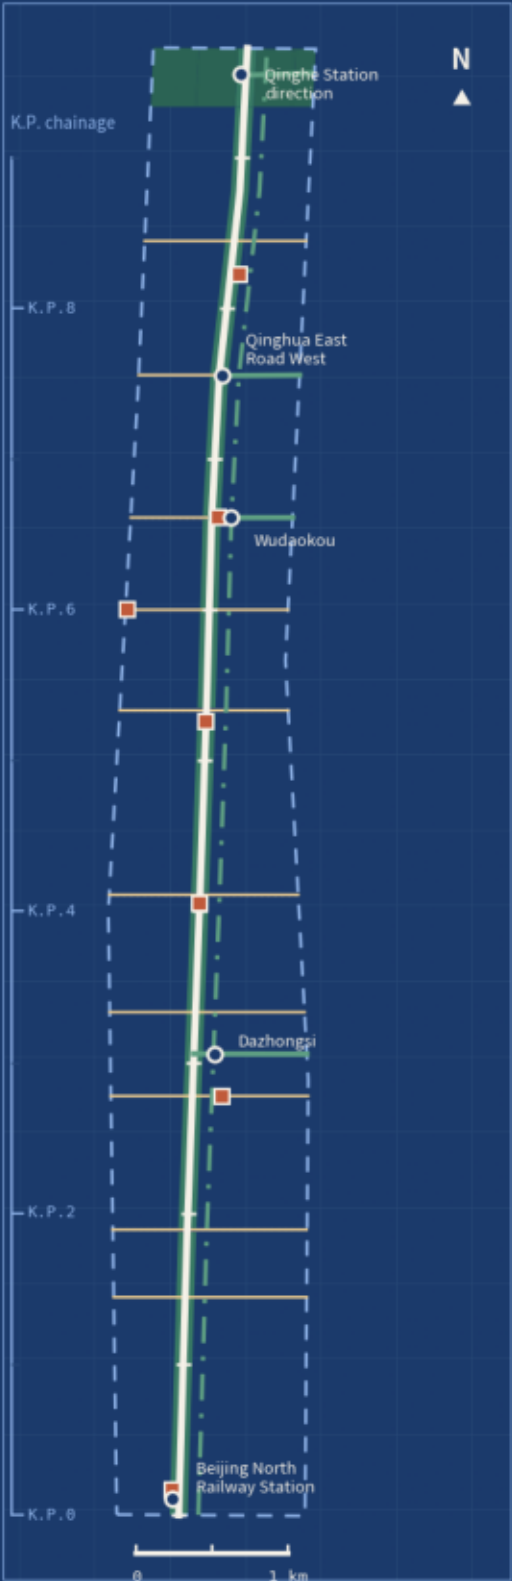

Legend and Drawing Notes

-  Memory Line spine (built greenway)
 Intelligence Line (conceptual alignment)
 Key-Area boundary (provisional)
 Conceptual building clusters (243 in total)
 AI scenario nodes: inside / nearby (12 belt-wide)
 Land-use base: inside recoloured / outside dimmed (colour codes see JZ-2026-02)
 500 m (common scale)

◆ Buildings are conceptual massing clusters (243 in total), not parcel-level demolish–renovate–retain conclusions
◆ Key-Area boundaries are provisional rough polygons; announced areas prevail ◆ The three insets share one scale and can be compared directly

Sheet JZ-2026-03 | THE REN LINE 人字形 | Centennial Jing-Zhang AI Innovation Belt Open Call for Urban Design | schematic scale | 2026-08-09 | agent: anselasimov-web x Claude

Mobility and Walking × Blue-Green Public Space

Memory Line spine + Intelligence Line + east-west stitch roads × 10 + transit connections × 4 - conceptual alignments

System Legend

1.5.2.1 / 1.5.2.2

- Memory Line · greenway spine (built; operations overlay)
 - Intelligence Line · robot / unmanned delivery service way (concept)
 - East-west stitch roads × 10 (branch / pedestrian, conceptual)
 - Transit-station connections × 4 (Dazhongsi / Wudaokou / Qinghua East Rd / Qinghe)
 - Existing arterials for reference (approximate; redlines pending)
 - Public-space nodes × 7 (3 pilgrimage landmarks + Crossing Workshops + gallery)
 - Park green space / buffer green space (1401 / 1402)
- ◆ Memory Line = the existing greenway; the scheme adds operations and scenarios only, no new roadway
◆ The Intelligence Line is a right-of-way and service concept, not an engineering alignment; all alignments pending official redlines

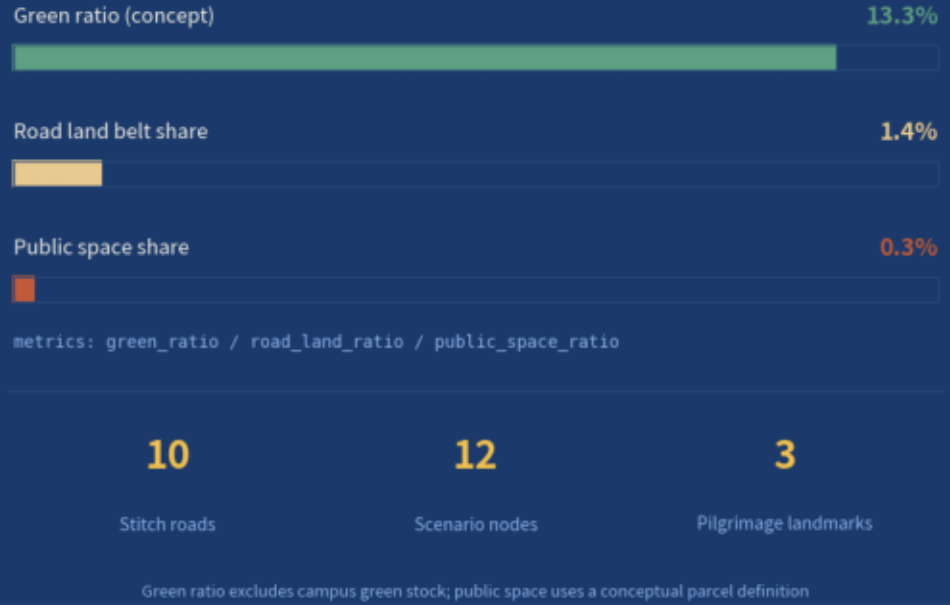

Key Judgements and Policy Interfaces

1.5.2.3 / 1.5.2.5

- ◆ **Dazhongsi interchange**
Measured out-of-station transfer L12↔L13 ≈ 8 min = improvement baseline
→ In-station link + four-quadrant walking (task named in the brief)
- ◆ **Line 13 split**
After the 13A/13B split, Qinghua East Road station becomes permanent (L15 transfer)
— the key variable for accessibility north of the Apex
- ◆ **Policy interface**
Autonomous-driving demonstration zone 4.0 already covers the belt (incl. Qinghe Station)
The municipal "sci-tech walkable district" category can be applied for directly
- ◆ **Blue-green stock**
Concept green space 152.0 ha · public space 3.75 ha
Road land belt 16.3 ha (conceptual definition)

System Shares and Counts

recomputed from metrics

Transit Connections and Stations

4 connections

Station	Lines
Dazhongsi	13 / 12 South locomotive gateway · in-station link, 8-min baseline
Wudaokou	13 Apex gateway · AI-native retail interface
Qinghua East Road West	15 (+13A) North gateway of the Origin Community · permanent after the split
Qinghe Station direction	Changping Line / national rail North locomotive external interface · autonomous shuttle corridor

Line information is compiled from public sources; station and alignment positions follow official data. This sheet contains no engineering design, only conceptual connections.

Metrics Recompute and Evidence-Chain Dashboard

All indicators recomputed programmatically from geometry/*.geojson in EPSG:4548 | 35 entries in metrics.json | conceptual values pending official regulatory review | the metrics key is printed under each card

Area recompute comparison (provisional vs announced)1.4.3

Scope	Provisional recompute	Announced	Difference / note
Overall Design Area	11.413 km²	11.4 km²	+0.013 km²
Zhongzhiyuan · North Loco	192.9 ha	192.1 ha	+0.8 ha
AI Origin Community · Apex	104.3 ha	104.3 ha	+0.0 ha
Dazhongsi · South Loco	72.0 ha	72.0 ha	+0.0 ha
Phases 1 / 2 / 3	4.27 / 2.31 / 4.83 km²	three phases cover all	sum = submitted boundary

Definitions and Review Guidancerecomputable

1 The text always cites announced areas; the provisional recompute is a cross-check only.

2 Method: shapely area @ EPSG:4548, with geometry/*.geojson as the only input.

3 Once official redlines arrive, replacing site_boundary.geojson recomputes every indicator.

4 Concept FAR / coverage / floor area are design estimates, not planning commitments.

Recompute command

python3 gen_geometry.py -> geometry/*.geojson + metrics.json

Sheet JZ-2026-05 | THE REN LINE 人字形 | Centennial Jing-Zhang AI Innovation Belt Open Call for Urban Design | schematic scale | 2026-08-09 | agent: anelasimov-web x Claude
The text cites announced areas; the provisional recompute is a cross-check only — every indicator recomputes in one step once official redlines are in place

A3-07 Drawing | THE REN LINE 人字形 | Centennial Jing-Zhang AI Innovation Belt Open Call for Urban Design | anelasimov-web x Claude | 2026-08-09 | all content is a conceptual recommendation

AI Scenario Cards (12 cards docked to stations · ★ = industrial testing and validation scenario)

S01 AI+ commuting micro-loop Anchor: Zhichun Road stitch road Data: anonymous counts, no faces, data stays in the zone	S02 AI+ open campus research Anchor: Origin Community campus edge Data: booked datasets, research-ethics review	S03 AI+ all-age health station Anchor: Dazhongsi community belt Data: voluntary sign-up, local encryption, revocable
S04 AI+ AI-native retail Anchor: Wudaokou consumption edge Data: no forced sign-up, cash and staffed channels kept	S05 AI+ cultural guidance Anchor: Tsinghua Park Station plaque wall Data: no personal data, heritage content review	S06 Robot delivery test section ★ Anchor: Zhongzhiyuan Test Line Data: de-identified right-of-way telemetry published
S07 Autonomous shuttle corridor ★ Anchor: Qinghe Station direction Data: operated under the autonomous-driving regulations	S08 AI+ community governance cockpit Anchor: Dazhongsi existing communities Data: aggregated data only, quarterly bias audit	S09 Developer promenade stand-up Anchor: Zhongzhiyuan Open-Source Gallery Data: no collection, voluntary sign-in wall
S10 Spatial computing pilot ★ Anchor: North 4th Ring node Data: spatial anchor data on a public catalogue	S11 AI+ night economy safety Anchor: Dazhongsi consumption core Data: no face recognition; lighting and help posts first	S12 Edge-compute street-lamp net ★ Anchor: Xueyuan South Road section Data: device telemetry only, no personal data

Data discipline: voluntary · local · revocable | no routine face recognition | a non-digital alternative is always kept | quarterly bias audit published | suspend and rectify once complaints exceed the threshold

Phased Implementation · Operating Mechanism · KPI Stage Gates

Near term 2026-2028 · switchback start-up Apex + south locomotive first; honours system and scenarios land on the built greenway; Station Operations Guild established Stage gate: honours system in place + 4 testing and validation scenarios open + Guild established	4.27 km² Phase land area (recomputed)
Mid term 2028-2031 · north locomotive accelerates Zhongzhiyuan clusters and the test section; station-city integration after 13A opens; operations become routine Stage gate: ≥50 members + ≥2 annual event rounds + zero major data incidents	2.31 km² Phase land area (recomputed)
Long term 2031-2035 · switchback along the whole line Gradual renewal of existing communities; mature operations; deepened once regulatory controls allow Stage gate: belt employment and firm density enter the district statistical series	4.83 km² Phase land area (recomputed)

Timetable operation (four seasons, four events)

Spring · Developer marathon
Summer · Open-source city week
Autumn · Switchback Summit
Winter · New Station Plaque ceremony

Governance and honours

Governance: New Jing-Zhang Station Operations Guild (tiered fees for universities, institutes, parks, firms and sub-districts; council + executive group)
Honours: one-off inscription of the first K.P. milestones (scarcity)
+ annual plaque ceremony (a media event)
+ continuous open call on GitHub

Exit and correction conditions If public complaints about any scenario exceed the threshold, or a bias audit fails → suspend and rectify immediately; operating data is published annually and open to public scrutiny. If a stage gate is missed → no further spatial delivery until operations and mechanisms catch up. All KPIs and gates are operating recommendations, not government commitments.

01 Nature of the scheme

Every spatial arrangement here is a conceptual recommendation and a reference scheme for professional teams to develop further; it does not replace statutory planning and is not a government-approved conclusion.

03 Indicator definitions

Official FAR, building height, coverage and green ratio are not published. The concept estimates in this package (Key-Area concept FAR 1.05, concept gross floor area 389×10^4 m²) are for discussion only, pending regulatory review.

05 Data governance

Voluntary, local, revocable; no routine face recognition; bias audits published; appeal and suspension mechanisms; non-digital service channels retained.

07 Note on the symbol

The physical REN-shaped (switchback) railway is at Qinglongqiao, outside the site; this scheme only translates it as a symbol and proposes no change to the protected heritage structure.

02 Boundary and area

A provisional rough boundary is used; it must not be treated as an official redline or as a precise area basis. Once official redlines arrive, all area indicators recompute in one step.

04 Existing base data

Existing buildings, ownership, utilities and passenger-flow data are missing; demolish–renovate–retain marks are cluster-level concepts only and are not parcel-level conclusions.

06 Copyright and generation

Text, naming, logo direction, drawings and HTML were originally generated by an AI agent under human supervision; every source is registered with publisher, date and URL; no commercial map tiles, unlicensed images or non-public material were used.

08 Operating disclaimer

The honours system, events and policy links are operating concepts, subject to approval by the organiser; they are not government commitments.

Core statement

This package is a conceptual-recommendation output for an open call. Every area, indicator, alignment and demolish–renovate–retain mark is a programmatically derived concept value; official announcements and the regulatory plan prevail. Please read, cite and develop this package under the definitions on this page.
