Jing-Zhang Heritage + AI Urban-Intelligence Governance — A3 Design Booklet (concept)

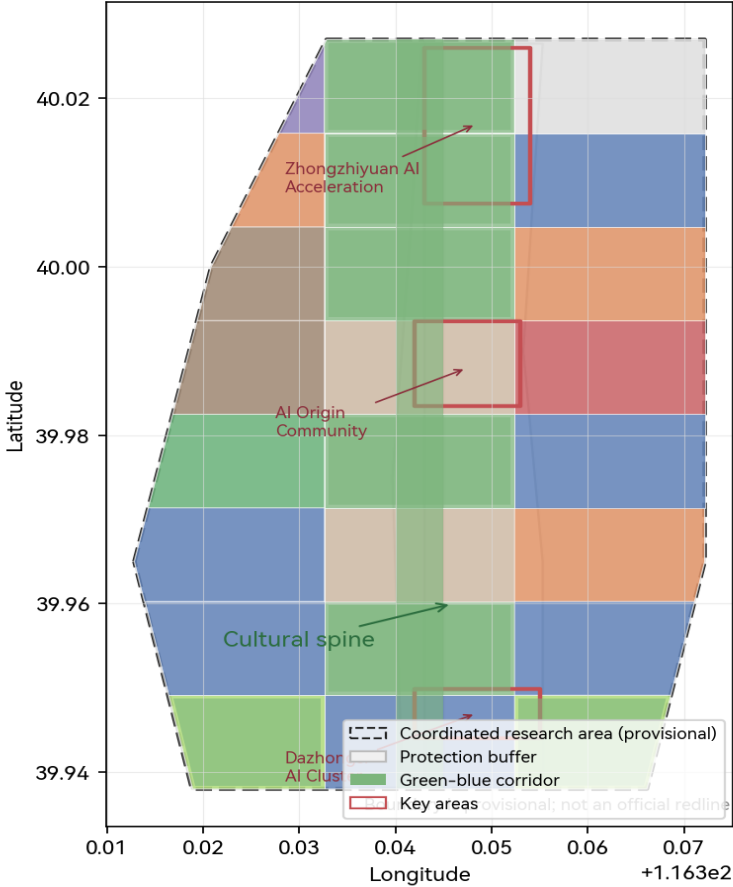

PROVISIONAL concept; boundary is NOT an official redline; plot-level & metrics are design directions; recompute after official data.

## 1. Design Basis & Three-Level Scope

Concept responding to the international Jing-Zhang AI Innovation Belt urban design call. Three-tier scope: research  $\approx 43.6\text{km}^2$ , core design  $\approx 11.4\text{km}^2$ , key areas  $\approx 368.4\text{ha}$ . Denominator mapping in metrics.json scope\_denominators.

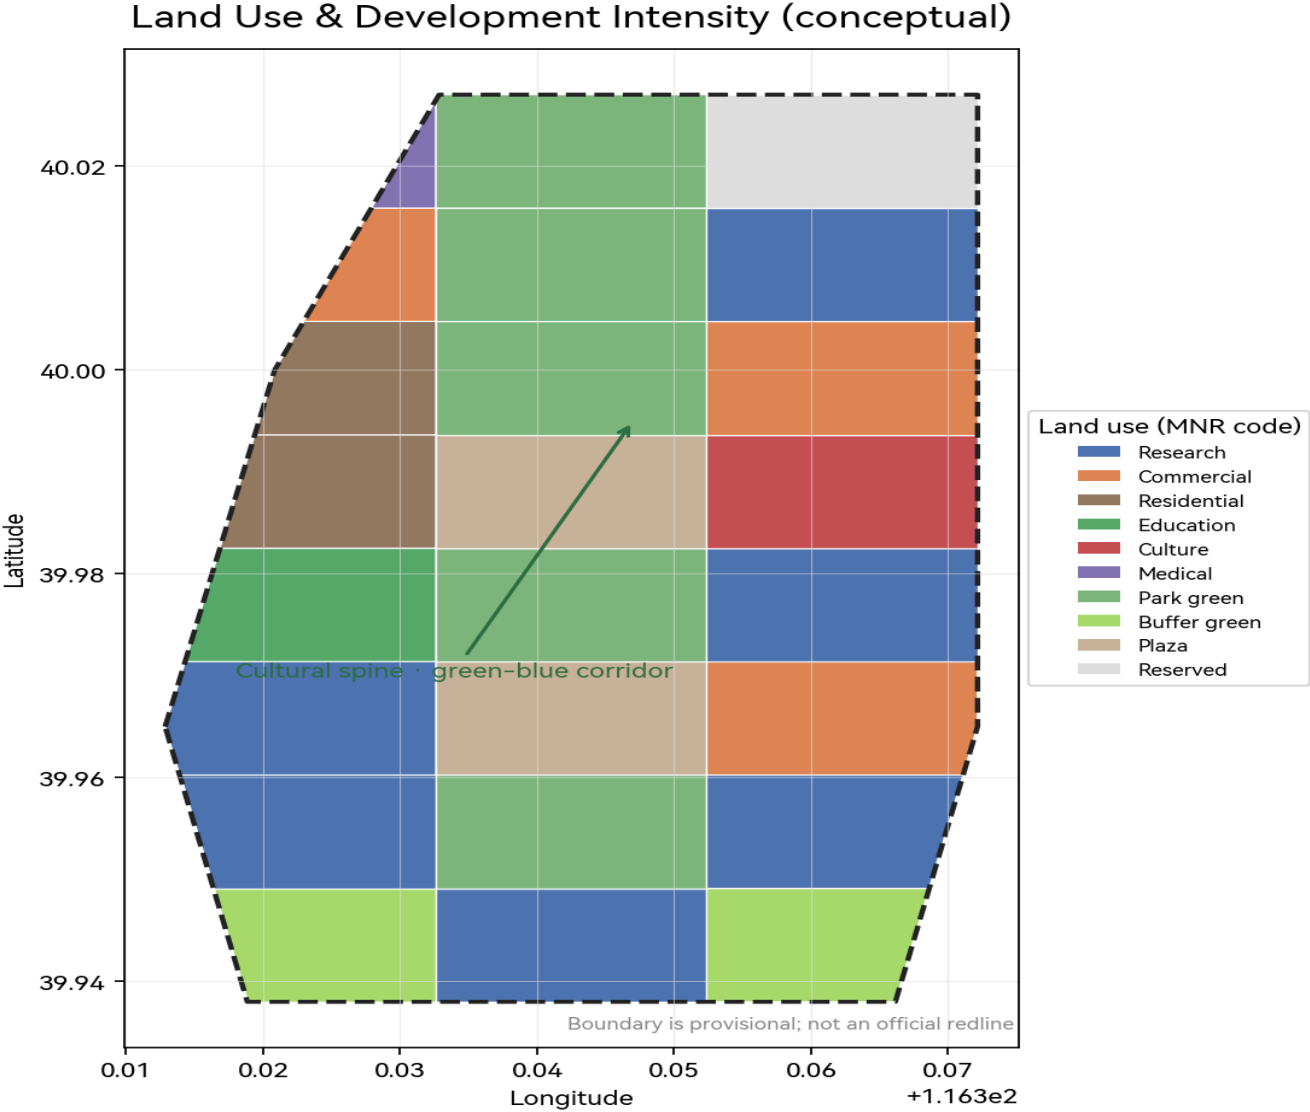

| Level       | Area                       | Task                | Geometry                 |
|-------------|----------------------------|---------------------|--------------------------|
| Research    | $\approx 43.6\text{ km}^2$ | Industrial strategy | site_boundary.geojson    |
| Core design | $\approx 11.4\text{ km}^2$ | Deep urban design   | land_use / buildings     |
| Key areas   | $\approx 368.4\text{ ha}$  | Detailed design     | key_areas / public_space |

2. Land-Use & Structure

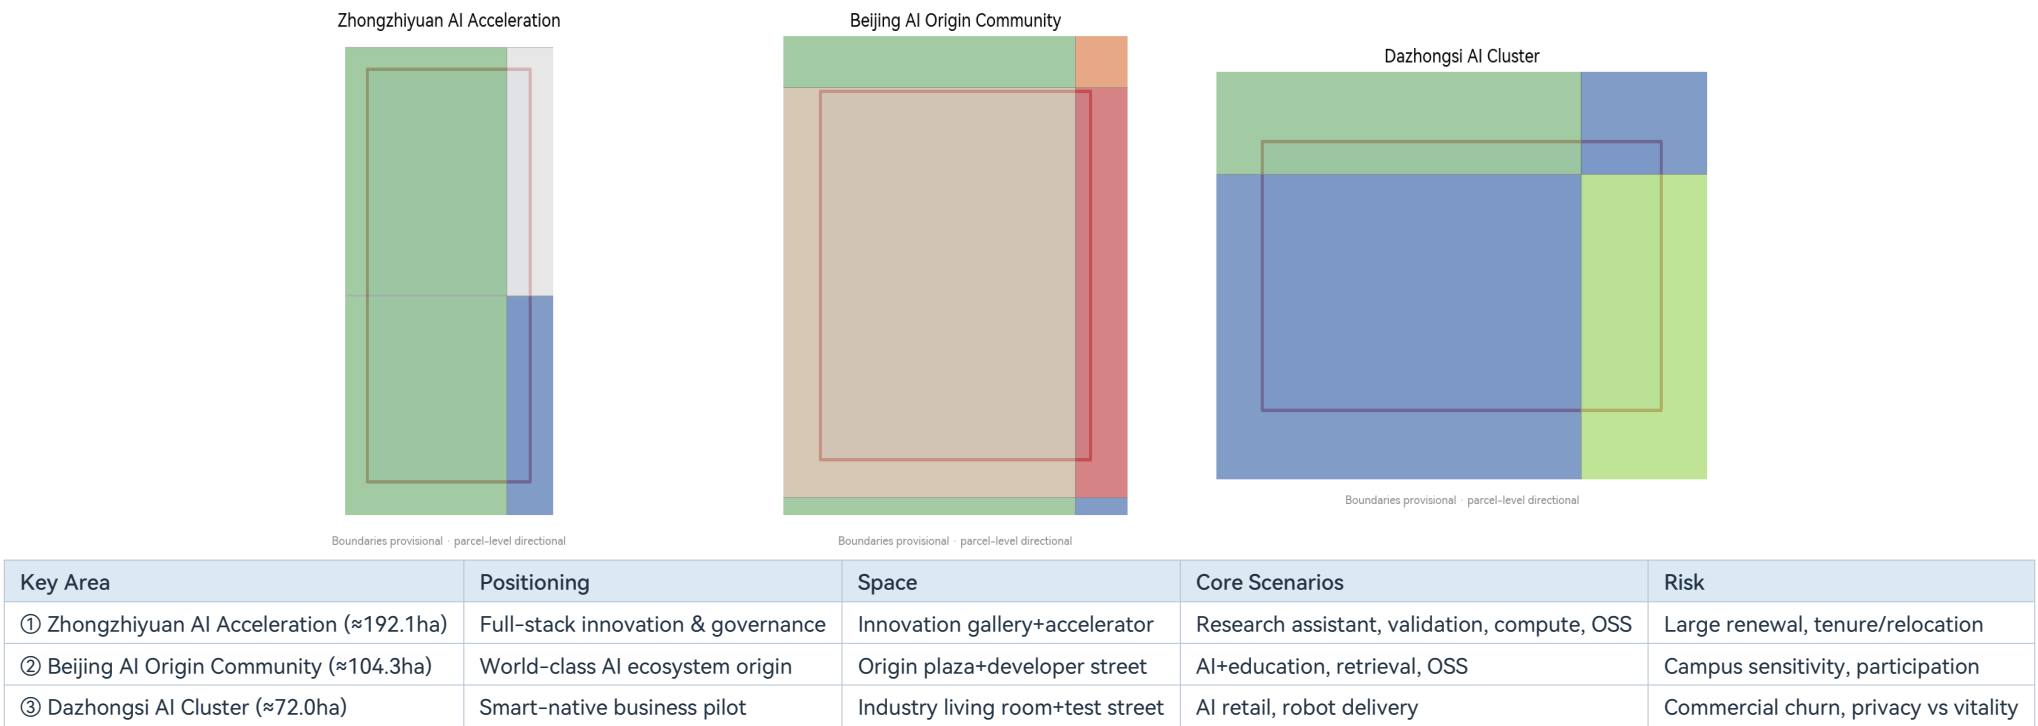

Using the Jing-Zhang Heritage Park active belt as cultural spine, with R&D;, office, commercial, residential and public services; indicative FAR  $\approx$ 1.34 at research scope.

3. Three Key Areas

≈368.4ha total; differentiated tasks of industrial agglomeration, ecosystem origin and smart-native business; each with risk & governance mechanism.

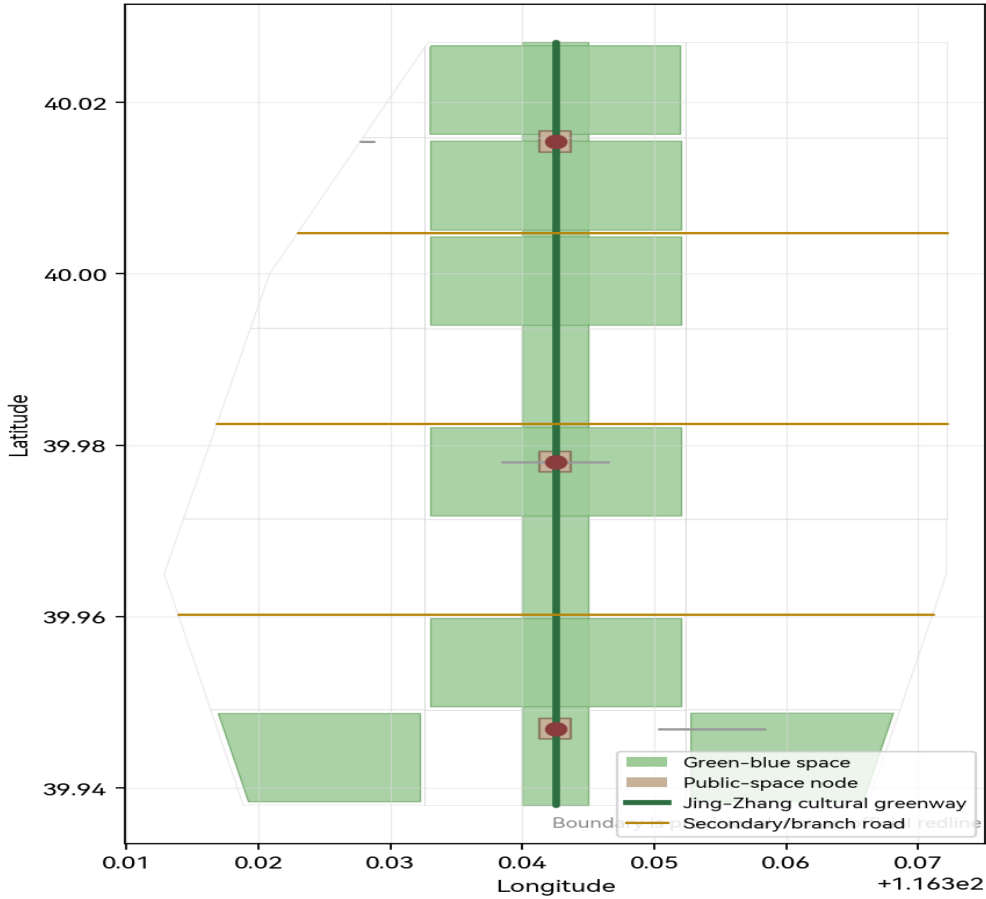

Three Key Areas — Detailed Design Index (Provisional)

4. Mobility, Slow-Transport & Blue-Green Public Space

Cultural greenway spine + north-south greenways + east-west secondary roads; heritage belt and Xiaoqing water network; plazas, developer streets and node parks.

5. Core Indicators (provisional recompute)

Recomputed from geometry/\* + metrics.json; concept values, must recompute after official data.

6. AI Scenario Cards (10, full in scenario\_cards.json)

Each with trigger, data fields, capability boundary, failure modes, human handover, KPIs, stop conditions; 3 are industrial validation.

| Scenario            | Users         | Deploy       | KPI    | Handover/stop  |

| 北京经济技术开发区（经开区） | AI+制造场景验证 / 智能硬件与产线需求 /  | 场景测试与中试协同 / 供应链与制造配套   |
| 京津冀区域          | 人才梯度流动 / 算力与数据中心布局互补 / 应 | 区域协同创新廊道衔接 / 公共服务均等化接口 |

8. Inclusivity · 9. VI · 10. Operations

Inclusivity: elderly/children/disabled/low-income/non-device/low-digital-literacy — accessibility, non-digital alternatives, relocation, participation, appeal. VI: 以'人字形展线+节点'为识别母题，将京张铁路人字形走向抽象为两个交汇节点，象征'人'与'智能体协同'连接; colors #2C6E3F 京张绿, #3A5A8C 智联蓝, #C7B198 铁路灰棕, #E8F0E4 基底白绿. Ops: government-guided+platform+multi-stakeholder; quarterly; proposal-compliance-pilot-monitor-review; KPIs & stop/exit.
