

Century-old Jing-Zhang · Youth Co-creation · AI Enabled

Jing-Zhang Heritage Park AI Youth Co-creation Vitality Belt

Youth-Friendly Public Space & AI-Enabled Design Proposal

Jing-Zhang Youth Pulse Belt

Youth-Friendly Public Space Track

AI Cultural Guide Scenario

Region 43.6 km² · Overall 11.4 km² · Key Areas 368.4 ha (registered values; to be recalculated)

Booklet Contents

- 01 Overall Concept — Jing-Zhang Youth Pulse Belt · Three-in-One
- 02 Spatial Structure — One Belt / Three Cores / Multi Nodes + Blue-Green Youth Loop
- 03 Key Areas — Detailed Design of Three Cores
- 04 Blue-Green Space · Slow Mobility · Transit · Municipal Services
- 05 AI Scenario Cards · Youth Personas · Industrial Test Scenarios
- 06 Youth-Friendly Seven-Piece Kit · Pilgrimage Landmarks
- 07 Indicator System & Area Recalculation
- 08 Implementation Phasing · Annual Activities · Community Co-creation
- 09 Risk · Copyright · Compliance Notes

Track: Youth-Friendly Public Space · Beijing Haidian

Submitted by: MomentOfUs

A3 Design Booklet

Provisional boundary — not an official redline; to be recalculated with official data

01 · Overall Concept

For the Youth-Friendly Public Space track, reshape the century-old Jing-Zhang Heritage Park corridor into a public-space spine where young talent is willing to come, stays, and co-creates.

Three-in-One Core Idea

Third Space System

Density of cafes, plazas, trails and green space matters as much as industry density; low-threshold encounters for transit innovators and settling innovators

AI Invisible Infrastructure

AI is not a showcase device but invisible infrastructure that lowers participation barriers, raises spatial adaptability, and amplifies youth co-creation — every scenario explainable, reviewable, human-overridable

Community Co-creation Mechanism

Youth curator system + proposal feedback loop + public-space booking platform, turning youth from users into producers of spatial content

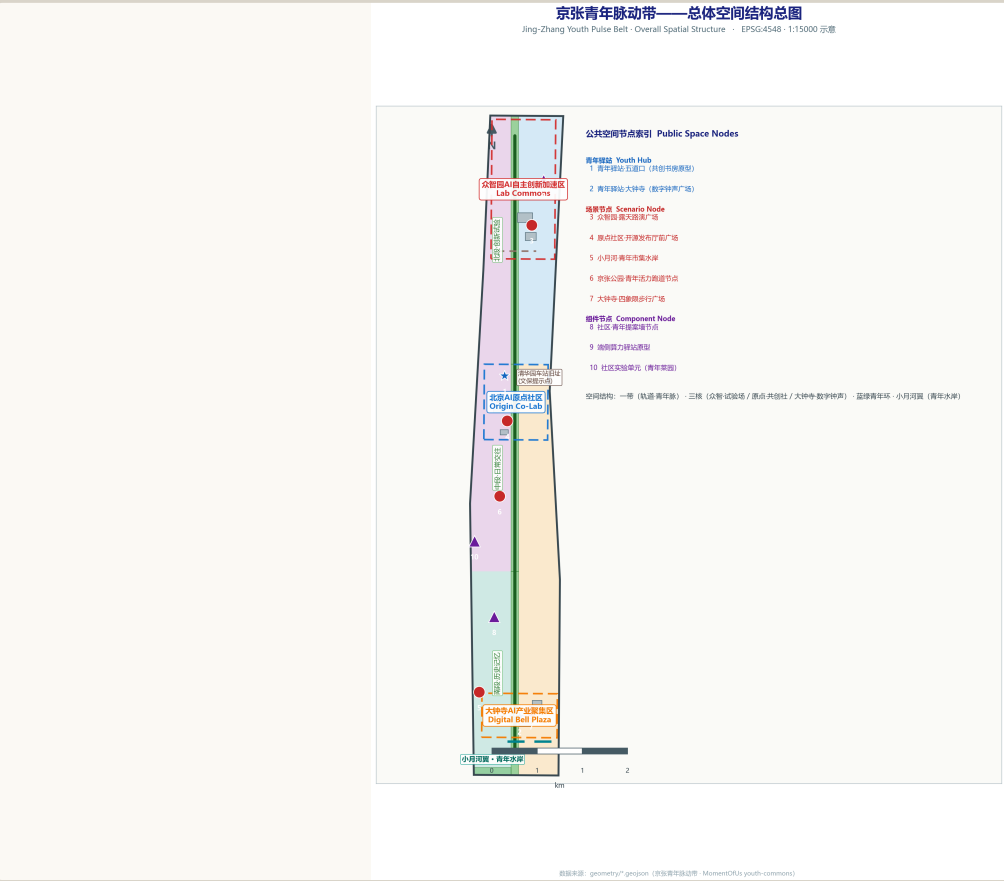

Fig.1 Site Overview & Submission Package

Three-Layer Cultural Narrative

- Jing-Zhang Railway: pioneering spirit of China's first self-built trunk railway
- Zhongguancun: from Electronics Street to the world's innovation frontier
- AI New Culture: open-source, co-creation, explainability — youth carry the baton

02 · Spatial Structure

The Belt is not a newly drawn redline but a working method translating the announcement's three scopes; the Cores are the three key areas; the Nodes are transit stations and community-level youth hubs; the Loop links slow mobility, green space, public space and night-time vitality.

Belt · Jing-Zhang Youth Pulse Belt

Segmented (conceptual, non-administrative): north 'Innovation Lab', middle 'Daily Encounter', south 'Historic Memory'

Three Cores · Key Areas

Zhongzhi Lab Commons / Origin Co-Lab / Digital Bell Plaza

Multi Nodes · Youth Hub Network

10 youth hubs along transit stations and communities: info, rest, rental, unattended services

Blue-Green Youth Loop

Jing-Zhang Park + Xiaoyue River Waterfront + Qinghe Interface + Campus Green Belt; four segments: park / waterfront / Qinghe / campus

Naming System

Belt name	Jing-Zhang Youth Pulse Belt	■■■■■■■■
Spatial spine	Youth Pulse Track	■■·■■■
Three cores	Lab Commons / Origin Co-Lab / Digital Be	■■·■■■ / ■■·■■■ / ■■■·■■■■
Loop	Youth Blue-Green Loop	■■■■■
Xiaoyue River wing	Youth Waterfront	■■■■
Community nodes	Youth Hub	■■■■

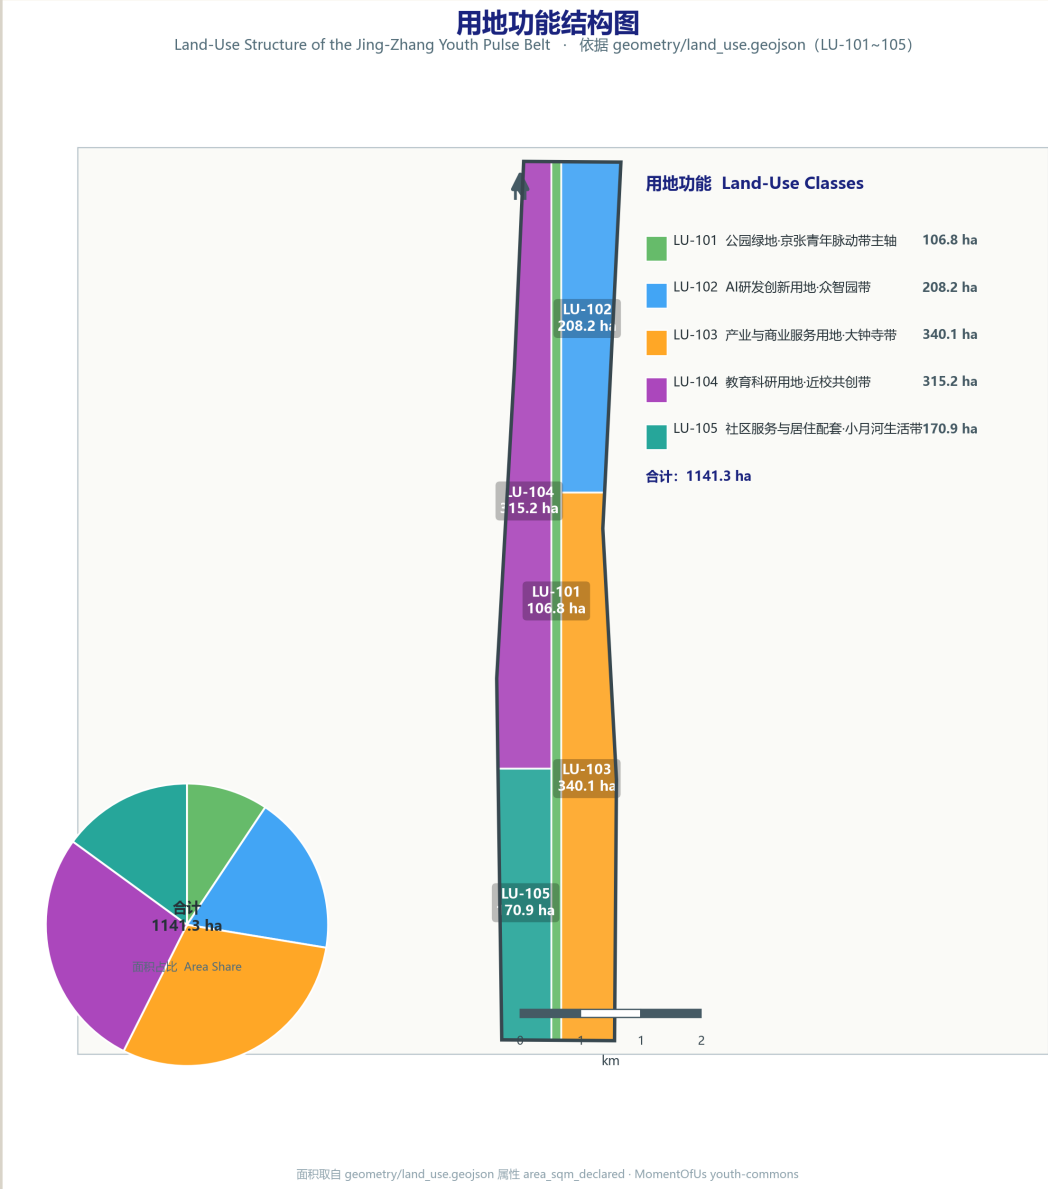

Fig.2 Three Scopes & Spatial Working Framework

03 · Key Areas — Detailed Design

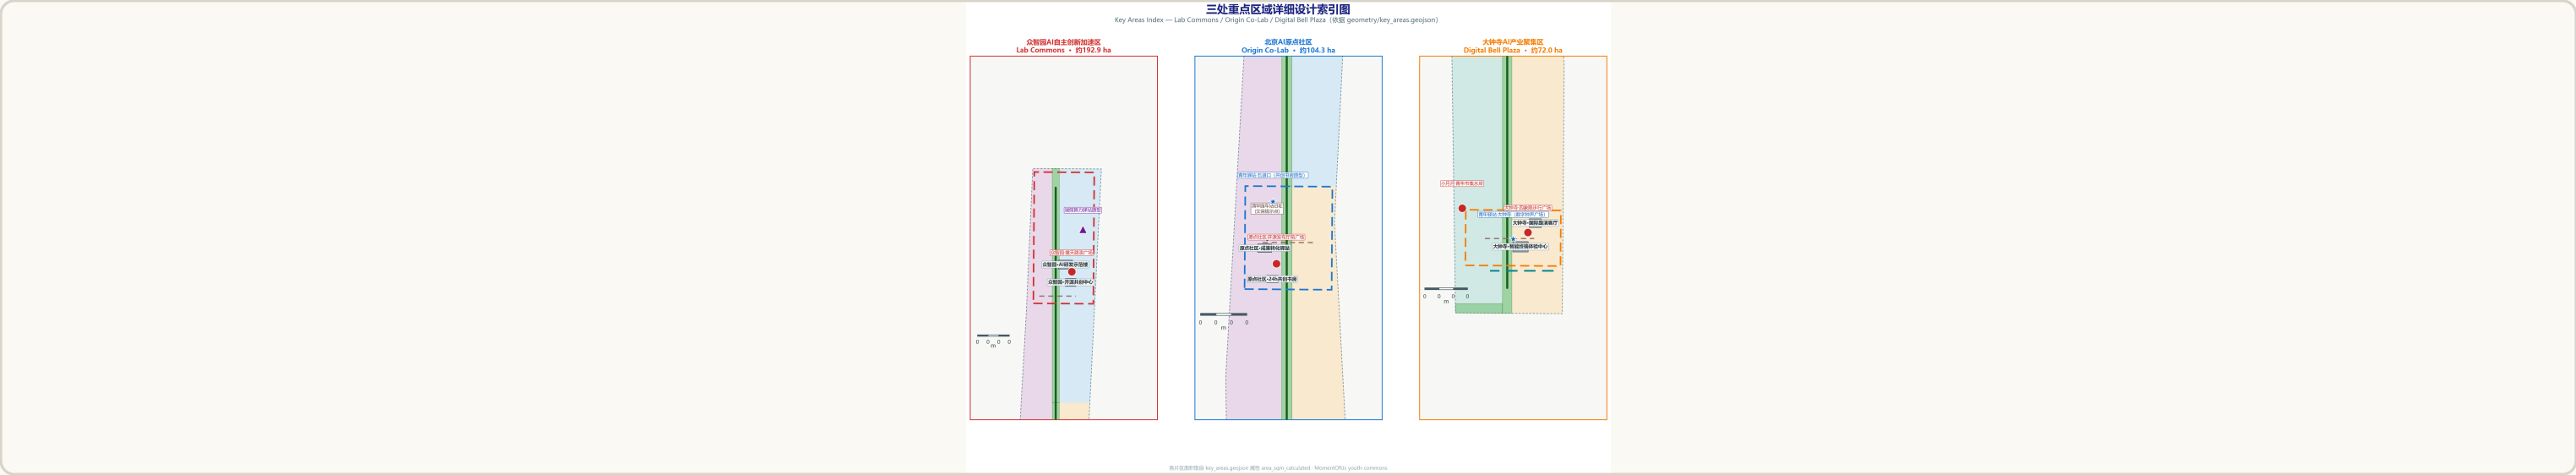

Fig.3 Three Key Areas Index & Design Tasks
Each area answers 'what / when / with whom' to implementation-plan depth, sharing a youth-friendly baseline: bookable public space, 24h hub, direct slow-mobility access, and explainable & human-overridable AI.

Zhongzhi Lab Commons

Zhongzhi Park AI Innovation Accelerator

Garden-style full-stack autonomous innovation block

- Open-source co-creation dome (code contribution wall + honors)
- Open-air pitch plaza (pitches / dev conference / hackathon)
- Safety governance sandbox (audit & red-team tests, visitable)
- Qinghe waterfront interface, low-carbon innovation exchange, external transit

Origin Co-Lab

Beijing AI Origin Community

Campus-adjacent outcome-transfer & talent community

- Campus co-creation street (stitching campus/park/block)
- 24h co-creation study (booking-based, anonymous)
- Outcome release hall (universities & open-source community)
- Transit integration & campus-park slow mobility

Digital Bell Plaza

Dazhongsi AI Industry Cluster

Urban smart-economy & international-exchange block

- Digital Bell Plaza (smart terminals + content consumption + festivals)
- Four-quadrant pedestrian connectivity (Dazhongsi Station)
- International pitch living room (showcase / talk / press)
- Station integration & static traffic

04 · Blue-Green Space · Slow Mobility · Transit

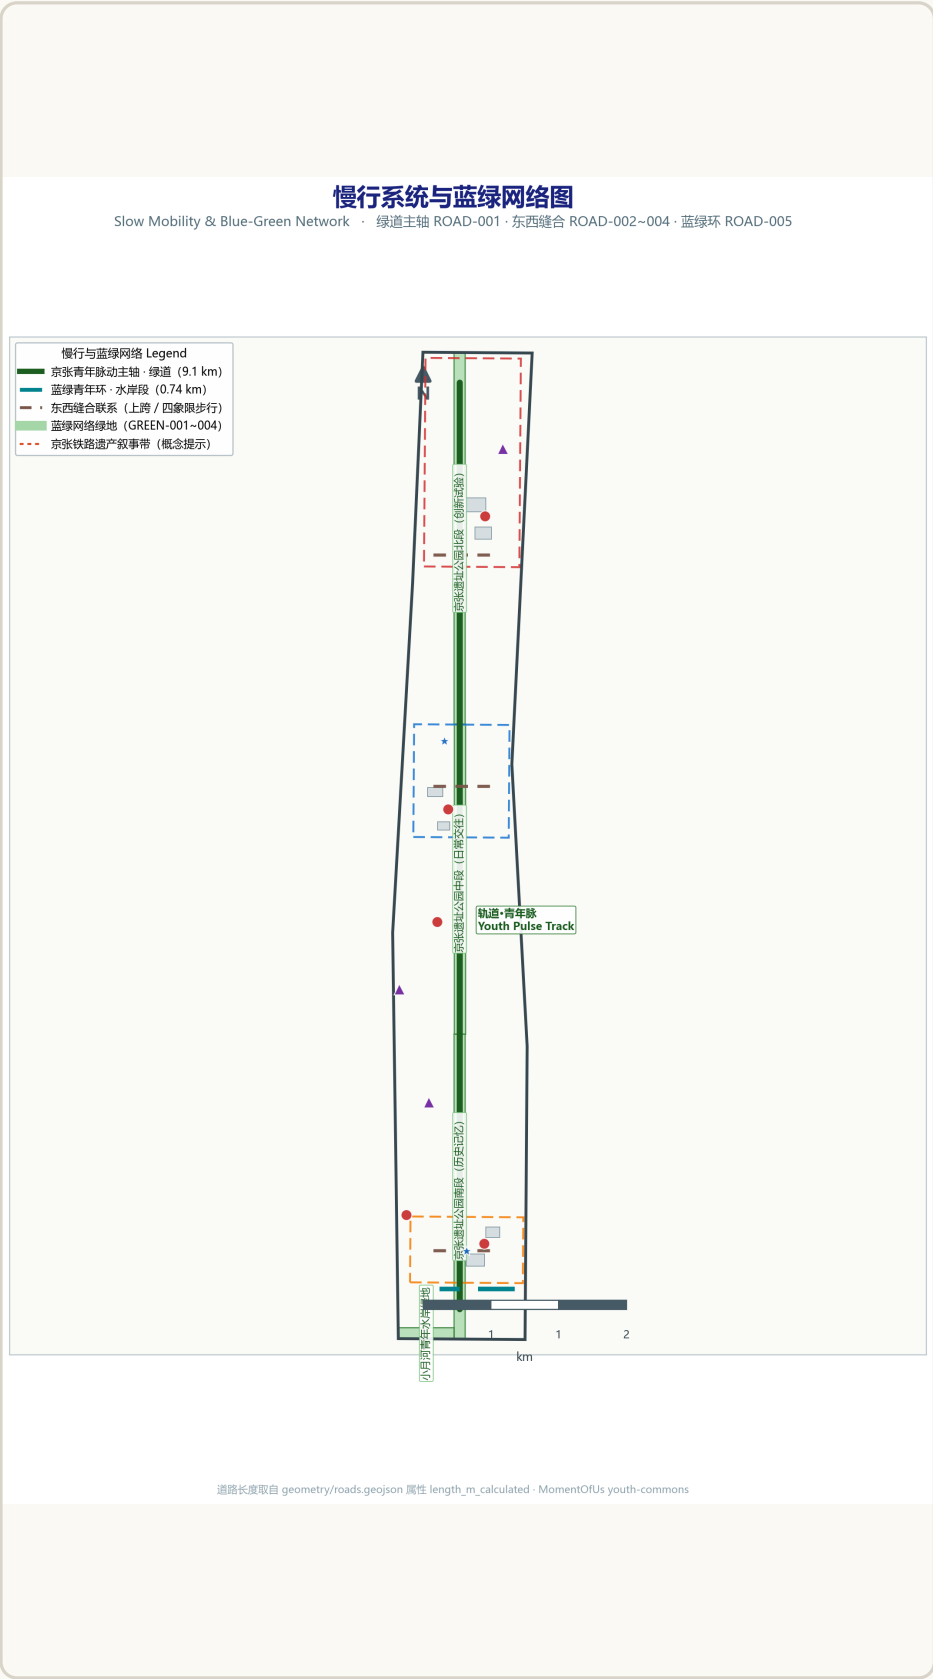

Fig.4 Transit, Slow Mobility & Blue-Green Public Space System

Blue-Green Youth Loop: a youth-friendly composite system linking north-south and east-west

Four Segments of the Blue-Green Youth Loop

Park Segment

Daily trails + night vitality runn

Waterfront Segment

Social & youth market venues

Event lighting

Three cores & event venues

Slow Mobility & Transit

- Park slow-greenway spine 9.1 km; road network 11.6 km
- Transit integration: Wudaokou (campus vitality gateway) / Dazhongsi (four-quadrant hub) / Qinghua East Rd W (park-campus interface)
- Slow-mobility gap stitching: grade-separated gaps (engineering), four-quadrant intersections, under-bridge activation, park-end hubs
- Youth hub network (10); parking: station-first, shared-first, small & dispersed

05 · AI Scenario Cards · Youth Personas

Cards are organized in three groups — innovation industry / public life / community co-creation — sharing privacy & review rules: explainability first, human override first, de-identification first; no personal behavior tracking, no unauthorized profiling.

3 Industrial Test & Validation Scenarios (concept/pilot, not government commitment)

Edge Compute Hub

New-infrastructure prototype; compute as public service; separate authorization for data & compute

Safety Governance Sandbox

Standards-setting, safety audit and red-team testing as visitable, bookable, supervised nodes

Low-speed Robot Delivery Pilot

Restricted park & internal routes; supervised and stoppable at any time

06 · Youth-Friendly Seven-Piece Kit · Landmarks

Modular · Replicable · Low-cost youth-friendly component kit

1 Youth Seat Cluster Movable, joinable social seats with power & shade	High Station areas, mid park belt
2 Co-creation Desk Outdoor work desk + whiteboard wall + low-threshold display	High Origin campus-adjacent inter
3 Mobile Display Modular racks for community exhibitions, project showcases, pop-ups	High Pop-ups, community exhibitio
4 Tiered Night Lighting Base / Active / Event lighting	High Night track, waterfront
5 Sports & Vitality Facilities Night-run signage, outdoor fitness, ball courts, low-disturbance siting	High North park belt, youth water
6 Unattended Service Station Info screen, charging, water, first aid, lost & found; edge-compute prototype	High Transit stations, park entra
7 Community Lab Unit Youth garden/experimental field, insect hotel, rain garden	High Community hub surroundings

3+1 Pilgrimage Landmarks

S1	Qinghuayuan Station · AI O Qinghuayuan Station site History meets future; origin of cultural narrative
S2	Open-source Co-creation Do Zhongzhi Park Carrier of code contribution wall & honors system
S3	Digital Bell Plaza Dazhongsi Smart-terminal & content consumption; international pitch living room
S4 Alt.	Wudaokou · Youth Energy St Wudaokou Campus-adjacent youth hub prototype; night vitality node

Visual Motif

Railway sleeper + heartbeat pulse: sleepers evoke Jing-Zhang railway history, the pulse curve evokes AI and youth vitality — extensible into a wayfinding symbol system (direction/culture/activity/accessibility, bilingual).

07 · Indicator System & Area Recalculation

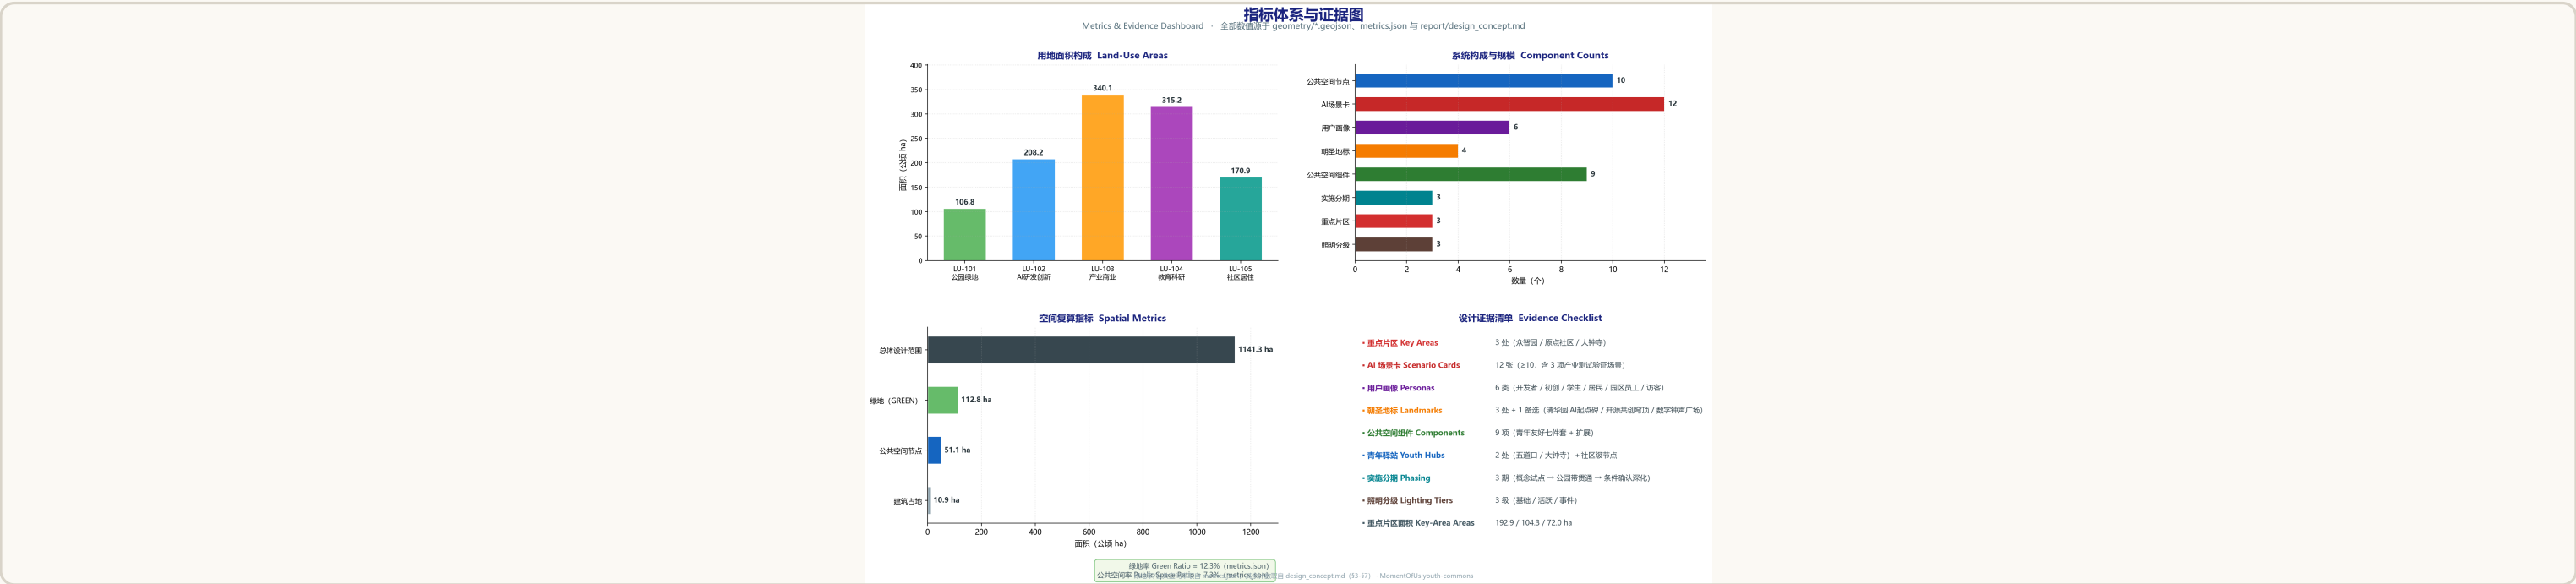

Fig.5 Core Metric Recalculation & Evidence Chain

site_area_sqm 11.4 km² ≈1141.3 ha · 11,412,825 m²	green_ratio 9.9% Green 1,128,201 m² / site	public_space_ratio 4.5% Public space 510,944 m² / site	road_length_m 11.6 km 11,586 m
slow_loop_length_m 9.1 km 9,100 m	key_area_count 3 Zhongzhi / Origin / Dazhongsi	landmark_count 3 + 1 S1–S3 + S4 alt.	scenario_card_count 12 ≥10 (taskbook)
persona_count 6 ≥5 (taskbook)	youth_hub_count 10 PUBLIC nodes	night_lighting_tier_count 3 Base/Active/Event	ai_test_scenario_count 3 ≥3 (taskbook)

Recalculation formulas (conceptual; inputs from submitted GeoJSON)

- green_ratio = green-space layer area ÷ site area
- public_space_ratio = public-space layer area ÷ site area
- slow_loop_length_m = sum of slow-mobility line lengths

08 · Implementation Phasing · Annual Activities · Community Co-creation

Distinct from the submission cycle: phasing is the urban renewal & construction path

Near term · Concept pilot

PHASE-001

· Light-weight facilities & operations first

· Seat clusters, lighting tiers, markets, co-creation study (low-dependency)

· Youth hub prototype launch

· JZ-05, JZ-07 & kit pilots

Mid term · Belt completion

PHASE-002

· Slow-mobility gap stitching & belt completion

· Youth waterfront & hub network expansion

· JZ-01, JZ-03, JZ-06 medium-dependency

· Kit scale-up

Long term · Major facilities

PHASE-003

· Deepening after regulatory/municipal/transit/ownership confirmation

· Digital Bell Plaza, open-source dome major projects

· JZ-02, JZ-04, JZ-08 high-dependency

· Landmark system & global AI activity route

Annual activity system (concept, not government commitment)

Developer Conference / Hackathon	Zhongzhi open-air pitch plaza	Annual
Open-source Open Day	Origin release hall	Quarterly
Youth Night-run Season	Jing-Zhang park belt	Spring+Summer
Youth Market	Xiaoyue River waterfront	Monthly/Festival
Digital Bell New Year / Festivals	Dazhongsi plaza	Annual

Community Co-creation Mechanism

Youth curator system

Curators per area: event booking, facility patrol, proposal collection
Renewal project list (8 items, JZ-01...08)■

Proposal feedback loop

Five steps: submit, de-identify, publish, review, reply — traceable, privacy-preserving
JZ-01 gap stitching · JZ-02 Qinghe interface · JZ-03 campus co-creation st

Booking platform

Public-space booking (human review); open calendars; organizer bears safety & copyright duty

09 · Risk · Copyright · Compliance

Boundary Statement (must read)

All geometry in these drawings is based on a provisional boundary — NOT an official redline, approval basis, or precise area basis. When official boundaries, key-area polygons and regulatory conditions are released, land use, buildings, roads, green space, and other indicators will be recalculated. Spatial structure, scenarios, projects and indicators are written to be discussable, reviewable, and recalculable after official boundary replacement; no regulatory values are fabricated and no

Boundary statement & four risk categories

Data risk Official boundary & basemaps missi Full recalculation after official polygons; all marked provisional	Compliance risk Copyright, clearance, privacy, her Clearance registry, de-identification, human review	Engineering risk Redlines, utilities, fire, flood u Marked pending official regulatory conditions	Operation risk Ownership, funding, actor, approva Logged in assumptions.json; no commitment
---	--	---	---

Copyright & Compliance

Basemaps, historical images, fonts and brand symbols are used with clearance status recorded in sources.json; original drawings, indicators and text are released under COMMUNITY-DISPLAY-ONLY license; commercial use requires separate authorization. This proposal claims no official approval, finalized regulatory plan, final land ownership, final construction scale, or implementation guarantee; AI-generated auxiliary content keeps explainable records and claims no human-expert final review.
