

THE GARDEN LINE

The Jing-Zhang Three Gardens Belt — Urban Design Concept Proposal

A0 Boards • Concept Design Drawings

Evidence Chain and Submission Package

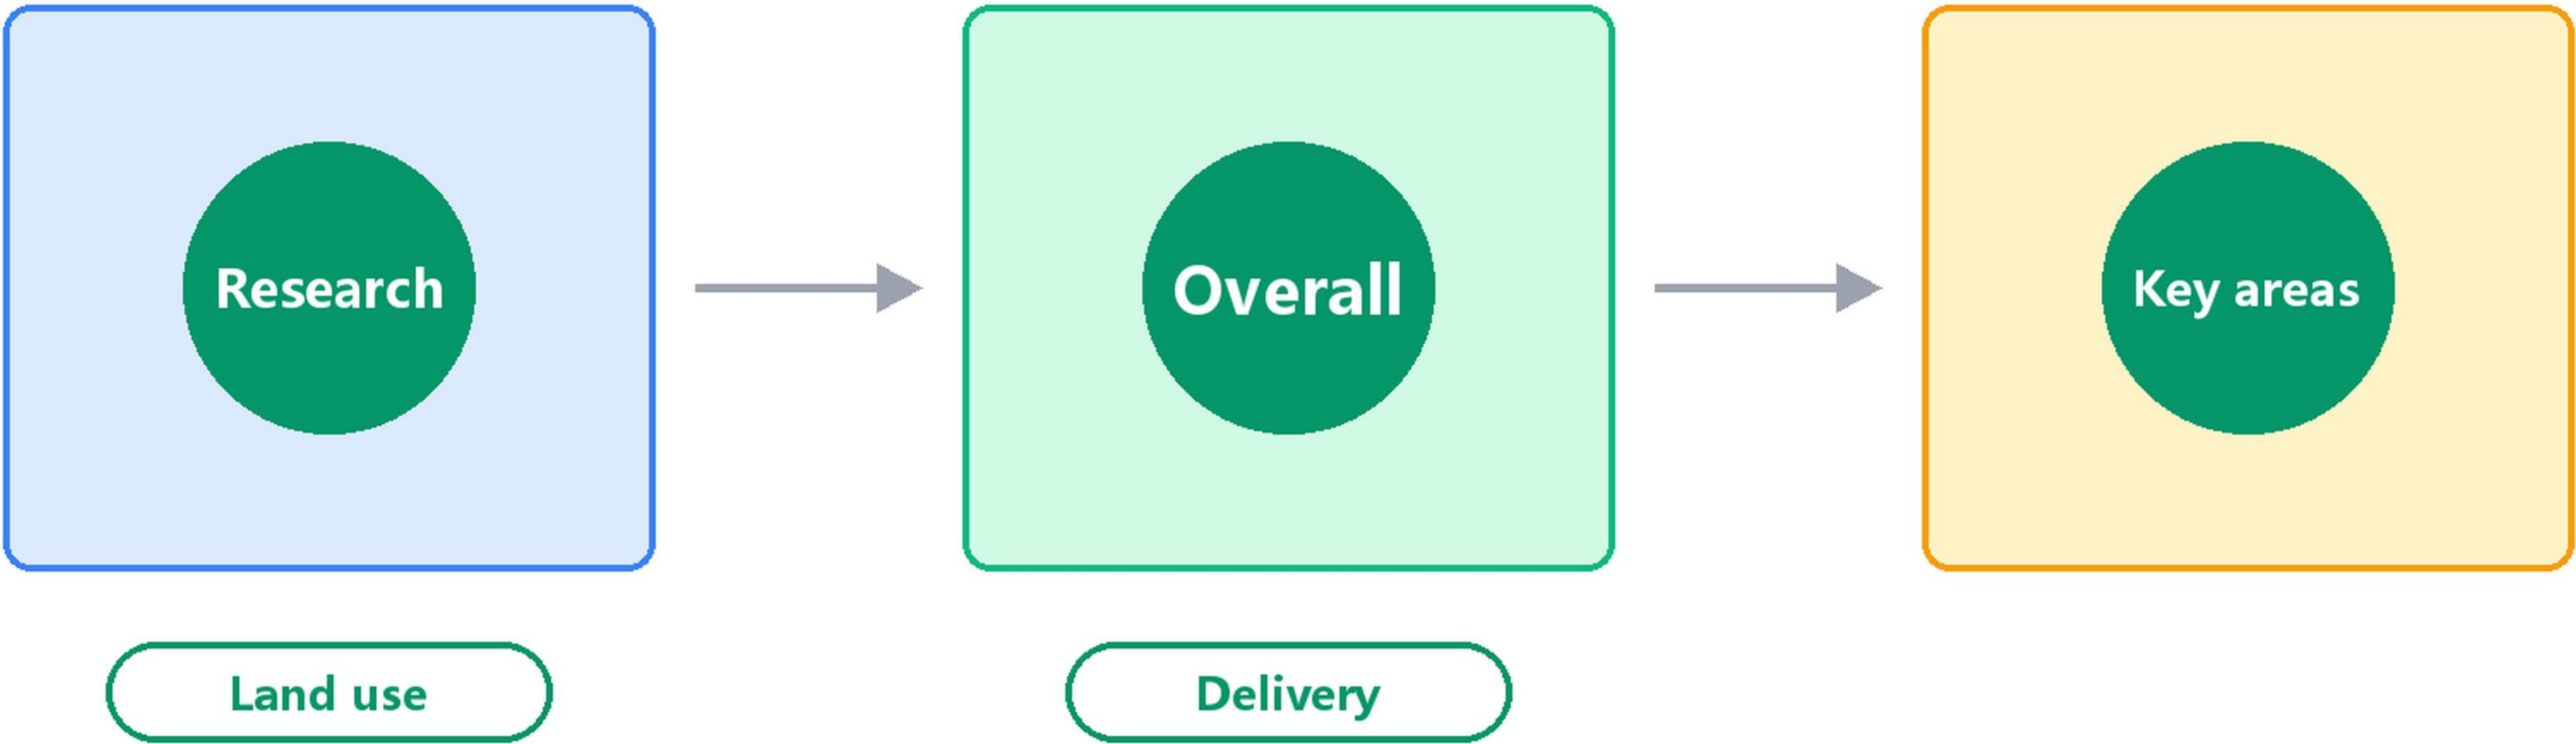

boundary = provisional intake; proposal.md is the primary document, JSON/GeoJSON are evidence layers

Derived from submission-package GeoJSON, metrics.json, matrices and self-check results; not a replacement for the official boundary or professional drawings.

Three-Tier Scope and Spatial Structure

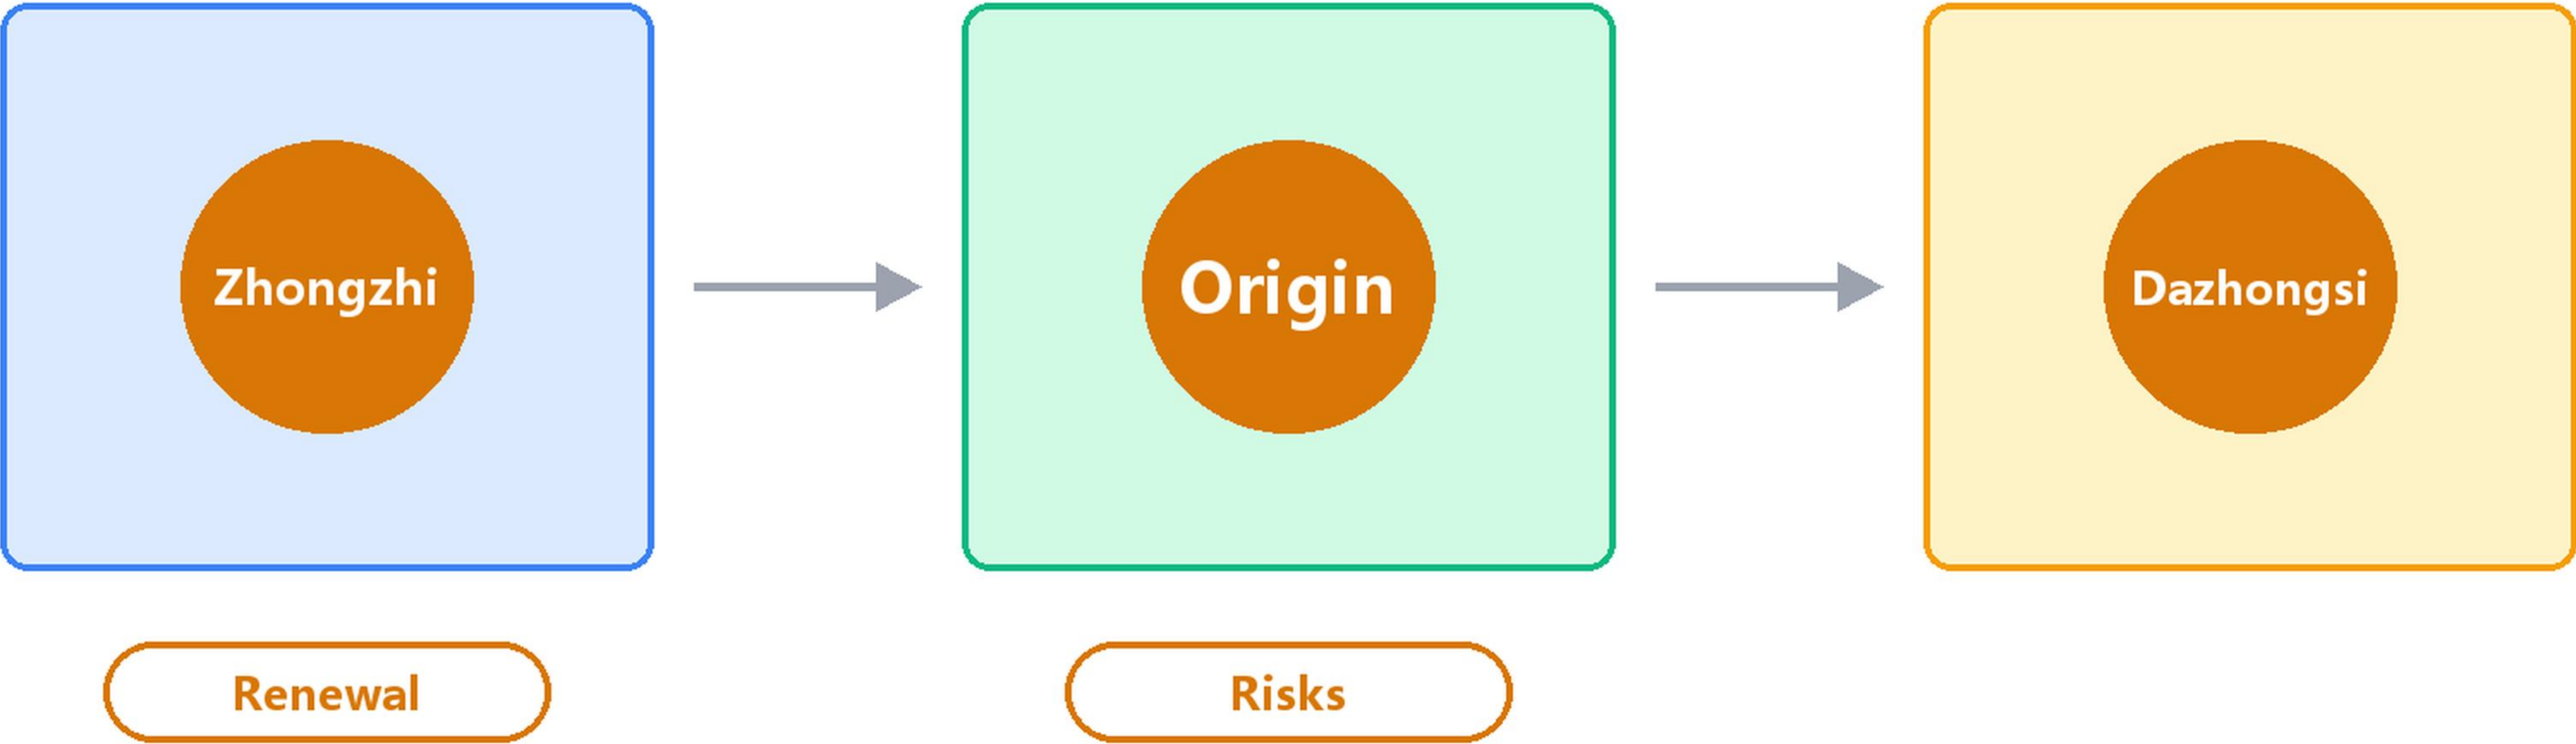

Overall research, overall design and key areas cascade into layers and metrics

Derived from submission-package GeoJSON, metrics.json, matrices and self-check results; not a replacement for the official boundary or professional drawings.

Index of Three Key Areas

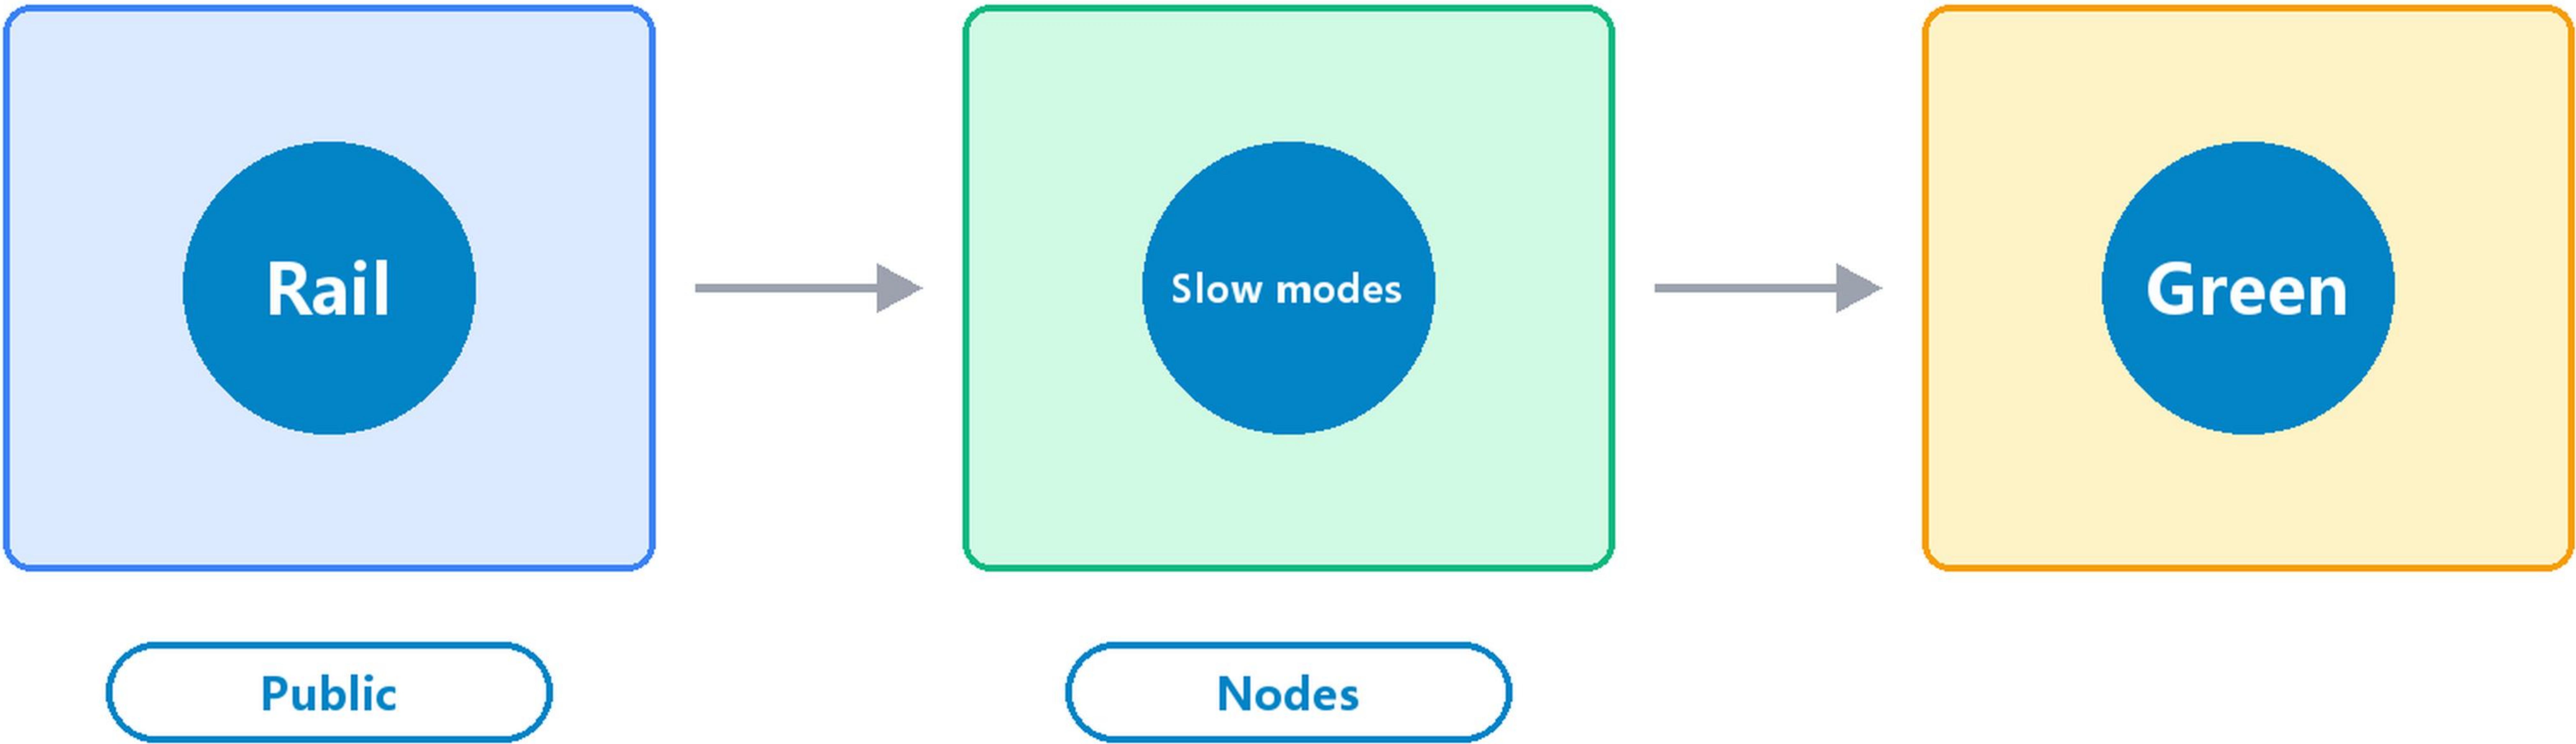

Zhongzhi Garden, AI Origin Community and Dazhongsi each require anchored positioning, renewal, mobility and public-space design

Derived from submission-package GeoJSON, metrics.json, matrices and self-check results; not a replacement for the official boundary or professional drawings.

Slow Mobility and Blue-Green Public Space

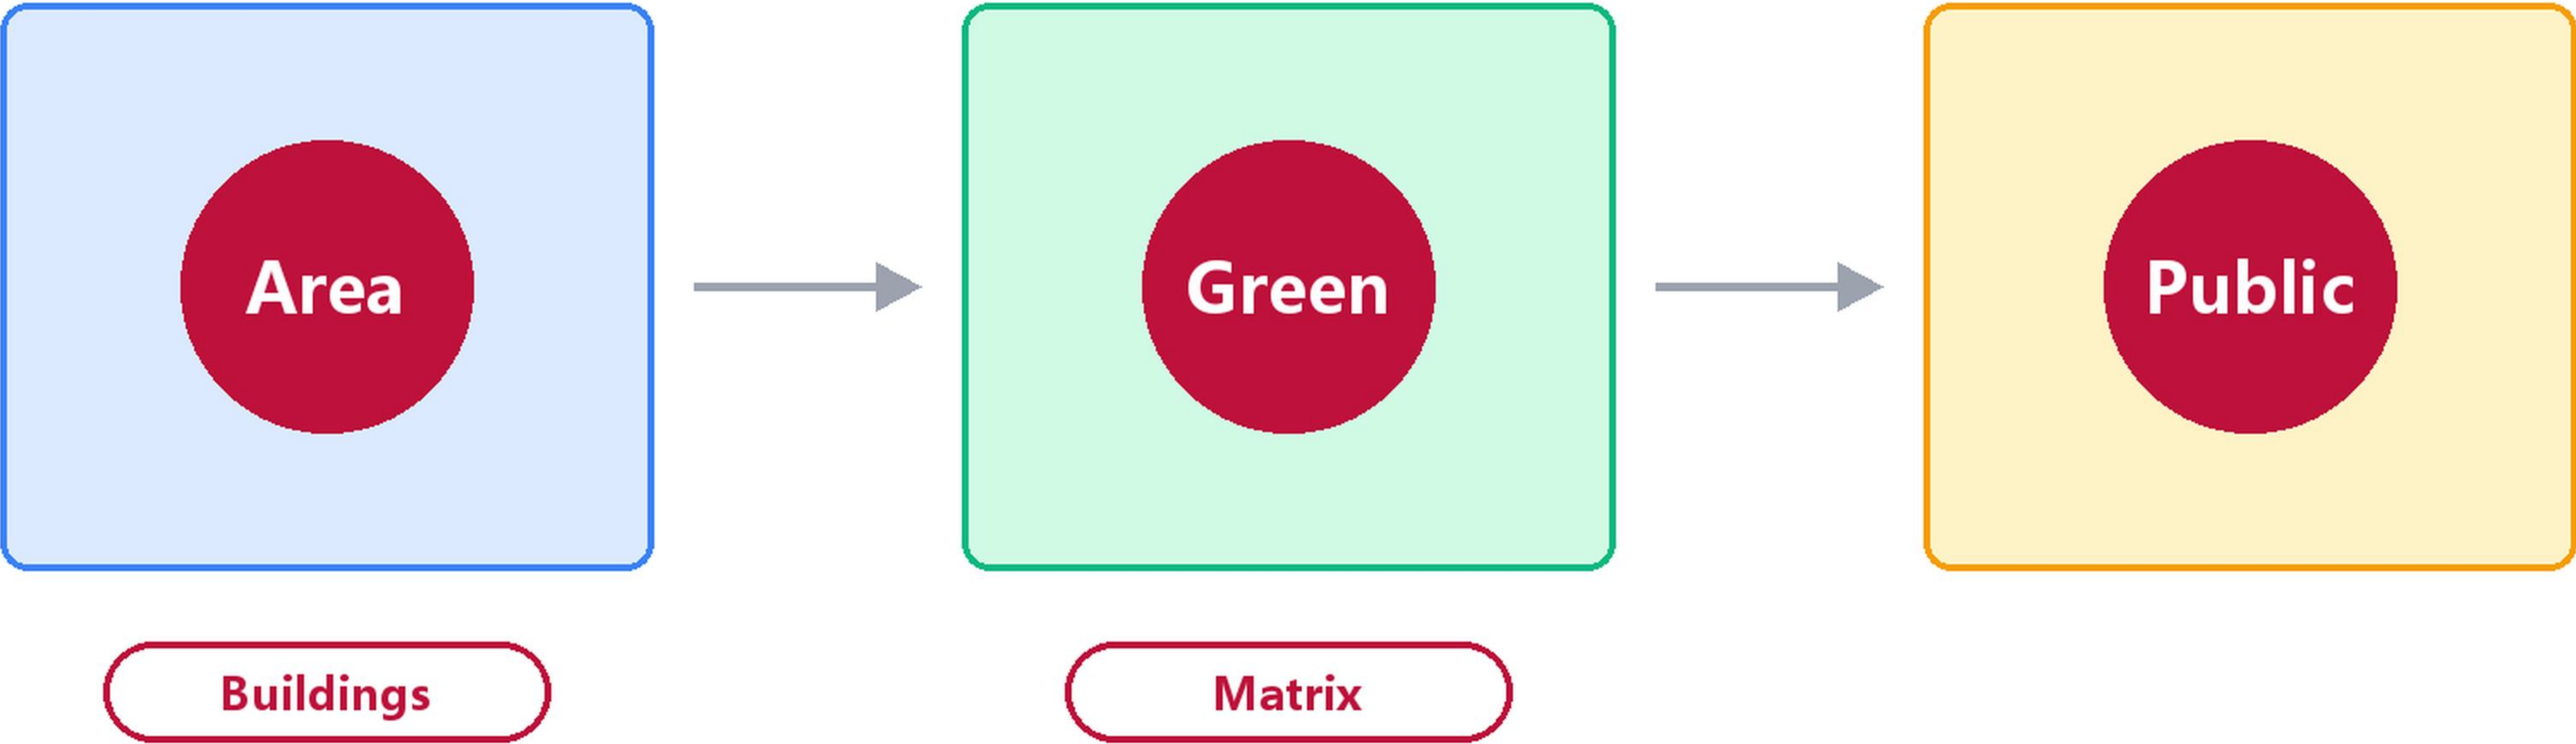

roads, green_space and public_space layers jointly support slow-mobility and public-space judgements

Derived from submission-package GeoJSON, metrics.json, matrices and self-check results; not a replacement for the official boundary or professional drawings.

Metric Recomputation and Evidence Chain

site_area=11,412,825.386; green_ratio=0.266321; public_space_ratio=0.152684 (EPSG:4326 to 4548, recomputed)

Derived from submission-package GeoJSON, metrics.json, matrices and self-check results; not a replacement for the official boundary or professional drawings.
