

JING-ZHANG LIVING AI BELT / SITE SYSTEM

One [unclear] es: heritage, blue-green mobility, auditable public services

三核 / three cores

蓝绿 / blue-green

移动 / mobility

N 开放 / **open testing**
AI service + public space

M AI 社区 / **neighborhood**
AI service + public space

S 产业 / **industry**
AI service + public space

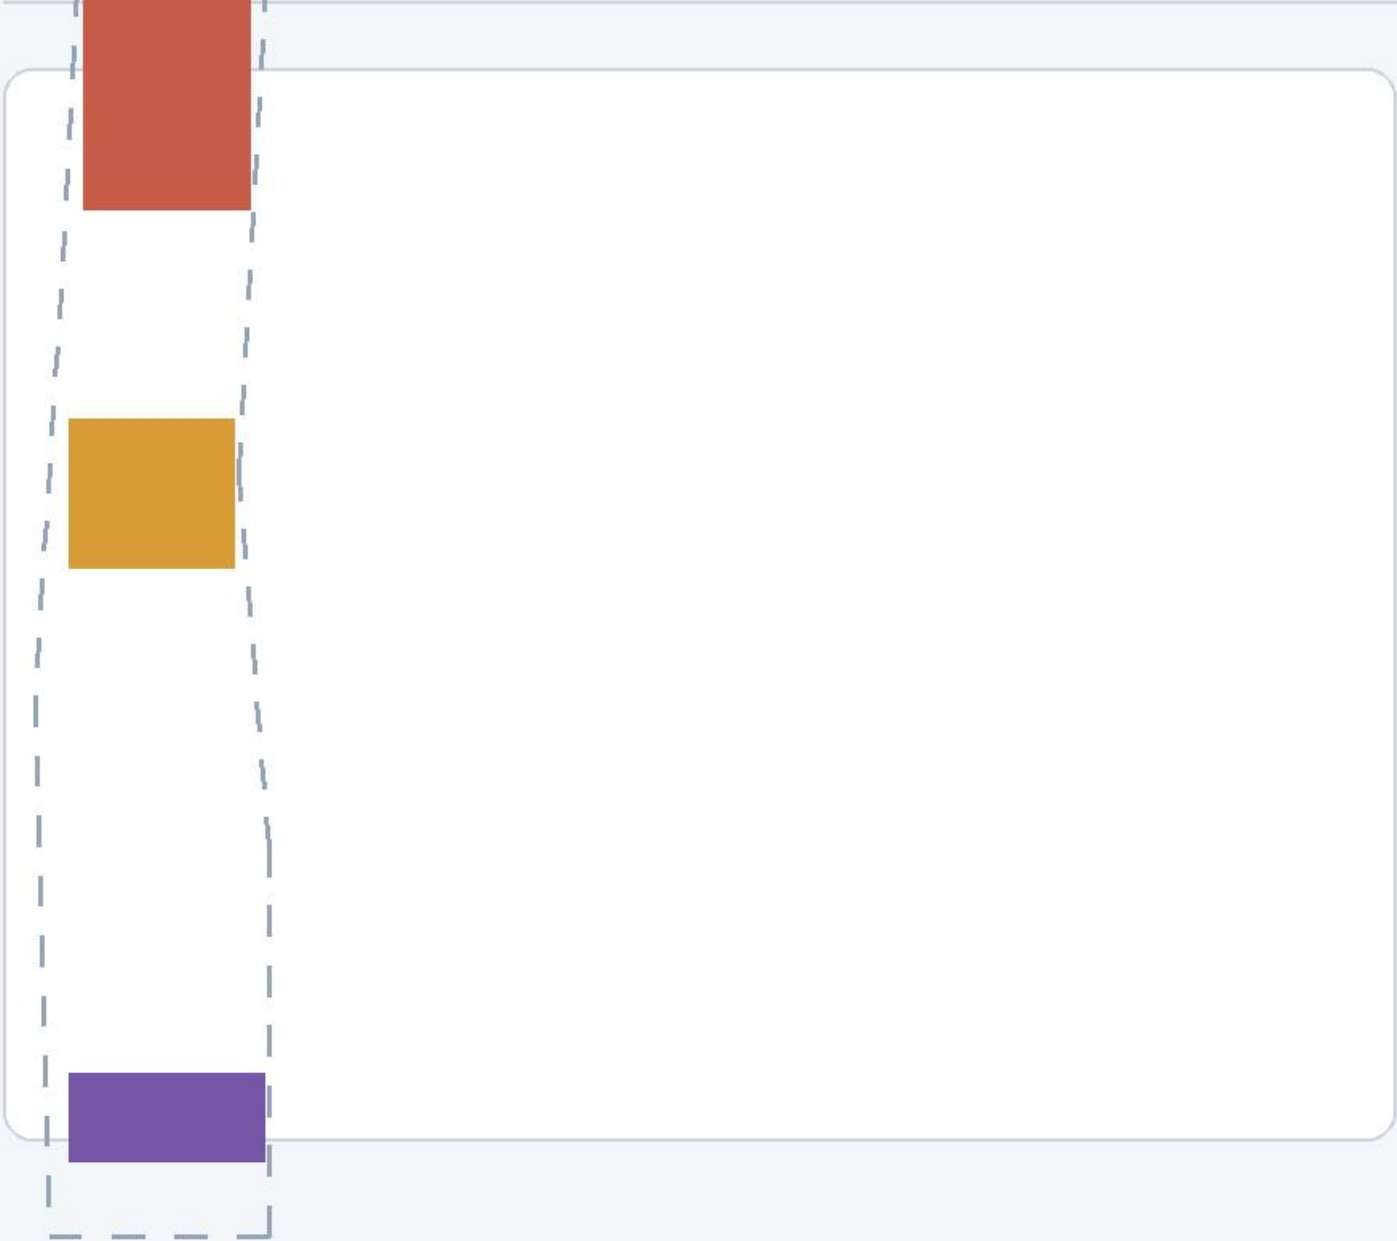

EVIDENCE CHAIN

boundary → **layers** → **metrics**

→ **figures** → **review**

THREE SCOPES / FOUR MIXED SYSTEMS

A spatial partition from industry strategy to node-level verification

Innovation + testing

mixed, walkable, adaptable

Daily life + service

mixed, walkable, adaptable

Culture + open space

mixed, walkable, adaptable

Blue-green + infrastructure

mixed, walkable, adaptable

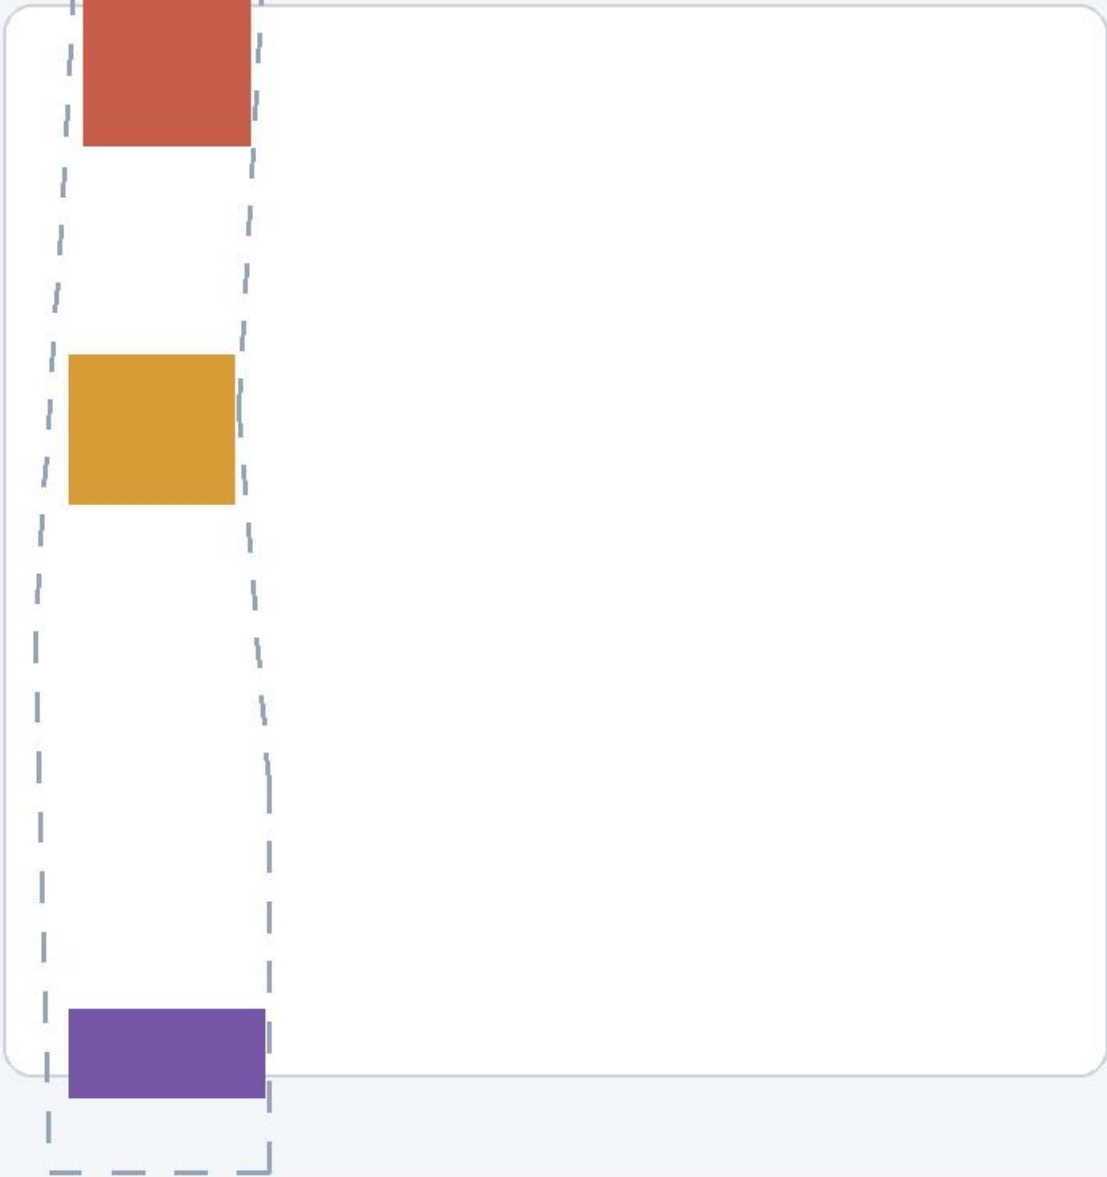

DESIGN RULE

public first / test first

retain → retrofit → transform

THREE CORE DETAILED DESIGN

Open neighborhood translation / verifiable industry

OPEN TEST

research + explainable AI
space + scenario + review

ORIGIN COMMONS

community + translation
space + scenario + review

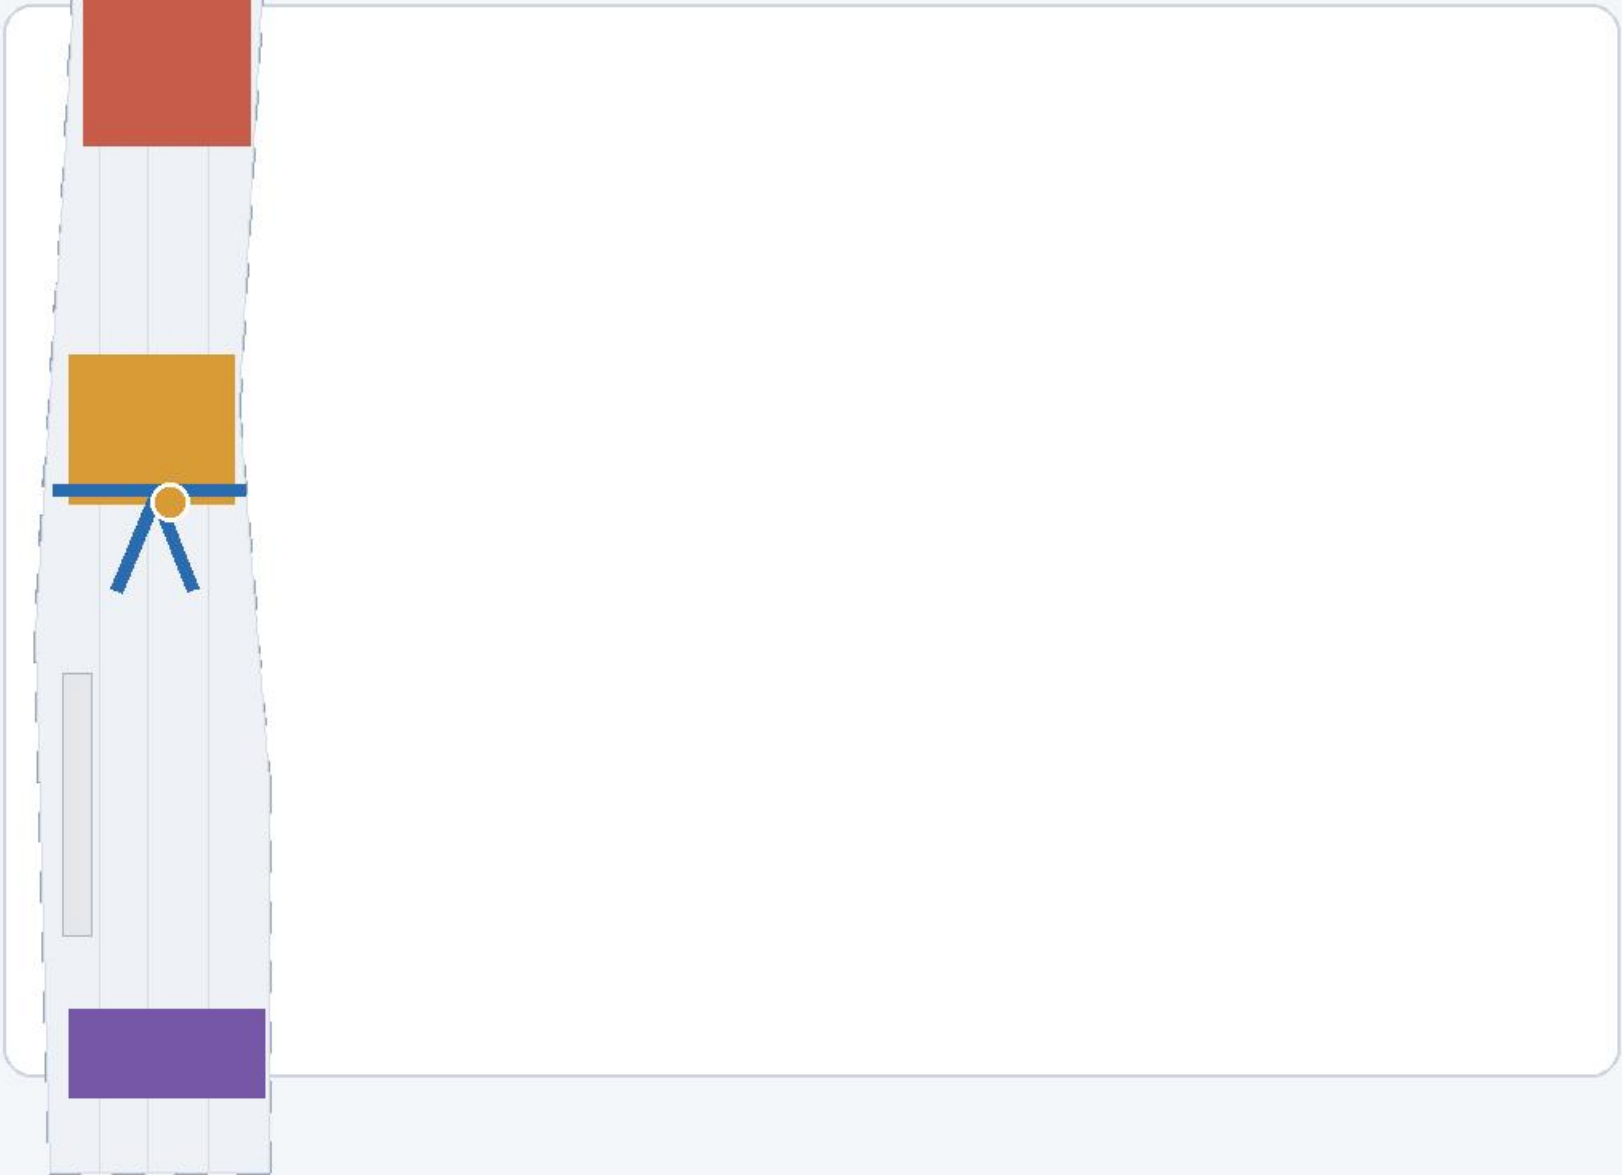

TEST STREET

enterprise + rail
space + scenario + review

SLOW MOBILITY / BLUE-GREEN / PUBLIC SERVICE

Rail t to neighborhood, neighborhood to park

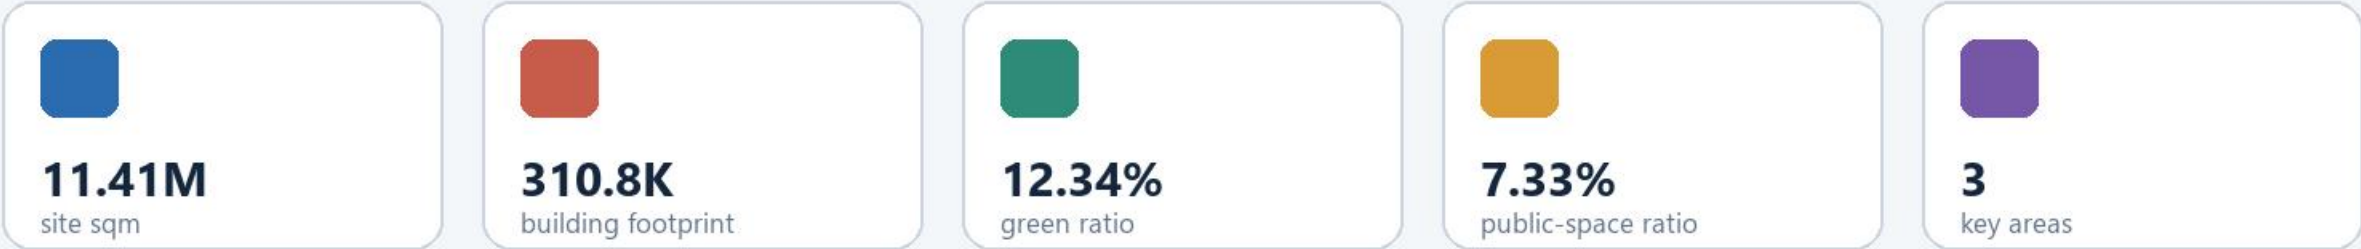

MOBILITY KIT

- continuous walking
- accessible shuttle
- short-stay stopping
- rain / shade / rest
- human fallback
- maintainable nodes

METRICS / EVIDENCE CHAIN

A reproducible path from geometry to readable design boards

FAR / height / density / setbacks remain pending official controls
