PHASE 0

Complete evidence; no engineering design without official polygons and controls.

PHASE 1

90-day no-build test; validate mediation, dual service, exit, and logs.

PHASE 2

Three reversible courts, only after specialist approvals.

PHASE 3

Conditional network; independent review decides expand, modify, or stop.

Evidence boundary: calculate what is knowable; keep the rest unknown

UNKNOWN

FAR, height, density, statutory green ratio, parking, demolition quantities, utility capacity, investment

Await official polygons, statutory documents, survey, and specialist studies; never agent-filled.

RISK CONTROLS

- Misaligned geometry
- Robot/public safety
- Privacy/over-sensing
- Token accessibility
- Children/vulnerable groups
- Vendor lock-in
- Orphan pilots
- Cultural error
