

01 Concept

Turn the railway gauge into an on-line protocol for AI: G0/G1/G2 zones, six gates, a n out-of-gauge depot. Trains renew; the gauge endures.

One spine, two belts, four districts, many gates. Spine = G0 datum; gates at station fo recourts; depot at Dazhongsi.

Twelve scenario cards (four industry tests); six personas from seniors to startups; no card without a gate; exit returns to the depot.

Three pausable packages; annual white paper on Gauge Day; failed recalibrations aut o-demote — a governance loop.
