

三处重点区 | 从空间锚点到运营场景

THREE KEY AREAS | FROM SPATIAL ANCHORS TO OPERATING SCENARIOS

PROVISIONAL GEOMETRY • INTAKE / DESIGN DISCUSSION ONLY

- 01

Zhongzhiyuan AI Acceleration

full-stack innovation / safety / testing
- 02

Beijing AI Origin Community

near-campus transfer / talent / open source
- 03

Dazhongsi AI Industry Cluster

station life / enterprise / global exchange

Key-area polygons are provisional constraints and are not official redlines or precise scoring evidence.

用地结构 | 把产业策略落到空间

LAND-USE STRUCTURE | FROM INDUSTRY STRATEGY TO SPACE

PROVISIONAL GEOMETRY • INTAKE / DESIGN DISCUSSION ONLY

STRUCTURE

AI / innovation
anchors + service nodes

Green / public
continuous daily-life network

Mobility
rail + slow loop

Phase
reversible first moves

Land-use polygons are generated from the same submitted boundary; exact official controls remain pending.

指标与证据 | 同一数据源可复算

METRICS + AUDIT | ONE DATA SOURCE, RECOMPUTABLE

PROVISIONAL GEOMETRY • INTAKE / DESIGN DISCUSSION ONLY

All displayed values are read from metrics.json; provisional status is intentionally visible.

交通慢行与蓝绿 | 让AI进入日常移动

MOBILITY + BLUE-GREEN | BRINGING AI INTO EVERYDAY MOVEMENT

PROVISIONAL GEOMETRY • INTAKE / DESIGN DISCUSSION ONLY

NETWORK LOGIC

- Rail-station integration
- Heritage greenway
- Slow-link repair
- Public-space AI audits

Conceptual network for field verification; road redlines, rail conditions, and municipal capacities require official confirmation.

场地证据链 | 一带三核

SITE EVIDENCE CHAIN | ONE SPINE, THREE ANCHORS

PROVISIONAL GEOMETRY • INTAKE / DESIGN DISCUSSION ONLY

DESIGN MOVE

- Heritage park as public spine
- Three AI innovation anchors
- Slow mobility + blue-green loop
- Recomputable evidence package

KEY AREAS

- Zhongzhiyuan AI Acceleration
- Beijing AI Origin Community
- Dazhongsi AI Cluster

Source: site package provisional boundaries + participant-controlled design layers. Replace official polygons when supplied.

VISITOR EXPERIENCE SYSTEM: ARRIVE TO RETURN

Three route choices • Ten service nodes • No-App baseline

01 / ROUTE MAP

Conceptual route targets; distance, slope, facilities and operations require field review

Dashed line = provisional boundary · colored lines = visitor routes · numbered circles = service nodes

02 / VISITOR CHOICE

Choose by time, energy, and interest — not by app onboarding

First Visit: Railway Memory Loop

2.4 km • 120 min

first-time visitor / older visitor

Half Day: Three-Anchor Innovation Loop

5.2 km • 240 min

design student / technology visitor

Slow and Quiet: Accessible Experience Loop

1.6 km • 90 min

wheelchair user / visitor with fatigue

Paper map • physical signs • human takeover
Rain / heat / fatigue / lost child: switch route
